

# Current State of JUMMP

## COMBINE 2011

Martin Gräßlin  
m.graesslin@dkfz.de

DKFZ

07.09.2011

# Agenda

- 1 Introduction
- 2 Current State of Development
- 3 Development

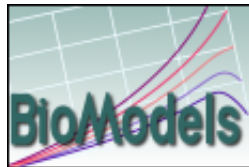

# Agenda

- 1 Introduction
- 2 Current State of Development
- 3 Development

# DKFZ What is JUMMP?

## Goals

- Modular framework for handling any Model file
- Replacement for existing BioModels DB
- Easy setup on sites outside the EBI
- Secure access to Models
- Collaborative Model Development

## Who develops it

- Computational Systems Neurobiology Group at EBI
- Data Management Group of TBI at DKFZ
- **Community:** JUMMP is Open Source

## Stack

- General Model Management Platform
- Not limited to SBML
- Strong use of Plugins
- Web Application using Grails Framework
- Easy to Extend and Contribute

# Agenda

- 1 Introduction
- 2 Current State of Development
- 3 Development

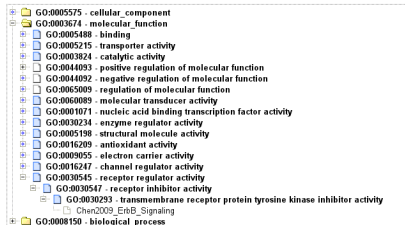

## Implemented Features

- Uses JSBML
- Extract all information
- Online Validation of submitted files
- Prototype views like Biomodels
- Submodel Generation
- Reaction Graph

Model	Overview	Math	Physical Entities
Parameters	Reaction Graph	Curation	Revisions
<b>Reactions (0)</b>			
<b>Rules (9)</b>			
<b>Rate Rule</b>	$\alpha_1 x_1^{g11} x_2^{g21} - (\beta_1 x_1) = \frac{d(\text{Osteoclasts})}{dt}$		
<b>Rate Rule</b>	$\alpha_2 x_1^{g12} x_2^{g22} - (\beta_2 x_2) = \frac{d(\text{Osteoblasts})}{dt}$		
<b>Rate Rule</b>	$k_2 y_2 - (k_1 y_1) = \frac{d(\text{BoneMass})}{dt}$		
<b>Assignment Rule</b>	$\begin{cases} x_1 - x_{1\_bar} & \text{if } x_1 > x_{1\_bar} \\ 0 & \text{otherwise} \end{cases} = y_1$		
<b>Assignment Rule</b>	$\begin{cases} x_2 - x_{2\_bar} & \text{if } x_2 > x_{2\_bar} \\ 0 & \text{otherwise} \end{cases} = y_2$		
<b>Assignment Rule</b>	$\left(\frac{\beta_1}{\alpha_1}\right)^{\frac{1-g22}{\gamma_1}} \left(\frac{\beta_2}{\alpha_2}\right)^{\frac{g21}{\gamma_1}} = x_{1\_bar}$		
<b>Assignment Rule</b>	$\left(\frac{\beta_1}{\alpha_1}\right)^{\frac{g12}{\gamma_1}} \left(\frac{\beta_2}{\alpha_2}\right)^{\frac{1-g11}{\gamma_1}} = x_{2\_bar}$		
<b>Assignment Rule</b>	$g_{12} g_{21} - ((1 - g_{11})(1 - g_{22})) = \gamma_1$		
<b>Assignment Rule</b>	$\begin{cases} 0.15 & \text{if time} \geq 1 \wedge \text{time} < 2 \\ -0.5 & \text{otherwise} \end{cases} = g_{21}$		

## Implemented Features

- Import of MIRIAM registry dump
- Generates identifiers.org URLs
- Web Services for name resolving
- Annotations are resolved during SBML upload
- Stored in database
- Search Models by Gene-Ontology Tree

## Implemented Features

- Publication Information Support
- Retrieved from Webservice
- Automatically extracted from SBML file
- Stored in Database
- Manual insert possible

<b>PubMed ID</b>	<u>20488988</u>
<b>Journal</b>	Science 2010 Jun; 328(5984): 1404-8
<b>Title</b>	Covering a broad dynamic range: information processing at the erythropoietin receptor.
<b>Authors</b>	V Becker, M Schilling, J Bachmann, U Baumann, A Raue, T Maiwald, J Timmer, U Klingmüller
<b>Affiliation</b>	Division Systems Biology of Signal Transduction, DKFZ-ZMBH Alliance, German Cancer Research Center, 69120 Heidelberg, Germany.
<b>Abstract</b>	Cell surface receptors convert extracellular cues into receptor activation, thereby triggering intr...

# Version Control

Precedings : doi:10.1038/npre.2011.6371.1 : Posted 8 Sep

## Implemented Features

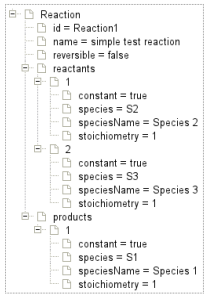

- Models under version control
- Bives: Diff between Revisions
- Public/Private Revisions
- Deletion of latest Revision
- Grant Read/Write Permission to Collaborators

## Multiple Backends

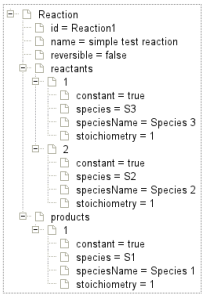

- git
- svn
- Plugins...

### Moves

Elements in revision2

Elements in revision3

## Flexibility

- First start to configure the application
- Stored in simple Java Properties file
- Multiple authentication backends:
  - Database
  - LDAP
  - More possible through Spring-Security
- User Registration and Administration

## External Command Tool to Load SBML files

- Uses IPC to communicate with JUMMP
- Written in Qt/C++
- Able to load all SBML models in a directory
- Can directly publish the model

## Linux Packages on OBS

<https://build.opensuse.org/package/show?package=jummp-loader&project=home:mgraesslin:jummp-loader>

# DEMO

# Agenda

- 1 Introduction
- 2 Current State of Development
- 3 Development**

# Features planned/under development

## Work Items

- Flexible Tagging System
- Search
- Curation/Annotate Process
- User Groups
- Web Service
- User Interface

# DKFZ Alpha/Beta Release

Precedings : doi:10.1038/npre.2011.6371.1 : Posted 8 Sep

Alpha Release planned to be released soon.

Announcement

Release will be announced when done

# DKFZ Alpha/Beta Release

Alpha Release planned to be released soon.

## Announcement

Release will be announced when done

## Everyone is Welcome

- General Wiki: <https://bitbucket.org/jummp/jummp/wiki/Home>
- Development Wiki: <https://bitbucket.org/mgraesslin/jummp/wiki/Home>
- Fork on Bitbucket: <https://bitbucket.org/mgraesslin/jummp/fork>
- Issue Tracker: <https://bitbucket.org/mgraesslin/jummp/issues>
- Mailing Lists: [jummp-discuss@googlegroups.com](mailto:jummp-discuss@googlegroups.com) and [jummp-dev@googlegroups.com](mailto:jummp-dev@googlegroups.com)

## Plugins

Development is very easy due to flexible Plugin Infrastructure
