ABSTRACT

The phenomenon of turnover is inevitable in any organization. This issue brings massive ramifications on cost to the organization especially during the training and recruiting process. It also gives negative perception from external stakeholder’s due impact of performance of that are influenced by the turnover. Job satisfaction and organizational commitment are two key constructs identified that influence the turnover intention. This study is conducted to examine the relationship between job satisfaction and organizational commitment towards turnover intention among medical officers in Hospital Ampang. For this study, non-probability sampling technique was used. A total of 175 respondents consisting of medical officers in Hospital Ampang participated in the study and the data that has been collected was analyzed using Statistical Package for Social Science (SPSS). Descriptive analysis presented the demographic profile of respondents. Research questions were answered using the Correlation Analysis and the SWOT tool to elucidate the ecosystem surrounding the issue affecting turnover at Hospital Ampang. This research has found out that both job satisfaction and organizational commitment have negative relationships with turnover intention. Recommendation were provided using TOWS analysis according to findings in SWOT analysis.
ACKNOWLEDGEMENT

Firstly, we would like to thank God Almighty for giving us patience, good health, inspiration and determination to finish our research.

Secondly, we also blissful to have Dr. Amina Josetta Ghulam Ahmad Kayani as our advisor, the person who always gives us aspiration, strength, useful information and guidance in order to complete our Applied Business Research (ABR) project paper with distinction. May Allah bless you with the best in everything.

Thirdly, we would like to take this opportunity to express our gratitude to all lectures, our deans and fellow faculty member at UiTM for abundantly encouragement, supports and guidance throughout the completion of our Master in Business Administration.

Last but not least, special dedication to our respondents at Hospital Ampang for feels free to be part in our research without asking for reward. We take their contribution as a valuable input and definitely without them our research would not be completed.

Our special dedicated also to our parents, family members and friends for their endless love, support, and encouragement in completing this report. Lastly, to our group member, through thick and thin we grow together.

We thank all from the bottom of our hearts.
