This project was financially supported by:

*University Medical Center Groningen, Graduate School of Medical Science*

This research forms part of the Project ICARUS of the research program of the BioMedical Materials institute, co-funded by the Dutch Ministry of Economic Affairs. The research described in this thesis was supported by a grant of the Dutch Heart Foundation (DHF-2009T076).

And

Financial support by the *Dutch Heart Foundation, University of Groningen, University Medical Center of Groningen, and Graduate School of Medical Science* for the publication of this thesis is gratefully acknowledged.

# **Cardiovascular Tissue Engineering and Regeneration based on Adipose Tissue- Derived Stem/Stromal Cells**

**PhD thesis**

to obtain the degree of PhD at the  
University of Groningen  
on the authority of the  
Rector Magnificus Prof. E. Sterken  
and in accordance with  
the decision by the College of Deans.

This thesis will be defended in public on  
Wednesday 15 June 2016 at 14.30 hours

by

**Mojtaba Parvizi**

born on 6 July 1982  
in Tabriz, Iran

**Supervisors**

Prof. M.C. Harmsen

Prof. M.J.A. van Luyn

**Assessment Committee**

Prof. J.L. Hillebrands

Prof. D. Grijpma

Prof. J. Krieger

*Dedicated to my parents,  
My wonderfull wife  
and son  
with great affection and love*

**Paranimfen**

Joris Anton van Dongen

# CONTENTS

<b>Chapter 1.</b>	General Introduction	9
<b>Chapter 2.</b>	Development of Recombinant Collagen-Peptide-Based Vehicles for Delivery of Adipose-derived Stromal Cells (ADSC)	19
<b>Chapter 3.</b>	Differential Mechanisms of Myocardial Conduction Slowing by Adipose Tissue-Derived Stromal Cells Derived from Different Species	47
<b>Chapter 4.</b>	Recombinant Collagen-like Peptide Biomaterial Mitigates Adverse Paracrine Effects of Adipose Tissue-derived Stromal Cells on Myocardial Conduction in Monolayers of Cardiomyocytes	69
<b>Chapter 5.</b>	Recombinant Collagen-based Microspheres for Soft Tissue Repair	91
<b>Chapter 6.</b>	Efficient Generation of Smooth Muscle Cells from Adipose-derived Stromal Cells by 3D Mechanical Stimulation can Substitute the Use of Growth Factors in Vascular Tissue Engineering	111
<b>Chapter 7.</b>	Therapeutic Prospect of Adipose-Derived Stromal Cells for Treatment of Abdominal Aortic Aneurysm	133
<b>Chapter 8.</b>	Perivascular Scaffolds Loaded with Adipose Tissue-Derived Stromal Cells Attenuate Progression of Abdominal Aortic Aneurysm in Rats	157
<b>Chapter 9.</b>	Summary and General Discussion	179
<b>Chapter 10.</b>	Future Perspective	187
<b>Chapter 11.</b>	Nederlandse Samenvatting	191
<b>Appendix.</b>	Acknowledgment	198
	Curriculum Vitae	201
