ECOLOGICAL RESILIENCE OF SOIL MICROBIAL COMMUNITIES

Stephanie D. Jurburg

2017

Ecological resilience of soil microbial communities

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen

op gezag van de

rector magnificus Prof. Dr. E. Sterken

en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

23 januari 2017 om 14.00 uur

door

Stephanie Denisse Jurburg

geboren op 26 Oktober 1989

te New Jersey, Verenigde Staten

The research presented in this thesis was carried out in the Microbial Ecology Group of the Groningen Institute for Evolutionary Life Sciences (GELIFES), formerly known as the Centre for Ecological and Evolutionary Studies (CEES); the Section of Microbiology at the University of Copenhagen; and the Centre for Functional Ecology in the Department of Life Sciences of the University of Coimbra, Portugal. Financial support was provided by the international project TRAINBIODIVERSE from the European Community's Seventh Framework Program (FP7-PEOPLE-2011-ITN) under grant agreement no 289949.

Prof. dr. M. Schloter

Prof. dr. H. Olf

To my family, who has always encouraged curiosity.

CONTENTS

CHAPTER 1	General Introduction	9
CHAPTER 2	Functional Redundancy and Ecosystem Function— The Soil Microbiota as a Case Study	25
CHAPTER 3	Functional response groups of a soil bacterial community exposed to heat stress	49
CHAPTER 4	Autogenic succession and deterministic recovery following disturbance in soil bacterial communities	73
CHAPTER 5	Legacy effects on recovery of soil microbial communities from perturbation	97
CHAPTER 6	Contrasted disturbance histories can induce decoupling between nitrifier groups and nitrification	119
CHAPTER 7	Bacterial communities in soil become sensitive to drought under intensive grazing	135
CHAPTER 8	General Discussion	155
	Supplementary Information	173
	References	197
	Summary	221
	Samenvatting	224
	Acknowledgements	229
