COMPOSITE DESIGN FOR BUILDINGSSUMMARY OF TEST RESULTSBeams B-7, B-8, B-9

(For Committee Use only)

Since the completion of Progress Report No. 1, "TESTS OF COMPOSITE BEAMS FOR BUILDINGS", three additional beam tests and three additional pushout tests were conducted. These are the tests agreed upon by the Committee in the meeting of February 1, 1960 as stated in the minutes of that meeting.

The attached Tables 1 through 8 give a preliminary summary of the results of these tests. Results of these tests will be incorporated in a final report when evaluation of all data has been completed.
