

CONTENTS

Chapter 1	General introduction	008
1.1	Introduction and outline of thesis	009
1.2	Dementia in 2011: Microbleeds in dementia --singing a different ARIA	017
Chapter 2	I Clinical associations of Microbleeds in memory clinic patients	024
2.1	Alzheimer disease patients with multiple microbleeds; relation with CSF biomarkers and cognition	025
2.2	Microbleeds do not affect rate of cognitive decline in Alzheimer disease	046
2.3	The Incidence of Cerebral Microbleeds: a longitudinal study in a memory clinic population	065
Chapter 3	II Underlying and associated pathology of microbleeds in dementia	086
3.1	Microbleeds relate to altered amyloid-beta metabolism in Alzheimer disease	087
3.2	No evidence for additional BBB P-glycoprotein dysfunction in AD patients with microbleeds	108
3.3	Dementia with microbleeds and transient neurological episodes: <i>a case report of</i> capillary CAA	119

Chapter 4	III Developments in imaging signs of microangiopathy	132
4.1	Susceptibility-Weighted Imaging versus T2*-Weighted Gradient Echo MRI: clinical relevance of improved microbleed detection in memory clinic patients?	133
4.2	Microbleeds in Alzheimer disease using 7T imaging; approaching the true number?	154
4.3	Microinfarcts assessed by post-mortem quantitative T1 relaxation time at 1.5 Tesla in Alzheimer and non-Alzheimer disease cases	169
Chapter 5	General discussion, conclusions and future directions	184
Appendices	Nederlandse samenvatting	204
	Dankwoord	209
	Proefschriften Alzheimercentrum	214
	List of publications	216
	About the author	218
