Fritz Engineering Laboratory Report No. 237.18A

INTRODUCTION

This report is a supplement to the BIBLIOGRAPHY OF CURRENT PROJECT REPORTS (F. L. Report 237.18).

Published and unpublished technical reports not included in report 237.18 are listed under their projects in this supplement. All reports were issued at Fritz Engineering Laboratory unless otherwise stated.

Project 354 contains the course reports and theses which were not prepared for a specific project. The theses and dissertations that are parts of certain research projects, however, are listed under those projects, not under Project 354.

Page numbers follow the sequence in Report 237.18 for each project.

Readers are referred to F. L. Reports 237.17 and 237.18 for more information and description of the research at Fritz Engineering Laboratory.

This supplement was prepared by Dundar Kocaoglu.
