Interactions of *Burkholderia terrae* with soil fungi

The research presented in this thesis was carried out in the Microbial Ecology cluster of the Genomics Research in Ecology and Evolution in Nature (GREEN) research group, Groningen Institute for Evolutionary Life Sciences (GELIFES), University of Groningen (The Netherlands).

Irshad Ul Haq received a European Commission Marie Skłodowska-Curie fellowship under the umbrella of TRAINBIODIVERSE – a multinational consortium of European research institutes and private sector partners. The research was financially supported by a grant (289949) from European Commission (TRAINBIODIVERSE), awarded to Jan Dirk van Elsas.

The printing of this thesis was funded by the University Library and Graduate School of Science University of Groningen.

Interactions of *Burkholderia terrae* with soil fungi

Mechanisms, gene expression patterns and ecological behavior of
Burkholderia terrae BS001 during its interaction with *Lyophyllum* sp.
strain Karsten and *Trichoderma asperellum* 302 in soil

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 7 October 2016 at 11.00 hours

by

Irshad Ul Haq

born on 12 April 1985
in Swabi, Pakistan

Supervisor

Prof. J.D. van Elsas

Assessment committee

Prof. J.T.M. Elzenga

Prof. L. Eberl

Prof. W. de Boer

I dedicate this book to my parents

Contents

CHAPTER 1	General Introduction and thesis outline	9
CHAPTER 2	The interactions of bacteria with fungi in soil: emerging concepts	21
CHAPTER 3	The genome of the fungal-interactive soil bacterium <i>Burkholderia terrae</i> BS001—a plethora of outstanding interactive capabilities unveiled	47
CHAPTER 4	Transcriptional responses of the bacterium <i>Burkholderia terrae</i> BS001 to the fungal host <i>Lyophyllum</i> sp. strain Karsten under soil-mimicking conditions	87
CHAPTER 5	Chemotaxis and adherence to fungal surfaces are key components of the behavioral response of <i>Burkholderia terrae</i> BS001 to two selected soil fungi	123
CHAPTER 6	A signalling molecule or a potential carbon source: the conundrum of oxalic acid in the interactions of <i>Burkholderia terrae</i> strains with two soil fungi	153
CHAPTER 7	General discussion and outlook	175
	Summary / Samenvatting	191
	Acknowledgements	197
