BOQUN LIU

Quantification of macromolecular crowding and ionic strength in Living cells

Academic Thesis, University of Groningen, the Netherlands

The work published in this thesis was carried out in the Membrane Enzymology group of the Biochemistry Department of the University of Groningen, the Netherlands. This work was financially supported by the China Scholarship Council grant, ERC Advanced Grant, and Netherlands Organization for Scientific Research Vidi grant.

ISBN: 978-94-034-0718-0 (printed book)
978-94-034-0717-3 (ebook)

Printing: Eikon +

Cover & layout:  Lovebird design.

rijksuniversiteit
 groningen

Quantification of macromolecular crowding and ionic strength in Living cells

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. E. Sterken
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 1 June 2018 at 12.45 hours

by

Boqun Liu

born on 2 September 1987
 in Jilin, China

Supervisor

Prof. B. Poolman

Co-supervisor

Dr. A.J. Boersma

Assessment Committee

Prof. G. Maglia

Prof. M. Heinemann

Prof. P. Swain

Table of contents

CHAPTER 1

Quantification of macromolecular crowding in the intracellular environment	7
--	---

CHAPTER 2

Design and Properties of Genetically-Encoded Probes for Sensing Macromolecular Crowding	29
Supporting information: Design and Properties of Genetically-Encoded Probes for Sensing Macromolecular Crowding.....	53

Chapter 3

Comparison of fluorescent proteins in a crowding sensor and the importance of efficient maturation in <i>Escherichia coli</i>	69
---	----

Chapter 4

Macromolecular crowding during adaptation to hyperosmotic stress	91
--	----

Chapter 5

Ionic strength sensing in living cells.....	111
Supporting information: Ionic strength sensing in living cells	123
Summary	135
Samenvatting	141
Acknowledgement.....	144
