zernike institute for
 advanced materials

The experimental research presented in this PhD thesis was performed in the research group Quantum Interactions and Structural Dynamics (QISD). Up to 31-12-2013 this group was embedded in the Kernfysisch Versneller Instituut (KVI) under the name Atomic and Molecular Physics (AMP). From 01-01-2014 the group is part of the Zernike Institute of Advanced Materials at the University of Groningen, The Netherlands.

kapteyn
 astronomical institute

The numerical and astronomical work presented in this PhD thesis was performed at the Kapteyn Astronomical Institute at the University of Groningen, The Netherlands.

Netherlands Organisation for Scientific Research

The work was funded by the Netherlands Organization for Scientific Research (NWO; VIDI project 639.042.017). The beamtimes were allocated by the Helmholtz Zentrum Berlin and financially supported by the European Community's Seventh Framework Programme.

Chemistry and Photophysics of Polycyclic Aromatic Hydrocarbons in the Interstellar Medium

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. E. Sterken
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 6 januari 2017 om 16.15 uur

door

Leon Michaël Primius Valentijn Boschman

geboren op 30 september 1988
 te Zwolle

Promotores

Prof. dr. ir. R.A. Hoekstra

Prof. dr. M.C. Spaans

Copromotores

Dr. S.M. Cazaux

Dr. T.A. Schlathölter

Beoordelingscommissie

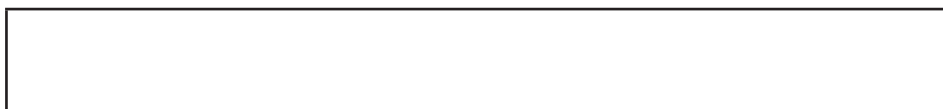

Prof. dr. I.E.E. Kamp

Prof. dr. F. Dulieu

Prof. dr. W.M.G. Ubachs

ISBN 978-90-367-9436-7 (printed version)

ISBN 978-90-367-9435-0 (electronic version)

Contents

1	Introduction	1
1.1	The Formation of H ₂ in Space	2
1.2	PAHs in the ISM	7
1.2.1	Molecular structure of PAHs	8
1.2.2	Observational Evidence	11
1.2.3	Observations	13
1.3	Atomic, Molecular, and Photonic Interactions on PAHs	16
1.3.1	PAH Chemistry	17
1.3.2	Photoprocessing of PAHs	18
1.4	Modeling of PAHs in the ISM	20
1.5	Contents of this Thesis	21
2	The Experimental Setup	23
2.1	Electrospray Ionization	24
2.2	Ion Funnel	26
2.3	Ion Guide	27
2.4	Mass Filter	28
2.5	Paul Ion Trap	29
2.6	Mass Spectrometer	29
2.7	Hydrogen Source	30
2.7.1	Placement of the Hydrogen Source	32
3	Hydrogenation of PAH Cations	35
3.1	Introduction	36

3.2	Experiments	37
3.2.1	Set-up	38
3.2.2	Results	39
3.3	Analysis and discussion	40
3.4	Conclusions	45
4	The Sequence to Hydrogenate Coronene Cations	47
4.1	Introduction	48
4.2	Results	49
4.2.1	Experimental results	49
4.2.2	Theoretical results	51
4.3	Discussion	56
4.4	Methods	58
4.4.1	Experiments	58
4.4.2	DFT calculations	59
5	VUV photoabsorption	63
5.1	Introduction	64
5.2	Experiment	66
5.3	Data analysis, Results, and Discussion	70
5.3.1	Coronene	71
5.3.2	Superhydrogenated coronene	74
5.4	Astrophysical Application	76
5.4.1	Modeling of the experimental results	77
5.4.2	The Photodissociation of PAHs	80
5.5	Conclusion	83
6	H₂ formation on PAHs in photodissociation regions	87
6.1	Introduction	88
6.2	Model	91
6.2.1	PAHs	93
6.2.2	H ₂ formation on dust grains	97
6.2.3	H ₂ photodissociation	98
6.2.4	Computations	99
6.3	Results	100
6.3.1	Spatial distribution of coronene	101
6.3.2	H ₂ formation rates	103
6.3.3	Impact of H ₂ formation	105
6.4	Discussion	108

6.4.1	Impact of uncertainties	108
6.4.2	Expectations for a population of large PAHs	110
6.5	Conclusions	112
7	Summary	117
7.1	Outlook & Future Experiments	120
	Samenvatting	125
	Dankwoord	133
	Bibliography	137
	List of Publications	147
