## Suspect in Cal Poly murders says not guilty

Mustang Daily—Patty Voss

Kenneth W. Curry, right, listens to charges brought against him Monday with his defense attorney, James B. Maguire. Curry pleaded not guilty to charges he allegedly murdered Cal Poly students Stephen Braun and Viola "Loia" Ada.

By ROSEMARY COSTANZO  
Staff Writer

Kenneth Wayne Curry, charged with murdering two Cal Poly students on May 27, pleaded not guilty and waived his right to a speedy trial Monday morning in Superior Court of San Luis Obispo County.

The trial is now scheduled to begin Monday, Feb. 4 at 8:45 a.m., with the pretrial hearing set for Friday, Feb. 1 at 10:00 a.m.

Curry also pleaded not guilty to two additional charges of robbery with the intent to kill.

The bodies of Steve Braun and Viola Ada were found shot to death June 2 on Cuesta Ridge a week before they were to graduate.

Curry was arrested July 13 at Paso Robles Auto Wrecking, where he was employed as a yard foreman.

Judge Warren C. Conklin also approved defense attorney James B. Maguire's request that the pretrial transcripts, preliminary hearing transcripts, arrest and search reports, and affidavits be sealed until the trial.

Though Curry is being held in county jail without bail until the trial, Maguire defended his request for the delay. "Because the death penalty is involved, the prosecution and defense are moving slowly to cover everything thoroughly," he said. "I anticipate several motion hearings before the preliminary hearing."

Curry first raised the suspicion of detectives the day that Braun's

Volkswagen was found in some brush off TV Tower Road on Cuesta Grade. Curry approached police to volunteer as a witness.

Sheriff's Chief Deputy Arnie Goble told the *Telegram-Tribune* that Curry said he may have been the last person to see Braun and

Ada alive. Curry told police he was target shooting on Cuesta Ridge and helped the couple push out their car that was stuck in a rut.

By comparing Curry's statements with those of others who saw the couple or their car the day of the murders, detectives said they were able to determine that Braun and Ada could not have been stuck at the time and place Curry said he helped them.

Curry turned over a rifle and pistol to detectives but tests showed that neither weapon was used in the killings. Another rifle was confiscated from Curry's Templeton home and was sent to Santa Barbara for ballistics testing. The ballistics reports have been sealed from public view.

Ballistics tests on shell casings found by Braun's car revealed that the .22-caliber casings may have been fired from the weapon.

Robbery is a possible motive for the killings, but police would not say if any of the victims' belongings were found in Curry's possession.

District Attorney Christopher Money has stated that his office will seek the death penalty against Curry.

## Programs to depict California's 'Traffic Safety Week'

By LISA MCKINNON

Staff Writer

In 1983, 4,571 people were killed and 292,538 were injured in traffic accidents occurring somewhere along California's 138,350 miles of public roadways, according to Traffic Safety Week literature.

Add to that the fact that seven Californians die every day at the hands of drunken drivers and that among children one-14 years old, car accidents are the leading cause of death. Also, a traffic accident is reported about every one minute.

It all sounds like a jumbled bunch of statistics that couldn't possibly have anything to do with

our lives but, in fact, every one of those numbers tells the somber story of real people in real situations.

In an effort to focus attention on traffic accidents, their causes and how they can be avoided, Governor Deukmejian has proclaimed Oct. 14-20 as California Traffic Safety Week.

During this, the second Traffic Safety Week in California's history (Governor Reagan signed a similar bill in 1973), the resources of industry, government, business, civic groups and safety organizations statewide will be pooled to dramatize the message that traffic

accidents kill, cripple and injure hundreds upon thousands of Californians every year.

The key word of the Traffic Safety Week project is involvement, said Chairman Peter O'Rourke.

"The primary purpose of Traffic Safety Week is to establish the awareness of motorists and pedestrians, to remind them to think of safety this week in the hopes that they'll make a habit of it," said David Bent, traffic safety unit administration officer of the San Luis Obispo Police Department.

### Police to enforce traffic

By DONALD MUNRO

Cal Poly police will be starting a program of "selective traffic enforcement" this week at problem intersections on campus.

Officers in marked police cars will begin by concentrating their efforts at the intersection of Cuesta Avenue and South Perimeter Road, said Investigator Ray Berrett. The intersection is a block from Mustang Stadium.

Officers will undertake a program of "selective enforcement," said Berrett. They will do nothing but issue citations to cars and bicycles that run the stop signs. Citations will also be issued to bicyclists who ride the wrong way on Cuesta Avenue, which is a one-way street.

Berrett said the major reason for the program is to promote traffic safety on campus.

"This year we've had several accidents already," he said.

Last week Berrett sat at the cor-

ner of the Cuesta Avenue intersec-

tion in an unmarked car, just to observe the situation. He watched 15 vehicles in a row run the stop signs before one car finally stopped.

Besides cars, people on bicycles ran the stop signs and went the wrong way on Cuesta Avenue. "I saw two narrow misses by vehicles running the stop signs and bicyclists going the wrong way," he said. "It's a hazardous situation there."

Officers will be at the intersection at periodic intervals during the next several weeks. Throughout the school year, dangerous intersections on campus will be the focus of concentrated police surveillance.

The police department plans to publicize these locations through the media, much like the San Luis Obispo Police Department announces the location of its radar gun, said Berrett.

Today has been designated Traffic Engineering Day. Traffic engineers will discuss design concepts the public is unfamiliar with, such as the new protected left-turn signal, as well as cite successful examples of their work.

Occupant Protection Day will be observed Oct. 17, followed by Licensing and Education Day Oct. 18 and Drunk Driving Prevention Day Oct. 19.

Bent said that while some parts of Traffic Safety Week had more bearing on the drivers in San Luis Obispo than others (we have fewer railroad crossings to deal with than do other cities), safety issues deserve the attention of the community.

"The primary traffic problems in San Luis Obispo are, number one, making left turns in front of oncoming cars and, number two, running red lights and stop signs," Bent said. "These are followed by driving at an unsafe speed for the situation and making right turns without merging into the bike lane first."

Despite the community's heavy student population, Bent was loathe to point the finger at students or any other group as the main culprits in traffic violations.

"The students are not the main group at fault," he said. "Problems are the result of a combination of increased traffic flow at the time students are in the area in conjunction with regular traffic. People become impatient and inattentive. They are preoccupied, late or lost and are not paying attention or driving defensively. That's a combination that results in accidents," Bent concluded.

## Cal Poly professor's wife dies in airplane accident

By Karen Ellichman

Staff Writer

The wife of a Cal Poly instructor died in a plane crash in Porterville on Oct. 13, according to police.

Sgt. Robert Leppert of Porterville said Nancy Eckrote, the wife of graphic communications lecturer Robert Eckrote, was killed after the plane she was a passenger on crashlanded at the Porterville airport. The pilot, Steve Hayes, 41, of Paso Robles, was able to escape from the rented plane before it burned. Hayes received second degree burns and injured his shoulder.

Eckrote and Hayes had taken off that morning from Paso Robles Municipal Airport. The two flew to Porterville to visit friends

after stopping at the Harris Ranch in the San Joaquin Valley.

"The plane was seen coming in too high (at the Porterville airport)," Leppert said. "The right wheel hit the ground, according to Hayes, and then the plane hit the side of a building."

Leppert said the landing had begun normally, but the plane was hit by a gust of wind. Porterville police have not yet determined the cause of the crash.

Mrs. Eckrote, whose family lives in Templeton, worked as a dispatcher at Atascadero State Hospital, according to a member of the graphic communications department.

Her husband has been a lecturer at Cal Poly for several years, said a department secretary.

## Absences: Who misses out?

Two students were overheard recently in the Snack Bar. One said: "Boy ain't that English teacher been missing many classes?"

"Yea," said the other. "My political science teacher hasn't been to class since what's his name became president."

Teacher absences. It's fun to be able to take an unexpected break, or better yet the afternoon off because a teacher is going out of town for the weekend and has cancelled their Friday classes. But in the end, it is the students who are short-changed.

Many teachers have an attitude that says: "Since you students don't pay much for your education, and I get paid half of what I should, you only deserve me part-time."

To many teachers this editorial does not apply. Most rarely miss class, or if they miss class, they do so only under extreme circumstances (illness or emergency). But there is a minority of teachers who seem to chronically miss classes quarter after quarter.

Sometimes these chronic nonattenders miss classes to extend the weekend into a vacation—this is of course inexcusable. Many times, however, they miss classes not to hike in Yosemite, but to attend professional engagements which are essential to their careers.

These professional commitments are needed for a teacher to receive tenure, and many improve in the classroom from this absence, but the student is still left without a teacher.

There are many solutions to this problem, but the most obvious is a better policy from the administration regarding approved absences for professional reasons. Classrooms shouldn't be without teachers, and these absences shouldn't be allowed unless a department can hire substitutes.

Departments are in a bind. While they need to give faculty members a chance to attend professional meetings, they also need money for substitutes, which they don't receive. The administration should either find/allot funds for substitutes, or not allow departments to okay absences if a class will go teacherless.

Departments should also examine their faculty members to see exactly how many absences each has taken over the year; both excused and unexcused. Professional meetings are valuable, but not at the expense of the student's education.

### CORRECTION

Because of a computer error, no cutline appeared with the front page photo of the Monday, Oct. 15 edition of the *Mustang Daily*. The photo showed Charlie Daniels of the Charlie Daniels Band roping cattle at Collet Arena before his show here Sunday. The photo was taken by Deanna Morris.

Also, a story on the crew club that appeared in the Oct. 9 issue of the *Mustang Daily* incorrectly reported that corporations, including the Madonna Corporation, have supplied funds to sponsor the club.

No funds have been supplied, but the club is seeking sponsorship of corporations such as Madonna.

## Reagan Rhetoric

### Central American policies planned to continue

By MARGARITA MILLS

Continuing the Administration's policies in Central America for four more years will make the world a safer and more secure place, said United Nations Ambassador Jeane Kirkpatrick.

"Our Administration has committed ourselves to maximum support of the peaceful nature showed in the politics of the democratic forces in Central America," she said.

A review of Latin involvement

The issue of the United States' involvement in Central America started during the Detente years, Kirkpatrick said.

The Detente years was a period when the Soviets were feeling strong and moved to expand their facilities in the Western Hemisphere. It started, explained Kirkpatrick, with the Soviets' ex-

pansion of submarine bases off the Central American coast, building of air strips in Cuba and development of major intelligence in Cuba.

The Soviet intelligence network, conducted by the KGB, permits the Soviets to engage in electronic surveillance.

"The Soviets made roads into our hemisphere — that's not ours, the United States, but ours, the Western Hemisphere which we are part of — by establishing in Nicaragua," Kirkpatrick said. "First in Nicaragua, then in Grenada."

"Dominoes could be heard falling all over the floor," she continued.

The extent of Soviet intervention in Central America has been growing in military strength as well as economic support. A White House

digest reported that in 1982 the Soviets, together with the Cubans, had 50 times as many military advisers in Latin America as did the U.S. The Soviets, as well, has provided a steady stream of military

equipment to Cuba — amounting to over \$1 billion in military assistance for the years 1982 and 1983.

U.S. military assistance amounted to about \$150 million in 1982.

#### Central American challenge

The Central America issue, Kirkpatrick continued, has been a unique challenge to the Administration for several reasons. The situation is new and unprecedented, difficult for political and historical reasons, and crucial for

"The stakes for the United States and the region are very high," she said. "Fortunately, in El Salvador there was no broad popular front formed between the democrats and Marxist-Leninist forces."

In El Salvador the government is controlled by democrats and the guerrillas are the Marx-

ist-Leninists, seeking to establish a new one-party dictatorship. In Nicaragua, the party in control is the Marxist-Leninists, armed and advised by Soviet sponsors, which recently replaced the one-party dictatorship of Somoza.

"In El Salvador, as in Nicaragua, there is a continued struggle between a majority of the people who would like to be a democracy and a new, violent, political elite linked to the Soviets world-wide," Kirkpatrick said.

#### U.S. commitment

"We believe it's important the people of that region should have the right to govern themselves and remain as independent nations," Kirkpatrick commented on the Administration's commitment to involvement in Central America. "We believe it's good for them and good for us."

"The whole essence of our policy is just that — to help them protect

their independence and to do so by means that are honorable, legal, and which will not involve us in conflict. We have, I think, succeeded to the extent permitted by the reluctant, half-hearted and limited support of the Congress and I expect that after the re-election of President Reagan we will continue in our support of the democratic forces in Central America in ways that will not risk U.S. involvement in conflict but will promise the future of the Central America," Kirkpatrick explained.

She concluded, "I am quite convinced that if we continue to policies of the last three and one-half years and enjoy support of the Congress — without which we can not do anything — then the world will be even more safe and secure for the future."

The trip to Washington, D.C. which supplied the information for this series of articles was made possible by Reader's Digest.

# Dairy team member wins \$2000

By BRENDA BIELKE  
Staff Writer

Cal Poly's dairy cattle judging team found their luck was not as good as they would have liked it to be in Madison, Wis. last week at the National Intercollegiate Dairy Judging Contest.

One team member, however, brought his own four leaf clover, not to mention skills, to the competition at the University of Wisconsin on Oct. 3.

The judging team placed 13th out of 36 teams and Blake Alexandre, a senior dairy science student, won High Individual out of about 140 competitors. Along with that honor, Alexandre was awarded the \$2,000 Kadee Scholarship.

"(The competition) was extremely intense—I feel very lucky to have won," said Alexandre.

In addition to Alexandre, the team is comprised of Doug Vanderpool, a dairy science major, Suzy Doerksen an agriculture business management major and Robin Wade, also a dairy science student.

As for overall team placement, the team members and their coach, Les Ferreira of the dairy science department, were a little disappointed.

"For the last 10 years Cal Poly has been in the top 10, so (placing 13th) was kind of a disappointment," said Alexandre.

"There were many good competitors. They (Cal Poly's team) did well, but they just had trouble with a couple of areas," said Ferreira.

# Fellowship to raffle off Rabbit

By Karen Ellichman  
Staff Writer

One 1979 Volkswagen Rabbit, excellent condition, blue book value \$3,700; on sale for \$1.

It's not a misprint. The Newman Catholic Fellowship is raffling off the Volkswagen to raise money for its activities, according to a Newman member.

"Don't stay at home. Don't leech off your friends. Don't beg your parents for their ancient, gas-guzzling family car," said Newman Chairman John Paneno. "If you are a college student who needs a car, we've got one for you."

The campus group is selling \$1 tickets (or six tickets for \$5) for the turbo-charged, 5-speed Rabbit. Newman received the car as a donation from a religious teaching group called the Christian Brothers, said biology major Mary Stoddard, Newman vice-chairman.

"The Christian Brothers have given Newman a lot of help," she explained. The Brothers established a winery to support education in the western states.

Staff member Glenn Perry said a Christian Brother gave the Rabbit to Newman because it was seldom used, specifying it be raffled off to support the campus organization.

"If the raffle raises a lot of money," Perry added, "the Christian Brothers plan to donate a car to us to be raffled off every year."

Agricultural business management major Theresa Garcia, also of Newman, said the group has sold

almost \$1,000 worth of tickets for the car, and hopes to make a \$5,000 profit from the raffle. The car will be the door prize at a Newman dance on Nov. 10, said Garcia, but the winner does not have to attend the dance to receive the prize.

"A student can drive from here to Los Angeles for less than \$5, if he wins the car," said Paneno, an electronic engineering technology major. The Rabbit gets 40 miles to the gallon.

Tickets for the car can be purchased at the Newman booth in the University Union Plaza on Thursdays between 11 a.m. and 1 p.m. The silver Rabbit will be displayed at that time, Garcia said. The Newman member added that each ticket, besides being the possible winner, includes a coupon for \$1 off a Dominos pizza.

"It's a great deal because a ticket for the car costs only a dollar, and you get a dollar off a pizza," she said. "You can't go wrong."

Garcia said her group will use the money raised by the raffle for Newman activities such as retreats, workshops and camping trips.

The winner of the car will have to pay its six percent sales tax and registration fees, Perry said, adding that the fuel-injected car can either be kept, or sold for \$3,400 to \$4,100 (the bluebook value). Newman estimates that the car is worth \$3,700 because of its condition, explained Perry.

Students may also purchase tickets by calling Perry at 543-4105.

## POLICE BULLETIN

Two cars parked in the R-1 residence hall parking lot were vandalized last week.  
A resident of Yosemite Hall reported the side mirror of a Nissan Sentra was broken off Friday, Oct.

12, said Investigator Ray Berrétt. The incident happened between 10 a.m. and 12:15 p.m.

In a separate incident, a Datsun 200SX belonging to a Sierra Madre resident had two hub caps stolen. Berrétt said the theft took place sometime between Oct. 10 and Oct. 12.

## Dairy

From page 3

Competing against teams from Cornell University, Clemson University and some Big 10 schools, Cal Poly was the National Champion last year. Only the top teams in the nation are invited to compete in the contest, which usually has 35-40 universities participating.

The National Champion title went to Virginia Polytechnic Institute and State University this year with Pennsylvania State University placing second and Cornell placing third.

"Students must judge 12 classes of cattle, two from each of the major dairy breeds," Ferreira explained. The competitors evaluate the cattle on a series of traits, then use their public speaking skills before the 12 judges to give their reasons for the judgements they have made. They are then ranked according to the judges' evaluations of each cow and compared to students from other schools.

"Luck is involved (in dairy cow judging) because you're trying to guess what the judges think," said Alexandre.

## Superstars enter election campaigning

LOS ANGELES (AP) — A celebrity "star wars" campaign has popular entertainers stumping far in the glitter of Hollywood for President Reagan and Vice President Walter F. Mondale. The Democratic and Republican parties, both hoping the idols of screen and tube can boost their candidates' standings among voters before the Nov. 6 election, have organized cheerleading networks of name celebrities. And while Sen. Gary Hart, D-Colo., held the monopoly on superstar support during the primary campaign, both Mondale and Reagan have rolled out dozens of celebrities to join the fray in the final weeks. The centerpiece of the Democrats' superstar campaign is a gala Beverly Hilton Hotel dinner Tuesday night where Mondale and running mate Geraldine Ferraro will be feted by the likes of Warren Beatty, Fonda, Sally Field, Lily Tomlin, Randy Quaid and cast members from television's "Hill Street Blues," among others. Beatty, a Gary Hart stalwart during the Democratic primary campaign, will host the evening,

heading a roster of Hart celebrities who now boost the Mondale ticket and Democratic congressional campaigns around the country. They include Marlo Thomas, Margot Kidder, Robert Walden, Hal Linden, Donna Mills and Cynthia Sykes, said Pat Duff, hired by the Democrats to coordinate the celebrity operation. In addition to circulating a list of 50 major actors supporting the Reagan-Bush effort, the GOP is teaming some of those stars with prominent politicians and local candidates to appear at local events. Actor Jimmy Stewart begins a tour Nov. 17 that will take him from Los Angeles to Phoenix, Amarillo, Texas, Albuquerque, N.M., and Wichita, Kan., said Goldie Arthur, a longtime Reagan friend from Los Angeles who coordinates his celebrity campaign effort.

Celebrities who have campaigned for Democrats include Sally Field campaigned in Texas for Rep. Lloyd Doggett; Valerie Harper and Ed Asner stumped for House candidate Jane Groves in Minnesota; singer Paul Simon appeared for Rep. Paul Simon in Illinois.

## Senior sets career goals in Washington

By MICHAEL STUMP  
Staff Writer

Though some students must serve an internship before they graduate, others take them on their own gain practical experience while in college and increase their employment chances.

Such was the case for senior political science major Gayle Kennedy, who recently participated in the Washington Center program, working for the Peace Corps in Washington, D.C.

Kennedy worked in the corps' Women in Development office.

"I was doing research on the role that women play in labor," said Kennedy. "We were working on trying to incorporate women into international development," she

said.

If this subject seems confusing, that's understandable. "It was pretty hazy to me at first," said Kennedy.

She gave an example of how modern industrialized countries try to help the developing nations:

"Let's say a United States organization, in trying to help a family in a developing country in Africa, gave them an extra water buffalo. What this actually does is put an extra burden on the woman because she has to do all the work in caring for the animal," said Kennedy.

Through her Peace Corps internship Kennedy landed a staff position with an organization called In Our Own Way, working on a pro-

ject with women community leaders. Kennedy stayed in Washington for an extra six months to form an experience which she said changed her life.

Kennedy said before her internship she did not know what she was going to do:

"It was a pretty pessimistic field," she said, referring to her concentration in international relations. "But after Washington I now know what I want to do. I know what skills I need and what classes I have to take.

Kennedy says she wants to go into the Peace Corps and possibly graduate from school.

"I think that's a classical get-my-hands-in-the-dirt kind of idea," she said.

## SPOKEN HERE...

Shirley Joe, Mike Lynch, Leonard Cravens, Doug Wilson, and Li-Hwa Lung, are CAL POLY graduates, and are among our many MIS Trainees who have gone on to successful FMC careers as

- Systems Analysts
- Programmer Analysts
- Technical Analysts
- Data Base Analysts

The Information Resources Department at FMC offers you, the new graduate, the opportunity to develop your analytical skills in our growing organization. Through the effective use of high technology in a hands-on environment, we have become a major asset to this multi-national corporation whose annual revenue exceeds 3½ billion dollars.

MIS Systems plays a key role in this success, and is expanding to meet the increasing business systems challenges. The MIS environment includes large IBM and DEC hardware, IMS/VS and Computervision IV software, challenging assignments, modern office facilities and a commitment to employees demonstrated by competitive salaries and career development opportunities.

For the recent graduate, we provide an MIS training program which covers applications in General Ledger, Cost Accounting, MRP, Master Scheduling, Inventory Control, Human Resources and Project Management. There will also be extensive training in the technical aspects of business computing, including TSO/JCL, RANIS, OS/JCL and COBOL programming, and hands-on IMS Data Base and Data Computing experience. If you are an MIS or CS graduate, we invite you to explore a career with a company dedicated to achievement, productivity and professional growth.

Evening Information Session  
Sunday, October 21st  
Interviews  
Monday, October 22nd

Contact the Placement Office for details. Plan to visit us, or write to M.A. Weingartner, Manager, College Relations, FMC Corporation, 1105 Coleman Avenue, Dept. E-84, San Jose, CA 95108. FMC is an equal opportunity employer.

## Alternative education

Washington Center places interns in nation's capital

By MICHAEL STUMP  
Staff Writer

A representative from the Washington Center, a non-profit internship program open to all majors, will be on campus Tuesday to show a video tape and answer questions about the program.

Ruth Marshall will be in University Union Room 204 from 1 to 2:30 p.m. The video presentation lasts about 15 minutes, giving background information and showing interns in typical work settings.

The Washington Center, begun in 1975, is what Carl Lutrin, Cal Poly political science professor and liaison for the Center, calls "alternative education."

Students earn 12 to 14 units working in Washington, D.C. for a congressman, senator, or government organization. Some examples are the House Budget Committee in the U.S. Congress, or in executive agencies, such as the National Endowment for the Humanities or the Federal Trade Commission.

Qualified applicants are usually given three or four different internship options.

According to a pamphlet published by The Center, no more than 20 percent of the work is clerical.

The Washington Center may be unique because students must pay to participate. The fee is about \$1,420 for the program and housing. Some intern-

ships, however, are paid.

Lutrin said it is unique in other ways, offering many benefits conventional internships cannot match. For one, students who qualify are automatically placed. Another is that interns are set up with a sponsor, a guide or supervisor available whenever problems occur.

"You sign a social contract with the sponsor to work to the best of your ability," said Lutrin.

He said the program is valuable for other reasons as well.

"It's practical experience. Most employers will be impressed by the fact that you traveled 3000 miles. It also builds responsibility," Lutrin said.

"Another asset is that it is very valuable to live in Washington, D.C. The resources there are enormous."

Housing provided by the Washington Center is located 2.5 miles from the White House.

Besides a fairly rigorous work load, usually 40 hours per week, interns are required to enroll in an academic seminar to complement the work experience. Lutrin said such figures as Carl Bernstein and Henry Kissinger have appeared before.

For more information about the Washington Center program, call Carl Lutrin at 546-2978.

# Shared Strength

When the right talents and the right resources come together, the result can be a legend in the making. Now, two landmark companies, Chevron and Gulf, are joining forces to become one of the world's strongest and most efficient energy producers.

When complete, the merger will be the largest in the history of American business. It will create the kind of team most managers can only dream about... and a whole new lineup of opportunities for energy professionals.

The technology, the experience, the financial strength... and an imaginative, venturesome spirit bred in the oilfields and refined by meeting a nation's complex energy needs... all of it will come together on the new Chevron team. Join us as we join forces. Chevron Corporation, Professional Employment Office, P.O. Box 7137, San Francisco, California 94120-7137.

An equal opportunity employer.

## Reggae comes alive locally

By PEGGY GRUENEBERG  
Special to the Daily

Peggy D. Grueneberg

Mutabaruka on stage at the San Luis Obispo Vet's Hall.

Many people who have associated music with Bob Marley were in for a surprise last week when stylists extraordinaire Eek-a-Mouse and headliner Mutabaruka performed at the San Luis Obispo Veterans Memorial Hall to a sold-out audience.

Ray-Gun, a reggae band from Santa Barbara, opened the show with some highly danceable ska-reggae hits, played on such instruments as the saxophone and oboe. The crowd grew restless, though, waiting for the main attractions. The only organ available was not working and could not be used, causing a half-hour delay.

At about 11 p.m. the much awaited Eek-a-Mouse entered clad in a Yankee Doodle outfit, one of his many stage costumes. The 7-foot "sing-jay" immediately captivated his audience with his unique high-nasal "biddy biddy bong bongs."

Though his light Jamaican-style rap might have a humorous twang, Mouse's popular tunes like "Neutron Bomb," "Crime" and "Gun Shot a Cry" gave weight to his social consciousness. Mouse explored a number of other themes ranging from religion to more romantic endeavors to playful tongue-in-cheek tunes like "Safari," which mimics the once popular tune "The Lion Sleeps Tonight."

Backed by the outstanding Jamaican band Jahmalla, the crowd seemed to forget about the pre-show delay as the "Mouseketeer" came back to the stage for his encore.

Geared up from the elastic enunciator, the audience was in for another shock as the deadly serious Muta appeared on stage. "De System" was the prime target for the socially conscious poet, who began his career by studying such poets as Shakespeare, Chaucer, Milton and Keats.

Muta, born in Kingston, Jamaica as Allen Hope, felt that he had to relate his experience to that of his people. His first books include *Sun and Moon* followed by *Outcry* and *The Book: First Poems*.

Due to the unfortunate time delay, the show ended at 1 a.m. and Mutabaruka did not come out for a well-deserved encore for an all-too-short set. Yet his message emerged intact to the listening audience that in reggae, "the rhythm is for your body, the words are for your soul."

## Engineers Develop your future with Ampex

**Software Engineers**  
We are designing real-time systems utilizing UNIX and "C". Experience with the VAX-11/780 or DEC's PDP-11 computers is preferred. Familiarity with VMS, UNIX and "C" language is highly desirable. Much of our software design provides real-time control of complex hardware such as videotape recorders or disc memories. Other areas include communication networks, and image processing.

**Electrical Engineers**  
We have design opportunities in most areas: analog record and playback systems, phase lock loops, state-of-the-art servo systems, digital coding, error correction, disk controllers, high speed data channels, high speed digital circuits using TTL and ECL and system interfaces. Digital systems vary from software control systems to high speed servo and signal circuits. We use semi-custom LSI circuits and are designing our own VLSI chips.

**Design Test Engineers**  
We use automated test equipment in our factories so that the engineering teams include designers of sophisticated test fixtures and programs to interface with the factory equipment.

**Mechanical Engineers**  
Ampex deals in microinches as most companies work in thousandths. You will work on high density video and instrumentation products or Winchester disk systems dealing with complex mechanisms rotating at very high speeds; magnetic heads whose gaps have tolerances of a few microinches; and state-of-the-art high speed actuators. Knowledge of mechanisms and the circuits required to drive them is desired.

**SIGN UP WITH YOUR PLACEMENT OFFICE

## Cross country team again 2nd to Stanford

Cardinals sweep three spots neutral turf

KRAEMER

Without a home course advantage, the Stanford women's cross country team finished the Cal Poly Invitational out in front. A 1-2-3 finish, resembling last year's finish line formation by the Mustangs, again put Cal Poly back in second place.

Stanford has the perfect combination of both front runners and depth," said Lance Harter, coach of the Mustangs.

Stanford's Regina Jacobs again showed her prowess over the 5000 meter race by finishing the Golden Fields course more than 30 seconds ahead of teammate Alison

Root, Poly captain, again showed her consistency, finishing second overall, first for the Poly Mustangs. Root's time over the 3 mile race was 17:13.4.

Robyn continues to provide leadership on and off the course," said Harter. "With this establishment of consistency, Robyn should be a favorite for the individual title at the Division II national

Robyn Root (right) and Jennifer Dunn running during workouts last week. Root placed fifth at the Cal Berkeley Invitational, but first among Cal Poly runners. Dunn was fifth among Poly runners.

Despite only a 26 second spread between the first and fifth Poly runners, the Mustang group was broken up by the Stanford and University of Texas teams. Sophomore Katy Manning came back after a disappointing finish at the Stanford race to be the second Mustang in, eleventh overall.

Junior Lori Lopez has been moving up for Poly. Lopez has been improving her placing every week, working up to a national finish. Vicky Bray and Jennifer Dunn were fourth and fifth for the Mustangs rounding out the team score to 62 points. Poly, ranked in the top six of the

NCAA national poll, is the only team to race head to head against the Stanford Cardinals. No other team in the top ten has run against Stanford, said Harter. "And I don't think that anyone will come as close as we did."

Poly will now turn their attention away from Division I competition and prepare to take another Division II national title.

This Saturday the Cal Poly women and men cross country will compete in the only home competition of the year. The 5000 and 10,000 meter races begin at 10:00 a.m. and 10:30 a.m. at the Crop Science Unit on Highland.

and prepare to take another Division II national title.

This Saturday the Cal Poly women and men cross country will compete in the only home competition of the year. The 5000 and 10,000 meter races begin at 10:00 a.m. and 10:30 a.m. at the Crop Science Unit on Highland.

## Harriers second at UCSB

By KIM MILLER  
Staff Writer

Even with nine of Cal Poly's Men's Cross Country team out of competition in this weekend's UCSB Invitational, the Cal Poly runners placed second behind Long Beach State University.

Coach Tom Henderson said the team's top four runners remained at home to rest up for the home meet next weekend which will determine the seven men to represent San Luis Obispo in the regional and conference championships.

Again this week a different man tied up the number one scoring position. Henderson said Jerry Hernandez ran the 10,000 meter course in 32:57, running his best race of the year.

"The UCSB course is considered very slow. It has many turns, narrow trails and soft sand on several parts of the course," the coach said.

Nelson Bernal and Ken Ellingboe placed 2nd and 3rd finishing six seconds apart with 33:12 and 33:18.

Chuck Fanter and Doug Gollieher finished 26th and 28th overall as Cal Poly's fourth and fifth scoring men.

Four other runners besides Fanter, Chris Craig, Rod Grieve, Sean Crowley and Dave Basinger, all ran the race as a workout. Henderson said, "They started from behind and ran in the back for the first three miles of the race. From there they worked together through six miles. The last .2 miles, they were allowed to run however they felt."

Next weekend Cal Poly hosts the eighth annual San Luis Obispo Invitational. Henderson said a 5,000 meter community race is scheduled to begin at 9:00 a.m. The women's cross country team race will begin at 10:00 a.m. followed by men's team racing at 10:30 a.m.

Chuck Fanter running at the Aztec Invitational in San Diego several weeks ago. Fanter placed 26th at the UCSB Invitational last Saturday.

## ENGINEERS ON CAMPUS INTERVIEWS DATA GENERAL AUSTIN, TEXAS

Trying to decide where to start your career? Consider Austin, Texas. A beautiful city in the heart of Texas where the sun shines nearly 300 days per year on our parks, rolling green hills and lakes.

Data General Austin is also an ideal place to start a career. It has the strength, stability and resources that reflect the major corporation it is — with sales of a billion dollars per year. And it has a small-company atmosphere. Here, people work together in small teams. They have a large measure of independence in advancing their technological solutions. They turn out excellent products. And they get a full measure of recognition for their contributions.

At Data General, we realize that college graduates need challenging work, and we're willing to give it to you. We have expanded our product line, which now encompasses the entire spectrum of minicomputers, from the most advanced virtual memory 32-bit computer to a 9½ pound portable computer.

Data General Austin plays a major role in the whole corporation. Our divisions can play a major role in your success.

The Research division designs microprocessor-based terminals, work stations and printers, as well as graphics software. We are looking for electrical engineers (both analog and digital), mechanical engineers and graphics programmers.

The Manufacturing division produces microprocessor-based terminals, printers, tape drives and power supply PCBs. We are looking for electrical engineers (both analog and digital), mechanical engineers, and industrial engineers to work in manufacturing engineering, quality engineering, test engineering, industrial engineering, automation engineering and new products engineering.

**Austin representatives from both Research and Manufacturing will be on campus October 18th.**

**Why not join us here - in Austin! Sign up at the Placement Office.**

**Join the team that is a generation ahead of the rest.**

Data General Corporation, 2708 Montopolis Drive, Austin, Texas 78741 Investing in people to make equal opportunity employment a reality.

 **Data General**  
careers a generation ahead.

## Jabbar to make this final year

LOS ANGELES (AP) — Kareem Abdul-Jabbar intends to end his outstanding basketball career this season, and the game's all-time leading scorer says that he'll leave with memories but no sadness.

"I've had a great career and I'm happy I was able to play as long as I have," said the Los Angeles Lakers' 37-year-old center, currently the oldest player in the National Basketball Association. "It's not sad. There's a lot more left for me in life."

"I feel pretty good about everything. I have the opportunity to leave at close to the top of my career."

Abdul-Jabbar, winner of the NBA's Most Valuable Player Award six times, announced last season that 1984-85 would be his final campaign.

Asked whether ceremonies honoring him around the NBA cities this season might prove distracting, he said, "No, it will be nice to relate to the fans," then added with a grin, "But I promise I won't be like Dave Cowens (former Boston center) and come back and play after taking all the presents."

Abdul-Jabbar, who goes into this season with 31,527 career points and has been a dominant force in the league for the past 15 years, said he isn't setting any lofty goals for his final year.

"Sure I'd like to win a championship, just as I've wanted to every year," he said. "But I just want to live up to the standards I've set."

"If I come close to last year, I don't think I'm capable of doing much better than that," added the player who led the Lakers in scoring (21.5), rebounds (7.3) and minutes played (32.7) last season.

Abdul-Jabbar also scored 25 points and grabbed 13 rebounds in his 14th NBA All-Star Game.

## Sparky talking about next year for Tigers

DETROIT (AP) — The World Series trophy barely had been passed to the Detroit Tigers when Manager Sparky Anderson began to think about next season.

"The greatest challenge for this club is to win in 1985," he said. "It must win in '85. It's a must for these players. It's a must for this team. It's a must for these fans."

"Vince Lombardi once said that every squirrel can find one acorn. Let's see if we can find a bunch of them."

The Tigers captured their fourth World Series title, their first since 1968, with an 8-4 victory Sunday

over the San Diego Padres in the Series' fifth game.

It was the end to a rare front-running season. The Tigers not only led the American League East Division from beginning to end — becoming only the third team in baseball to do so — but they won 35 of their first 40 games.

"Even though we won all those games, we didn't get a chance to show what we were until the last game," said Detroit center fielder Chet Lemon. "We were 35-5, and still had to prove it. Then, we were 7-1 in the playoffs — the same percentage. Now the world knows."

The Tigers won a club-record 104 games, holding no less than a seven-game lead from July 1 until the end of the season and finishing 15 games ahead of second-place Toronto. The front-running season put them in the select company of the 1927 New York Yankees and the 1923 New York Giants.

The Tigers beat Kansas City in three straight games in the American League playoffs, and needed only one game over the minimum to beat San Diego in the World Series.

In the revelry of triumph, catcher Lance Parrish did not think any team could have stood in the Tigers' path.

"I don't think anyone could," he said. "Winning 35 of 40 was fantastic. We just put it all together. We are world champions."

## Green not blue at Open

COLUMBUS, Ga. (AP) — Hubert Green, who finally ended a three-year dry spell with a victory in the Southern Open golf tournament, said he wasn't over the hill as some people had indicated.

"I played like I was over two or three hills," he declared with a grin Sunday after winning for the first time since the 1981 Greater Hartford Open.

Green shot a steady, bogey-free 3-under-par 67 to capture the \$54,000 first prize by six strokes with a 265 total, 15-under-par over the par 70, 6,791-yard Green Island Country Club course.

Scott Hoch, Rex Caldwell and rookie Corey Pavin shared second place. Hoch, three shots off the

pace entering Sunday's final round, shot a 70. Caldwell had a 66 and Pavin a 68.

The victory was Green's 18th of his 15-year career and increased his lifetime earnings to \$1.76 million and \$135,753 this year. Last year, his worst on the Tour, he won only slightly more than \$29,000.

Asked if he felt like he was back to his heyday from 1973-79, the 37-year-old Green replied:

"No. But I'm a lot closer than I was six months ago. I'm no longer crawling. I'm walking now, but I'm still not running yet. The fact is, the last four or five years I played awful."

He took the lead after the second round and never relinquished it.

## Texas ties to be No. 1 in country

Will there even be a No. 1 college football team this week? Coach Fred Akers of top-rated Texas wants to maintain the status quo. Don James of runner-up Washington doesn't want the pressure of being No. 1 as yet and Barry Switzer of third-ranked Oklahoma says he'll "let y'all (the media) decide that."

So maybe Jeff Ward, whose 32-yard field goal as time ran out gave Texas a 15-15 tie with Oklahoma, has the right idea.

"What they should do is not have any No. 1 team this week," Ward says. "We (Texas and Oklahoma) should both be ranked No. 2 and we should go from 2 through 20."

There seems to be as much difference of opinion a-out No. 1 as there was in the controversial Texas-Oklahoma shootout, which ended with Switzer claiming that the officials "actually took the game away from us."

Akers politicked that Texas "should stay just where we are. The last I heard, you stay No. 1 unless you lose. That's the way it is in championship fights."

But defensive tackle Tony Degrate of the Longhorns thought that Washington deserved the top spot following the Huskies' 37-15 triumph over Stanford, one of just two easy victories by members of The Associated Press Top Twenty, the other being 10th-ranked Miami's 49-25 trouncing of Cincinnati as Bernie Kosar set school records by passing for 375 yards and five touchdowns.

"We tied and the No. 2 team won. That should settle it," Degrate said.

But the very thought of being No. 1 had James squirming.

# To every roommate about to become a friend.

Right now, about the only thing you have in common is the same room. But you and those strangers who moved in with you are going to crack a lot of books and burn a lot of midnight oil together.

You're going to discover the people behind the nametags, the ones inside the roommates. And who knows? Before the term is over, your roommates may very well turn out to be good friends.

To each of you we say, let it be Löwenbräu.

**THE HANDS-ON, HIGH-TECH TEAM**

Evening Information Session — Sunday, October 21st  
 Campus Interviews — Monday, October 22nd

FMC offers you, the new graduate, the opportunity to apply and broaden your skills in a unique environment. FMC is a major multinational producer of machinery and chemicals for industry, agriculture and government. We're using high technology in a hands-on environment to produce results in such diverse areas as energy, defense, food and heavy machinery.

Our broad range of products, services and professional development programs provide the scope and flexibility you need. You'll gain hands on responsibility and professional experience from the start.

If you are an engineering graduate, we invite you to explore a career with a company dedicated to achievement, productivity and professional growth. FMC's Hands-On, High Tech Team.

Come to our evening Information Session on Sunday, October 21. On Monday, October 22, we will be on campus to interview qualified individuals. Plan to visit us, or write to M.A. Weingartner, Manager, College Relations, FMC Corporation, 1105 Coleman Avenue, Dept. E84, San Jose, CA 95108. FMC is an equal opportunity employer.
