Genetic characterizations and epigenetic interference to better understand and fight occult Hepatitis B virus infection

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 12 July 2017 at 11.00 hours

by

Julio Rendon Londoño

born on 18th December 1984
in Medellin, Colombia

Supervisors

Prof. M.G. Rots

Prof. M.C. Navas

Assessment Committee

Prof. A.J. Moshage

Prof. A.L.W. Huckriede

Prof. L.F. Barrera

Paranimfen

Dr. Diego Jiménez Avella

Lucía Berro Pizarossa, MJur

The research described on this thesis was financially supported by:

Comité para el Desarrollo de la Investigación
Universidad de Antioquia.

UMCG-Abel Tasman fellowship

"Generación del Bicentenario"
fellowship, by Colciencias

Cover design: Juan Diego Álvarez
Cover title: "NEMESIS"

UMCG Institute PhD thesis
ISBN (printed): 978-90-367-9962-1
ISBN (electronic): 978-90-367-9961-4

Table of Content

Chapter 1	General Introduction	1
Chapter 2	Virus-host-interplay in hepatitis B virus infection and epigenetic treatment strategies	28
Chapter 3	Molecular Characterization of Occult Hepatitis B Virus Infection in Patients with End-Stage Liver Disease in Colombia	82
Chapter 4	Exploiting Hepatitis B Virus CpG island 1 and 3 as Epigenetic Targets for Transcription Inhibition Using CRISPR/dCas9 System	132
Chapter 5	Re-expressing Epigenetically Silenced Genes by Inducing DNA Demethylation through Targeting of Ten-Eleven Translocation 2 to any Given Genomic Locus	173
Chapter 6	Potential Usage of Hepatitis B Virus X Protein as an Epigenetic Editing Tool for DNA Methylation Alteration and Gene Induction	196
Chapter 7	Discussion	226
Chapter 8	Summary	256
APPENDICES		260
