Don't trust your Pets with careless people. See that they are properly taken care of during the Summer months while you're away. PHONES: KENSINGTON 23-59 10-17

Pre-1907
Rabies Vaccination

The vaccination of your dog against rabies will prevent the danger of its having rabies (hydrophobia or "going mad").

For the protection of your family, friends and your dog, the treatment should be given once a year. Rabies vaccination is as near perfect as any vaccination known to medical science. It is harmless, not painful, and not expensive.

NOW is a good time to have your dog given this treatment.

Broadway Veterinary Clinic

PREVENT FOWL POX, SOREHEAD, CANKERS

VACCINATE NOW

with Dr. Salsbury's
FOWL POX VACCINE

Don't risk fowl pox's ruining egg production this fall. Be safe... Vaccinate.

Build permanent immunity to fowl pox. Vaccinate your young birds at 6 to 12 weeks of age with Dr. Salsbury's Fowl Pox Vaccine. It's check tested for purity, safety, and potency.

For Tracheitis Use Dr. Salsbury's Laryngotracheitis Vaccine.
