Technological status of organic photovoltaics (OPV) - DTU Orbit (09/11/2017)

Technological status of organic photovoltaics (OPV)
This paper gives a technological status of organic and polymer photovoltaics (OPV) for both single and tandem junctions. We list the current state-of-the-art at the laboratory level for very small rigid and mostly vacuum processed devices to larger area flexible and printed devices. In comparison to other thin film PV the view held is that OPV is at a very early stage of industrial development with future success depending on an application where OPV is uniquely performing.

General information
State: Published
Organisations: Department of Energy Conversion and Storage, Functional organic materials
Authors: Carlé, J. E. (Intern), Krebs, F. C. (Intern)
Pages: 309-310
Publication date: 2013
Main Research Area: Technical/natural sciences

Publication information
Journal: Solar Energy Materials and Solar Cells
Volume: 119
ISSN (Print): 0927-0248
