Contents

Chapter 1	General introduction and scope of this thesis	9
Chapter 2	Platelet doubling after the first azacitidine cycle is a promising predictor for response in MDS, CMML and AML patients in the Dutch azacitidine compassionate patient named program <i>British Journal of Haematology 2011; 155: 599-606</i>	33
Chapter 3	Azacitidine results in comparable outcome in newly diagnosed AML patients with more or less than 30% bone marrow blasts <i>Leukemia research 2013; 37: 877-882</i>	49
Chapter 4	Azacitidine might be beneficial in a subgroup of older AML patients compared to intensive chemotherapy: a single center retrospective study of 227 consecutive patients <i>Journal of Hematology & Oncology 2013; 6: 29</i>	63
Chapter 5A	Long-term outcome in older AML patients treated with hypomethylating agents compared to conventional chemotherapy	83
Chapter 5B	Overexpression of TP53 is associated with poor survival, but not with reduced response to hypomethylating agents in older patients with acute myeloid leukemia. <i>British Journal of Haematology, in press</i>	91
Chapter 6	Effective targeting of primitive AML CD34+ cells by the second-generation proteasome inhibitor carfilzomib <i>British Journal of Haematology 2015; 171: 652-655</i>	99
Chapter 7	Summary, discussion and future perspectives	121
Chapter 8	Nederlandse samenvatting	145
Appendix	List of abbreviations	151
	Dankwoord/Acknowledgements	155
	List of publications and Curriculum vitae	161
