Microglia  priming in the  aging brain :
Implications for neurodegeneration

Divya Darwin Arulseeli

Research

The research described in this thesis was performed at the Department of neuroscience, Section Medical Physiology, University Medical Center Groningen, University of Groningen, Groningen the Netherlands.

Funding

The research described in this thesis was partly funded by Lundbeck (Paramus, USA), the Jan Kornelis de Cock Foundation.

Printing of this thesis was financially supported by:

University of Groningen, Groningen, the Netherlands

University Medical Center Groningen (UMCG), Groningen, the Netherlands

Research School of Behavioural and Cognitive Neurosciences (BCN), The Netherlands

Cover design credit: The young, aged persons face impressions indicating aging were adopted with due permission from the work of art by Czech artist, Oldřich Kulháněk. His works are on permanent display at the M&K gallery, Prague (www.mk-galerie.cz). The images of the brain represent changes in microglia with brain aging.

Layout of coverpage: Images of brain with microglia by Divya Darwin Arulseeli

Printed by Drukkerij Haveka B.V, Alblasserdam

Microglia priming in the aging brain: Implications for neurodegeneration

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. E. Sterken
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on
 Monday 10 October 2016 at 14:30 hours

by

Divya Darwin Arulseeli

born on 18 May 1983
 in Nagercoil, India

Supervisors

Prof. H.W.G.M. Boddeke

Prof. K.P.H. Biber

Co-supervisor

Dr. B.J.L. Eggen

Assessment Committee

Prof. S.E.J.A. de Rooij

Prof. C. D. Dijkstra

Prof. E. M. Hol

For Appa, Amma, thambu & Anuj

Table of Contents

Chapter 1	1
<i>General introduction</i>	
Chapter 2	55
<i>An optimized protocol for the acute isolation of human microglia from autopsy brain samples</i>	
Chapter 3	107
<i>Differential immune priming of microglia in the white and grey matter of the aging brain</i>	
Chapter 4	149
<i>Immune priming of microglia in response to neuronal dysfunction in a DNA repair deficient model of accelerated aging</i>	
Chapter 5	191
<i>Enhanced microglial pro-inflammatory response to lipopolysaccharide correlates to brain infiltration and blood brain barrier dysregulation in a mouse model of telomere shortening</i>	
Chapter 6	235
<i>General discussion and summary</i>	
Thesis summary	262
Dutch Summary	264
Publications	266
Acknowledgements	269
