DELAY APPROVAL IN PRIVATE FINANCE INITIATIVE (PFI) PROJECT IN MALAYSIA

MOHD ASRUL BIN ADNAN

A project report submitted in partial fulfillment of the requirements for the award of the Master of Science (Construction Management)

Faculty of Civil Engineering
Universiti Teknologi Malaysia

JANUARI 2013
Dedication

To those who have been supporting me unconditionally, without whom, this project would be complete, my family and friends.

My heartiest thanks.
ACKNOWLEDGEMENTS

The deepest and sincere gratitude is specially expressed to Professor Madya Ir. Dr. Rosli Mohamad Zin who has been an ideal project supervisor via his sage advice, insightful criticisms and patient encouragement in aiding the writing of this project in innumerable ways. The valuable time, unwavering efforts and continued supports he placed into the completion of this project especially during the revision period are exceptionally indebted.

The warm thanks are also advanced to the examiners and panels of presentation for their suggestions and constructive comments in making this project the same as it presented here. The incomparable assistance, steadfast professionalism and cordial attitudes of the staff in Faculty of Civil Engineering, School of Post Graduate (Engineering) as well as College of Science and Technology are also gratefully acknowledged.

A debt of gratitude is also owed to many people namely family, friends, colleagues and students who endlessly helped and persistently contributed a strong driving force along the way to the successful completion of this project. Foremost, special thanks are expressly dedicated to all respondent from the private company from client, consultant, contractor and others from their good responds answer the questionnaire.
ABSTRACT

Several studies had shown that many project managers are facing difficulties in predicting the approval of Private Finance Initiative (PFI) Project. This is due to the fact that there are many issue that can be linked to delay of approval in PFI Project. This study is carried out with the objectives to identify the cause of late approval in PFI Project, at the same time the impacts and strategies to minimize delay approval of PFI are also investigate. The main instrument of data collection was questionnaire survey with expects in the construction industry. The results show that there are eight causes, ten impacts and four solutions in the delay of approval in (PFI) Project. The degree of importance for these causes, impacts and the strategies to minor this problem will be determined through the questionnaire survey. From the findings of questionnaire survey the researcher will be able to identify the causes, impacts and the strategies to minor this problem delay approval in (PFI) Project.
