## Table of Contents

### UMAP 2013 Late-Breaking Results and Project Papers

- Preface - Late Breaking Results and Project Papers  
Eelco Herder, Olga C. Santos

#### Late Breaking Results

1. Encountering the Unexpected: Influencing User Experience through Surprise  
*Alice Gross, Manfred Thüring*
2. Board Recommendation in Pinterest  
*Krishna Kamath, Ana-Maria Popescu, James Caverlee*
3. Crowdsourced Evaluation of Semantic Patterns for Recommendation  
*Valentina Maccatrozzo, Lora Aroyo, Willem Robert Van Hage*
4. Utilizing Social Networks for User Model Priming: User Attitudes  
*Adam Moore, Gudrun Wesiak, Christina M. Steiner, Claudia Hauff, Declan Dagger, Gary Donohoe, Owen Conlan*
5. Mining Potential Domain Expertise in Pinterest  
*Ana-Maria Popescu, Krishna Kamath, James Caverlee*
6. A Quantitative Approach for Modelling and Personalizing Player Experience in First-Person Shooter Games  
*Noor Shaker, Mohammad Shaker, Ismaeel Abu-Abdallah, Mehdi Al-Zengi, Mohammad Hasan Sarhan*
7. Understanding the Temporal Dynamics of Recommendations across Different Rating Scales  
*Paula Cristina Vaz, Ricardo Ribeiro, David Martins de Matos*
8. Term Extraction for User Profiling: Evaluation by the User  
*Suzan Verberne, Maya Sappelli, Wessel Kraaij*

## 9. Semantic Technologies as Enabler for Distributed Adaptive Hyperlink Generation

*Ruben Verborgh, Mathias Verhoeven, Erik Mannens, Rik Van de Walle*

### Project Papers

1. [Unfolding Cultural, Educational and Scientific Long-Tail Content in the Web](#)  
*Michael Granitzer, Christin Seifert, Silvia Russegger, Klaus Tochtermann*
2. [LinkedUp - Linking Web Data for Adaptive Education](#)  
*Eelco Herder, Stefan Dietze, Mathieu D'Aquin*
3. [Information Retrieval and User-Centric Recommender System Evaluation](#)  
*Alan Said, Alejandro Bellogin, Arjen de Vries, Benjamin Kille*
4. [techplay.mobi: A Technological Framework for Developing Affective Inclusive Personalized Mobile Serious Games to Enrich Learning Competences](#)  
*Olga C. Santos, Mar Saneiro, Emmanuelle Gutiérrez Y Restrepo, Jesus G. Boticario, Elena Del Campo, Raúl Cabestrero, Pilar Quirós, Sergio Salmeron-Majadas, Emmanuelle Raffenne, Emanuela Mazzone*

The international workshop on Personal Access to Cultural Heritage (PATCH, <http://patch2013.wordpress.com/>) is a forum for researchers and practitioners who are working on various aspects of cultural heritage and are interested in exploring the potential of state of the art technology to enhance the CH visit experience.

Personalization seems to carry a great potential for cultural heritage (CH), enabling users to cope with ever growing CH material. However, unlike other domains and tasks, where users may have well defined needs and preferences, CH may be a bit challenging as users tend to explore cultural heritage sites as leisure activities, many times with friends and family and are open to new experiences. Hence the question is how to model and support users in this domain, taking into account its specific peculiarities.

PATCH aims at building a research agenda for personalization in CH in order to make the individual CH experience a link in a chain of a lifelong CH experience which builds on past experience, is linked to daily life and provides the foundation for future experiences. The workshop aims to be multi-disciplinary. It is intended for researchers, practitioners, and students of information and communication technologies (ICT), cultural heritage domains (museums, archives, libraries, and more), and personalization.

PATCH 2013 presents novel research ideas, projects and scientific findings focused on the following aspects. The first and largest was personalization of city tours and touristic experiences, bringing lessons learned at the indoors and online museum visitors guide systems to the outdoors – cities and other CH sites and linking them. This is an important new area based on active involvement of a broad range of people to enhance the management of cultural heritage information. In this way the experiences are connect to "daily" lives and the user is not only the information consumer but also the producer. Then another aspect was the introduction of web of things to CH – personalization of visitors' interactions with smart CH objects. A somewhat unusual suggestion for integration of virtual reality into CH related application is also presented and finally, the delicate and challenging matter of how to involve curators in the process of creating personalized information for visitors.

Considering the submissions, it seems that the overall direction is towards integrating the outdoors, indoors and online CH sites via semantic web technologies and internet of things into a continuous personalized CH experience. A key issue is that of participation: to allow the user to participate not only in the consumption of information but also in the interpretation and discussion around the information as well as in the creation of new content. People are no longer passive users or consumers of information but take part in the production, they became “prosumers” of information.

We thank the members of the Program Committee of PATCH 2013 for their support and reviews. Furthermore, we are grateful to all authors who submitted articles and contributed with their works to a fruitful discussion.
