On Protein Quality Control, Myofibrillar Myopathies, and Neurodegeneration

Melanie Meister-Broekema

2017

The research described in this thesis was conducted at the Department of Cell Biology (Division: Radiation & Stress Cell Biology), University Medical Center Groningen, University of Groningen, The Netherlands.

The research was supported by grants from Prinses Beatrix Fonds.

Printing of the thesis was financially supported by the University of Groningen and the Graduate School for Drug Exploration (GUIDE) at the University Medical Center Groningen.

Cover Design: Anna Woldring (awoldring@gmail.com)

Thesis printed by Ipskamp Drukkers, Enschede

ISBN (print): 978-90-367-9806-8

ISBN (electronic): 978-90-367-9805-1

university of
 groningen

On Protein Quality Control, Myofibrillar Myopathies, and Neurodegeneration

PhD thesis

to obtain the degree of PhD
 at the University of Groningen
 on the authority of the
 Rector Magnificus Prof. E. Sterken
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Tuesday 9 May 2017 at 11:00 hours

by

Melanie Meister-Broekema

Born on 28 March 1985
 in Hannover, Germany

Supervisor

Prof. H. H. Kampinga

Co-promoter

Dr. S. Carra

Assessment Committee

Prof. U. L. M. Eisel

Prof. J. van der Velden

Prof. U. Rueb

Paranymphs

V. Kakkar

P. W. K. Nagle

For my amazing husband Peter,
the love of my life; you are my warp drive

And for James and minimum,
for making my life brighter and completed

Table of Contents

Chapter 1	Introduction: From Chaperones to Proteinopathies; Protein Folding, Protein Aggregation, and Protein Degradation	1
Chapter 2	Cellular Protein Quality Control and the Evolution of Aggregates in SCA3	39
Chapter 3	Barcoding Heat Shock Proteins to Human Diseases: Looking Beyond the Heat Shock Response	61
Chapter 4	DNAJB6 delays Neurodegeneration in a <i>Drosophila melanogaster</i> model for Huntington's disease via non-cell autonomous mechanisms	99
Chapter 5	Disturbances in Hsp70-client processing caused by the myopathy-associated BAG3 ^{P209L} mutant leads to a devastating collapse in protein homeostasis	127
Chapter 6	Discussion	159
Appendix	English Summary	183
	Nederlandse Samenvatting	189
	Acknowledgements	197
	List of Publications	203
