

GRAPHICS, VIRTUAL REALITY AND TRAINING

AN OVERVIEW OF THE VIRTUAL REALITY TRAINING LAB AND THE PROTOTYPE IMMERSIVE TECHNOLOGIES LAB

HISTORY AND PURPOSE

- Started in the 90s
- Need for reconfigurable graphics
- Need for an analogous immersive training environment

TRAINING SYSTEMS AND PRODUCTS OVERVIEW

- Dynamic On-board Ubiquitous Graphics (DOUG)
- Mass Handling Training Scenarios
- Robotic Workstation (RWS) Training
- EVA Training Procedure Development (Reconfigs)
- Simplified Aid for EVA Rescue (SAFER)
- Virtual Reality Trainer System (on-board)

DYNAMIC ONBOARD UBIQUITOUS GRAPHICS

WHAT IS DOUG?

- 3D Viewing tool and graphics engine
- Can load up-to-date scene configurations
- Used for Exploration Applications (EDGE)
- Utilized on-ground and on-board for training simulations and planning

MASS HANDLING TRAINING

ROBOTICS WORKSTATION TRAINING

EVA (SPACE WALK) TRAINING PROCEDURES

SAFER TRAINING

SAFER REVIEW TOOL

VIRTUAL REALITY TRAINER

VIRTUAL REALITY TRAINER EST. SPRING 2018
