

This thesis focused on benign adverse events and to a lesser degree, addressed serious neurological complications following chiropractic care for subjects with neck pain. Based upon the data from a prospective, multi-center, observational cohort study, it was possible to answer a number of important clinical questions.

ISBN/EAN: 978-90-9023102-0

Adverse events following chiropractic care

Sidney Rubinstein

**Adverse events following chiropractic care
for subjects with neck pain**
