ABSTRACT

UMI NUR KURNILIAWATI. A320120222. CLASSROOM TECHNIQUE USED IN THE TEACHING OF ENGLISH AT SMP NEGERI 1 SAWIT BOYOLALI: A NATURALISTIC STUDY. Research Paper. School of Teacher Training and Education. Muhammadiyah University of Surakarta. 2016

This study is carried out to describe classroom technique used in the teaching of English at SMP Negeri 1 Sawit, Boyolali. The kinds of this research is descriptive qualitative research especially naturalistic study in analyzing the data. The method of collecting data in this research are observation, interview and document. The finding of the study shows that there are some classroom techniques implemented by English teachers at SMP Negeri 1 Sawit such as: answering question, checking, correction, discussion, drilling, grouping, individual task, listening to music, picture describing, presentation, question and answer, questioning, reading aloud, repetition, role play, and translation. The teachers have roles as facilitator, teacher as motivator, teacher as observer, teacher as manager, teacher as model, teacher as counselor, teacher as controller, and teacher as evaluator. The students have roles as members of group, as tutor of other learners, as negotiator, as subject, and as monitor and evaluator of their own learning progress. There are some materials used by English teachers, such as: textbook, workbook, dictionary, photocopy exercises, powerpoint on LCD, audio like song, and videos from youtube. The conclusion of this research is that English teachers at SMP Negeri 1 Sawit used various classroom techniques which can improve the students’ ability. Various techniques can make the students interested in English teaching-learning process. It does not make the class monotonous. The students become more active and creative. Based on the results, apparently, classroom techniques used by the teachers have important role in the teaching-learning process.

Key words: Classroom techniques of teaching English, teachers’ and students’ roles, instructional material.
ABSTRAK

Tujuan dari penelitian ini untuk mengamati proses pembelajaran di SMP Negeri 1 Sawit Boyolali. Penelitian ini dibuat untuk mendeskripsikan tipe teknik, tujuan penggunaan teknik, peran guru dan siswa, serta materi pendukung. Jenis penelitian ini adalah deskriptif kualitatif khususnya Natularistik Studi dalam menganalisis data. Metode yang digunakan dalam penelitian ini antara lain observasi, wawancara, dan dokumentasi.

Temuan dalam penelitian ini menunjukkan bahwa teknik mengajar yang digunakan oleh guru bahasa Inggris di SMP Negeri 1 Sawit Boyolali antara lain drilling, grouping, individual task, listening to music, picture describing, presentation, question and answer, questioning, reading aloud, repetition, role play, and translation. Peran guru dalam kelas antara lain sebagai fasilitator, sebagai observer, sebagai manager, sebagai model, sebagai konselor, sebagai kontroler, dan sebagai evaluator. Siswa mendapat peran sebagai anggota kelompok, pembelajar dari siswa lain, sebagai negosiator, sebagai subjek, dan sebagai monitor serta evaluator pada perkembangan belajar mereka sendiri. Ada beberapa materi yang digunakan oleh guru bahasa Inggris, seperti buku teks, lembar kerja siswa, kamus, latihan dalam bentuk fotocopy, power point pada LCD, musik dan lagu, dan video dari youtube.

Kata Kunci: Teknik Mengajar dalam pelajaran Bahasa Inggris, Peran Guru dan Siswa, Materi Pendukung.

Kata Kunci: Teknik Mengajar dalam pelajaran Bahasa Inggris, Peran Guru dan Siswa, Materi Pendukung.
INTRODUCTION

In *SMP Negeri 1 Sawit*, English is one of many subjects which taught there. It is given to the seventh grade students. Curriculum that is used 2013 Curriculum in the teaching-learning process. The teacher is responsible for the students to give the teaching techniques of learning English easily that is suitable with the student’s need. Actually, teaching of English in *SMP Negeri 1 Sawit* is integrated teaching. It is not focused in each aspect of skills. The teacher covers all of the skills in the general English.

Actually, in *SMP Negeri 1 Sawit*, English lessons is done as a whole, has not focused on every skills such as listening, reading, writing, and speaking. The teacher teaches all aspects of it together in one lesson there. Within a meeting of the lesson, the teacher had to explain various aspects simultaneously. It is called integrated teaching.

*SMP Negeri 1 Sawit* obliges its students to learn the English subjects. In English class, the teacher should play an active role in teaching all aspects of language skills. The most of Junior High School students are teenager and include to the category of young learners. The young learners have many different characteristics. How to learn and their capacity is also different. Classroom techniques which appropriate are needed here. *SMP Negeri 1 Sawit* usually find problems for students as they feel bored with English lessons in the classroom. The English class of *SMP Negeri 1 Sawit* consist of 32 students each class. It becomes important to make a research because as a researcher who wants to be a teacher, the writer have to know what is the best techniques used to teaching in English. Based on phenomenon above, the researchers try to investigate the teaching and learning process especially the classroom technique when the teacher teaches English to achieve the learning objectives.

The researcher interested in having a study in teaching-learning process especially the classroom technique on teaching of English class at *SMP Negeri 1 Sawit*. The writer wanted to deeply know the process of teaching-learning especially classroom techniques used by the teachers in teaching of English in *SMP Negeri 1 Sawit*. 
Approach is a theory of language and language learning. It is called Axiomatic. Method is a procedure or overall plan of presentation usually used by the teacher to get their aims in the teaching-learning process. It is a procedural of teaching-learning process, although technique is a classroom practice or techniques used by teacher or the implementation of approach and method.

As Anthony (in Fauziati 2002: 16) views approach as “A set of correlative assumptions dealing with the nature of language and the nature of language teaching and learning. An approach is an axiomatic.” Anthony (1963: 95) also defines method as “an overall plan for the orderly presentation of language material, no part of which contradicts, and all of which is based upon the selected approach. An approach is axiomatic whereas a method is procedural”, although technique is an implementation which actually takes place in a classroom. It is a particular trick, strategy, or contrivance used to accomplish an immediate objective. Technique must be consistent with a method, and therefore in harmony with an approach as well”. (Anthony, 1963: 36).

Classroom techniques plays the important role. To reaches the goal of teaching-learning process, the teacher have to find and used the teaching techniques which is appropriate with the student’s characteristics. Technique is something that actually takes place in language teaching or learning in the classroom.

Relevant to the above description on approach, method, and technique, Celce-Murcia (in Fauziati, 2014: 15) give her summary stating that an approach is general (e.g. cognitive approach), that a method is specific set of procedures more or less compatible with an approach (e.g. the silent way method), and that a technique is a very specific type of learning activity used in one or more methods (e.g. using colored rods of varying lengths to facilitate language practice in silent way).

Based on the review above, the writer is interested to describe types of techniques used in the teaching English at SMP Negeri 1 Sawit. To prove the originality of this research, the writer takes some previous study related to English teaching technique. There are Revellia (2014), Ahsan (2015), Prakusumasari (2015), and Ismayanindar (2015).
Shelvita Revellia (UMS, 2014) studied the *Techniques of English Teaching used at SMP Muhammadiyah 5 Surakarta: A Naturalistic Study*. The aims of her research is to observing teaching-learning process of English in SMP Muhammadiyah 5 Surakarta. The objective of this research is to describe the techniques of teaching English implemented by the teacher at SMP Muhammadiyah 5 Surakarta. The type of her research is qualitative research especially naturalistic study. Methods of collecting data in this research are observation, interview and document. The conclusion of her research is that there are four techniques implemented by the teacher in teaching learning process of English of SMP Muhammadiyah 5 Surakarta. The techniques are namely Reading Aloud, Oral Repetition, Answering Question and Dialog Conversation.

Annisa Ahsan (UMS, 2015) studied the *techniques in teaching reading to the seventh grade of SMP Negeri 2 Wonogiri*. The aims of her research is to identify the techniques in teaching reading and the procedures of teaching reading to seventh grade of SMP Negeri 2 Wonogiri. The types of her research is descriptive qualitative research. The result of this study shows that the researcher found as follow: (1) the techniques in teaching reading to the seventh grade in SMP Negeri 2 Wonogiri are reading aloud and KWLH technique.

Kukuh Prakusumasari (UMS, 2015) studied about the *use of story-mapping technique in teaching reading skill at the second year of SMP Muhammadiyah 6 Surakarta in 2014/2015 Academic Year*. The objectives of this research are to describe the procedure of teaching reading by using story mapping technique and to identify the result of story mapping technique in reading comprehension of narrative text. In her research, she used descriptive qualitative research. There are some results, such as the story mapping technique gives positive impact to the success of teaching reading of narrative text, story mapping technique helps the students to comprehend the content of narrative text easily, story mapping technique helps them remembering the important content of reading narrative text, the students are able to analyze the generic structure of the text, and they are more interested in joining teaching-learning activities, the students have development of reading skill.
NimasIsmayanindar (UMS, 2015) studied about the teacher’s feedback technique in teaching descriptive text at the second year of SMP N 1 Sragen. This study is aimed at describing: 1) the teacher feedback technique used in teaching descriptive text, 2) the student’s response of the teaching writing descriptive text, and 3) the problems faced by the teacher in teaching writing descriptive text. In achieving the objectives, the researcher used descriptive qualitative approach to collect and analyze the data. The result of the analysis shows that teacher’s corrective feedback techniques are appropriate and effective for the second year student of SMP N 1 Sragen in teaching descriptive text.

This study focuses on classroom technique used in teaching of English which the subject in SMP Negeri 1 Sawi in 2015/2016 academic year includes the components of a technique itself, such as types of classroom techniques, the purposes in using each technique, teachers’ and students’ role in each types of classroom techniques. So, this study can extend the previous study and in other research field.

The writer applies several theories related with the previous study in order to support the data of research There are several theories to support her research namely Notion of Approach, Method and Technique, Notion of Classroom Techniques of English Teaching, Classroom Techniques in teaching Listening, Classroom Techniques in teaching Speaking, Classroom Techniques in teaching Reading, Classroom Techniques in teaching Writing, and Instructional Material.

Richards and Rodgers (in Fauziati (2002: 11) identified approach is axiomatic. It describes the nature of the subject matter to be taught. It states a point of view, philosophy, an article of faith, that is, something which one believes but not necessarily be proved. It is often unarguable except in term of the effectiveness of the methods which grow out of it”.

Antony (1963:96 in Fauziati, 2009: 16) defines technique is implementation which actually takes place in a classroom. Techniques must be consistent with a method, and therefore in harmony with an approach as well.

English teaching has four important skills namely listening skill, speaking skill, reading skill, and writing skill. Each skill has different technique to improve English teaching for the student.
There are some techniques can be used in the teaching listening, such as Bottom-up processing, Top-down processing, Oral repetition, Identifying key words, Paraphrasing, Summarizing, Answering question, Brainstorming, Simultaneous listening and reading aloud. Classroom techniques used in teaching speaking are Discussion, Role play, Simulations, Information gap, Brainstorming, Story telling, Interviews, and Picture describing.

Activities to improve student’s bottom-up skills in reading are recognizing word meanings, recognizing phrases, recognizing sentence structure and comprehension. Activities to improve student’s top-down skills are advance organizers, previewing, skimming and scanning, and prediction. Studies in the teaching writing have identified that there are at least three paradigms of teaching: the product approach, the process approach, and the genre-based approach.

Cunningsworth (in Brown 1994: 7) stated that the role of materials (particularly coursebooks) in language teaching namely: (a) A resource for presentation materials (spoken and written), (b) A source of activities for learner practice and communicative interaction, (c) A reference source for learners on grammar, vocabulary, pronunciation, and so on, (d) A source of simulation and ideas for classroom activities, (e) A syllabus (where they reflect learning objectives which have already been determined), and (f) A support for less experienced teachers who have yet to gain confidence.

Johnson and Paulston (in Brown 1994: 7) said that learner role in individualized approach to language learning: (a) The learner is a planner of his or her own learning program and thus ultimately assumes responsibility for what he or she does in the classroom; (b) The learner is a monitor and evaluator of his or her own progress; (c) Tearer is a member of a group and learns by interacting with others; (d) The learner is a tutor of other learners; (e) The learner learns from the teacher, from other students, and from other teaching sources.

Richard (1985: 23) states that there some teacher’s role in the classroom such as: (1) Teacher as a facilitator, (2) Teacher as motivator, (3) Teacher as observer, (4) Teacher as manager, (5) Teacher as model, (6) Teacher as counselor, (7) Teacher as controller, and (8) Teacher as evaluator.
RESEARCH METHOD

This research is a Naturalistic study about teaching of English at SMP Negeri 1 Sawit Boyolali. Williams (1989: 66) describes that “Naturalistic inquiry is inquiry conducted in natural settings (in the field of interests, not in laboratories), using natural methods (observation, interviewing, thinking, reading, writing) in natural ways by people who have natural interest in what they are studying (practitioners, such as teachers, counselors, and administrators as well as researchers and evaluators). This study gets the data from the observations made by the writer.

The writer gets the data from three sources, namely: events, informants, and documents. The method of collecting data in this research are observation, interview, and documentation. The techniques for analyzing data in this research are reduction the data, display the data, drawing conclusion. The subject of this study is the English teachers and students of SMP Negeri 1 Sawit Boyolali. The writer observes all of class in grade seven until nine. The teachers’ name are Emi Titik Yami Yani, M.Pd., Dra. Siti Qomariah, and Nur Haryani, S. Pd. The object of this research is the writer focus on the classroom techniques used in the teaching of English at SMP Negeri 1 Sawit Boyolali in 2015/2016 academic year.

FINDING AND DISCUSSION

The research focuses on the questions of problem statement that are: 1) Types of classroom techniques in teaching English, 2) The purposes of using each technique, 3) Teachers’ role, 4) Students’ role, and 5) Instructional material used in the teaching of English at SMP Negeri 1 Sawit Boyolali.

1. Types of Classroom Techniques in Teaching English at SMP Negeri 1 Sawit Boyolali.
   a. Techniques used by Mrs. A in teaching English. Some techniques used by the teacher such as Translation, Grouping, Checking, Listening to Music, Discussion, Presentation, Answering Question, Correcting, Reading Aloud, Drilling, Questioning, Repetition, and Picture Describing.
b. The techniques used by Mrs. B such as Correcting, Answering Question, Grouping, Presentation, Translation, Role Play, Question and Answer, Repetition, and Drilling.

c. The techniques used by Mrs C such as Reading aloud, Repetition, Grouping, Drilling, Picture Describing, Checking, and Individual Task.

2. The Purposes of Using Each Technique at SMP Negeri 1 Sawit Boyolali.

There are sixteen techniques that used in the teaching of English at SMP Negeri 1 Sawit Boyolali. Each technique has its purpose, such as:

a. Answering Question can improve the students’ understanding of the text and can help the teacher to know how far the students can understand the text.

b. Checking is to correct students’ word and to check their understanding of the new vocabularies or the material that already explained by the teacher.

c. Correction is to correct students’ word and to check their understanding of the new vocabularies in this material.

d. Correction is to correct students’ word and to check their understanding of the new vocabularies in this material.

e. Discussions are to compare their work with their friends’ work, make the students more active and creative, and share all information that the students know to their friends.

f. Grouping is to share all of the material with their group.

g. Individual Task is to measure the students’ ability in understanding the material and task given by the teacher.

h. Listening to Music is to improve the students’ listening skill.

i. Picture Describing is to improve the students’ creativity.

j. Presentation is to see the students’ ability in delivering their result of their discussion.

k. Question and Answer is to know the students’ ability to answer her question directly.

l. Questioning is to train the student to have critical thinking.
m. Reading Aloud is to improve the students’ reading skill.

n. Repetition is to lead students to repeat the sentences or utterances with understanding the pronunciation, meanings and message.

o. Role Play is to make the students more fun in studying English and

p. Translation is to help the students to understanding the meaning of the words, phrases, or sentences that they have not understand before.

3. Teachers’ Role at SMP Negeri 1 Sawit Boyolali.

According to Richard (1985: 23), teacher roles are related to the following issues: the types of functions teachers are expected to fulfill (e.g. practice director, counselor, facilitator, motivator, observer, manager, controller evaluator and model). There are many kinds of teachers’ role in the teaching-learning process at SMP Negeri 1 Sawit Boyolali namely: a. Teacher as Facilitator, b. Teacher as Motivator, c. Teacher as Observer, d. Teacher as Manager, e. Teacher as Model, f. Teacher as Counselor, g. Teacher as Controller, and h. Teacher as Evaluator. The writer conclude that teachers’ role at SMP Negeri 1 Sawit Boyolali are appropriate with Richard theory.

4. Students’ Role at SMP Negeri 1 Sawit Boyolali.

Johnson and Paulston (in Brown 1994:7) said that learner role in individualized approach to language learning: a) The learner is a planner of his or her own learning program and thus ultimately assumes responsibility for what he or she does in the classroom; b) The learner is monitor and evaluator of his or her own progress; c) Learner is a member of a group and learns by interacting with others; d) The learner is tutor of other learners; and e) The learner learns from the teacher, from other students, and from other teaching sources.

The students’ role in the teaching of English at SMP Negeri 1 Sawit Boyolali such as:

a. The student as member of group: the purpose of using this technique is to sharing all of the material with their group. So, if they do not understand with the teachers’ explanation, they can learn from their friends in their groups;

b. The student as tutor of other learners: tutor here means that the students facilitate by the teacher to learn with other students so the students can share their
knowledge to another. The teacher is always dividing the students into a group or pairs. This technique has purpose to build the students’ interaction

c. Students as negotiator: there is interaction between the students and the teacher. It happened on English class when the teacher explaining some material and giving instruction, then at the time when the students feel confused with the assignment, they can ask until they understand it;

d. Student as subject: the teacher wants to build the students to explore their ideas in many cases. Some activities that can be used such as discussion and picture describing. In this occasion, the teacher gives opportunities to the students to explore their ideas and there is no limiting to them; and

e. Student as monitor and evaluator of his own learning progress: the students can monitor their learning progress from the result of their test. By seeing the result of the test, the students can see how far they understanding the material. If the students feel their result is bed, they can evaluate their learning program. They can change the learning style so that the result of their test will be better. The students have their own responsibility.

The explanation above showed that the students’ role at SMP Negeri 1 Sawit Boyolali are appropriate with the Johnson and Paulston theory.

5. Instructional Material used at SMP Negeri 1 Sawit Boyolali.

The materials are used by English teachers at SMP Negeri 1 Sawitsuch as: textbook (BahasaInggris “When English Rings a Bell” written by Wachidah and Gunawan for seven grade, BahasaInggris “When English Rings a Bell” written by Wachidah and Gunawan for eight grade, BahasaInggris “When English Rings a Bell” written by Wachidah and Gunawan for nine grade), workbook (BahasaInggris written by Kurniawati and Arini), and dictionary. These materials are printed materials. Printed materials are materials that are printed such as textbook, workbook, dictionary, and photocopies exercises. Sometimes, the teacher also used the supplementary material taken from internet. It uses to enrich the materials on the textbook. The sources taken from internet are called non-printed sources.

Materials used at SMP Negeri 1 Sawit Boyolali are appropriate with Richard theory. According to Richard (1994) there are some forms of material:
a. Printed materials such as books, workbooks, worksheets or readers.
b. Non-print materials such as cassette or audio materials, video or computer-based materials.
c. Materials that comprise both print and non-print sources such as self-access materials and materials on the internet.

CONCLUSION

Syarif (2013) states that Curriculum 2013 is a form of integrated work between reconstruction of passing grade competence, suitability and adequacy, expansion, advancement of the materials, learning revolution and evaluation form.

Teaching of English in *SMP Negeri 1 Sawit* is integrated teaching. It is not focused in each aspect of skills. The teacher covers all of the skills in the general English. In *SMP Negeri 1 Sawit*, English lessons is done as a whole, has not focused on every skills such as listening, reading, writing, and speaking. The teacher teaches all aspects of it together in one lesson there. Within a meeting of the lesson, the teacher had to explain various aspects simultaneously. It is called integrated teaching.

It is appropriate with Syarif theory that in Curriculum 2013, teaching learning process using integrated teaching.

Based on the explanation above, the writer drawed the conclusion that English teachers at *SMP Negeri 1 Sawit, Boyolali* used various classroom techniques which can improve the students’ ability. Various techniques can make the students interested with English teaching-learning process. It does not make the class monotonous. The students become more active and creative. Based on the results, apparently, classroom techniques used by the teachers have important role in the teaching-learning process.
