Synthetic strategies for modifying dielectric properties and the electron mobility of fullerene derivatives

Fatemeh Jahani Bahnamiri

This project was carried out in the research group of Chemistry of (Bio)Molecular Materials and Devices part of the Stratingh Institute for Chemistry and Zernike Institute for Advanced Materials, University of Groningen, The Netherlands. This work is part of the Joint Solar Program (JSP) of Hyet Solar and the Stichting voor Fundamenteel Onderzoek der Materie FOM, which is part of the Netherlands Organization for Scientific Research (NWO)

Synthetic Strategies for Modifying Dielectric Properties and the Electron Mobility of Fullerene Derivatives

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Thursday 30 June 2016 at 09.00 hours

by

Fatemeh Jahani Bahnamiri

born on 31 May 1983

in Babol, Iran

Supervisors

Prof. dr. J. C. Hummelen

Assessment committee

Prof. dr. M. A. Loi

Prof. dr. A. J. Minnaard

Prof. dr. R. P. Sijbesma

To my lovely family
and
loveliest Dadi

Contents

1	Introduction	1
1.1	Motivation	1
1.2	Organic semiconducting materials	2
1.3	Organic solar cells	2
1.3.1	Working principals of BHJ organic solar cells	3
1.3.2	Inorganic solar cells	5
1.3.3	Charge separation mechanism; organic versus inorganic solar cells	6
1.4	Effect of dielectric constant on efficiency of organic solar cell	7
1.5	Determining factors affecting the dielectric constant	9
1.5.1	Polarization mechanisms	9
1.5.2	The relation between dielectric constant and polarization	12
1.5.3	Dielectric loss	12
1.6	High dielectric constant materials	13
1.6.1	High dielectric materials for general organic electronics	13
1.6.2	High dielectric organic materials for photovoltaic applications	16

1.7	Electron mobility	20
1.8	Fullerenes	21
1.8.1	Fullerenes in organic electronics	22
1.9	Outline	23
2	Influence of Installing Permanent Dipole Groups on Dielectric Constant of Fullerene Derivatives	33
2.1	Introduction	34
2.2	Synthesis	36
2.3	Characterization	38
2.3.1	UV-vis absorption measurements	38
2.3.2	Cyclic voltammetry measurements	39
2.4	Results and Discussions	40
2.4.1	Isotropic polarizabilities and dipole moment	40
2.4.2	Dielectric constant of fullerene derivatives with push-pull side groups	41
2.4.3	Comparison With theory	43
2.5	Conclusions	44
2.6	Experimental	44
2.6.1	General	44
2.6.2	Dielectric constant measurement	48
2.6.3	Electron mobility measurements based on space-charge limited current	48
2.6.4	Device fabrication	49
2.6.5	Device characterization	49
3	Increasing the Dielectric Constant of Fullerene Derivatives by TEG Side-chains	53
3.1	Introduction	54
3.1.1	Research goals	55
3.2	DFT calculations	55
3.3	Synthesis	57
3.4	Characterization	57
3.4.1	UV-vis absorption measurement	57
3.4.2	Cyclic voltammetry measurement	58
3.5	Solubility of fullerene derivatives with TEG side chains	60

Contents

3.6	Dielectric constant of fulleropyrrolidines with TEG side chains	61
3.7	Charge carrier mobility of fulleropyrrolidine with TEG side chains	62
3.8	Conclusions	64
3.9	Experimental	65
3.9.1	Synthesis	65
3.9.2	Device fabrication	68
3.9.3	Device characterization	69
4	Designing High Dielectric Constant Fullerene Derivatives; Alternative Strategies	73
4.1	Introduction	74
4.2	The effect of ethylene glycol chain lengths	74
4.2.1	Increasing polarity of the chains	78
4.3	Installing high- ϵ side chains	81
4.4	Incorporation of highly polarizable atoms	84
4.5	Experimental section	86
4.5.1	Synthesis	87
5	An effect of Acetylene Moieties on the Charge Carrier Mobility of Fullerene Derivatives?	103
5.1	Introduction	104
5.1.1	Charge transport in organic semiconductors	104
5.1.2	Research goals	106
5.2	Synthesis	107
5.3	Characterization	107
5.4	Mobility measurements	109
5.5	TEM measurements	110
5.5.1	The effect of electrodes on the mobility measurements	111
5.6	Conclusions	114
5.7	Experimental	114
5.7.1	Device fabrication	115
5.7.2	Device characterization	115
5.7.3	Synthesis	115
