RETRACTION NOTICE

UDC 661.12:004.8/.6

DOI 10.2298/CICEQ1104000E

## Retraction Notice to ARTIFICIAL INTELLIGENCE IN PHARMACEUTICAL PRODUCT FORMULATION: NEURAL COMPUTING

[*Chem. Ind. Chem. Eng. Q.* 15(4) (2009) 227-236]

This article has been retracted at the request of the authors.

The retraction has been made because the authors admitted that they took the text and drawings from the review article written by R. Rowe and E. Colbourn, *Future Medicinal Chemistry* 1(4) (2009) 713-726, without their permission and even did not include this article in the list of references.

One of the conditions of submission of a paper for publication are that authors confirm that their work is entirely originally written, someone else's data and/or text are appropriately cited or quoted and permission has been obtained for use of copyrighted material from other sources. Therefore, the retracted article represents a severe improper usage of the scientific publishing system. Apologies are offered to readers of the *Chem. Ind. Chem. Eng. Q.* that this abuse was not detected during the submission process.
