Abstract

Awareness in retirement planning in Malaysia still becomes an important issue in Malaysia. There are a lot of retirement scheme and also step for retirement saving being introduced by financial institutions. Nevertheless, many studies have shown that money saved in companies and government pension plan may not be adequate for future consumption. Therefore, this project paper aimed at discussion demographic factors, financial education background, work-related variables and goal clarity factors towards retirement planning behavior among individual workers in Malaysia. As a result, a theoretical framework is developed to illustrate the relationship between demographic, financial education background, work-related variables and goal clarity with retirement planning.
1.0 INTRODUCTION .................................................................................................................. 1

1.1 BACKGROUND OF STUDY .............................................................................................. 1

1.2 STATEMENT OF PROBLEM ............................................................................................ 2

1.3 RESEARCH OBJECTIVES ................................................................................................. 4

1.4 RESEARCH QUESTIONS .................................................................................................... 4

1.5 THEORETICAL FRAMEWORK ......................................................................................... 4

1.6 RESEARCH HYPOTHESIS ................................................................................................. 5

1.7 SIGNIFICANCE OF RESEARCH ...................................................................................... 6-7

1.8 SCOPE OF STUDY ............................................................................................................ 7

1.9 LIMITATIONS OF STUDY ............................................................................................... 8

1.10 DEFINITION OF TERMS .................................................................................................. 8-9

2.0 LITERATURE REVIEW ..................................................................................................... 10

2.1 LITERATURE REVIEW .................................................................................................... 10

2.1.1 CONCEPT RETIREMENT PLANNING BEHAVIOR .................................................. 10

2.1.2 DEMOGRAPHIC VARIABLES ...................................................................................... 11

2.1.3 FINANCIAL EDUCATION BACKGROUND ................................................................ 12

2.1.4 WORK-RELATED VARIABLES .................................................................................... 12

2.1.5 GOAL CLARITY ........................................................................................................... 13

3.0 METHODOLOGY AND DATA ......................................................................................... 13

3.1 RESEARCH DESIGN ......................................................................................................... 13

3.1.1 Primary Sources .......................................................................................................... 13

3.1.2 Secondary Sources ..................................................................................................... 13
3.2 SAMPLING METHOD ..................................................... 16

3.3 RESEARCH INSTRUMENTS ........................................... 16

3.3.1 Reliability Analysis .................................................. 17

3.3.2 Frequencies Analysis ............................................... 18

3.3.3 Descriptive Analysis ............................................... 18

3.3.4 Correlation Analysis ............................................... 18

3.3.5 Regression Analysis ............................................... 18

4.0 FINDINGS AND INTERPRETATION .................................. 19

4.1 INTRODUCTION .......................................................... 19

4.2 RELIABILITY TEST ..................................................... 19

4.3 FREQUENCY ANALYSIS ............................................... 20

4.3.1 Department ......................................................... 20

4.3.2 Sector ................................................................. 21

4.3.3 City ................................................................. 22

4.3.4 State ................................................................. 23

4.3.5 Stage in career life .................................................. 24

4.3.6 Educational Level .................................................. 25

4.4 CROSSTABULATION ................................................... 26

4.5 DESCRIPTIVE ANALYSIS ............................................. 27-28

4.6 CORRELATION ANALYSIS ........................................... 29-33

4.7 HYPOTHESIS TESTING ............................................... 34

4.7.1 Demographic variable ............................................. 34
