Facilitating LGBT Medical, Health and Social Care Content in Higher Education Teaching and Postgraduate General Practice Training

Dr Zowie Davy, School of Health and Social Care

### Background

- Lesbian, Gay, Bisexual, and Transgender health care will, increasingly, be a feature of the primary care repertoire
- Pride in Practice <a href="http://www.lgf.org.uk/prideinpractice">http://www.lgf.org.uk/prideinpractice</a>
- Transgender Awareness (National Initiative)
- 'out' LGBT individuals increasingly doctors. scientists etc.

### Background

 Gender normativity –people conforming to dominant social standards of what is 'appropriate' feminine and masculine behaviour

 heteronormativity—the cultural bias in favour of oppositesex over same-sex sexual relationships

• Term LGBT assumes that the Ts have co-extensive healthcare issues as with the Ls, Gs, and Bs

www.lincoln.ac.uk

### Background

• Lack of time and resources (Obedin-Maliver et al., 2011)

• Unwillingness or inability of faculty to teach LGBTrelated curricular content (Frenk et al., 2010)

 Little understanding of LGBT medical education in terms of health promotion, prevention, and care at a strategic or operational level

- WP1 will retrieve hitherto absent data about LGBT content in medical and health and social care degree training and nursing courses from the 9 universities across the East Midlands region.
- A discourse analysis of the thematic educational content
- Assessed alongside the accreditation criteria of the relevant medical, nursing, and postgraduate training bodies
- Assess compulsory or elective education students

www.lincoln.ac.uk

### The research

- WP2: Purposive sampling will identify 15 to 18 programme leaders and teaching staff to be interviewed
- A semi-structured interview tool will gather experiential data surrounding the (non)inclusion and teaching of LGBT content and will be analysed from structural, educational policy and teaching approaches

### The research

• A survey of 30 General Practice educators in the region will be conducted

 Consider LGBT content in relation to the Deanery's professional standards framework

## Aims and Outcomes

- There will be 2 research outcomes.
- (1) The research will provide hitherto absent data about LGBT content in higher education and provide insights into facilitators and barriers for teaching LGBT content
- (2) The pilot study will enable us to construct adaptable methodological tools that will be incorporated into a national Medical Research Council bid
