# **The multi-phase ISM of radio galaxies: a spectroscopic study of ionized and warm gas**

**Proefschrift**

ter verkrijging van de graad van doctor aan de  
Rijksuniversiteit Groningen  
op gezag van de  
rector magnificus prof. dr. E. Sterken  
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op  
vrijdag 1 juni 2018 om 14.30 uur

door

**Francesco Santoro**

geboren op 22 April 1987  
te Marsicovetere, Italië

**Promotores**

Prof. dr. R. Morganti

Prof. dr. T. A. Oosterloo

**Beoordelingscommissie**

*Alla mia famiglia e in particolar modo  
a mio nonno Francesco,  
che non ho mai conosciuto ma a cui devo molto.*

*To my family and especially  
to my grandfather Francesco,  
who I never met but to whom I owe a lot.*

**The research leading to this thesis has received funding from the European Research Council under the European Union’s Seventh Framework Programme (FP/2007-2013) / ERC Advanced Grant RADIOLIFE-320745.**

This research makes use of data collected at the Very Large Telescope (VLT). The VLT is part of the La Silla Paranal Observatory operated by the European Organisation for Astronomical Research in the Southern Hemisphere (ESO). In particular, the observations leading to the results shown in this thesis have been performed using the following ESO instruments: VIMOS, SINFONI, MUSE and X-Shooter. This research makes use of the SDSS Archive, funding for the creation and distribution of which was provided by the Alfred P. Sloan Foundation, the Participating Institutions, the National Aeronautics and Space Administration, the National Science Foundation, the US Department of Energy, the Japanese Monbukagakusho, and the Max Planck Society.

Cover design: ‘Flammarion Woodcut’ from *L’Atmosphere - Météorologie Populaire* (Paris, 1888) by Camille Flammarion, coloured by Heikenwaelder Hugo (Vienna, 1998)

# Contents

<b>1</b>	<b>Introduction</b>	<b>3</b>
1.1	AGN in galaxy evolution: a fundamental piece of the puzzle	4
1.1.1	AGN classification: radiative-mode vs. jet-mode . . .	6
1.1.2	AGN feeding and feedback: the role of gas . . . . .	10
1.2	Radio galaxies . . . . .	15
1.2.1	Compact and young radio galaxies . . . . .	17
1.3	The complex nature of AGN-driven outflows . . . . .	20
1.3.1	Outflows in different gas phases . . . . .	20
1.4	This Ph.D. Thesis . . . . .	25
1.4.1	Thesis outline . . . . .	26
	References . . . . .	29
<b>2</b>	<b>The jet-ISM interaction in the outer filament of Centaurus A</b>	<b>39</b>
2.1	Introduction . . . . .	41
2.2	Data reduction and analysis . . . . .	44
2.3	Results . . . . .	45
2.4	Discussion and conclusions . . . . .	51
	References . . . . .	54
<b>3</b>	<b>The outer filament of Centaurus A as seen by MUSE</b>	<b>59</b>
3.1	Introduction . . . . .	61
3.2	Data reduction and analysis . . . . .	62
3.3	Results . . . . .	64

---

3.4	Discussion and conclusions . . . . .	66
	References . . . . .	70
<b>4</b>	<b>Embedded star formation in the extended narrow line region of Centaurus A: extreme mixing observed by MUSE</b>	<b>75</b>
4.1	Introduction . . . . .	77
4.2	Data Reduction and Analysis . . . . .	79
4.3	The gas ionization: a unique structure . . . . .	81
4.3.1	The line ratios . . . . .	81
4.3.2	Dust and continuum sources . . . . .	83
4.3.3	The continuum sources energetics . . . . .	85
4.4	Photoionization models . . . . .	87
4.5	Discussion and Conclusions . . . . .	90
	References . . . . .	93
<b>5</b>	<b>The warm molecular hydrogen of PKS B1718-649: feeding a newly born radio AGN</b>	<b>97</b>
5.1	Introduction . . . . .	99
5.2	Observations and data reduction . . . . .	102
5.3	Results . . . . .	105
5.3.1	Distribution and kinematics of the molecular hydrogen	105
5.3.2	The H <sub>2</sub> 1-0 S(1) line in the innermost 75 pc . . . . .	109
5.3.3	The temperature and mass of the H <sub>2</sub> . . . . .	110
5.4	Relating the kinematics of the gas to the radio nuclear activity	113
5.5	Conclusions . . . . .	116
	References . . . . .	118
<b>6</b>	<b>Probing multi-phase outflows and AGN feedback in compact radio galaxies: the case of PKS B1934-63</b>	<b>123</b>
6.1	Introduction . . . . .	125
6.1.1	PKS B1934-63 . . . . .	127
6.2	Observations and Data Reduction . . . . .	128
6.3	Data Analysis and Results . . . . .	130
6.3.1	Redshift and stellar population modeling . . . . .	130
6.3.2	The emission lines model . . . . .	131
6.3.3	The density diagnostic diagram . . . . .	135
6.3.4	The radius of the narrow and broad gas components	138
6.4	Gas kinematics in the inner regions . . . . .	140

	<b>Sommario</b>	<b>241</b>
	<b>Acknowledgments</b>	<b>251</b>

*“There is a pleasure in the pathless woods,  
There is a rapture on the lonely shore,  
There is society, where none intrudes,  
By the deep sea, and music in its roar:  
I love not man the less, but Nature more,  
From these our interviews, in which I steal  
From all I may be, or have been before,  
To mingle with the Universe, and feel  
What I can never express, yet cannot all conceal.”*  
George Gordon Byron

*“Vi è un piacere nei boschi inesplorati  
e un'estasi nelle spiagge deserte,  
vi è una compagnia che nessuno può turbare  
presso il mare profondo,  
e una musica nel suo ruggito;  
non amo meno l'uomo ma di più la natura  
dopo questi colloqui dove fuggo  
da quel che sono o prima sono stato  
per confondermi con l'Universo e lì sentire  
ciò che mai posso esprimere  
né del tutto celare.”*  
George Gordon Byron
