Unravelling the stellar Initial Mass Function of Early-Type Galaxies with hierarchical Bayesian modelling

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 6 april 2018 om 16:15 uur

door

Matthijs Dries

geboren op 10 februari 1986
te Emmen

Promotores

Contents

1 Introduction **1**
- 1.1 Formation and evolution of galaxies . . . 4
- 1.2 Elliptical galaxies . . . 6
- 1.3 Stellar population synthesis . . . 7
  - 1.3.1 Single Stellar Populations . . . 8
  - 1.3.2 Composite Stellar Populations . . . 10
  - 1.3.3 Population Synthesis models . . . 11
- 1.4 The initial mass function . . . 12
- 1.5 Bayesian model comparison . . . 14
- 1.6 This thesis . . . 19

References . . . 21

2 Bayesian inference of the IMF in Single Stellar Populations **25**
- 2.1 Introduction . . . 27
- 2.2 Hierarchical Bayesian inference . . . 29
  - 2.2.1 The first level of inference . . . 32
  - 2.2.2 The second level of inference . . . 40
- 2.3 Stellar templates . . . 41
  - 2.3.1 Isochrones . . . 42
  - 2.3.2 Stellar library . . . 42
  - 2.3.3 Interpolator . . . 44
- 2.4 Results - mock single stellar populations . . . 48
  - 2.4.1 The regularization scheme . . . 49
  - 2.4.2 First level of inference . . . 49

2.4.3 Second level of inference 66
2.5 Results - model versus model 67
2.5.1 The regularization scheme 67
2.5.2 IMF reconstruction of MILES SSPs 68
2.5.3 Mass fraction of low-mass stars 71
2.6 Summary and discussion 73
Appendix 2.A Velocity dispersion mock SSPs 76
Appendix 2.B Results for mock SSPs 77
Appendix 2.C Results for MILES SSPs 89
References 94

3 Bayesian inference of the IMF in CSPs 97
3.1 Introduction 99
3.2 Model description 101
3.2.1 Hierarchical Bayesian framework 101
3.2.2 New model features 103
3.3 Stellar templates 109
3.3.1 Isochrones 109
3.3.2 Stellar library and interpolator 110
3.3.3 Isochrone binning 110
3.4 Composite stellar population mock spectra 111
3.4.1 SFHs from semi-analytic models 111
3.4.2 CSP mock spectra with a variable IMF 113
3.5 Results 116
3.5.1 The required number of SSPs 116
3.5.2 Reconstructed IMFs 119
3.5.3 Reconstructed spectra 122
3.5.4 Reconstructing the variable IMF 122
3.6 Summary and discussion 128
Appendix 3.A Binning isochrone stars 132
Appendix 3.B Systematic uncertainties 134
References 137

4 Hierarchical Bayesian inference of the IMF in ETGs 141
4.1 Introduction 143
4.2 Model description 146
4.2.1 Hierarchical Bayesian framework 147
4.2.2 New features: abundance and error patterns 149

4.3 The MIX stellar population models . . . 151
4.3.1 The X-shooter Spectral Library . . . 152
4.3.2 The MIX library . . . 155
4.3.3 Additional M dwarfs . . . 156
4.3.4 Optimizing the MIX library . . . 157
4.3.5 Stellar templates . . . 160
4.4 The data . . . 162
4.5 Results . . . 166
4.5.1 Results `run1` and `run2` . . . 167
4.5.2 Abundance variations . . . 177
4.5.3 Isochrones . . . 182
4.5.4 The regularization scheme . . . 184
4.5.5 The IMF parameterization . . . 185
4.5.6 IMF shape from theoretical models of star formation 189
4.5.7 Mass-to-light ratios . . . 191
4.6 Summary and discussion . . . 193
Appendix 4.A SSP-based response functions . . . 197
References . . . 200

5 Conclusions and future outlook 205
5.1 Results, chapter by chapter . . . 206
5.2 Main conclusions . . . 210
5.3 Future outlook . . . 212
