

UTM/ATM Research Considerations – Dr. Parimal Kopardekar

PK will present an overview of how airspace is changing and what aspects of the ATM will remain/change over the coming years. This will include anticipated UTM/ATM interoperability as Urban Air Mobility and On Demand Mobility become increasingly prominent. PK will also highlight what UTM has done recently, including an update on TCL progress, and where UTM fits in the airspace above 500 AGL – especially in Upper Class E.
