Smoking during pregnancy and prenatal programming

Consequences for DNA methylation

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. E. Sterken
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on
 Wednesday 13 December 2017 at 11.00 hours

by

Karolin Franziska Meyer

born on 1 October 1984

in Crivitz, Germany

Supervisor

Prof. W. Timens

Co-Supervisor

Dr. M.N. Hylkema

Assessment committee

Prof. M.G. Rots

Prof. A. Hoek

Prof. J.W. Holloway

Paranimfen

Jennie Ong, M.Sc.

Hataitip Tasena, M.Sc.

What we know is a drop,
what we don't know is an ocean.
(Sir Isaac Newton)

Table of Contents

Chapter 1: General introduction and scope of the thesis	1
Chapter 2: Prenatal exposure to tobacco smoke sex-dependently influences methylation and mRNA levels of the IGF axis in lungs of mouse offspring.	13
Chapter 3: Prenatal smoke exposure disturbs female <i>FoxA2</i> , <i>beta-Catenin</i> , and <i>Fn1</i> promoter methylation....	37
Chapter 4A: Prenatal smoke exposure reduces <i>Cyp2a5</i> mRNA in female mouse offspring but not its promoter methylation.	43
Chapter 4B: <i>Cytochrome P450 2a5</i> methylation profile is organ-specific and affected by maternal smoking during pregnancy.	51
Chapter 5: The prenatal programming effect of pregnancy smoking on <i>Igf1r</i> and <i>Igf1</i> methylation is organ- and sex-specific.....	59
Chapter 6: Prenatal programming of <i>Igf1</i> by maternal smoking during pregnancy is organ- and cell type-specific.....	95
Chapter 7: Inter- and transgenerational epigenetic inheritance: evidence in asthma and COPD?	113
Chapter 8: Summary/General discussion/Future perspectives	141
Chapter 9: Dutch Summary	153
Chapter10: Acknowledgements.....	157
