THIS THESIS IS DEDICATED TO:

My beloved mother and father
  My sisters
  My brother
  My friends
ACKNOWLEDGMENTS

Bismillahirrahmanirrahim. Alhamdulillahihirobbil’alamin. Praise be to Allah SWT, the Most Merciful, who has given the writer the unremarkable blessings without which she would have never finished this thesis. In this opportunity, she would like to acknowledge and thank those people who contributed to this thesis.

The writer would like to express the deepest thank to both consultants, Dr. Agus Widyantoro, M.Pd. and Sudiyono, S.Pd., M.A., whose encouragement, guidance and support from the initial to the final phase of this writing enabled her to develop an understanding of the subject. Without their guidance and persistent help, this thesis would not have been possible.

The writer is also grateful to Ibu Isti Rahayu, S. Pd. and Ibu Nur Ngaini, S.Pd, the English teachers of SMA N 1 Sanden, for supporting the project. My appreciations also go to all the eleventh grade students of SMA N 1 Sanden for their cooperation during this study.

In addition, the writer offers her greatest gratitudes to her family; the writer’s parents, Bapak Maryanta and Ibu Ngadiyem, for their prayers, support, and extraordinary courage, and the writer’s brother, Dwi Erfyan Sukendar, for giving the writer prayers and support.

The writer is also greatly indebted to her many friends: Swamida, Sukma Sinta, and Linda for sharing many fun experiences; all friends from class A (Ndaru, Gusta, Kiki, Tyas, Nisa, Listi, Ayu, Yayuk, Febi, and Dewi) who have always given the writer supports and encouragements to finish this thesis; and all of the friends in the Department of English Language Education (Fani, Amy, Mbak Brian, Mbak Wulan, Santi, and the other friends who could not be mentioned one by one) for their togetherness during the process of this thesis.

A big thank is also addressed to Sriwijaya Bharata Sakti for waiting so long for this thesis. Besides, gratitude is also expressed for teaching the writer to appreciate herself, and for everything that has been and will be.

Finally, the writer realizes that this thesis is still far from being perfect. She realizes that many mistakes have been made even though they all have been corrected. Therefore, criticisms and suggestions from readers are highly appreciated for the improvements of this thesis.

IMPROVING THE STUDENTS’ READING COMPREHENSION THROUGH
KNOW-WANT-LEARN TECHNIQUE AT THE ELEVENTH GRADE OF
SMA NEGERI 1 SANDEN IN THE ACADEMIC YEAR OF 2012/2013

by:
Eko Yuniarti
08202241019

ABSTRACT

This study is aimed at finding out the impacts of the use of Know-Want-Learn technique in improving the reading comprehension among eleventh grade students of SMA N I Sanden in the academic year of 2012/2013.

The study was action research in two research cycles. In the study, the researcher collaborated with the English teachers and the students. The data of this study were qualitative in nature supported by quantitative data. Qualitative data were obtained from the results of classroom observation and collaborators’ discussion. Quantitative data were obtained from pre-test and post test results. The instruments for collecting the data were observation guides, interview guides, and the pre-test and post test. The data were in the form of field notes, interview transcripts, and the scores of the students’ pre-test and post test. A t-test was used for the analysis of the quantitative data.

The results of the two cycles show that the use of Know-Want-Learn technique is effective to improve the students’ reading comprehension. It is supported by the qualitative data which show that (1) Know-Want-Learn technique can help the teacher to scaffold the students’ comprehension of the text by focusing on the steps before, during, and after reading; (2) Know-Want-Learn technique can help the students to preview the text, assess what they have learned after reading, and attract their interest in reading; (3) The kind of activities given such as preteaching vocabulary, using skimming and scanning, using fix-up strategies, and guessing meaning can help the students to read the text efficiently. The finding is also supported by the quantitative data. The mean of the students’ reading comprehension scores improves from 70.5 in the pre-test to 82.5 in the post-test. According to the t statistic, the difference is significant at \( p < 0.05 \). From the results above, it can be concluded that the use of Know-Want-Learn technique can improve students’ reading comprehension.
CHAPTER 1
INTRODUCTION

The objective of this study is to improve the students’ reading comprehension at grade XI of SMA N 1 Sanden through Know-Want-Learn (KWL) technique. This chapter presents the background of the problem, the identification of the problem, the limitation of the problem, the formulation of the problem, the objective of the study, and the significance of the study.

A. Background of the Problem

SMA Negeri 1 Sanden is one of the Senior High Schools in Bantul regency. The school is situated at Jalan Murtigading, Sanden, Bantul regency, Yogyakarta province. The school is one of the favourite schools in Bantul. It gets numerous achievements in many competitions such as sports, arts, and march. It also has complete facilities to support the teaching and learning process. The school has been given an A score for the school accreditation on March 2006 by Yogyakarta School Accreditation Board.

SMA N 1 Sanden uses the School-Based Curriculum (KTSP) for its teaching and learning processes. The use of the School-Based Curriculum (KTSP) in the secondary education is based on the Law No. 20, 2003 about National Education System. The School-Based Curriculum (KTSP) gives more autonomy for schools. It allows the teachers to develop their own syllabus which is based on the characteristics and needs of the learners.
Based on the School-Based Curriculum, the English teaching and learning processes in Senior High School have three objectives. First, the teaching and learning processes are aimed at making the students master English in an informative level. In this level, the students are prepared to continue their study to the higher level. Second, the teaching and learning processes are aimed at building students’ awareness of the importance of English in the global community. In this objective, the teaching and learning process is directed to help students in mastering English as an international language. Third, the teaching and learning processes are aimed at improving students’ understanding of the relationship between language and culture. This means that students are expected to learn not only the language but also the culture of the English speaking countries.

This study is focused on the second objective of English teaching and learning processes which are aimed at building students’ awareness of the importance of English in the global community. In this objective, the teaching and learning processes are aimed specifically at making the students master the four skills namely listening, speaking, reading, and writing.

From the preliminary observation and some interviews with the English teacher and some students at grade XI of SMA N 1 Sanden, the researcher found a problem in the English teaching and learning process. The problem was related to the students’ reading comprehension. The students found that understanding an English text was the most difficult subject for them. When they were given a text to read, they still got difficulties in getting
meanings of difficult words so that they had to use their dictionaries when they found words they did not know the meaning. When the teacher asked the students to answer some questions based on the text orally, most of the students could not give the correct answers. The condition indicated that the students have low proficiency in understanding a text.

Considering the facts above, the researcher believes that some efforts are needed to solve the problem in the English teaching and learning processes especially in the teaching of reading comprehension. In order to solve the problem, the researcher is motivated to conduct action research. It involves the English teacher in the school to find out the best solution of the problem in the teaching of reading comprehension at eleventh grade students of SMA N 1 Sanden.

**B. Identification of the Problems**

From the classroom observation and the interview with the English teacher in SMA N 1 Sanden, the researcher finds some problems related to the students’ low proficiency level in reading comprehension. The problems are related to the students, the learning materials, and the teaching technique.

The first problem is related to the students. From the classroom observation in the eleventh grade, the researcher finds some problems related to the students. First, the students have low vocabulary mastery. When they are given a text to read, they do not know the meanings of most words in the text. They have to use their dictionaries to find the meaning of the words. They tend to translate every single word in the text. Second, the students
not aware of the use of learning strategies. They do not know how to use the efficient comprehension strategies such as using prior knowledge, making prediction, skimming and scanning, or guessing the meaning from the context. The use of those learning strategies contributes to the success of the learning processes. Third, the students are not interested in reading a text. They find that reading an English text is boring and stressful. This condition made the students find difficulties in understanding the text.

The second problem is related to the teacher. The teacher dominates the whole session of the lesson as she talks to the students in most of the time of the teaching and learning process. The teacher does not give a chance to the students to share knowledge. Besides, the teacher never models how to use efficient reading comprehension strategies. The teacher just lets the students read the text and then do the task by themselves. Sometimes, the teacher just asks the students to submit the work without giving feedback to the students so that the students do not really know how to comprehend the text.

The third problem is related to the media used in the teaching of reading. There are no media used in the classroom. The students are only given a long text to read. The teacher said that it is difficult for her to find some related pictures for the students, whereas the use of pictures can stimulate the students to recall their prior knowledge related to the topic of the text.
The fourth problem is related to the teaching technique in the teaching of reading comprehension. The teacher only focuses on testing students’ ability to translate the text and answer the questions based on the text. It can be seen from the monotonous activities which consists of reading aloud, looking for the meaning of English words in the dictionaries, and finally answering the questions based on the text.

C. Limitation of the Problem

The researcher and the collaborators of this research agreed that the instructional reading technique, called Know-Want-Learn (KWL) technique, has great contributions to improve the students’ reading comprehension. Therefore, the problem of this study is limited to improve the students’ reading comprehension through Know-Want-Learn (KWL) technique at the eleventh grade of SMA Negeri 1 Sanden which will be determined in the field collaboratively.

Know-Want-Learn (KWL) technique is proposed as the treatment to improve the students’ reading comprehension since it has well-organized steps to scaffold the students in understanding text. The technique helps the students to activate their background knowledge before reading, monitor their comprehension when they are reading, and evaluate their comprehension after reading. Besides, Know-Want-Learn (KWL) technique can also be easily implemented in the classroom. The students only need to complete graphic organizer namely KWL chart to record their thinking process.
Based on the observation and interviews, this action research would only be implemented in class XI IPS 3 since the students of XI IPS 3 had low proficiency in reading comprehension. It is expected that *Know-Want-Learn* (KWL) technique can scaffold the students in understanding the text so that the students can improve their reading comprehension.

**D. Formulation of the Problem**

Based on the identification and limitation of the problems above, the research question is formulated. The research question is stated as “How does the use of *Know-Want-Learn* (KWL) technique improve the students’ reading comprehension at grade XI of SMA Negeri 1 Sanden?”

**E. Objective of the Study**

This study is aimed at improving the students’ reading comprehension at grade XI of SMA Negeri 1 Sanden through *Know-Want-Learn* (KWL) technique. During the study, the use of *Know-Want-Learn* (KWL) technique helps the students to activate their prior knowledge, monitor their comprehension, and record what they have learned from the text. At the end of the study, the students are able to improve their reading comprehension by the use of *Know-Want-Learn* (KWL) technique.

**F. Significance of the Study**

The researcher hopes that the findings of this study can give benefits for some parties. The first is for the English teachers especially in SMA N 1 Sanden. The researcher hopes that the findings will give new information about the learning technique which can be used to improve the students’
reading comprehension. The second is for the eleventh grade students in SMA N 1 Sanden. The researcher expects that the use *Know-Want-Learn* (KWL) technique will improve the students’ reading comprehension. The third is for the researcher herself. This study will be used as an experience on how to conduct an action research study particularly in improving reading comprehension. Besides, this study becomes an experience in developing her knowledge and skills in problem solving process. The last is for other researchers. The result of the study will be a reference to conduct a similar study.
CHAPTER II
LITERATURE REVIEW AND CONCEPTUAL FRAMEWORK

This chapter deals with some theories that become the bases for the discussion. The purpose of the chapter is to get the understanding of what the basic principles of the research are, so that the problem stated in the previous chapter can be answered. The discussion will be presented in four headings. They are related to reading comprehension, the teaching of reading comprehension, the concept of Know-Want-Learn (KWL), and conceptual framework.

A. Reading Comprehension

In this subchapter, the researcher presents some theories related to reading comprehension. There are four main points to be discussed in this subchapter. They are the definition of reading comprehension, the process of reading comprehension, factors affecting reading comprehension, and the strategies in reading comprehension.

1. The Definition of Reading Comprehension

Reading comprehension is the process of constructing meaning involving the written language by interpreting textual information in the light of prior knowledge and experiences using appropriate and efficient comprehension strategies (Snow, 2002: 11, Mikulecky & Jeffries, 1990: 3, Johnson 2008: 110). The process of constructing meaning is the process in which the reader combines their prior knowledge with the additional information from a text, draw the meaning of words, and connect it to reach the clear understanding of
the written text (Pang, et al., 2003: 14). In this process, the reader uses their prior knowledge about the topic, language structure, and text structure to understand the writer’s message (Lenz, 2005:1). In the process of understanding the message which is stated or unstated in the text, the reader also needs to use various strategies such as predicting, clarifying, and confirming. Those are all strategies used by the reader for the negotiation of meaning.

From the definition above, reading comprehension can be defined as the process in which the readers construct meaning from a text connected to the background knowledge they have to get the clear understanding of the writer’s message.

2. The Processes of Reading Comprehension

As it is mentioned before, reading comprehension is the process in which the reader constructs meaning from the text. There are at least three types of constructing meaning processes proposed by some experts. The three processes of constructing meaning of the text are presented below.

a. Bottom-up processing

Bottom-up processing views the process of reading as phonemic units. In bottom-up processing, the reader must recognize a multiplicity of linguistic signal such as letters, morphemes, syllables, words, phrases, grammatical cues, and discourse markers (Brown, 2001: 299). It means that the reader has to scan from letters to letters, recognize the words from one to another, associate among phrases, clauses, and sentences, and finally it is processed
into phonemic units representing lexical meaning and attains some comprehension of the text.

**b. Top-down processing**

In top-down processing, the reader involves their knowledge of syntax and semantic to create meaning of the text (Goodman cited in Hudson, 2007:37). The reader constructs meaning by bringing their early thought to the text being read. It means that the reader’s background knowledge is very important in getting the meaning of the text. In top-down processing, the reader makes some prediction of the text. The process is continued by taking samples which will be confirmed or not to the predictions have been made before. Finally, the reader checks the predictions.

**c. Interactive processing**

Interactive processing is a combination of top-down and bottom-up processing. In interactive processes, the reader predicts the probable meaning of the text, then moving to the bottom-up processes to check whether that is really what the writer says (Nuttal cited in Brown, 2001: 299). It means that the reader both recognizes words and predicts the implied information in constructing meaning of the text.

From the discussion above, it can be concluded that there are three types in the process of reading. They are bottom-up processing, top-down processing, and interactive processing. Bottom-up processing deals with the word recognition. Top-down processing deals with the readers’ background knowledge. The last, interactive processing combines the top-down and
bottom-up processing. Here, interactive processing combines word recognition and background knowledge of the readers. The three processes help the readers to comprehend the text they read.

3. Factors Affecting Reading Comprehension

There are many ideas of the factors affecting reading comprehension proposed by some experts. Below four factors affecting reading comprehension are presented.

a. Background knowledge of the text

Students’ background knowledge of the text is one of the factors affecting reading comprehension. Readers understand what they read because they are able to take the stimulus beyond the graphic representation and assign it membership to an appropriate group of concepts already stored in their memories. Here, the students’ background knowledge is important since the students start to make connections about what they already know in order to construct meaning (Alderson, 2000: 32, Brown, 2001:299).

b. Affection

Affection factor includes the students’ interest, motivation, attitudes and beliefs. The affective factors have an important role in influencing what is understood by the readers (Alderson, 2000: 32).

c. Purpose of reading

Efficient reading consists of clearly identifying the purpose in reading. Purposes of reading help the reader to focus on information that they want to
find out. A reader can have problems in understanding a text if he reads with no particular purpose in mind (Alderson, 2000: 32, Brown, 2001:306).

d. Vocabulary Mastery

Vocabulary mastery is essential to reading comprehension. It is impossible to understand the text if the readers do not know much about a significant number of the words in the text. By mastering much vocabulary, the reader can construct the meaning of the text easily (Klinger, Vaughn, and Boardman 2007:47).

From the theories above, it can be concluded that reading comprehension is not a single process. It is a complex process which is affected by some factors such as the reader’s background knowledge of the text, the reader’s motivation and interest in reading, the reader’s purpose of reading, and the reader’s vocabulary mastery. All of those factors relate to each other in influencing the reader’s reading comprehension ability.

4. Reading Comprehension Strategies

The use of strategies in reading requires the reader to think about how to approach the text in order to decode and retain information (Roe & Ross, 2006: 12). In this definition, strategies are ways for learners to solve problems encountered in constructing meaning in any context. Strategies chosen by learners are modified to fit the demands of the learning situation. The strategies used by the students must be different from one another. There are some strategies in reading comprehension.

a. Identifying the purpose in reading
Efficient reading consists of clearly identifying the purpose in reading a text. By identifying the purpose in reading before reading a text, the readers know what they are looking for and can weed out potential distracting information (Brown, 2001: 306).

b. Using efficient silent reading technique

Silent reading is appropriate for intermediate and advanced students. This strategy leads the students to try inferring meaning from context. It is also the best practices to make the students become efficient readers (Brown, 2001: 306).

c. Skimming and scanning the text

Skimming is a reading strategy in which the readers quickly run their eyes across a whole text. By skimming the text, the reader will be able to predict the purpose of the passage, the main topic, or message, and the supporting ideas. Scanning is quickly searching for some particular piece or pieces of information in a text. The purpose of scanning is to extract specific information without reading through the whole text. The reader can use this strategy to look for the detail information in the text such as looking for the names or dates, finding the definition of a key concept, and listing a certain number of supporting details (Brown, 2001: 306).

d. Guessing

In this strategy, the students try to guess the meaning of the words when they are not certain or they do not know the meanings of the words, a
grammatical relationship, a discourse relationship, a cultural reference, content messages, and infer implied meanings (Brown, 2001: 306).

e. Questioning

This strategy allows the students to have practice in making questions and then answering by themselves. The questions that should be made are those which can arouse their awareness of what they read. These will represent whether they have understood the text or not.

f. Making predictions and inferences

Predicting means that the readers are using their background knowledge to negotiate meaning of the text. They connect their background knowledge with the information from the text. In inferencing, the readers have to find some of the clues, then combine it to their background knowledge and past experiences to interpret the meaning of the text.

Those are the strategies for having good reading comprehension. The strategies go in line with the two processes, bottom-up and top-down procedures. The reader starts reading by having the first strategy which is identifying the purpose in reading and ends with capitalizing on discourse markers to process relationships. The strategies above are highly required for reading comprehension.

**B. Teaching Reading Comprehension**

Teaching is an activity in which the teacher guides and facilitates learning, gives a chance for the learners to learn, and sets the condition for learning (Brown, 2000: 7). Guidance is done by leading the students to do
activities in the effort of getting knowledge. The teacher can help the students in gaining the knowledge by giving facilities such as tasks. By giving these tasks, the teacher lets the students study by themselves. To make the teaching and learning process run well, the teacher needs to set a good situation for the students to learn. In setting a good condition, the teacher must consider a classroom method or technique that is used as this can influence the way she/ or he manages the class.

Based on the definition above, teaching reading comprehension is a guidance that is done by the teacher to make learners reach their reading comprehension on the text using a certain technique. The teacher can lead the learners to understand a text by using some strategies on reading comprehension (Pang, et.al., 2003: 14).

1. **Principles in teaching reading comprehension**

   In the teaching of reading, the teacher cannot directly just teach reading to the students by giving texts and asks them to understand it. There are some principles which have to be considered by the teacher. As it is proposed by Harmer (1998: 70-71), there are six principles in teaching reading. They are described as follows:

   a. The teacher needs to understand that reading is not a passive skill.

      Reading is an active activity. When the readers read a text, they must do other activity, not just read a text at glance. It means that the teacher does not merely ask the students to read a text, but he/or she has to make them realize that the reading is not a passive skill. It includes the understanding of word
meaning, the arguments stated in the text, and working out with the arguments whether they agree or not.

b. The teacher has to make the students enjoy reading the passage.

To make students interested in reading is important. When the students do not enjoy reading, they will get nothing from it. It is different from when they are interested in what they are reading, they will get more benefits. They can get more knowledge and new information from the text they are reading.

c. The teacher needs to encourage the students in responding to the content of a reading text, not just to the language being used in the text.

Understanding a language is also a part of comprehending a text. However, it is not the common thing in reading comprehension. The students have to respond to the meaning of the text and express their feelings about the topic of the text. That is why it becomes the responsibility of the teacher to encourage them to do that.

d. The teacher should emphasize that prediction is a major factor in reading.

Prediction is one of the strategies in reading comprehension. Before the students come into the text, they can do prediction by looking at the title of the text. The title sometimes gives clues at what the text is about. By doing this, the students will actively start the process of reading. Indeed, the teacher should give clues to make the students comprehend the text easily.

e. The teacher has to match the tasks to the topic.

Tasks are one of ways to check the ability of the students in comprehending a text. Good tasks are those that are suitable for the topic
being discussed. Tasks can be made by questions and puzzle. In this case, the teacher has to consider choosing or creating the right tasks for the students.

f. The teacher should exploit reading texts to the full.

Exploiting reading texts to the full means that the teacher does not ask the students to read a text and then move to another activity having no relation to the text. However, the teacher should cover all the things that the students can work out with the text. The teacher has to discuss the text fully, study the language, give additional tasks to the students.

2. Problems of teaching reading comprehension

Teaching reading is a part of the activity in teaching English that must be done by the teacher. Some teachers find problems in teaching reading comprehension. The first problem is that the teacher cannot know exactly the students’ prior knowledge (National Research Council, 2003: 62). Although the teacher has taught some materials which are related to the topic that will be discussed, she or he cannot make sure that all the students can understand the material well. It becomes a serious problem in teaching reading comprehension as prior knowledge is very important to the students’ reading comprehension.

Teachers find the fact that deciding suitable tasks of reading are complicated (National Research Council, 2003: 63). It is reasonable enough as tasks will influence the students in comprehending a text. When the teacher can give good and suitable tasks of reading, the students will engage in
reading and comprehension can be easily achieved. Indeed, appropriate tasks and texts help students in understanding texts.

Another problem that might be faced by the teacher is that teachers feel that finding the best method and strategies to teach the students is quite difficult. It is because they face students with different characteristics and levels of intelligence. In fact, the method and strategies chosen by the teacher may affect the students in achieving their reading comprehension. That is why suitable methods and strategies are needed to conduct by teachers in teaching reading comprehension.

From the description above, it is clear that the condition of not knowing exactly the students’ prior knowledge, the difficulty in designing suitable tasks, and the difficulty in choosing the appropriate technique and strategies are problems which appear in teaching reading comprehension. In relation to the last problem, the difficulty in choosing appropriate methods and strategies, the researcher feels necessary to apply certain technique in the teaching of reading comprehension.

3. Components in teaching and learning of reading

Teaching reading can occur when there are some components put together in a certain condition of the teaching and learning process. The components include the teacher, the students, the materials, and the techniques.
a. The teacher

The teacher becomes the most important component in teaching reading as her/or his attitude can influence the students’ performance. She/or he takes role as a facilitator in teaching and learning process not as the instructor (Dorn and Soffos, 2005: 80). The teacher explains and models the strategies that will be used in reading. Besides, she/or he also has to encourage the students to participate in the teaching and learning process and helps them when they have difficulty in reading (Dorn and Soffos, 2005: 31).

b. The students

In teaching reading, the students take the role as the readers. They read many kinds of texts based on the aim of learning in senior high schools such as recounts, descriptive, narratives, expositions, procedures, news items, reports, explanations, and discussion (Permendiknas no.23, 2006: 12). The aims of their reading are to achieve comprehension so that the students can get new information and knowledge from a text they read. To achieve a good comprehension in reading the students must have adequate prior knowledge for understanding the content and sufficient time to process the information, reread the passage, clarify the information, analyze the content, and have opportunities to discuss a text with other students (Dorn and Soffos, 2005: 17).

c. The materials

The materials for teaching reading are closely related to the kinds of the texts. The texts that are chosen must be suitable for the need of the learners
(Harmer, 1998: 68). If the text is too difficult for the students, it will make them frustrated. On the other hand, if the text is too easy for them, they will consider it as unimportant.

It is also considered that the materials depend on who the students are (Harmer, 1998: 69). As this study is conducted in a senior high school, the students are categorized as teenagers whose interest is different. That is why materials are chosen by considering the interest and the need of the students based on the curriculum.

d. Media

Media is one of the components in the teaching and learning process. It can be used by the teacher to facilitate learning. In the teaching and learning process of reading, media such as textbooks, multimedia, advertisements, and the internet become the sources where various texts are presented (Snow and Chair, 2002: 25). The teacher can choose one or two of the media based on the need and the text that will be taught by her or him.

e. The techniques

A technique is one of the important components in teaching reading. The use of a technique will represent how the teaching and learning process will be. The technique that is used by the teacher will also influence the students in the way they understand texts.

4. Strategies in the teaching of reading comprehension

The use of comprehension strategies in the teaching of reading is very important. It will influence the students reading comprehension. The are
seven strategies proposed by Zimmermann and Hutchins cited in Moreillon (2007:11). Some of them are as follows:

a. Activating or building background knowledge

Activating background knowledge is very important. The reader’s background knowledge plays an important role in the reader’s abilities to comprehend the text. In the process of comprehending, the reader relates the new information presented by the author to old information stored in the reader’s mind (Cooper, 2000: 12). When the reader can connect what he or she is reading with something already known or understood, background knowledge is being utilized to make sense of the new information. The teacher has to help the students to explore what they have known about the text.

b. Using sensory image

Sensory image is the strategy in which the students use their sense to achieve comprehension. By using this strategy, the students work on the experience that they have and visualize it in their memories. This visualization is called as imagination. Through imagination, the students can be encouraged to use their senses and make mental pictures of what they are reading.

c. Questioning

This strategy allows the students to have practice to make questions and answer by them. The questions that should be made are those which can
arouse their awareness of what they read. These will represent whether they have understood the text or not.

d. Making predictions and inferences

The teacher should emphasize that prediction is a major factor in reading. Predicting means that the readers are using their background knowledge to negotiate meaning of the text. They connect their background knowledge with the information from the text. Before the students reading, they can do prediction by looking at the title of the text. The title sometimes gives clues at what the text is about. By doing this, the students will actively start to the process of reading. Indeed, the teacher should give clues to make the students comprehend the text easily. In inferencing, the reader has to find some of the clues, then combine it to their background knowledge and past experiences to interpret the meaning of the text.

e. Using fix-up option

Fix up option is a strategy that allows the students to keep their understanding on reading a text. This strategy can be said as a bridge for the students in reading a text. It can be done by the students when they are no longer making connections of what they are reading. This strategy can be used by the students to recover meaning and figure out unknown words.

5. The Teaching of Reading in Senior High School

The teaching of reading has an important objective. Based on the School-Based Curriculum (Departemen Pendidikan Nasional, 2006), reading in Senior High School in Indonesia is aimed at making students comprehend
interpersonal, ideational, and textual meanings in various written text. The texts are in the form of descriptive, narrative, spoof, recount, procedure, report, news item, anecdot, exposition, explanation, and discussion.

In reading a text, the students are expected to be able to gain information and knowledge from the text being read. It means that students have to understand the meanings of the texts. The students’ understanding of the text includes the ability to find general idea, main idea, implied information, detailed information, and specific information in the text types.

Based on the School-Based Curriculum (Departemen Pendidikan Nasional, 2006), Standard of competence of reading for Senior High School students grade XI states that the students should be able to understand the meaning of written short functional texts and essays in the form of report, narrative, analytical and hortatory exposition, news item, anecdot, explanation, and discussion related to the surrounding to get knowledge. Meanwhile, the basic competency states that the students should be able to respond the meaning of short functional texts both formal and informal accurately, fluently, and acceptably in essays related to surrounding and to respond the meaning and rhetoric steps accurately, fluently, and acceptably in essays related to surroundings to get knowledge in the forms of report, narrative, analytical and hortatory exposition, news item, anecdot, explanation, and discussion.
C. The Concept of Know-Want-Learn (KWL)

This subchapter discusses some relevant theories which are related to Know-Want-Learn (KWL) technique. In this section, the discussion of the concept of Know-Want-Learn (KWL) technique is mainly related to four aspects. They are the definition of Know-Want-Learn (KWL), the characteristics of Know-Want-Learn (KWL) technique, the implementation of Know-Want-Learn (KWL) technique, and the advantages of using Know-Want-Learn (KWL) technique.

1. The Definition of Know Want Learn (KWL)

Know-Want-Learn (KWL) is an instructional reading technique that is used to activate students’ background knowledge, assist students in setting purposes for reading, and help students to monitor reading comprehension by using graphic organizer (Peregoy & Boyle, 2001: 70, Ros & Vaughn, 2002: 179). In this definition, four important concepts of Know-Want-Learn (KWL) technique are used. Firstly, Know-Want-Learn (KWL) is an instructional reading technique to aid the teaching of reading. It uses graphic organizer namely KWL chart to help the students record their thinking process before, during, and after reading. Secondly, Know-Want-Learn (KWL) technique is designed to activate students’ background knowledge. By using Know-Want-Learn (KWL) technique, the teacher can help the students recall the information stored in their mind which is related to the topic. Thirdly, Know-Want-Learn (KWL) technique can assist students in setting purposes for reading. By the use of Know-Want-Learn technique, the teacher can encourage
the students to determine why they are reading a specific text. Fourthly, *Know-Want-Learn* technique helps the students to monitor their own comprehension. Here, the readers can reject or confirm the information stored in their mind with the information they find in the text.

*Know-Want-Learn* (KWL) consists of three basic stages (Ros & Vaughn, 2002: 179). They are K stage, W stage, and L stage. In the K stage: *What I know*, students access their background knowledge to the text by listing what they already know about a specific topic. Then in the W stage: *What I want to know*, students determine what they want to know by making questions related to the topic, and finally assess what they learn in the L stage: *What I learn*.

From the definition, *Know-Want-Learn* (KWL) technique can be concluded as a technique which has well-organized steps to be followed by the students. The technique combines the use of reading strategies in the effort to improve reading comprehension.

2. **The Characteristics of Know-Want-Learn Technique**

*Know-Want-Learn* (KWL) has characteristics that are different from other instructional reading techniques. Below, four characteristics of *Know-Want-Learn* (KWL) are presented.

a. Using charts

In the implementation of *Know-Want-Learn* (KWL) technique, the use of chart is important. The chart used in this technique is known as KWL chart. KWL chart consists of three columns. They are *What I Know* (K) column, *What I want to Know* (W) column, and *What I learn* (L) column. The chart
presents a before-during-after strategy that must be completed by the students during the thinking-reading process. The first two sections of the chart are to be filled out prior to the lesson while the last column is to be filled out after the lesson. KWL chart helps students to be active thinkers while they read, gives them specific things to look for, and get them reflect on what they have learned. It can be used as a short introduction to a lesson to stimulate prior knowledge and assist the teacher’s instruction during the teaching and learning process (Ogle cited in Ros & Vaughn, 2002: 179). Below is the example of KWL chart.

Figure I: The example of KWL chart.
b. Involving three basic stages

*Know-Want-Learn* (KWL) consists of three basic stages (Ros & Vaughn, 2002: 179). They are K stage, W stage, and L stage. In the K stage: *What I know*, students access their background knowledge to the text by listing what they already know about a specific topic. Then in the W stage: *What I want to know*, students determine what they want to know by making questions related to the topic, and finally recall what they learn in the L stage: *What I learn*. Below is the illustration of the use of KWL chart.

**KWL CHART**

</tbody>
</table>

**Figure II:** The use of KWL chart

The figure above shows how the use of KWL chart imitates the process of comprehending the text. The process in K stage represents the process in which the reader uses their prior knowledge before reading. The
process in W stage represents the process in which the reader states questions in which they are more interested. The process in L stage represents the process in which the reader checks whether the information he/she gets from the text is suitable with the information stored in their mind. The three stages in KWL are exactly the same as how reader processes to comprehend the text. Each column in the chart shows the process of comprehending the text (Ros & Vaughn, 2002: 179).

c. Combining the use of strategies

Know Want Learn (KWL) technique involves a variety of strategies to help students make meaning from a text. There are at least three strategies used. They are activating prior knowledge, setting purpose of reading, and monitoring and assessing comprehension (Ros & Vaughn, 2002: 178).

d. Using interactive processing

The use of Know-Want-Learn (KWL) technique can assist the teacher in teaching reading using an interactive model of reading (Ros & Vaughn, 2002: 180). An interactive reading model is a reading model that recognizes the interaction of bottom-up and top-down processes simultaneously throughout the reading process (Brown, 2001:299). An interactive model emphasizes the role of prior knowledge or pre-existing knowledge in providing the readers with implicit information in the text. In the implementation of Know-Want-Learn (KWL) technique, activating the students’ prior knowledge is the most important stage.
3. The Use of Know-Want-Learn (KWL) Technique

The Know-Want-Learn (KWL) technique consists of three basic steps representative of the cognitive or metacognitive steps employed by the students as they utilize the strategy; accessing What I Know, determining What I Want to Know, and recalling What I Learn (Ros & Vaughn, 2002: 178). To assist the students in using the strategies when reading, there is a simple worksheet for the students to complete during the thinking-reading process namely KWL chart.

During the Know step, the teacher and the students involve in a discussion designed to assist students in thinking about what they already know about the topic of the text. For this step, the teacher starts by using a brainstorming procedure. As in the Pre Reading Plan, students are encouraged to discuss where or how they learned the information so as to provide information concerning the source of their ideas. After brainstorming, the teacher and the students discuss the general categories of information likely to be encountered when they read and how their brainstormed ideas could help them determine the categories. For example, the teacher might say “I see three different pieces of information about how is turtle looked. Description of its looks is certainly one category of information I would expect to include” (Ogle, 1986: 566).

During the Want to Learn step, the teacher and the students discuss what they want to learn from the text. Before starting to read, the students write
down the specific questions in which they are most interested in the second column. This step helps the students to set a purpose of reading.

During the What I learn step, the students write what they learn from reading. They should check their questions that they generated in Want to Learn step. In this step, the students have to confirm or reject their own questions in What I Want to Know. Besides, they have to generate their ideas based on the information they find. In this step the students can monitor their own comprehension.

4. The Advantages of Using Know-Want-Learn (KWL) Technique

Know-Want-Learn (KWL) has some advantages that can help the students understand the text. Below, three advantages of Know-Want-Learn (KWL) are presented.

a. Helping the students to check prior knowledge

The use of Know-Want-Learn technique in the teaching of reading helps the students check their prior knowledge of a topic, concept, or process before learning about it. With this prior knowledge, the brains of the students will recall what they already know (the K of KWL) about the topic. When the students get new information, the students will use their brains to join the old knowledge with the new information from the text. learners who start making connection about what they already know can create meaning of the text more easily (Cardenas, 2009: 38).
b. Building the students’ interest in reading

The second benefit of the use of **Know-Want-Learn technique** is to stir the students’ interest in what students also want (the W of KWL) to know additionally about the topic. Making their own questions about the topic can increase the students’ interest because of the fact that the students felt the necessity of finding out what would really happen in the text. The students are interested to read the text because they want to find the answer of their own question or not. By completing K and W column, the students are not only making use of their prior knowledge but also are motivated to keep reading the text (Cardenas, 2009: 38).

c. Providing a chance for the students to assess what they have learned

The third benefit is to provide a chance for students at the end of a lesson to look back and assess what they have learned in the lesson. By completing the last column namely **What I Learned** column, the students record the information they get from the text. Here, the students can assess their own thinking process (Ros & Vaughn, 2002: 179).

**D. Conceptual Framework**

This study begins with the problem occurring in English teaching learning processes. The problem is related to the students’ low proficiency level in reading comprehension. Reviews of related theories have been presented as references for dealing with the problem. Here, the researcher presents the conceptual framework.

The School-Based Curriculum is the current curriculum used in Indonesian education system. Based on the School-Based curriculum, the
teaching of English in Senior High School in Indonesia is aimed at making the students master the four language skills namely listening, speaking, reading, and writing. Being one of the four language skills, reading has an important objective. In the teaching and learning of reading, the students are expected to be able to gain information and knowledge from the text being read. It means that students have to understand the meanings of the texts. The students are competent if they can find general idea, main idea, implied information, detail information, and specific information in the text types. However, gaining information and knowledge from the text being read is not a simple matter even for Senior High School students. There are some aspects that make them have difficult to understand the text such as the students’ lack of vocabulary mastery, the use of reading comprehension strategies, the students’ lack of interest and the teacher’s technique used in the teaching of reading.

Based on the problem above, the researcher will use *Know-Want-Learn* (KWL) as a technique in the effort to improve students’ reading comprehension. *Know-Want-Learn* (KWL) is an instructional reading technique that is based on moving from one stage to another to activate students’ background knowledge, assist students in setting purpose for reading, and help students to monitor reading comprehension by using KWL chart. The use of *Know-Want-Learn* (KWL) technique can help students to develop tactical ways to understand the text by the use of various strategies such as activating prior knowledge, setting a purpose of reading, questioning,
making prediction, monitoring comprehension, using skimming & scanning, and analysing vocabulary.

Efforts to improve the students’ reading comprehension can be made through action research. The research participants including the principal, the English teacher, and the researcher need to work collaboratively to reach the success of the research. Here, the researcher has to complete some steps. The first step is identifying the problems in the English teaching and learning processes at grade XI of SMA 1 Sanden, the second step is planning the feasible actions to be carried out, the third step is implementing the planed actions, and the fourth is evaluating the result of the implemented actions. The research activities will be stopped when the students’ reading comprehension can be improved. The conceptual framework of the study is summarized in a visual illustration below.
Figure III. Conceptual Framework

The students have low proficiency level in reading comprehension

The use of Know-Want-Learn technique

Problems related to the students’ low proficiency level:
- The teacher only tested the students’ ability in the classroom
- The students were not aware of the use of efficient comprehension strategies.
- The students lacked interest

Principles of Know-Want-Learn technique
- Scaffolding the students’ comprehension by activating prior knowledge, setting purpose of reading, monitoring reading.
- Engaging the students to the use of efficient comprehension strategies
- Building the students’ interest.

The students’ reading comprehension improved
CHAPTER III
RESEARCH METHOD

This chapter presents the discussion of the research method. This is presented in six headings. They are the research design, setting of the study, subjects of the study, research instruments, data collection techniques, and research procedure.

A. Research Design

This study was categorized into action research. The aim of this study was to show the process of improvement of the students’ reading comprehension. In this study, the researcher collaborated with all of the other research team members. The steps done by the researcher and collaborators were identifying the problem occurring in the English teaching and learning, planning and carrying out the actions, observing and reflecting on the actions implemented in the study (Kemmis & Mc. Taggart in Burns, 2010: 7-8). In this scheme, the researcher and collaborators found a problem, planned a possible solution, implemented and observed the actions, and reflected on the outcome of the actions. It formed the action research Cycles as can be seen in the illustration below.
B. Setting of the Study

The study was conducted in SMA Negeri 1 Sanden. The school was situated at Jalan Murtigading, Sanden, Bantul regency. The school was choosen as the setting of the study for three reasons. The school is one of the favourite schools in Bantul. It gets numerous achievements in many competitions such as sports, arts, and march. It also has complete facilities to support the teaching and learning process. The school has been given an A score for the school accreditation on March 2006 by Yogyakarta School Accreditation Board.
C. Subjects of the Study

The subjects of the study were the researcher herself, the two English teachers, and the students of XI IPS 3 class of SMA Negeri 1 Sanden. The XI IPS 3 class consisted of 32 students. The students were sixteen up to seventeen years old. Most of them came from middle class economic background. The researcher chose XI IPS 3 class because according to the teacher, the students of XI IPS 3 had the lowest achievements in English subject.

D. Instruments of the Study

The instruments for collecting data in this study were a test instrument and non-test instruments. The test instrument included the test items and the non-test instruments included an observation guide and an interview guide. The data of the test instrument were in the form of numerical data. Meanwhile, the data of the non-test instruments were in the forms of field notes and interview transcripts of the teaching and learning processes.

1. Observation Guide

The observation guide was used to determine the aspects to be observed in the reading class when the action plan was conducted. The observation guide was in the form of checklists. It contained some aspects with some indicators of each aspect. The data about the aspects observed during the action then were recorded everytime through some descriptions in the form of field notes.
In this study, four variables were observed. They were related to the students’ behaviour, teacher’s role in the teaching of reading, the learning materials and the teaching technique. Every aspect involved several indicators to be observed in the English class. The four aspects can be seen in the specification table 1.

2. Interview Guide

The interview guide was used as the guidelines for the researcher in giving questions to the students and the teacher. In this study, the researcher involved five aspects. They were the students’ attitude, the condition during the teaching of reading, the use of learning strategies, the use of learning materials, and the implementation of *Know-Want-Learn* (KWL) technique. There were some indicators of each aspect. The aspects and the indicators could be seen in the Table 2. The results of the interview were recorded in the form of interview transcript.

In this study, the researcher also used a test instrument for collecting data. The test instrument was in the form of a reading comprehension test. The data of the test instrument were in the form of numerical data.

3. Reading Comprehension test

The reading comprehension test was used for a pre-test and a post test. It was a multiple choice test consisting of 50 items. The test materials were adapted from some textbooks. In developing the comprehension questions, the researcher based on the reading comprehension taxonomy. There were
six levels of reading comprehension taxonomy namely knowing, comprehending, applying, analyzing, synthesizing, and evaluating (Motta, in Suharto, 2006: 175).

a. Validity

To get the validity of the test, the researcher used content validity. The researcher used the existing concept in the current curriculum (Suharto, 2006: 3). Here, the researcher developed the test based on the basic competences and the indicators of the basic competences which were taken from the current curriculum, the School-Based Curriculum. Table 3.

b. Reliability

To get the reliability of the pre-test and post test items, the researcher tried the test out to the students from the other school in which the students have relatively the same abilities. Then after getting the students’ score in the test, the researcher used the help of the ITEMAN program where the Cronbach’s Alpha statistic was used to find the reliability of the test.

E. Data Collection Technique

The data about the improvement of the students’ reading comprehension were obtained by doing observation in the English class, conducting interviews after the class meeting, and administering the reading comprehension test. These data collection techniques are described below.

a. Observation
The observation was done to get the information that was needed. The researcher collected the data by observing the class situation and condition in the teaching learning process. She sat at the back of the classroom and noted down the class activities in the teaching and learning process. For example, at the beginning of the lesson, the researcher observed and noted down how the teacher opened the lesson by giving several questions and how the students responded to the teacher’s questions. Then she explained the material. The observation was done by the researcher and the English teacher as the collaborator. The observation results were recorded in the form of field notes.

b. Interview

The interview was done to know the effectiveness of the actions. The researcher interviewed the students and the English teacher about the activities in the teaching and learning process. In this case, the researcher held the interview with the English teacher and the XI students about the use of Know-Want-Learn technique in reading class. The researcher asked the teacher some questions related to class activities, class condition, students’ behaviour, and the students’ proficiency level in reading. For example, the researcher asked the teacher to tell her how she explained the material to the students. The researcher also interviewed some students by asking them questions about class activities. For example, the researcher asked the students about their difficulties in understanding the text. The information was recorded into interview transcripts.
c. Reading Comprehension Test

The reading comprehension test was administered before and after the researcher conducted the actions. The reading comprehension test was used to measure the students’ reading comprehension. The test was in the form of a multiple choice test consisting of 50 items. The data of the reading comprehension test were collected in the form of numerical data.

F. The Validity and Reliability of the Data

a. The Validity of the Data

Validity is an essential aspect for evaluating the quality and acceptability of the research (Burns, 1999:160). The five validity criteria proposed by Burns (1999:161) were employed to validate the data. They were democratic validity, process validity, outcome validity, catalytic validity, and dialogic validity.

For democratic validity, in this study, the researcher interviewed the English teacher and the XI IPS 3 students of SMA Negeri 1 Sanden (Burns in Sanjaya, 2010: 41-42). In the interview, the English teacher and the students expressed their views, and opinions toward the actions done.

For outcome validity, the researcher emphasized the study on the betterment of the learning process to reach the maximal result (Burns in Sanjaya, 2010: 42). In this case, the researcher formulated the new questions related to the new problem found in the class when she tried to solve the main problem of the study. This action was done after the researcher did the reflection in the end of the class meeting.
For process validity, the researcher collected the data by doing observation and noted down everything that could be caught by the researcher’s senses (Burns in Sanjaya, 2006: 42). In this activity, the researcher observed the students’ attitudes, class condition, the teaching technique used by the English teacher, during the teaching and learning processes and described the collected data in the field note form.

For catalytic validity, the researcher tried to get the stakeholders’ responses to the changes occurring to themselves (Burns, in Sanjaya, 2006: 43). For this purpose, the researcher observed the implementation of the actions, made the reflection of the actions done in the XI IPS 3 class, and asked the questions to the English teacher and the XI IPS 3 students to know the changes they made after the researcher applied the actions during the study.

For dialogic validity, the researcher asked the English teacher as the stakeholder to participate in the process of the study by giving criticism and suggestions (Burns in Sanjaya, 2010: 43). For this purpose, the researcher conducted reflective dialogues with the English teacher for criticism or suggestions to the actions done in the class.

b. The Reliability of the Data

To obtain the trustworthiness, the researcher used the triangulation technique. Burns (1999:164) proposed four types of triangulation. They are time triangulation, space triangulation, investigator triangulation, and theoretical triangulation. Nevertheless, only time triangulation and
investigator triangulation were used to validate the data in this research. They were as follows.

1. **Time Triangulation**

   The data were collected in a period of time. It was done to get a sense of what factors were involved in change processes. In this research, the researcher did the action from August 28\textsuperscript{th} 2012 until October 29\textsuperscript{th} 2012.

   The data collected were compared to formulate research questions and the treatment used to improve students’ reading comprehension. Then, the changes related to the improvement of students’ reading comprehension through *Know-Want-Learn* technique were monitored in every Cycle.

2. **Investigator Triangulation**

   Investigator triangulation involved more than one observer used in the same research setting to avoid observer bias and provide checks on the reliability of the observations. The data were related to the teaching and learning processes especially the implementation of *Know-Want-Learn* technique to improve students’ reading comprehension.

   In this case, the researcher and the collaborators collected the same data about teaching and learning processes related to my way in presenting materials, students’ attitudes in the class, and class atmosphere. The results were recorded into field notes. Then the researcher and the collaborators crosschecked the data to see the fitness of the data.
F. Research Procedure

To carry out the study, the researcher used the action research procedure suggested by Burns (1999: 161-162). The procedure consisted of the following four steps.

1. Reconnaissance

In this step, the researcher observed the place where she carried out the study. The researcher interviewed the English teacher and the XI IPS 3 students and carried out classroom observation of the English teaching and learning process. Based on the results of the observation, the researcher identified the problems that occurred. The researcher focused on analyzing the problems related to the students’ low proficiency in reading comprehension. The results of the observation were used as the basis for developing the research actions.

2. Planning

In this step, the researcher worked together with the English teacher to plan some actions to be done in the English teaching-learning process based on the problems defined in the previous step. The aim of the actions was to improve the students’ reading comprehension by using Know-Want-Learn technique. The actions planned to be carried out were presented below.

The first was writing the test items that were tested in the pretest and post test. In this action, the researcher formulated the test items taken from several resources such as the students’ worksheet, the examination try out,
and some course books. In addition, the researcher tried to formulate the test items based on the syllabus of English for the eleventh grade of the senior high school in the first semester.

The second was determining the topic of the text to be taught. Here, the researcher would present the topic of animal for the report text. Meanwhile, for the narrative text, the researcher would present the topic of folklore. Besides, the researcher also prepared the media used in the teaching and learning process such as pictures and powerpoint presentation.

The last was determining the class activities. In this action, the researcher planned some interesting activities that could encourage the students to use their abilities in comprehending the reading text. In planning the actions, the researcher worked together with the English teacher of grade XI of SMA Negeri 1 Sanden.

3. Actions and Observation

In this step, the researcher did the actions that had been planned in the previous step (Kemmis & McTaggart (1988) in Burns (2010:8)). The actions were done in six meetings or two research Cycles (three meetings for each Cycle). First, the researcher conducted Cycle one. In this Cycle, the researcher presented the topic of animals in the first meeting, countries of origin in the second meeting, and cultural events in the third meeting. In the first meeting, the researcher presented what Know-Want-Learn is. The researcher showed KWL chart to the students and presented how to use the
chart to help them understand the text. In the next meeting, the researcher asked the students to work in groups of four, in pairs, or sometimes individually to use KWL chart in order to understand the text they read. In the end of the Cycle, the researcher evaluated the actions by interviewing the students and the teacher about the class activities. From the reflection of Cycle one, the researcher found some weaknesses. Then the researcher conducted Cycle two. In this Cycle, the researcher used power point presentation to present the materials. Then the students were asked to do the task using KWL chart. In the end of the second Cycle, the researcher also evaluated the actions by interviewing the students and the teacher about the class activities. The researcher asked whether the actions done could improve the students’ reading comprehension or not.

While the researcher did the actions, the research collaborator took notes in the backside of the class to observe the students’ behaviours during the activities. The research collaborator used a checklist to observe and evaluate the events in the classrooms. It was done to find problems during the class and see how effective the actions were.

4. Reflection

In this step, the researcher evaluated the actions that were conducted. She evaluated the actions by observing the teaching and learning process conducted in the class and interviewing the students and the teacher about the class activities (Kemmis & McTaggart (1988) in Burns (2010:8)). The reflection was useful to show the effectiveness of the actions conducted in
the teaching and learning processes. At the end of the actions, the researcher consulted the results of the actions conducted and the problems occurring during the actions that seemed ineffective to the collaborator. It was to find out whether the actions were successful or not. The successful actions would reapply in the next Cycle but the unsuccessful actions would be changed or improved into the suitable one.
CHAPTER IV
RESEARCH FINDINGS AND DISCUSSION

This chapter presents the following sections: reconnaissance, reports of Cycle I, and reports of Cycle II. Reconnaissance reviews the identification of the field problems and the actions to solve the problems. The next section presents the planning, actions and observations, and also reflections of Cycle I. The last section reports the planning, actions and observations, and also reflections of Cycle II.

A. Reconnaissance

At the beginning of this study, the researcher had a discussion with the English teacher about the English teaching and learning process in the XI IPS 3 class, conducted the interviews with the XI IPS 3 students, and did observation of the English teaching and learning process. The results are presented as below.

1. Identification of the Field Problems

Based on the discussion and observation, the researcher identified 16 problems related to the English teaching and learning process in the XI IPS 2 class. The problems are shown in Table 4 below.

Table 4. The Field Problems Concerning the Teaching Learning Process of English in the XI IPS 2 Class of SMA Negeri 1 Sanden

</tbody>
</table>

NB: S: Student T: Teacher TT: Teaching Technique LM: Learning Material

From the table above, it can be seen that the problems occurring in the teaching learning process of English are related to the teacher, the students, and the teaching technique. Since the researcher focused only on the students’ reading comprehension, she selected the problems that were related to the problems occurring in the teaching of reading.

2. Determining the Actions to Solve Problems

After having discussions with the English teacher, the researcher determined some actions expected to offer some solution to the problems. There were six actions planned in this study. They were using interactive text-preview through the use of KWL chart, using pictures to help students activate prior knowledge, preteaching key vocabulary, using skimming and scanning strategies, asking the students to guess the meaning and use fix-up strategies, and checking the students’ chart.

3. The Relationship between the Fields Problems and the Actions

After the actions had been designed, the researcher related the field problems to the actions designed. The following table shows which field problems were related to the actions that had been designed.

B. Reports of Cycle I

1. Planning

After determining the problems related to the teaching of reading, the researcher and the collaborators began to plan the actions to solve the problems.
The actions were focused on improving students’ reading comprehension through the use of *Know-Want-Learn* technique. The situations expected after the implementation of the actions are:

a. Students could have more opportunities to express the ideas related to the topic of the text.

b. Students would be motivated and interested to read the text.

c. Students could find specific and general information from the text.

d. Students could improve their abilities to read efficiently by using comprehension strategy such as skimming scanning, guessing meaning, and using fix-up strategy.

e. The teacher could guide the students in before, during, and after reading process

Based on the discussion with the collaborators on August 28, 2012, some actions would be implemented in Cycle I. The action planed of Cycle I were using interactive text-preview through the use of KWL chart, using pictures to help students activate prior knowledge, preteaching key vocabulary, using skimming and scanning strategies, asking the students to guess the meaning and use fix-up strategies, and checking the students’ chart. They are discussed as follows.

The first action done was using interactive text-preview. This action aimed at promoting the interaction between the teacher and the students. By using this action, the teacher could build the students’ motivation, attract the students’ interest in reading, and give chance to the students to express their ideas related to the topic of the text.
The second action was using pictures. This action aimed at stimulating the students to activate their previous knowledge related to the topic of the text. Pictures were also used as a media in the teaching of reading since there were no media used in the classroom.

The third is preteaching vocabulary. This action aimed at creating a context for the students that facilitates comprehension by identifying key words and then preteach them. The action was also expected to solve the students’ low vocabulary mastery problems so the students did not need to translate every word in the text when they were reading.

The fourth action was using skimming and scanning. Skimming gave the students advantage of being able to predict the function of the passage, the main topic, and the messages of the text. Here, the students did quick running one’s eyes across a whole text for its gist. The use of scanning helped the students to extract specific information without reading through the whole text. Here, the students did quick searching some particular piece or pieces of information in a text. The use of this strategy could also help the students to focus attention on the text.

The fifth action was asking the students to guess meaning and use fix-up strategies. This action could help the students when they found difficult words in the text. By using the strategies, the students would not depend on the use of dictionary.

The last action was checking the students’ chart. This action aimed at assessing the students comprehension by crosschecking before and after reading.
From seeing KWL chart, the students’ process of thinking was obvious. The use of KWL chart also helped the teacher to guide the students before, during, and after reading.

2. Actions and Observations

In this step, actions planned in the previous step were done. The actions were done in three meetings. It was conducted on September 6th, 8th, and 10th, 2012. In this Cycle, the researcher presented the topic of animals in the first meeting, countries of origin in the second meeting, and cultural events in the third meeting. The results of Cycle I were presented below.

a. Using interactive text-preview through the use of KWL chart

Before the action was done in the classroom, there was no good interaction between the teacher and the students. In the reading class, the teacher dominated the whole session of the class and the students activities were only reading aloud, translating the text, and answering the questions based on the text. The students had only little chance to express their ideas related to the text.

In this action, the researcher tried to build an interaction with the students. As she acted as the teacher in the class, the researcher considered the students’ activities before reading. The researcher used interactive text-preview through the use of KWL chart. Here, the researcher tried to engage the students to the topic of the text by asking them to brainstorm ideas about the topic of the text. Besides, text previewing aimed at building motivation and interest in reading.

There was a process of improving the students’ interactions between the students and the English teacher, the students’ motivation, and the students’
interest to read the text. The improvement was achieved gradually from one meeting to the next two meetings during Cycle I. It could be seen from the students’ behaviour during the process of previewing text. In the first meeting, the students were shy to respond to the teacher. Only some of the students who wanted to share their knowledge. The improvement could be seen in the next two meetings. The students were enthusiastic to express their previous knowledge about the topic. The evidence can be seen from the quotation of the field notes below.

R showed the picture of kangaroo in the slide show then she asked the students “What do you know about Kangaroo?” Some students shared their ideas “From Australia Miss”, said a student. “Kangaroo can jump Miss, It has kantong for the baby kangaroo Miss. R said,” What is kantong in English?” Pouch Miss, said one student. Good, kata R. Then R asked the students to write everything they know about the topic in What I Know column.

(Appendix B/ Field note 3)

The quotation above shows that the students made connection between the information stored in their mind with the title of the text. Here, the students linked their background knowledge to the text before reading it. The use of the students’ prior knowledge could help the students to understand the text easily.

Text preview in Know-Want-Learn technique could also motivate and build the students’ interest in reading. It can be seen in the quotation of the interview transcript below.

R : “Dek Fitri sama Dek Rani, tadi kan udah ngisi tabel KWL, dengan melengkapi kolom K dan W sebelum baca teks tadi cukup membantu ga?” (You have tried to complete KWL chart, haven’t you? Was completing the K and W columns before reading a text helpful for you?)
S1 : “Menurutku menarik mbak?” (It was interesting Miss.)
R : “Maksudnya?” (What do you mean?)
The quotation of the interview transcript above shows that the use of Know-Want-Learn (KWL) technique could build the students’ interest. It can be seen from the students’ feeling of curiosity and challenged to find the answer from their own questions in the text. By doing this action, the students were motivated to keep reading a long text.

b. Using pictures to activate the students’ prior knowledge

Before the researcher did the actions, in the teaching and learning process of reading, the English teacher used limited media to teach the students. She just gave the students a text taken from “Look Ahead” and then asked the students to read the text. After reading the text, the students were asked to answer the questions based on the text.

In this study, the researcher used pictures as media to help the students activate their prior knowledge about the text. The picture was used just before the students read the text. The use of pictures could help the students to activate their prior knowledge about the topic.
“What do you know about Sidney?” asked the researcher. “In Australia Miss”, a student answered. “Good, others please?” There was no answer. “Ok, I will show you the picture”. R showed the picture of Sidney’s landmark, Sidney Opera House. “Ow, pernah liat Miss, itu bangunannya kayaknya buat konser. Boleh ditulis di What I want to know column ya Miss misalnya, what is the name of the building?” Ya, boleh, said the researcher.

(Appendix A/ Field note 7)

The quotation of the field note above shows that by using pictures, the students could recall their previous knowledge since the use of media or visual cues are needed when the topic were unfamiliar for them. The use of picture can also focus the students attention of the text. The evidence can be seen in the quotation of the interview transcript below.

R : “Bagaimana Bu penggunaan gambar tadi? Apakah menurut Bu Isti sudah cukup membantu siswa?” (“How about the used of picture Miss? Do you think it can help the students?”

ET : “Bagus mbak, ada peningkatan sekarang. Siswa jadi lebih mudah untuk siswa mengungkapkan ide. Selain itu, pakai gambar kan juga memfokuskan siswa pada text yang akan mereka baca. Jadi ide yang keluar juga ga asal” (“Good Miss, there was an improvement. It became easier for the students to express their ideas. Besides, the use of pictures could focus to the students’ attention to the text they are going to read. So, the ideas expressed were well-organized”)

(Appendix B/ Interview Transcript 10)

The quotation above shows that the use of pictures helped the students to express their ideas easily. It also helped the students to focus their attention on the text they read because they knew what they would read based on the picture they saw.

c. Preteaching Vocabulary

Vocabulary is essensial to reading comprehension. It is impossible to understand text if the readers do not know much about a significant number of the words in the text.
In this study, the researcher prepared the students before reading by identifying key vocabulary by preteaching them to the students. The finding can be seen in the quotation below.

R wrote vocabulary related to the topic in What I Know column. Then she asked the students to determine which vocabulary were related to the topic. “Di sini, ada beberapa kosakata yang terkait topik bacaan. Dari 8 kosakata, ada 3 yang tidak terkait topik. Now, as far as you know, which words are related to our topic, and which are not.”

(Appendix A/ Field note 7)

R wrote some vocabulary related to the topic then asked, “They are the vocabulary you are going to find in the text. Di antara kalian, ada yang tahu artinya?” Some of the students gave their answers. “OK, mari kita bahas kosakata ini.”

(Appendix B/ Field note 7)

From the quotation of the field notes above, the researcher prepared the students before reading by identifying key vocabulary. This action aims at helping the students understand the text easily.

d. Using skimming and scanning

The finding of the study shows that using Know-Want-Learn (KWL) technique can help the students to find specific and general information of the text efficiently. This can be seen in the following quotation of the interview transcript below.

R : “Surya, sekarang kalau baca teks masih diartikan per kata ga?” (Surya, do you still read the text by translating the word one by one now?)
S : “Ga Miss. Pakai strategi biar cepat nyari informasi yang dibutuhkan di teks nya. Kalau mau nyari informasi yang specific kayak angka, nama atau menemukan main idea ga perlu dibaca semua textnya jadi ga buang buang waktu.” (No, I don’t Miss. If I would like to find specific information such as number, name, I did not need to read the whole text, so it did not take much time in reading)

(Appendix B/ Interview Transcript 8)
From the students’ responses above, it can be stated that the students can read the text efficiently. They can find specific and general information from the text efficiently. It is because the use of Know-Want-Learn (KWL) technique engages the use of efficient comprehension strategies namely scanning and skimming for the text. The findings that show this information are presented below.

1) The use of scanning

The finding shows that the use of scanning in reading helps the students to find the specific information from the text. It can be seen in the interview transcript below.

R : “Dek, sekarang kalau mau menemukan informasi yang spesifik dalam text seperti nama atau tanggal, lebih mudah atau tidak?” (Was it easy for you to find the specific information from the text such as names and dates?)
S1 : “Mudah Miss.” (Yes, it was.)
R : “Yang bikin mudah apanya?” (What made it easy?)
S2 : “Strateginya. Ga perlu dibaca semua tapi langsung aja cari apa yang perlu dicari. Jadi cepet Miss.” (The use of strategy. We did not need to read the whole text, just trying to find the information we need.)

(Appendix B/ Interview Transcript 11)

From the quotation, it can be concluded that the use of scanning helps the students to extract specific information without reading through the whole text. Here, the students do quick searching some particular piece or pieces of information in a text. The use of this strategy can also help the students to focus attention on the text.

2) The use of skimming

Besides using scanning to find specific information of the text such as names, dates, a definition of key concept, the researcher also uses skimming. The use of
skimming can also help the students to find the general information. The evidence can be seen in the following quotation of the interview transcript below.

\( R \) : “Dek Rani, penggunaan strategi skimming cukup membantu untuk menemukan informasi dalam text tidak?” (Rani, did the use of skimming help you to find the information from the text?)

\( S \) : “Membantu Miss. Jadi bacanya sekilas aja kan? Buat menemukan main idea, memprediksi the social function misalnya.” (Yes Miss. So, we just need to read across a whole text for its gist. Take for example for finding main ideas of the text and predicting the social function of the text.)

(Appendix B/ Interview Transcript 12)

From the quotation, it can be seen that using skimming in reading can help the students to find the general information of the text. Here, the students do quick running their eyes across a whole text for its gist. Skimming gives the students the advantages of being able to predict the function of the passage, the topic, and the messages of the text.

e. Using Fix-Up Strategy and Guessing Meaning of the Text

In this study, the researcher introduced the efficient comprehension strategies namely fix-up strategy and guessing meaning based on the context. The researcher asked the students to use fix-up strategy when they did not know the meaning of difficult words. The researcher asked the students to reread the sentence, reread the sentences before and after, break apart the work and look for smaller words, look for a prefix or suffix. The use of this strategy could help the students deal with their vocabulary limitation.

The use of fix-up strategy and guessing meaning of the difficult words in the text gave positive effects to the students. It could help the students to read efficiently. The fact can be seen in the extract of the field notes below.
When the students were asked to find the meaning of the word fragrant, they could give an answer that the meaning of the word fragrant is *wangi*. When R looked at the students’ worksheet, the students wrote seven fragrant flower and wrote the meaning of seven is 7 meanwhile flower is *bunga*, so, the meaning of fragrant might be *wangi*.

(Appendix B/ Field notes 4)

From the quotation above, it can be seen that the use of fix-up strategy and guessing meaning of the text help the students overcome their vocabulary problems. The use of the two strategies help the students to be efficient readers.

In this Cycle, the students tried to use the strategies. Some students could use the strategies while reading, but most of the students found it difficult to guess meaning. The evidence can be seen in the interview transcript below.

R : “Yoci, what do you think about using fix-up strategy and guessing meaning of the text?”
S1 : “It is helpful Miss.”
R : “How about you Ridwan?”
R : “Susah mbak. Ada beberapa yang aku tida bisa menebak. Tapi tadi sambil diskusi sama Yoci jadi bisa.” (“It was difficult Miss. I could not guess. But I could guess it after discussing with Yoci.”)

(Appendix B/ Interview Transcript 13)

From the quotation of the interview transcript above, it can be seen that the action was not successfully implemented. Some students still found it difficult to use the strategy.

f. Checking the students’ chart

After completing the three columns in KWL chart, the students were asked to check their chart. This action could help the students to evaluate their own comprehension. Here, the students have to check their own thinking-process before, during, and after reading by looking at *What I know, What I want to know,*
and What I learn column to make sure that the information in the three columns are related to each other or not.

“Now, let’s check your KWL chart. Can you find all the answers for your questions in the second column, Rani?” asked the researcher. No Miss, I asked about how deep the pouch. But I couldn’t find it. *Tapi saya dapat pengetahuan kalau bayi kangguru itu selama 5 bulan ada di kantong*, said one student. “Good, how about you Ridwan?” *Sukses Miss, ada pertanyaan yang terjawab, yang berapa kecepatan kangaroo waktu lari, di text ada kata run yang artinya lari trus ada keteranganannya, can also run at speeds of over 45 kilometres per hour. Hour artinya jam kan Miss? Brarti kecepatannya 45 km per jam. Trus tadi sebelum baca saya tahu kalau Kangguru makan rumput. Di teks ada kata eat grass. Berarti benar. Good job Rani, Ridwan.*”

(Appendix B/ Field note 6)

From the quotation of the field notes above, it can be seen that the students can evaluate their own thinking-process of reading. They related the information they wrote in the first column and the second column with the information in the third column. When they did not find the information they need, they tried to expand their ideas by finding other important information.

3. **Reflection**

After implementing the actions in Cycle I, the researcher and the collaborators held a discussion to reflect the actions. Everyone participating in this research has ample opportunities to share their ideas, opinions, and feelings related to the implemented actions. Based on the discussion with the collaborators in a democratic and dialogic atmosphere, the reflection can be summarized in the following description.

a. **Using interactive text-preview**

Using interactive text-preview was done in every meeting in the Cycle I. The use of interactive text-preview was successful in promoting interaction between
the students and the teacher and building the students’ interest in reading. Besides, this action could also help the students activate their prior knowledge before reading. They also felt curious, challenged, and satisfied to read the text to complete their KWL chart.

In this Cycle, most of the students were enthusiastic to share their ideas related to the topic but they still used bahasa when sharing ideas. Based on the discussion with the English teacher and the collaborator, the researcher decided to ask the students to use English when they were sharing ideas. It would be beneficial for the students when they read a text if they brainstormed ideas and made prediction in English.

b. Using pictures to activate the students’ prior knowledge

The researcher began to use pictures in the teaching of reading in the second meeting. After using pictures, the students were enthusiastic to share their ideas related to the topic. The use of pictures was very beneficial for the students as a media in the teaching and learning process. It could stimulate the students when they had limited prior knowledge about the topic. The use of pictures were also effective to build the students’ interest in reading.

In this Cycle, the pictures used in the teaching and learning process were limited. The researcher only used one picture for each text to stimulate the students before reading. In fact, the picture could not really help the students to recall their prior knowledge about the topic. In the next Cycle, the researcher would use more pictures in Cycle II to stimulate the students in before-reading stage.
c. **Preteaching vocabulary**

Before asking the students to read a text, the researcher taught the key vocabulary to the students. This action could provide enough background to prepare the students for reading. Preteaching vocabulary was very effective in helping the students to understand the text because the students’ low vocabulary mastery could be solved.

d. **Using skimming and scanning**

The use of efficient comprehension strategy was done in every meeting in Cycle I. It was done during the students read the text. The implementation of this action was effective to help the students get the specific and general information of the text. Most of the students could use these strategies so they did not need to read the whole text in order to find the information they need.

e. **Using fix-up strategy and guessing meaning**

The use of fix-up strategy and guessing meaning of the difficult words in the text gave positive effects to the students. It could help the students to read efficiently. In Cycle I the students still found difficulties in using the strategy. Most of the students still tried to open their dictionary although the researcher did not allow the students to open their dictionary.

f. **Checking the students’ chart**

Checking the students’ chart was done in every meeting in Cycle I. After the students read the text, the researcher asked the students to check their three columns. This action was effective to assess the students’ process and thinking from before, during, and after reading. Here, the thinking process was visible.
4. **Revised Plan**

Based on the reflection of Cycle I, there were more plans which need to be revised. They were the language used, the use of comprehension strategy, the use of media.

C. **Reports of Cycle II**

1. **Planning**

Before conducting the actions in Cycle II, the researcher and the collaborators held a discussion to revise the plans for Cycle II. They focused to solve the problems found in Cycle I especially related to the language used, the use of comprehension strategy, and also the way to motivate students to be more active. The action plans of Cycle II are as follows.

   The first action was using interactive text-preview through the use of KWL chart. This action was the same as Cycle I. The difference with Cycle I was that the researcher tried to minimize the use of *Bahasa* in expressing their ideas. In Cycle II, the students had to use English as much as possible.

   The second action was using pictures to activate the students’ prior knowledge. Here, the researcher used more pictures than before. The use of series of picture was effective since it could help the students to recall what they have known about the topic.

   The third action in Cycle II was preteaching the key vocabulary in every meeting. This actions aimed at providing enough background to the students about the topic of the text. The procedure used in the Cycle was the same with the previous one.
The fourth action was using strategies in reading namely skimming and scanning. The students would scan the text for finding the answers for their own questions in the previous column. Then the students would skim the text for finding main ideas, text value, and social function of the text.

The fifth action asking the students to guess meaning and use fix-up strategy. The researcher asked the students to reread the sentence, reread the sentences before and after, break apart the work and look for smaller words, look for a prefix or suffix.

The sixth action was checking the students’ chart. The difference with the first cycle was the use of self-reflection. In Cycle II, the researcher asked the students to write their own reflection or expand ideas by making a summary.

2. Actions and Observations

The actions of Cycle II were conducted in three meetings on September 15th, 17th, 22th, 2012. The materials of Cycle II were narrative text. The topic were folklore and fable. In implementing the actions, the researcher was also accompanied by two collaborators who took notes in the back of the class to observe the teaching learning processes. The data of Cycle II were also collected through classroom observations and interviews. The results of Cycle II were presented below.

a. Using interactive text-preview through the use of KWL chart

The students’ interaction, motivation, and interest had improved after the implementation of interactive text-preview in every meeting in Cycle I. The procedures of doing the actions were the same as the first Cycle but in Cycle II,
the researcher tried to ask the students to use English in expressing ideas. In the first meeting, they seemed to be shy to speak. It can be seen from the quotation of the fieldnote below.

“...What do you think the story will be?” asked the researcher. “Tentang persahabatan, trus jadi musuh,” said the students. “In English please,” said the researcher. “Wah, malu miss kalau salah Miss?” asked the students. “It’s okay. Don’t worry of making mistake. I’ll help you to correct it,” said the researcher. “Hmm.. about friend and musuh? apa ya musuh?” “Enemy,” said the other student. “Ya, so friend becomes enemy Miss...,” said the student.”

(Appendix B/ Field note 10)

From the quotation above, it can be seen that the student felt embarrassed to share their ideas in English. But when the researcher tried to make him sure that making mistake was not a matter, the student wanted to try to share ideas using English. It shows that the good interaction between the teacher and the students was built and could help the students engage in class activities.

In the second meeting, the students began to use English when they were expressing their ideas. The students became more interested in joining reading activities. They shared their previous knowledge using English. The evidence can be seen in the quotation of the field note below.

“...Ok, so, what may the story be?” asked the researcher. “Me me me Miss, that’s about a son and his mom. They poor,” said a student enthusiastically. That may be about magic beanstalk Miss,” said another student. “OK good. Write them down on your first column,” said the researcher.

(Appendix B/ Field note 9)

From the quotation above, it can be seen that the students were enthusiastic to share their ideas related to the topic. Here, they began to make prediction about the text. The students also competed each other to complete KWL chart. They tried to be accurate in making prediction and stating questions. Then they tried to
find the answer for their own questions and also made sure that their prediction were accurate. It showed that the students’ motivation and interest were improved since the students’ felt curious, challenged, and satisfied. The evidence can be seen in the interview transcript below.

R : “Sebelum baca teks tadi kan kalian disuruh melengkap What I Know column. Menurut kamu waktu melengkap What I Know column tadi gimana? Susah ga?” (Before reading, you were asked to complete What I know column, what did you think? Was it difficult or not?)
S : “Wah, asik Miss. Tadi saya sama Elsa dan Putra buat membuat prediksi tentang isi teks nya. Kita juga bersaing buat menyebutkan hal hal terkait topik yang kita ketahui dan siapa yang benar.” (Yes, It was interesting Miss. Elsa, Putra, and I made some prediction of the text’s content. We also competed each other to mention some information related to the topic and made sure that we were right.)
R : “Trus, kamu bisa nemuin jawabannya ga?” (So, could you find the answers?)
S : “Dari 5 pertanyaan yang aku buat, yang ada jawabnya 3 Miss. Tapi prediksiku benar semua. Puas rasanya.” (From the five questions I stated, I found three answers for my questions. But I could predict accurately. I felt satisfied)
R : “Kalau sebelum baca text disuruh bikin prediksi seperti itu, kamu jadi termotivasi buat baca textnya ga? (“If you were always asked to make prediction before reading, do you think that you were motivated and interested to read the text?)
S : “O, iya Miss, kan jadi ngrasa penasaran, tertantang buat nemuin jawabannya, trus kalau udah ketemu jawabannya tu puas banget.” (Of course Miss, I felt curious, challenged to read the text and satisfied when I found the answers.)

(Appendix B/ Interview Transcript 17)

From the extract of the interview transcript above, it can be stated that the students were interested to the activities done before reading. It can be seen from the students’ attitude in the classroom. The students tried to be active in the classroom. They felt curious about the text, challenged to show their previous knowledge about the text, and satisfied after finding the answers in the text.
three feelings are the indicators of interest. From the students’ response, it can be seen that the students’ interest and motivation were improved.

b. **Using more pictures to activate the students’ prior knowledge**

In this Cycle, the researcher used more pictures to help the students activate their prior knowledge since the text used was narrative. The use of picture could create the context for the students and help the students to imagine the situation where the story took place. The evidence can be seen in the interview transcript below.

*R* : “*Memakai gambar bisa membantu buat memahami teks nya ga dek?*” (Did the use of picture help you to comprehend the text?)

*S* : “*Jelas Miss. Kan kalau sebelumnya dikasih gambar kita bisa ada bayangan situasinya bagaimana, tokohnya seperti apa, jadi itu bisa membantu untuk memahami text.*” (Of course Miss. If we were given pictures before, it could help us to imagine the situation and the characters so it could help us to understand the text.)

(Appendix B/ Interview Transcript 10)

From the quotation above, it can be seen that the use of picture could help the students to create context in their mind about the situation in the story. It could help to provide background to the students so that they could make meaning of the text easily.

c. **Preteaching vocabulary**

In Cycle II, the researcher still pretaught vocabulary to the students. Here, the researcher wrote more words in the white board and asked the students to pay attention to the words.

*R* wrote some vocabulary related to the topic then asked, “*They are the vocabulary you are going to find in the text. Di antara kalian, ada yang tahu artinya?*” Some of the students gave their answers. “*OK, mari kita bahas kosakata ini.*”

(Appendix B/ Field note 7)
From the quotation above, it can be seen that the researcher tried to focus the students’ attention on the key vocabulary. The students also aware of the keywords in the text. The researcher’s way to focus the students’ attention on the difficult words and then teach them was effective to help students minimize their difficulties when finding difficult words in the text. The evidence can be seen in the interview transcript below.

R : “Tadi waktu disuruh perhatikan keywords dan ga boleh tanya lagi kalau ketemu kata itu di text gimana dek?” (What did you think when you were asked to look at the keywords and then you were not allowed to ask the meaning of the words again when you found it?)
S : “Ternyata sangat bermanfaat Miss. Jadi pas baca ga kesulitan dan udah banyak tau arti kosa kata yang sulit.” (It was very useful Miss. It could help us when reading and because we have known the meaning of difficult words.)
R “Membantu kalian buat memahami teks ga?” (Did it help you to understand the text?)
S : “Sangat membantu Miss. Selain itu bacanya juga jadi efektif yang tanya terus arti kata yang susah. (Yes, it did. Besides, we could also read efficiently Miss.)

(Appendix B/ Interview transcript 15)

From the quotation above, it can be seen that preteaching vocabulary is needed before the students read the text. It could help the students to read efficiently after knowing the meaning of the keywords.

d. Using skimming and scanning

The researcher continued the action in Cycle I that is asking the students to use skimming and scanning during reading. There was no significant different between the Cycle II and Cycle I. The use of skimming and scanning in this Cycle could help the students in finding general and specific information from the text. The evidence can be seen in the interview transcript below.
R : “Dek, sekarang udah ada peningkatan belum setelah dari kemarin menggunakan skimming and scanning pas baca text?” (Was there any improvement after you used skimming and scanning during reading?)

S : “Uda banyak peningkatan Miss daripada yang pas pertemuan pertama dan kedua kemari.” (Yes, it was Miss. It was better than in the first and second meeting last week.)

R : “Peningkatannya seperti apa?” (What improvement did you get?)

S : “Ya kan sekarang udah terbiasa memakai strategi itu. Jadi udah bisa cepet kalau mau menemukan informasi yang spesific dan general. (Now, I was familiar with the use of the strategy better than before. So, we could find specific and general information from the text efficiently.)

(Appendix B/ Interview transcript 19)

From the quotation of the interview transcript above, the use of skimming and scanning could help the students to read the text efficiently. They were familiar with the use of the strategy so that they could use it easily.

e. **Using fix-up strategy and guessing the meaning**

Fix-up strategy and guessing meaning were the two new strategy used in Cycle II. The researcher asked the students to use fix-up strategy when they did not know the meaning of difficult words. Here, the researcher taught the students to guess meaning and use fix-up strategy. She asked the students to reread the sentence, reread the sentences before and after, break apart the work and look for smaller words, look for a prefix or suffix. The use of this strategy could help them deal with their vocabulary limitation.

The use of fix-up strategy and guessing meaning of the difficult words in the text gave positive effects to the students. It could help them to read efficiently. The fact can be seen in the interview transcript below.

R : “Dek, menurut kalian berdua, setelah memakai strategi membaca kemarin ada ga peningkatan yang kalian dapatkan?” (After using reading strategies, was there any improvement for you?)

SI : “Ada Miss. Jadi lebih mudah ketika membaca text.” (Yes, I did Miss. It could be easier for me to read the text.)
S2 : “Iya Miss.” (Yes, so did I Miss.)
R : “Jadi lebih mudah gimana maksudnya?” (What do you mean by becoming easier?)
S2 : “Lebih efisien Miss, jadi ga perlu buang-buang waktu buat baca text.” (It was efficient for me Miss. I did not need to spend much time for reading.)
R : “Kenapa bisa jadi lebih efisien dan ga buang-buang waktu?” (Why do you think that it could be efficient and did not spend much time?)
S2 : “Kan biasanya kita kalau membaca diartii per kata per kalimat Miss. Kita juga boleh pake kamus. Kalau sekarang kita udah bisa pake strategi.” (I usually read the text by translating word by word, sentence by sentence, and we were allowed to open our dictionary Miss. Now, I can use reading strategies.)
S1 : “Iya Miss, kayak fix-up strategy. Itu bisa bantu kita buat baca lebih dan cari informasi dari teks lebih efisien.” (Yes Miss, take for example, the use of fix-up strategy and scanning. They could help use to look for the information from the text efficiently.)
R : “Masih ingat ga fix-up strategy buat apa?” (Do you still remember what fix-up strategy and scanning are?)
S2 : “Jelas masih Miss, udah apal. Kalau fix-up strategy dipakai kalo kita menemukan kata-kata sukar, kita bisa baca kata di depan atau di belakangnya.” (Of course Miss. I remember it. Fix-up strategy is used when we find difficult word. We may reread the word before and after.)

(Appendix B/ Interview transcript 20)

On the other hand, the collaborator’s opinion toward the use of efficient comprehension strategy in the teaching of reading could be seen in the interview transcript below.

R : “Bu, apakah penggunaan strategi dalam teknik KWL ini dapat membantu siswa membaca secara efisien Bu?” (Miss, Did the use of reading strategies in KWL technique could help the students to read efficiently?)
C : “Iya mbak. Sangat membantu kalau menurut saya. Penggunaan strategi dapat membantu siswa membaca secara efisien, tidak tergantung pada kamus lagi.” (I think it was helpful for the students. The use of strategies help the students read efficiently without using dictionary.)
R : “Jadi sudah ada peningkatan ya Bu?” (So, there was an improvement, wasn’t it?)
C : “Ow, jelas mbak. Dulu siswa bergantung pada kamus. Mereka kalau membaca itu diartikan per kata. Jadi buang-buang waktu juga. Sekarang mereka bisa baca secara efisien. Kemarin saya lihat mereka jarang buka kamus kalau ga disuruh.” (Of course Miss. The students depended on the use of dictionary before you use the technique. Now, they read efficiently. I saw them did not open their dictionary if you did not ask them to do that.)

(Appendix B/ Interview transcript 21)
From the quotation above, it can be seen that the use of fix-up strategy and
guessing meaning can help the students to be efficient readers. Before the action
was done in the classroom, the students tended to use their dictionaries when they
were reading the text. They translated every single word in the text to get the
entire meaning of the text. This strategy was not efficient at all. The students spent
much time in reading class just for translating the text. By using the efficient
comprehension strategy, the students could read the text efficiently without
translating each word in the text.

f. Checking the students’ chart and making reflection

In Cycle 1, the researcher asked the students to check their chart after reading.
This action could help the students to evaluate their own comprehension. Here,
the students had to check their own thinking-process before, during, and after
reading by looking at What I know, What I want to know, and What I learn
column.

In Cycle II, the researcher added an action. Here, the researcher asked the
students to make reflection after completing the three columns. The students’
reflection could help them to reflect what they have learned. They should write
the most interesting part of the story or the most interesting fact they found from
the text.

“Now, you have to write on you paper about what the most interesting things you
learn form the text,” said the researcher. “Apa aja boleh Miss?” asked a student.”

(Appendix A/ field note 11)

From the quotation above, it can be seen that the students could express their
feeling after reading. They could also take a value from the text after making their
own reflection. This action could also help them to reflect what they had learned from the beginning to the end of the reading process.

3. Reflections

After accomplishing Cycle II, the researcher and the collaborators had final reflections. The reflections were based on the classroom observations and also interviews. Based on the discussion with the collaborators in a democratic and dialogic atmosphere, the reflections can be summarized in the following description.

a. Using interactive text-preview through the use of KWL chart

The use of interactive text-preview seemed to be significant to improve the students’ motivation and interest in reading. It could be seen from the students’ enthusiasm to explore their background knowledge about the topic. Most of the students felt curious about the topic, challenged to find the answers of their own questions, and satisfied when they could complete the last column of KWL chart. Feeling curious, challenged, and satisfied are the indicators of interest. The students’ interest and motivation in reading could help them understand the text because they used schemata.

b. Using pictures to activate the students’ prior knowledge

The use of pictures in the teaching and learning of reading was efficient to help the students in previewing the text. It could stimulate the students to recall any information stored in their memories prior to reading. It also helped the students to create a context for them and provide any background knowledge so that the students create meaning of the text easily. Besides, the use of more
pictures in the teaching of narrative text could help them to imagine where the story took place. This could help them understand the text easily because visualization was also needed.

c. **Preteaching vocabulary**

Preteaching vocabulary was very effective to help the students to understand the text in the way that it could help them to create context for the students before reading. Here, the students’ low vocabulary mastery could be solved by preteaching some key vocabulary related to the topic. The way the researcher asked the students to focus their attention on the keywords was effective. In Cycle I, most students had not really paid their attention to the keywords taught. In Cycle II, the students focused their attention to the keywords so that they could understand the text easily without asking the meaning of the difficult words to the researcher or to their friends too much.

d. **Using skimming and scanning**

The use of skimming and scanning strategy was significantly effective for the students to get the general and specific information efficiently. After the implementation of using skimming and scanning while reading in Cycle II, the students were familiar with the strategies. There was an improvement from Cycle I to Cycle II. In Cycle II, the students could easily used the strategy to help them find general and specific information from the text. So, the students had better improvement in understanding the text.

e. **Using fix-up strategy and guessing meaning**
The strategies were only used in Cycle II. In fact, the strategies were effective to improve the students’ understanding of the text since they dealt with vocabulary problems. Here, the students did not need to use their dictionaries to translate the every single word in the text. Here, they just need to reread the sentence, reread the sentences before and after, break apart the work and look for smaller words you know and look for a prefix or suffix. In Cycle I, the researcher did not use this strategy. The researcher found that the students still had difficulties in finding the difficult words beside the keywords in the text. The students still asked the researcher the meaning and permit to use dictionary. After the implementation of fix-up strategy and guessing meaning in Cycle II, there was an improvement of the students’ abilities in finding the meaning of difficult words. They could try to find the meaning of difficult words by doing some steps in fix-up strategy. This strategy could help the them in understanding the text and reading the text efficiently.

f. Checking students chart and making reflection

Checking the students’ chart was effective to help them assess their own comprehension of the text. By seeing the process before and after reading, they could understand the text well. It was better than in Cycle I. In Cycle I, the students were familiar with their own thinking process by checking their chart. In Cycle II, after the students were familiar with their own thinking process in reading, the students tried to be better in completing the chart. They became more systematic in completing each column in KWL chart. It could help them in monitoring their own comprehension.
Here, the researcher also added a new action, that is making their own reflection after reading. This action was effective in helping the students reflect their feeling after reading.

Based on the findings of Cycle II, the researcher and the collaborators conclude that all actions had successfully improved students’ reading comprehension at grade eleven of SMA N 1 Sanden in the academic year of 2012/2013. Since the objective of this research could be achieved, the researcher and the collaborators agreed to end this research in this Cycle. The results of the improvements of the students’ reading comprehension during Cycle I and Cycle II can be seen in the following table.

Table 9. The Results of the Improvements of the Students’ Reading Comprehension during Cycle I and Cycle II

<td>3. <strong>Preteaching vocabulary</strong></td>
<td>• Preteaching vocabulary was effective for the students to deal with their vocabulary limitation problems. It was also effective to prepare them before reading the text. In Cycle I, there were only few students who paid attention to the key word. They still asked the researcher when they found difficult words in the text although they had learned it before.</td>
<td>• Most of the students paid attention to the key words that had been learned so that they could read the text without asking the researcher when they found difficult words.</td>
</tr>
<tr>
<td></td>
<td>4. <strong>Using skimming and scanning.</strong></td>
<td>• Using skimming and scanning was effective to help the students to find specific and general information of the text. It could also help the students to read efficiently using strategies. In the first Cycle, there were still few students who could use this strategies to find the information in the text. Some students still tried to translate every single word in the text.</td>
<td>• The students’ abilities to find specific and general information in the text was improved. Most of the students tried to use the strategies instead of translating the text.</td>
</tr>
<tr>
<td></td>
<td>5. <strong>Using fix-up strategy and guessing meaning of the text</strong></td>
<td>• Some students still found difficulties in finding the difficult words in the text. Most of them</td>
<td>• The students’ vocabulary mastery increased. They became more independent than</td>
</tr>
</tbody>
</table>
could not use fix-up strategy. They tried to ask their friends or open their dictionaries before although they sometimes asked the teacher to help them in using the fix up strategies.

6. Checking the students’ chart

- Checking the students’ chart was effective to help the students assess their own-thinking process. In Cycle I, the students had been able to assess their own comprehension. The action was continued in Cycle II.

- In Cycle II, the students was asked to assess their own comprehension and make their own reflection. This action was effective to help the students reflect what they have learned.

D. Quantitative Data

The quantitative data are in the form of the students’ pre-test and post test scores. Here, the researcher compares the students’ pre-test and post test scores by using the $t$-test to know whether or not there is a significant difference in the pretest and post test scores. The data can be seen from the students’ average scores before and after they get the treatment. Below, the results of the $t$-test are presented.

Table 9. Result of T-Test

<table>
<thead>
<tr>
<th></th>
<th>Mean</th>
<th>N</th>
<th>t</th>
<th>p</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pair 1 post test</td>
<td>7.0500</td>
<td>30</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Pre test</td>
<td>8.2500</td>
<td>30</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Pair 1 Post test &amp; Pre test</td>
<td>1.20000</td>
<td>30</td>
<td>14.858</td>
<td>.000</td>
</tr>
</tbody>
</table>
Based on the table of the statistical analyses above, it can be found that the average score of the pre-test is 7.0500 and the average score of post test is 8.2500. It means that the average score in the post test increases by 1.2000 from the average score in the pre-test. According to the $t$ statistic, the score difference is significant at $p < 0.05$.

**E. Research Finding**

The implementation of the action in this research was over. Based on the actions, observation, and the reflections, the findings were found as the following.

First, *Know-Want-Learn* technique is believed to be effective to improve the interaction between the students and the teacher. Previously, the students were shy and did not want to ask question when they found difficulties. Besides, the students had only a little chance to share ideas in the classroom. This technique allowed the teacher to scaffold the students in reading by focusing on the process before, during, and after reading.

Second, *Know-Want-Learn* technique is believed to be effective to improve the students’ interest of reading by doing interactive text-preview. The students’ interest in reading contributes to the students understanding of the text. Before the action was done, the students did not consider the process before reading that was previewing the text.

Third, *Know-Want-Learn* technique is believed to be effective to improve the students’ ability in finding the general and specific information and also find the meaning of difficult words in the text efficiently. Formerly, the students had difficulties in finding the main ideas, detail information and the meaning of
difficult word in the text. The students had to read the whole text and translate the text to understand it. It was because they rarely practiced and were taught how to read efficiently. By using this technique in reading, the students were able to find main ideas, detail information and the meaning of difficult words in the text by the use of efficient comprehension strategies namely skimming and scanning.

**F. Discussion**

The research was focused on improving students’ reading comprehension using **Know-Want-Learn** technique. This technique was implemented both in the first Cycle and the second Cycle. The findings of the research showed that **Know-Want-Learn** technique was successful in improving the students’ reading comprehension. From the findings, the discussion was written as the following.

The researcher conducted **Know-Want-Learn** technique by the use of graphic organizer namely KWL chart. The use of KWL chart could help the students to preview the text and assess their own comprehension by recording all the process of reading. Based on the finding, it helped them in the process of reading comprehension as it is stated by Klingner and Vaughn (2007: 200).

The use of **Know-Want-Learn** technique could also build a good interaction between the students and the teacher. When a good interaction was built, the students would have a closer relationship. They also had an opportunity to share their knowledge among the students. This finding was in line with Klingner, Vaughn, and Boardman (2007: 139,144).

Implementing **Know-Want-Learn** technique allowed the students to understand the entire text. During the process of reading, they read the text and connected it
with their background knowledge. Likewise, they also arouse what they had in their background knowledge and related it with the information in the text. It means that there was interactive process during reading as it is stated by Hudson (2007: 33-57) and Brown (2001: 298-299).

The use of *Know-Want-Learn* technique could also help the students to use efficient comprehension strategies such as skimming and scanning. The use of the strategy could help the students read the text efficiently. They could find the general and details information in the text without read it as a whole.
CHAPTER V
CONCLUSIONS, IMPLICATIONS, AND SUGGESTIONS

This chapter presents three sections: conclusions, implications, and suggestions. Those three sections are presented below.

A. Conclusions

The teaching and learning of reading comprehension was found effective when it was well-designed from the very beginning stage. Here, the teacher should consider before-during-after reading process. At the beginning process of reading, previewing text was the most importance stage to scaffold the students’ comprehension of the text. Through previewing the text, the teacher could help the students feel interested and motivated to read the text. This process also helped the students recall their previous knowledge about the topic. The use of graphic organizer namely KWL chart here could help the students to preview the text and record them in a systematic way. Previewing activities accompanied by media stimulated the students to read and also create context for the students before reading. The activities also promoted the interaction between the students and the teacher. Here, the teacher could scaffold the students in understanding the text. Meanwhile, the students should response to the teacher by sharing their previous knowledge related to the topic.

The use of efficient comprehension strategies were effective to help the students read the text efficiently. Here, the students could use skimming and scanning to help them find specific and general information of the text. Other
strategy that could be used during reading process was using fix-up strategy and guessing meaning when the students were not certain. The use of the two strategies could help the students deal with their vocabulary limitation problems because the students could read efficiently without translating the text.

The activities after reading were also important for the students. In this study, the researcher used two activities after reading, they were checking the students’ chart and making reflection. The activities were effective to help the students assess their own comprehension and reflect what they have learned from the text.

B. Implications

Based on the findings, three points of implication can be proposed. Those are the importance of *Know-Want-Learn technique* to scaffold the students in understanding text, the importance of using efficient comprehension strategies, and the importance of *Know-Want-Learn technique* in improving students’ reading comprehension.

First, the results of the study imply that *Know-Want-Learn* technique needs to be implemented since the technique could help the teacher to scaffold the students’ in understanding text. By using this technique, the teacher should guide the students before reading, monitor the students during reading, and evaluate the students’ understanding after reading.

Second, the implication to the use of reading comprehension strategy is that the teacher should model how to use efficient comprehension strategies to the students. It is important because the use of comprehension strategies are needed to help the students read the text efficiently.
Third, the findings carry the implication that it is important to use *Know-Want-Learn* technique in the classroom reading activity to improve students’ reading comprehension. The improvement of the students’ reading comprehension is important since reading is one of the four skills that should be mastered.

**C. Suggestions**

Based on the conclusion and the implication, some suggestions are offered for the English teacher, and the other researchers. These are presented as follows.

1. **The English Teachers**

   It is suggested that the English teachers should scaffold the students’ comprehension of the text. It can be done by considering the process before, during, and after reading. Besides, the English teachers need to use more media like pictures in the teaching of reading. It can attract the students’ attention to the text and it can help the students recall the information stored in their memory. It is important since the students’ prior knowledge contribute to the students understanding of the text.

2. **The other Researchers**

   It is necessary to follow-up this study to get more actions to improve students’ reading comprehension. There are some factors of this study which may be interesting to explore. For example, it is possible for other researchers to implement the similar technique in other schools.

APPENDIX A
FIELD NOTES
FIELD NOTES

Field Notes 1
Hari, tanggal : Rabu, 29 Februari 2013
Jam : 08.00
Kegiatan : Meminta Izin untuk penelitian
Tempat : Ruang Guru
R : Reseacher
GP : Guru Piket (Guru Bahasa Inggis kelas X)
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)

R : Selamat siang Bu Isti.
ET1 : Hallo mbak Yuni, apa kabar? Lama tidak ketemu mbak Yuni ini.
R : Alhamdulilah baik Bu.
ET1 : Gimana mbak, ada yang bisa saya bantu mbak? Katanya mau mengadakan penelitian di sini ya?
R : Iya Bu. Saya bermaksud mengadakan penelitian di sini untuk skripsi Bu. Kebetuluan skripsi saya action research.
R : Ya nanti belajar sama sama ya Bu. Kalau di kelas XI yang paling susah apa ya BU?
R : Kalau materi nya gimana Bu?
ET1 : Kalau soal materi, biasanya saya ambil dari buku-buku mbak. Ada beberapa buku yang saya pakai. Tapi yang paling sering saya pakai itu Look A Head mbak.
R : Ada masalah atau tidak Bu untuk pemilihan teks nya atau materi materi nya?
kelas XI kan biasanya bentuknya teks yang ndladrah to mbak, tidak ada gambar yang menarik. Padahal kalau ada gambar Ss itu juga lumayan terbantu.

R : Kalau begitu, untuk lebih jelasnya apa saya boleh ikut ke kelas ya Bu, untuk melihat masalah-masalah terkait reading?

ET1 : Ow, silahkan mbak. Anak anak pasti pada seneng ketemu mbak Yuni lagi. Dulu pas KKN ngajar mereka juga kan?

R : Iya Bu. Kira kira kapan ya Bu saya bisa ikut ke kelas?

ET1 : Nanti masalah waktu saya sms ya mbak, soalnya ini mau ada ulangan dulu.

R : Ow, iya Bu, terimakasih banyak ya Bu. Kalau begitu sya permisi Bu.

ET1 : Iya mbak, sama sama. Nanti saya hubungi mbak Yuni lagi.

Field Notes 2
Hari, tanggal : Jumat, 3 Agustus 2013
Jam : 09.00
Kegiatan : Meminta izin kepala sekolah untuk melakukan penelitian
Tempat : Ruang kepala sekolah dan ruang guru
HM : Headmaster
GP : Guru Piket
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)

R tiba di sekolah sekitar pukul 10.45 dan langsung menuju tempat guru piet. R menyapa seorang guru yang sedang piket dan bertanya apakah bapak kepala sekolah sudah masuk. GP berkata bahwa bapak kepala sekolah sudah masuk dan di ruang kepsek. R diminta untuk langsung menemui HM. R kemudian langsung menuju ruang kepsek. Di dalam ruang kepala sekolah, HM sedang menemui tamu sehingga R harus menunggu untuk beberapa saat. HM lalu menemui R di kursi tamu dan menanyakan maksud kedatangan R. Lalu, R memperkenalkan diri kepada HM dan mengutarakan maksud kedatangannya beliau, yakni ingin meminta izin melakukan penelitian di salah satu kelas XI yaitu di kelas XI tentang pengajaran reading dalam bahasa inggris. HM menanyakan judul skripsi R. R memberitahu judul skripsi R yaitu —\textit{Improving the Students’ Reading Comprehension through KWL}. Pada awalnya HM menanyakan apakah penelitian tersebut akan mengganggu jalannya KBM atau tidak. R lalu menjelaskan bahwa tidak akan mengganggu KBM. R justru bermaksud untuk memperbaiki kekurangan yang ada pada pembelajaran reading di kelas XI. HM menanggapi dengan baik tujuan R dan memberikan izinnya asal penelitian tersebut tidak mengganggu proses belajar Ss dan justru bisa meningkatkan kemampuan Ss. Beliau meminta R untuk membincarakannya terlebih dahulu dengan guru bahasa inggris yang bersangkutan. R mengatakan kepada HM bahwa sebelumnya R telah menemui guru bahasa Inggris yaitu ET1. R juga mengemukakan bahwa berdasarkan diskusi dengan ET1, R dan ET1 berencana melakukan penelitian di kelas XI IS2. R berkata kalaupun nantinya ada perubahan, R akan segera
memberitahu HM. Kemudian R berterimakasih kepada HM atas izinnya dan pamit pulang.

Field Notes 3  
Hari, tanggal : Jumat, 10 Agustus 2013  
Jam : 08.30  
Kegiatan : Observasi  
Tempat : Ruang Kelas  
R : Reseacher  
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)  
ET2 : English Teacher 2 (Bu Nur Ngaini, S.Pd)  

Setelah berbincang cukup lama, P meminta ijin untuk mewancarai beberapa Ss. Setelah selesai mewawancarai beberapa Ss, R menuju ruang guru kembali untuk pamit pulang.

Field Notes 4  
Hari, tanggal : Senin, 13 Agustus 2013  
Jam : 07.30  
Kegiatan : Konsultasi RPP  
Tempat : Ruang Guru  
R : Reseacher  
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)  

mengatakan bahwa akan ada mid test untuk para Ss yang akan dilaksanakan pada minggu depan. Untuk minggu ini, beliau ingin mereview materi-materi yang akan digunakan untuk mid test. ET1 memberikan pandangan pada R bahwa penelitian mungkin bisa dilaksanakan setelah mid test. Lebih tepatnya stelah hari raya Idhul Fitri. ET1 juga meminta agar penelitian dilakukan terus menerus dan meminta agar jadwalnya tidak sampai terpotong. R menyanggupi apa yang diminta oleh ET1. Setelah berbincang cukup lama dan menyepakati waktu untuk pelaksanaan penelitian setelah mid test, R pamit pulang. ET1 meminta R untuk mengingatkan beliau pada hari rabu agar ET1 tidak lupa. R menyanggupinya dan pulang.

Field Notes 5  
Hari, tanggal : Kamis, 6 September 2013  
Jam : 12.00  
Kegiatan : Pelaksanaan pre-test  
Tempat : Ruang Guru  
R : Reseacher  
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)  
Ss : Students

Field Notes 5
Hari, tanggal : Rabu, 7 September 2013
Jam : 07.30
Kegiatan : konsultasi pelaksanaan cycle I
Tempat : Ruang Guru
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)

Field Notes 6
Hari, tanggal : Sabtu, 8 September 2013
Jam : 07.30
Kegiatan : Pertemuan 1 (Cycle 1)
Tempat : Ruang Guru
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)

R memulai pelajaran dengan berdoa dan mengecek siapa yang tidak hadir pada hari itu. Setelah itu, R mereview pelajaran sebelumnya dengan bertanya, What did you learn in the previous meeting? Beberapa Ss menjawab, report text Miss. Itu lho yang text tentang binatang kayak shark. Setelah mereview materi pada pertemuan sebelumnya, R kemudian memberikan
apersepsi kepada Ss tentang materi pembelajaran hari ini dengan memberikan beberapa pertanyaan.

Sebelum R membagikan teks yang akan dibaca Ss, R menerangkan kepada Ss bahwa mereka akan bekerja secara berkelompok dengan menggunakan teknik Know-Want-Learn (KWL). Kemudian R menjelaskan dengan rinci bagaimana teknik tersebut digunakan. R menunjukkan KWL chart di papan tulis dengan menggunakan LCD proyektor. Kemudian R menjelaskan satu persatu apa yang harus dilakukan oleh Ss pada setiap langkah. Ss menyimak setiap penjelasan R dengan seksama. Setelah selesai menerangkan R bertanya apakah semua Ss sudah mengerti atau belum dengan apa yang harus mereka lakukan nantinya seperti, Does everybody understand?. Ss menjawab secara serentak, understand Miss.

Selanjutnya, R meminta Ss untuk berkelompok, setiap kelompok terdiri dari 4 Ss. R menentukan kelompoknya secara acak. Kemudian, R membagikan worksheet yang berisi KWL chart yang nantinya akan digunakan oleh Ss untuk menuliskan hasil diskusi mereka.

Setelah membagikan KWL chart pada masing masing kelompok, R menunjukkan gambar kangaroo pada slide show. R kemudian bertanya What do you know about the Kangaroo? Beberapa Ss mengemukakan ide mereka. From Australia Miss. Kangaroo can jump Miss, It has kantong for the baby kangaroo Miss. R kemudian berkata, What is kantong in English?” Pouch Miss, jawab seorang Ss. Good, kata R. Ketika Ss menyebutkan kata kata dalam bahasa Indonesia, R mencoba untuk menanyakan kata tersebut dalam bahasa Inggris lalu menuliskannya di papan tulis. R kemudian meminta Ss untuk menuliskan semua hal yang mereka ketahui tentang Kangaroo pada kolom K (What I know). Setelah Ss selesai berdiskusi dan melengkapi kolom K, R kemudian meminta Ss melengkapi kolom berikutnya yaitu kolom W. Pada bagian ini, Ss menuliskan hal yang mereka ketahui terkait topik. R menuntun Ss dengan memberikan beberapa pertanyaan What do you want to know about kangaroo? Sebelum Ss mengungkapkan ide nya, R menjelaskan bahwa pertanyaan yang mereka buat harus pertanyaan yg jawabannya mungkin akan mereka temukan di teks sehingga Ss bisa lebih berhati hati dalam membuat pertanyaan.

Kemudian beberapa Ss mengungkapkan ide mereka, “Hmm... I want to know what does kangaroo eat Miss. Beberapa Ss laki laki masih sesekali mengajukan pertanyaan yang menurut mereka lucu, how high Kangaroo can jump Miss, lompat pagar bisa ga ya Miss?. Kemudian R meminta Ss menuliskan hal yang ingin mereka ketahui tersebut pada kolom W.

Selanjutnya, R membagikan teks berjudul Kangaroo kepada Ss. R meminta Ss membaca teks secara berkelompok. Sebelum Ss membaca teks, R menjelaskan bahwa Ss harus mencari jawaban dari pertanyaan mereka. Now, you have to try to find the answer for your questions in the text. Ketika membaca teks,

“Now, let’s check your KWL chart. Can you find all the answers for your questions in the second column, Rani?” asked the researcher. No Miss, I asked about how deep the pouch. But I couldn’t find it. Tapi saya dapat pengetahuan kalau bayi kangguru itu selama 5 bulan ada di kantong”, said one student. “Good, how about you Ridwan?” Sukses Miss, ada pertanyaan yang terjawab, yang berapa kecepatan kangaroo waktu lari, di text ada kata run yang artinya lari trus ada keteranganannya, can also run at speeds of over 45 kilometres per hour. Hour artinya jam kan Miss? Brarti kecepatannya 45 km per jam. Trus tadi sebelum baca saya tahu kalau Kangguru makan rumput. Di teks ada kata eat grass. Berarti benar. Good job Rani, Ridwan.”

meminta Ss untuk mengumpulkan hasil pekerjaan mereka. Lalu, R menutup pelajaran dengan berdoa.

Field Notes 7
Hari, tanggal : Senin, 10 September 2013
Jam : 07.30
Kegiatan : Pertemuan 2 (Cycle 1)
Tempat : Ruang Guru
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)

R datang kesekolah pukul 6.45. Kemudian P langsung menuju ruang guru untuk menemui ET1 dan memastikan bahwa R telah menyiapkan segala sesuatu yang dibutuhkan dalam kegiatan pembelajaran hari ini. Setelah jam 7.00 tepat bel berbunyi, R bersama ET1 dan ET2 langsung menuju laboratorium bahasa.

Setelah memastikan bahwa Ss paham dengan penjelasan R, R memberikan apersepsi kepada Ss secara umum mengenai kota-kota di Australia. Kebanyakan dari mereka mengetahui kota Sydney. “What do you know about Sidney?” ”In one of capital city Miss”. “Good, others please?” Tidak ada jawaban dari Ss. “Ok, I will show you a picture”. R kemudian menunjukkan landmark kota Sidney, Sidney Opera House. “Ow, pernah liat Miss, itu bangunannya kayaknya buat konser. Boleh ditulis di What I want to know column ya Miss misalnya, what is the name of the building?” Ya, boleh, jawab R.

R lalu meminta Ss membentuk kelompok. Tiap kelompok terdiri dari 4 Ss. Kali ini R menentukan anggota masing masing kelompok dengan menyuruh siswa menghitung 1 sampai 8. Setelah kelompok terbentuk, kemudian R memberikan worksheet berupa KWL chart untuk setiap kelompok. R meminta Ss untuk memulai melengkapi KWL chart tersebut mulai dari kolom K, W, dan L.

Sebelum siswa mulai mengerjakan, R memberi beberapa kosakata terkait topik untuk membantu siswa. R menulis beberapa kosakata di What I Know column. Kemudian meminta siswa menentukan kosakata mana yang terkait topik. “Di sini, ada beberapa kosakata yang terkait topik bacaan. Dari 8 kosakata, ada 3 yang tidak terkait topik. Now, as far as you know, which words are related to our topic, and which are not. Di antara kalian, ada yang tahu
artinya?” Some of the students gave their answers. “OK, mari kita bahas kosakata ini.”

Setelah selesai membahas beberapa kosakata terkait text, R meminta siswa menuliskan hal hal yang mereka ketahui terkait topik di What I Know column. Setelah siswa selesai menuliskan hal hal yang mereka ketahui, siswa diminta mengisi column kedua. Di kolom ini, siswa harus membuat pertanyaan sendiri mengenai hal hal yang ingin mereka ketahui terkait topik bacaan.

R lalu berkeliling untuk memonitor kegiatan Ss dalam membaca dan memberikan feedback. Ketika Ss masih dalam tahap preview, R melihat ada satu kelompok yang sedang menulis di kolom K. Mereka menulis hal hal yang telah mereka ketahui terkait topik bacaan. Mereka juga menuliskan banyak hal yang ingin mereka ketahui. Hal ini menunjukkan bahwa Ss sudah mengerti apa yang harus mereka lakukan di preview. Mereka Ketika R berkeliling lagi untuk memonitor kelompok yang lain, R melihat bahwa hampir semua kelompok mengerjakan sesuai dengan apa yang P terangkan. Pada pertemuan ini, sudah banyak Ss yang mencoba menebak arti suatu kata dengan melihat konteks kalimat.

Setelah Ss berdiskusi, R meminta beberapa kelompok untuk mempresentasikan hasil diskusi mereka. Ketika R memberikan kesempatan kepada Ss, namun mereka malah saling tunjuk satu sama lain. Akhirnya ada perwakilan dari salah satu kelompok maju ke depan. Setelah Ss tersebut mempresentasikan hasil diskusi dari kelompoknya, R memberi kesempatan kepada kelompok lain untuk menanggapi apa yang telah dipresentasikan. Kemudian R bersama sama Ss merangkum apa yang telah mereka pelajari berdasarkan kolom What I learned.

Setelah semua selesai, akhirnya R bersama Ss merangkum bersama-sama mengenai apa saja yang dipelajari hari ini. P lalu menutup pelajaran dengan berdoa.

Field Notes 8
Hari, tanggal : Sabtu, 15 September 2013
Jam : 10.00
Kegiatan : Pertemuan 3 (Cycle 1)
Tempat : Ruang Guru
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)

R membuka pelajaran dengan memimpin doa lalu mengececk kehadiran siswa sebelum masuk ke pelajaran pada pertemuan ke 3 ini, R mereview topik pembahasan sebelumnya. Hampir semua siswa mengingat pelajaran sebelumnya.
R bertanya, “What did you learn yesterday?” Ss answered “Report texts”, “P” “What is the social function of report texts?” Ss “To give information of something Miss, generally. A R “What is the generic structure then?” Ss “General classification and description”, How about the tenses?” asked the researcher. “Using simple present tenses Miss”.

Setelah sekitar 10 menit membahas teks berjudul thanks giving, R kemudian menunjukkan gambar kepada siswa. R kemudian menyuruh siswa untuk membuat table Kwl pada buku mereka. Setelah siswa menggambar table KWL, R bertanya pada siswa. “What do you know about this? Owh, itu namanya mitoni kalau di sini Miss. Mitoni apa ya? Seven months Miss. Any other ideas? “That is tingkeban Miss”, siswa lain menjawab. Good. Now, Im your K column, write the things you know about tingkeban”. Kemudian secara berkelompok siswa menuliskan hal-hal yang mereka ketahui terkait tingkeban. Setelah 5 menit, R meminta siswa membaca hasil diskusi mereka. Setelah selesai, siswa mengisi kolom W. Mereka menuliskan hal-hal yang ingin mereka ketahui terkait topic. Selesai menuliskan hal yang ingin mereka ketahui, siswa kemudian membaca teks yang diberikan oleh R. R memberi waktu 5 menit kepada siswa untuk membaca teks secara sekilas. Kemudian menuliskan garis besar isi teks tersebut di kolom L. R membimbing siswa untuk mengisi kolom L. sambil berkeliling, R melihat pekerjaan siswa. R melihat beberapa siswa sudah menemukan jawaban dari pertanyaan di kolom W.

Setelah 5 menit R meminta siswa berhenti membaca. R kemudian bertanya, “What is the text about? “It’s about tingkeban, the step and meaning meaning Miss.” Well, ok, now you may read the text to find the answer for your own question.” Siswa kemudian membaca teks tersebut sampai selesai dan melengkap kolom L. Setelah siswa selesai R meminta siswa mempresentasikan hasil diskusi dan pekerjaan mereka. Beberapa kelompok mampu menemukan jawaban dari pertanyaan yang mereka tanyakan pada kolom W. Secara garis besar, siswa mampu mengetahui isi teks dan detail information dalam teks setelah menggunakan...

Field Notes 9
Hari, tanggal : Senin, 17 September 2013
Jam : 07.30
Kegiatan : Pertemuan 4 (Cycle 2)
Tempat : Ruang Guru
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)

R kemudian membuka pelajaran sementara ET 1 dan ET 2 duduk di belakang sambil mengisi observation sheet sebagai penilaian untuk R. R membuka pelajaran dengan menyapa siswa. “Good morning”. “Good morning Miss. Hari ini ngapain Miss? Nonton film?” No, I still need your help.” We are going to read text and complete Kwl chart.” Ow, after that, may we watch movie Miss?” “Hm, ask Miss Isti.” So, what we are going to learn Miss?” “Good question. Before we talk about our topic to day. I’d like to ask you first. Have you ever read fairy tales? Beberapa siswa menjawab, “Cerita-cerita fiktif gitu kan Miss?” “Like Cinderella.” “Good”. “Pasti hari ini belajranya narrative.” Beberapa siswa telah menebak bahwa hari itu mereka akan belajar narrative text. R lalu mereview pengetahuan siswa tentang teks naratif dan contoh cerita naratif. R menanyakan mengenai generic structure of the text, dan tenses. Setelah selesai
R kemudian meminta siswa untuk membentuk kelompok. Setelah kelompok terbentuk R menunjukkan beberapa gambar pada siswa. Kemudian R bertanya pada siswa “...Ok, so, what may the story be?” asked the researcher. “Me me me Miss, that’s about a son and his mom. They poor,” said a student enthusiastically. “OK good. Write them down on your first column,” said the researcher. “Can you guess the title of the text we are going to read based on the pictures I show you?” “Bean stalk Miss”. “Itu yang di sinetron-sinetron di TPI.” “Jack and the bean stalk Miss.” “Good, Jack and the bean stalk. Now I’ll give you some vocabulary related to the text. But before that, can anyone guess what vocabulary you may foubd? Beberapa siswa yang telah tahu ceritaberdulul “Jack and the bean stalk menyebutkan beberapa kosa kata. Namun masih ada diantaranya yang tidak tahu kata tersebut dalam bahasa Inggris. R membantu memberikan bahasa Inggris kata-kata yang disebut siswa. Di sini R menerapkan “preteaching vocabulary” agar siswa lebih mudah untuk memahami teks. Di samping menanyakan pada siswa tentang kosa kata yang mereka ketahui, R menambahkan beberapa kosa kata.

R kemudian meminta siswa membaca teks secara sekilas. Setelah itu, R meminta siswa melengkapi kolom K dan kolom W. Siswa kemudian mempresentasikan hasil pekerjaan mereka. R kemudian memberi waktu pada siswa untuk membaca teks tersebut secara seksama. Pada bagian ini, siswa melakukan skimming dan scanning. Setelah selesai semua siswa mempresentasikan hasil pekerjaan mereka. Pada Cycle 2 ini R meminta siswa untuk menuliskan reflection dari apa yang telah mereka pelajari. Ini bertujuan untuk membuat siswa paham tentang moral value of the text. “Now, you have to write on you paper about what the most interesting things you learn form the text,” said the reseacher. “Apa aja boleh Miss?” asked a student.

R kemudian memberikan beberapa pertanyaan pada siswa terkait teks. Siswa diminta untuk mengerjakan soal tersebut secara individu.

Natilnote 10
Hari, tanggal : Sabtu, 22 September 2013
Jam : 07.30
Kegiatan : Pertemuan 5 (Cycle 2)
Tempat : Ruang Guru
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)

R datang ke sekolah tepat pukul 11.30. Hari itu pelajaran hari itu dengan menerangkan materi pembelajaran pada hari itu.

Setelah semuanya siap, R membuka pelajaran dengan menyapa siswa serta mengecek kehadiran siswa. Ada 2 orang siswa yang tidak masuk pada hari itu. Setelah itu, R mengulas materi pembelajaran pada pertemuan sebelumnya. Beberapa siswa masih mengingat materi pembelajaran yang diberikan minggu lalu. R bertanya, “What did you learn last week?” We learned narrative Miss. Can you tell me what narrative text is? “Narrative is a text that tells about fiction. It is for entertain or amuse the reader. “Good Lina.” How about the tenses used?” “Using past tense Miss like was, werw, -ed.” “Kk.” Today, we are going to read narrative text again, but with a different topic. Well, let me show you a pictures. R menunjukkan beberapa gambar ayam dan kaki seribu. Siswa masih terlihat bingung.

R wrote some vocabulary related to the topic then asked, “They are the vocabulary you are going to find in the text. Di antara kalian, ada yang tahu artinya?” Some of the students gave their answers. “OK, mari kita bahas kosakata ini.

R lalu menunjukkan paragraph pertama pada slide. R lalu memberikan waktu satu menit pada siswa untuk membaca teks tersebut. Setelah satu menit, R meminta siswa untuk menuliskan hal yang mereka tahu setelah membaca teks secara sekilas. R juga meminta siswa untuk menebak isi paragraph setelahnya dalam bentuk pertanyaan di kolom W. begitu seterusnya sampai paragraph terakhir sampai semua kolom dilengkapi R dan siswa kemudian membahas apa yang telah mereka pelajari dan mereka bahas. Beberapa kelompok diberi kesempatan untuk merangkum materi yang telah merka pelajari.
Pukul 13.30 bel berbunyi. R lalu merangkum materi pada hari itu R tidak memberi pertanyaan pemahaman mengenai teks pada hari tersebut kemudian R menutup pelajaran dengan berdoa bersama.

Field Notes 11  
Hari, tanggal : Senin, 24 September 2013  
Jam : 07.30  
Kegiatan : Pertemuan 6 (Cycle 2)  
Tempat : Ruang Guru  
ET1 : English Teacher 1 (Bu Isti Rahayu, S.Pd)

“Ok class, today. I am going to give you a naratif text, again, so you don’t be bored.” “Jangan panjang-panjang Miss?” Dari pertanyaan siswa tersebut terlihat bahwa mereka sudah mulai terbiasa dengan penerapan KWL di kelas.

“Now I’ll give some vocabulary in your K column. You have to choose which belong to the topic we are going to discuss. R lalu membagikan KWL chart yang sudah di beri beberapa kosa kata pada kolom K. “And the title of the text is “Alibaba and the Fourty Thieves.” Ok, silahkan dikerjakan.

Tepat pukul 13.0, bel berbunyi. R langsung mereview materi pelajaran pada hari tersebut, lalu menutup kelas dengan berdoa.
APPENDIX B
INTERVIEW TRANSCRIPT
APPENDIX C: INTERVIEW TRANSCRIPTS

NB : 
R : Researcher 
T : English Teacher 
S : Students 

Interview 1 (Observasi awal)
Hari, Tanggal : Rabu, 29 Februari 2012 
Pukul : 08.30
R : Researcher 
ET 1 : English Teacher (Ibu Isti Rahayu, S.Pd) 
T : Ruang tamu di ruang guru.

R : Selamat siang Bu Isti.
ET1 : Hallo mbak Yuni, apa kabar? Lama tidak ketemu mbak Yuni ini.
R : Alhamdulilah baik Bu. 
ET1 : Gimana mbak, ada yang bisa saya bantu mbak? Katanya mau 
mengadakan penelitian di sini ya? 
R : Iya Bu. Saya bermaksud mengadakan penelitian di sini untuk skripsi Bu. 
Kebetulan skripsi saya action research.
ET1 : Ow, begitu ya mbak? PTK kan? Kebetulan kan ini kita juga habis ada 
pembahasan mengenai PTK. Nanti saya malah bisa belajar dari mbak Yuni ya.
R : Ya nanti belajar sama sama ya Bu. Kalau di kelas XI yang paling susah 
apa ya BU? 
ET1 : Reading mbak. Mereka itu males kalau disuruh baca teks. Padahal kan 
pembelajaran saat ini banyak diutamakan ke jenis-jenis teks gitu kan ya. Minggu 
kemaren saya ajarkan teks narrative. Banyak dari mereka bilang kalau teks nya 
susah dan banyak kata-kata sukar. Bisa dibilang kosa kata yang mereka kuasai itu 
masih kurang. Mereka juga sangat tergantung pada kamus mbak. Sebenarnya kan 
kalau baca tapi terlalu sering buka kamus juga gag boleh. Tapi mau gimana lagi 
mbak, kalau gag pakai kamus mereka juga ga ngerti apa apa.
R : Kalau materi nya gimana Bu?
ET1 : Kalau soal materi, biasanya saya ambil dari buku-buku mbak. Ada 
beberapa buku yang saya pakai. Tapi yang paling sering saya pakai itu Look A 
Head mbak.
R : Ada masalah atau tidak Bu untuk pemilihan teks nya atau materi materi 
nya?
ET1 : Ada mbak. Kadang mencari teks yang sesuai sama kemampuan siswa itu 
agak susah. Kadang terlalu panjang. Kadang kata katanya terlalu sulit. Dan untuk 
kelas XI kan biasanya bentuknya teks yang ndladrah to mbak, tidak ada gambar 
yang menarik. Padahal kalau ada gambar siswa itu juga lumayan terbantu.
R : Kalau begitu, untuk lebih jelasnya apa saya boleh ikut ke kelas ya Bu, 
untuk melihat masalah masalah tertkait reading?
ET1 : Ow, silahkan mbak. Anak anak pasti pada seneng ketemu mbak Yuni lagi. Dulu pas KKN ngajar mereka juga kan?

R : Iya Bu. Kira kira kapan ya Bu saya bisa ikut ke kelas?
ET1 : Nanti masalah waktu saya sms ya mbak, soalnya ini mau ada ulangan dulu.
R : Ow, iya Bu, terimakasih banyak ya Bu. Kalau begitu sya permisi Bu.
ET1 : Iya mbak, sama sama. Nanti saya hubungi mbak Yuni lagi.

Interview 2

Hari, Tanggal : Rabu, 29 Agustus 2012
Pukul : 09.00
R : Reseacher
ET 1 : English Teacher (Ibu Isti Rahayu, S.Pd)
T : Ruang tamu di ruang guru.

R : Selamat pagi Ibu.
ET1 : Selamat Pagi mbak Yuni. Gimana mbak Yuni jadi penelitian kan?
R : Iya Bu, jadi. Setelah saya observasi ke kelas kemarin saya sudah menemukan beberapa masalah terkait reading dan saya nanti akan coba memakai teknik untuk mengatasi masalah tersebut Bu.
ET1 : Terus ini mbak Yuni jadinya mau pakai teknik apa?
R : Memakai KWL bu. Nanti pakai chart.
ET1 : Ow, graphic organizer gitu ya?
R : Benar bu, jadi nanti siswa mengisi KWL chart sebelum dan setelah membaca teks. Nanti saya akan tunjukkan RPP saya ke Bu isti sekalian minta saran dari Ibu.
ET1 : Hm, iya mbak. Nanti saya bantu sebisa saya ya.
R : Terima kasih banyak ya Bu. Ini saya mau langsung permisi Bu, mau wawancara siswa.
ET1 : Iya mbak. Silahkan.

Interview 3

Hari, Tanggal : Rabu, 29 Agustus 2012
Pukul : 08.30
R : Peneliti
S : Student (Ridwan)
T : Depan Ruang Kelas XI IPS 2.

R : Halo dek Ridwan.
S : Lhoh, mbak Yuni balik lagi ke sini. Ngapain mbak?
S : Ow, boleh dong mbak. Mau nanya apa mbak?
R : Menurut kamu pelajaran bahasa Inggris itu susah gag dek?
S : Susah banget mbak.
R : Yang paling susah apa?
R : Biasanya kalau pas pelajaran membaca gitu sama Bu Is disuruh ngapain?
R : Kalau sebelum membaca itu Bu Isti membimbing kalian ga?
S : Membimbing gimana mbak? Kita Cuma langsung disuruh membaca teks nya trus jawab pertanyaan.
R : Kalian kalau membaca dan memahami teks nya gimana? Biar ngerti isinya.
S : Pakai kamus mbak. Diartiin gitu.
R : Ga pakai strategi biar bacanya efisien?
S : Ga mbak, ga pernah diajari kok.
R : Teks nya sering ada gambarnya ga dek?
S : Ga mbak, Cuma teks panjang.
R : Ok dek. Terimakasih ya buat waktunya.

Interview 4
Hari, Tanggal : Rabu, 29 Agustus 2012
Pukul : 09.30
R : Researcher
S1, S2, S3 : Students 1,2,3
T : Perpustakaan

R : Met siang semuanya.
S1,S2, S3 : Hai mbak. Siang.
R : Baru sibuk baca baca buku ya? Mbak Yuni boleh minta waktunya sebentar ga?
S1 : Ga sibuk kok mbak. Nanya apa mbak?
R : Nanya nanya soal pelajaran bahasa Inggris. Ni kan kalian baca baca buku di sini, seneng membaca ya?
R : Oya? Lha, sekarang yang mau mbak Yuni tanyain, kenapa ada yang suka ama baca teks bahasa inggris, kenapa ada yang nggak?
S1 : Susah mbak. Liat teks nya yang panjang aja udah males. Banyak banget ngartiinnya.
S2 : Kalau aku emang dasarnya seneng bahasa Inggris sih mbak.
R : Sebentar, ni tadi dek 1 ma 3 kok bilang ngartiinnya banyak?
Memangnya kalau baca teks itu diartiin satu satu ya?
R : Bacanya gag pakai strategi ya? biar cepet ga perlu ngartiin?
R : Ok. Kalau dek 2 gimana caranya biar bisa memahami teks?
R : Menurut kalian, biar bisa membantu memahami teks itu gimana?
R : Ok Dek. Makasih banyak dek buat waktunya.
S1, S2, S3 : Sama sama mbak.

Interview 5
Hari, Tanggal : Rabu, 29 Agustus 2012
Pukul : 13.00
R : Researcher
S : Student (Wahyudin Saputra)
T : Ruang kelas

R : Hai Dek Putra. Boleh minta waktunya buat tanya tanya ga Dek?
R : Iya. Mbak Yuni cuma mau nanya kalau pelajaran reading sama Bu Is gimana Dek? Enak ga?
R : Biasanya kalau pelajaran reading disuruh ngapain?
S : Disuruh baca teks, ambil kamus di perpustakaan, disuruh baca teks, jawab pertanyaan, terus dibahas bersama sama mbak. Biasanya ditunjuk satu satu gitu. Tapi ga semuanya yang ditunjuk.
R : Terus kesulitan kamu kalau pelajarn bahasa Inggrisnya disuruh baca apa?
S : Susah artinya sama kalau buka kamus kelamaan.
R : Ama Bu guru ga dibantu dek?
S : Gag mbak, kan disuruh baca sendiri. Paling nanti setelah selesai itu baru dibahas sama sama baru kita tahu benernya.
R : Ok Dek, makasih banyak ya buat waktu sama informasinya.
S : Sama sama mbak. Tapi jangan dibilangin ma Bu Is lho mbak.
R : Iya, tenang ajaa.
PENELITIAN
Pertemuan 1 Cycle I
Interview 6
Hari, Tanggal : Sabtu, 8 September 2012
Pukul : 08.30
R : Reseacher
S1&S2 : Students (Fitri&Rani)
T : Ruang kelas

R : Hai Dek, boleh minta waktunya sebentar ga?
S1 : Boleh mbak. Mau interview ya mbak?
R : Iya ni Dek, Dek Fitri sama Dek Rani, tadi kan udah ngisi tabel KWL, dengan melengkapi kolom K dan W sebelum baca teks tadi cukup membantu ga?
S1 : Menurutku menarik mbak?
R : Maksudnya?
S2 : Jadi kayak main tebak tebakan Miss. Apa yang kita tahu sama apa yang pengin kita tahu bisa ditemukan di teks pa ga. Kan otomatis jadi pengin baca teks nya.
S1 : Iya Miss, jadi penasaran dan tertantang buat menemukan jawaban dari pertanyaan yang ada pada What I want to know kolom. Jadi pas baca itu kita tahu apa yang kita mau temukan dalam teks.
R : Jadi kalau baca text yang panjang udah ga masalah ya?
S2 : Iya Miss, kalau teks nya pendek kan jadi tidak yakin informasi yang kita butuh ada pa ga.
R : Kesulitannya apa Dek?
S1 : Ini mbak, kalau ga ada jawabannya kan jadi ga ketemu jawabannya.
R : Lalu penggunaan picture cukup membantu kalian tidak?
S2 : Iya Miss, kan menarik kalo ada gambarnya. Apalagi kalo buat yang teks report apalagi mbak.
R : Membantunya gimana?
S1 : Misalnya kita belum pernah tahu yang namanya comodo dragon, trus ditunjukin gambarnya. Kan kita jadi tahu kayak apa itu, trus jadi pengin tahu lebih banyak lagi.

Interview 7
Hari, Tanggal : Sabtu, 8 September 2012
Pukul : 08.45
R : Reseacher
ET1 : English Teacher (Isti Rahayu, S.Pd)
T : Ruang Guru

R : Permisi Bu Isti. Ini mau tanya mengenai pertemuan pertama ini Bu.
ET1 : Ya Mbak sini mbak.
R : Menurut Bu Isti dan Bu Nur, pelajaran hari ini gimana Bu?
ET1 : Ya, pertemuan pertama ini sudah berjalan cukup baik Mbak. Mungkin kalau siswa masih sedikit agak bingung kan wajar, maklum baru pertemuan
pertama ya Mbak. Tapi saya lihat tadi siswa tertarik kok dengan cara mengajar Mbak Yuni.

R : Menurut Ibu, penggunaan KWL chart ini bisa membantu siswa tidak Bu?
ET2 : Menurut saya chart nya sudah cukup membantu Mbak apalagi untuk tahap before reading, jadi untuk previewing text. Dan saya rasa previewing teks itu juga penting untuk menuntun siswa memahami teks.

R : Kira kira kekurangannya apa ya Bu?

R : Owh, iya Bu, terima kasih banyak ya Bu.
ET1 : Iya Mbak, sama sama.

Pertemuan 2 Cycle I
Interview 8
Hari, Tanggal : Senin, 10 September 2012
Pukul : 08.30
R : Reseacher
S : Student (Surya)
T : Ruang kelas

R : Hai Dek, boleh minta waktunya sebentar ga?

R : Iya, ga pakai bahasa Inggris kok. Pakai bahasa Indonesia aja.
S : Ok mbak kalau pakai bahasa Indonesia siap.

R : Gimana pelajaran bahasa Inggrisnya Dek, pas diajar sama mbak Yuni?
S : Asik mbak. Pelajaran reading nya jadi ga membosankan kok mbak.

R : Surya, sekarang kalau baca teks masih diartikan per kata ga?
S : Ga Miss. Pakai strategi biar cepat nyari informasi yang dibutuhkan di teks nya. Kalau mau nyari informasi yang specific kayak angka, nama atau menemukan main idea ga perlu dibaca semua textnya jadi ga buang buang waktu.

R : Bagus. Masih ada kesulitan ga dek?
S : Ga Miss. Pakai strategi biar cepat nyari informasi yang dibutuhkan di teks nya. Kalau mau nyari informasi yang specific kayak angka, nama atau menemukan main idea ga perlu dibaca semua textnya jadi ga buang buang waktu.

R : Ya kan baru 2x pertemuan mbak. Kadang masih susah soalnya biasanya kan kita artiin pakai kamus kata katanya. Sekarang sama mbak Yuni ga boleh pakai kamus.
S : Asah mbak. Pelajaran reading nya jadi ga membosankan kok mbak.

R : Tapi sedikit sedikit udah mulai bisa ya? Tanpa diartiin satu satu kan bisa paham juga to dek?

R : Begitu ya Dek? Ya sudah, makasih banyak ya Dek.
S : Iya Mbak. Sama sama.
Interview 9

Hari, Tanggal : Senin, 10 September 2012
Pukul : 08.30
R : Researcher
S : Student (Alif)
T : Kantin Sekolah

R : Hai Dek, boleh minta waktunya sebentar ga Dek?
S : Boleh kok Mbak. Tapi kita sambil makan ya Mbak.
R : Iya Dek, Ga masalah kok. Ni mbak Yuni mau nanya soal pelajaran bahasa Inggris yang tadi. Dek, penggunaan picture cukup membantu kalian tidak?
S : Iya Mbak, kan menarik kalo ada gambarnya. Apalagi kalo buat yang teks report apalagi mbak.
R : Membantunya gimana?
S : Misalnya kita belum pernah tahu yang namanya comodo dragon, trus ditunjukin gambarnya. Kan kita jadi tahu kayak apa itu, trus jadi penguin tahu lebih banyak lagi.
S : Terus misalnya lagi yang Sidney itu. Setelah liat gambarnya kita jadi tahu mbak. Trus jadi ada bayangan Sidney tu kayak apa?
R : Jadi penggunaan picture cukup membantu ya Dek?
S : Membantu banget Mbak.
R : Ok Dek, makasih banget ya Dek.
S : Sama sama Mbak.

Interview 10

Hari, Tanggal : Senin, 10 September 2012
Pukul : 08.30
R : Researcher
S : English Teacher (Isti Rahayu, S.Pd)
T : Ruang Guru

R : Permisi Ibuk, boleh minta waktunya sebentar tidak ya Bu?
ET : Boleh dong Mbak Yuni. Gimana gimana?
R : Bagaimana Bu penggunaan gambar tadi? Apakah menurut Bu Isti sudah cukup membantu siswa?
R : Berarti penggunaan gambar ini cukup membantu ya Bu?
ET : Sangat membantu kalau menurut saya. Dengan gambar kan jadi mbak Yuni bisa mengkungkung siswa agar fokus pada hal yang akan dibicarakan di dalam teks.
R : Terimakasih banyak Bu.
ET : Sama sama Mbak.
**Pertemuan 3 Cycle I**

**Interview 11**

**Hari, Tanggal : Sabtu, 15 September 2012**

**Pukul : 13.30**

**R** : Reseacher

**S** : Student

**T** : Ruang kelas

---

R : Siang Dek, boleh minta waktunya ga?
S1 : Boleh mbak.
R : Langsung aja ya Dek ni mbak Yuni mau nanya. Dek, sekarang kalau mau menemukan informasi yang spesifik dalam text seperti nama atau tanggal, lebih mudah atau tidak?
S1 : Mudah Miss.
R : Yang bikin mudah apanya?
R : Hmm, begitu ya? Ya sudah Dek, terima kasih banyak ya Dek
S : Iya Mbak, sama sama.

---

**Interview 12**

**Hari, Tanggal : Sabtu, 15 September 2012**

**Pukul : 13.30**

**R** : Reseacher

**S** : Student (Rani)

**T** : Depan Laboratorium Bahasa

---

R : Halo Dek. Boleh minta waktunya sebentar buat tanya tanya?
R : Owh, iya Dek, ga masalah kok. Cuma bentar.
S : Iya Mbak.
R : Dek Rani, penggunaan strategi skimming cukup membantu untuk menemukan informasi dalam text tidak?
S : Membantu Mbak. Jadi bacanya sekilas aja kan? Buat menemukan main idea, memprediksi the social function misalnya.
R : Kesulitannya apa Dek ketika menggunakan strategi ini?
S : Belum terbiasa mbak. Jadi kadang masih aku terjemahin kalau baca.
R : Kalau penggunaan KWL nya sendiri gimana Dek?
R : Hm, Ok Dek. Makasih banyak Ya dek.
S : Sama sama Mbak. Maaf ya Mbak, soalnya keburu buru.
R : OK Dek.
Interview 13
Hari, Tanggal : Sabtu, 15 September 2012
Pukul : 13.45
R : Reseacher
S : Student (Yoci)
T : Depan Laboratorium Bahasa

R : Dek Yoci sama Dek Ridwan, boleh minta waktunya sebentar ga?
R : Menurut Dek Yoci sama Dek Ridwan, pelajaran bahasa Inggris hari ini gimana?
S : Menyenangkan mbak.
R : Yoci, menurut kamu penggunaan fix-up strategies tu gimana?
S1 : Cukup membantu Mbak
R : Kalau menurut Dek Ridwan?
R : Secara keseluruhan, menurut kalian, penggunaan KWL chart sama beberapa strategi yang mbak Yuni ajarkan cukup membantu kalian ga?
R : Kalau penggunaan KWL nya sendiri gimana dek?
R : OK Dek, makasih ya.
S : Iya Mbak.

Interview 14
Hari, Tanggal : Sabtu, 15 September 2012
Pukul : 13.45
R : Reseacher
ET : English Teacher (Isti Rahayu, S.Pd)
T : Ruang Guru

R : Permisi Bu, boleh minta waktunya sebentar Bu?
R : Begini Bu, ini kan sudah 3 pertemuan ya Bu saya ngajarnya. Menurut Ibu bagaimana Bu, apa sudah ada peningkatan?
ET : Hm, kalau menurut saya sudah cukup mbak ini untuk cycle 1. Siswa sudah mulai ada peningkatan. Indikator di RPP nya saya lihat juga sudah tercapai.
Tetapi bukan berarti sudah ada peningkatan yang signifikan ya Mbak, kekurangan kanan kiri masih ada tapi masih bisa dibenahi nanti pada Cycle berikutnya Mbak.

R : Menurut Ibu, kira kira untuk Cycle 2 nanti apa ya Bu yang paling penting dibenahi?

ET : Saya rasa itu dulu Mbak. Iya Mbak, sama sama ya.

**Pertemuan 1 Cycle 2**

**Interview 15**

**Hari, Tanggal : Sabtu, 17 September 2012**

**Pukul : 09.30**

R : Reseacher

S : Student

T : Depan Laboratorium Bahasa

R : Siang Dek.

S : Siang Mbak.

R : Ini Mbak mau wawancara sebentar ganggu ga ya Dek?

S : Ga Mbak, ni kita juga cuma ngobrol ngobrol aja kok. Mau tanya apa mbak?

R : Mau tanya beberapa hal tentang tentang pelajaran bahasa Inggris yang tadi. Tapi jawabnya harus jujur ya Dek.

S : Ok Mbak.

R : Menurut kamu, setelah Mbak Yuni meminta kalian memakai bahasa Inggris untuk mengungkapkan ide tadi gimana? Tambah susah atau bagaimana?

S : Sebenernya tambah enak mbak, karna kan kalau ketemu kata kata yang sekiranya jadi kata kunci kan nanti jadi lebih mudah ketika membaca. Tapi ada tapinya Mbak. Kan kadang malu Mbak kalau pake bahasa Inggris.

R : Lho tapi kan ga Mbak Yuni marahin Dek. Malah dibenerin kan?

S : Iya sih mbak, tapi kan pada disorakin Mbak.

R : Ga masalah kan yang penting jadi tahu.

S : Iya Mbak.

R : Terus pelajaran hari ini gimana Dek menurut kamu?
S : Menyenangkan Mbak. Lha teks nya pakai banyak gambar jadi kan menarik, trus jadi bisa lebih mudah untuk mengisi kolom K dan kolom W.
R : Lebih mudahnya gimana maksudnya Dek?
S : Itu lho Mbak, pas brainstorming kan gambar itu bisa kasih stimulasi ide nya apa, trus jadi ada pengin tahu apa aja yang ada di teks. Kan bisa jadi melengkapi kolom K dan W.
R : Hmm, begitu ya. Ok Dek, terimakasih banyak ya Dek udah mau diwawancara. Mbak Yuni mau langsung menemui Bu Isti ni di kantor.
R : Terima kasih.

Interview 16
Hari, Tanggal : Sabtu, 17 September 2012
Pukul : 14.00
R : Reseacher
ET : English Teacher (Isti Rahayu, S.Pd)
T : Ruang Guru

R : Permisi Bu Is, boleh minta waktu Ibu sebentar untuk wawancara Bu?
ET1 : Silahkan Mbak. Sini duduk.
R : Terima kasih Bu. Ini langsung saja ya Bu saya tanya, menurut Ibu, pelajaran hari ini bagaimana Bu?
ET : Ya, saya rasa untuk hari ini sudah lebih baik daripada yang di Cycle 1 kemarin mbak. Siswa sudah lebih banyak memakai bahasa Inggris, mereka juga sangat tertarik untuk membaca teksnya setelah diberi beberapa gambar, lalu mereka juga sudah memcoba untuk tidak menerjemahkan paragraf tersebut per kalimat. Sudah lebih baik kok mbak. Teknik nya mbak Yuni dengan menyuruh membaca sekilas lalu menulis di what I know, setelah itu dibaca lagi ternyata sangat efektif mbak.
R : Begitu ya Bu? Bu, kalau untuk yang pertemuan berikutnya nanati saya mau potong potong teks nya jadi biar nanti siswa bisa skimming dan scanning bagaimana ya Bu?
ET1 : Oya silahkan saja Mbak. Pokoknya yang menurut Mbak Yuni itu bisa membantu siswa ya silahkan dicoba diterapkan. Nanti saya tinggal kasih saran atau koreksi saja ya.
R : Iya Bu, Wassalammu’alaikum.
ET1 : Wa’alaikum salam.
Pertemuan 2 Cycle 2
Interview 17
Hari, Tanggal : Sabtu, 22 September 2012
Pukul : 09.30
R : Reseacher
S : Students (Wahyudin Saputra&Elsa Sulistyanto)
T : Depan Laboratorium Bahasa

R : Siang Dek Putra, Dek Elsa. Mbak Yuni ganggu ga ni?
S1&S2 : Ga Mbak, ada apa ya Mbak?
R : Ini mau tanya dan minta pendapat tentang pelajaran bahasa Inggris hari ini.
S2 : Silahkan Mbak.
R : Sebelum baca teks tadi kan kalian disuruh melengkapi What I Know column. Menurut kamu waktu melengkapi What I Know column tadi gimana? Susah ga?
S : Wah, asik Miss. Tadi saya sama Elsa dan Putra buat membuat prediksi tentang isi teks nya. Kita juga beraing buat menyebutkan hal hal terkait topik yang kita ketahui dan siapa yang benar.
R : Trus, kamu bisa nemuin jawabannya ga?
S : Dari 5 pertanyaan yang aku buat, yang ada jawabannya 3 Miss. Tapi prediksiku benar semua. Puas rasanya.
R : Kalau sebelum baca text disuruh bikin prediksi seperti itu, kamu jadi termotivasi buat baca textnya ga?
S : O, iya Miss, kan jadi ngrasa penasaran, tertantang buat nemuin jawabannya, trus kalau udah ketemu jawabannya tu puas banget.
R : Terus dengan diajar pake KWL ini kalian merasa terbantu untuk memahami bacaan ga Dek?
R : Kesulitannya apa?
S : Nebak artinya itu mbak. Sama kadang kadang kalau pertanyaannya yang di kolom W ga ketemu jawabannya tu penasaran mbak.
R : Berarti kalau nebak arti masih agak susah ya?
S : Iya Mbak, tapi mulai terbiasa.
R : Ok Dek, terima kasih ya.
S1 & S2 : Sama sama Mbak.
Interview 18
Hari, Tanggal : Sabtu, 22 September 2012
Pukul : 09.30
R : Reseacher
S : Students
T : Depan Laboratorium Bahasa

R : Halo Dek, boleh minta waktunya sebentar? Mbak Yuni mau tanya tanya sama kalian.
S1 : Boleh Mbak.
S2 : Tanya apa Mbak? Pakai bahasa Inggris mesti.
R : Ga pakai bahasa Inggris kok. Cuma tanya soal pelajaran tadi aja.
S1 : Ok Mbak. Silahkan.
R : Langsung saja ni ya Dek, menurut kalian, memakai gambar bisa membantu buat memahami teks nya ga dek?
S : Jelas Miss. Kan kalau sebelumnya dikasih gambar kita bisa ada bayangan situasinya bagaimana, tokohnya seperti apa, jadi itu bisa membantu untuk memahami text.
R : Terus, tadi waktu disuruh perhatikan keywords dan ga boleh tanya lagi kalau ketemu kata itu di text gimana dek?
S : Ternyata sangat bermanfaat Miss. Jadi pas baca ga kesulitan dan udah banyak tau arti kosa kata yang sulit.
R : Membantu kalian buat memahami teks ga?
S : Sangat membantu Miss. Selain itu bacanya juga jadi efektif yang tanya ternya arti kata yang susah.
R : Hmm berarti sekarang kalau membaca ga perlu diartikan per kata ya Dek?
S : Iya Mbak.
R : Ok Dek, Mbak Yuni rasa udah cukup kok itu aja. Makasih ya Dek waktunya.
S : Sama sama Mbak.

Pertemuan ke 3 Cycle 2
Interview 19
Hari, Tanggal : Senin, 24 September 2012
Pukul : 13.30
R : Reseacher
S : Students
T : Kantin Sekolah

R : Halo Dek, siang. Baru makan ya? Boleh mengganggu sebentar?
S : Boleh Mbak. Mau makan sekalian Mbak?
R : Gag Dek, makasih. Ini mau tanya tanya aja soal pelajaran bahasa Inggris yang tadi. Dek, sekarang udah ada peningkatan belum setelah dari kemarin menggunakan skimming and scanning pas baca text?
S : Uda banyak peningkatan Miss daripada yang pas pertemuan pertama dan kedua kemarin.
R : Peningkatannya seperti apa?
S : Ya kan sekarang udah terbiasa memakai strategi itu. Jadi udah bisa cepet kalau mau menemukan informasi yang spesific dan general.
R : Dengan melengkapi kolom KWL bisa membantu kalian memahami teks atau tidak?
S : Bisa mbak. Kalau pake kolom kan dari sebelum membaca, selama membaca, sampai setelah membaca kan dibimbing.
R : Ok Dek. Terima kasih banyak ya Dek.
S : Sama sama Mbak.

Interview 20
Hari, Tanggal : Senin, 24 September 2012
Pukul : 13.45
R : Reseacher
S : Students
T : Depan Laboratorium Bahasa
R : Siang Dek, boleh ga ni Mbak Yuni tanya tanya? Minta waktunya sebentar.
S : Boleh Mbak, silahkan aja.
R : Dek, menurut kalian berdua, setelah memakai strategi membaca kemarin ada ga peningkatan yang kalian dapatkan?
S1 : Ada Mbak. Jadi lebih mudah ketika membaca text.
S2 : Iya Mbak.
R : Jadi lebih mudah gimana maksudnya?
S2 : Lebih efisien Mbak, jadi ga perlu buang-buang waktu buat baca text.
R : Kenapa bisa jadi lebih efisien dan ga buang-buang waktu?
S2 : Kan biasanya kita kalau membaca diarticen per kata per kalimat Mbak. Kita juga boleh pake kamus. Kalau sekarang kita udah bisa pake strategi.
S1 : Iya Mbak, kayak fix- up strategy. Itu bisa bantu kita buat baca lebih dan cari informasi dari teks lebih efisien.
R : Masih ingat ga fix-up strategy buat apa?
S2 : Jelas masih Mbak, udah apal. Kalau fix-up strategy dipakai kalo kita menemukan kata-kata sukar, kita bisa baca kata di depan atau di belakangnya.

Interview 21
Hari, Tanggal : Senin, 24 September 2012
Pukul : 14.00
R : Reseacher
ET2 : English Teacher (Nur Ngaini, S.Pd)
T : Depan Ruang Guru
R : Permisi Bu Nur, bisa minta waktunya sebentar tidak ya Bu?
C : Iya Mbak, silahkan duduk.
R : Begini Bu, saya mau tanya tanya tentang pembelajaran di kelas selama penerapan KWL? Apakah penggunaan strategi dalam teknik KWL ini dapat membantu siswa membaca secara efisien Bu?
R : Jadi sudah ada peningkatan ya Bu?
R : Ini berarti penelitian saya di sini sudah cukup berhasil ya Bu?
C : Iya Mbak, alhamdulillah. Penelitiannya juga bermanfaat untuk saya jadi saya tahu PTK itu seperti apa.
R : Kira kira saya perlu menambah Cycle lagi tidak ya Bu? Atau mungkin menambah pertemuananya?
C : Saya rasa cukup kok mbak.
R : Jadi saya bisa akhiri Cycle ini ya Bu?
C : Iya Mbak, silahkan.
R : Baik Bu, terimakasih banyak atas waktu Ibu.
C : Iya Mbak, sama sama.
R : Saya permisi dulu Bu, Wassalammu’alaikum.
C : Wa’alaikum salam.

Interview 22
Hari, Tanggal : Selasa, 25 September 2012
Pukul : 09.30
R : Reseacher
ET1 : English Teacher 1 (Isti Rahayu, S.Pd)
T : Perpustakaan

R : Selamat siang Bu Isti.
ET1 : Eh, Mbak Yuni, siang Mbak. Monggo duduk dulu. Maaf ya tadi saya tidak bisa menemani sampai selesai.
R : Iya Bu, tidak apa apa. Tadi kan tetap ada Bu Nur. Begini Bu, ini kan sudah pertemuan ke 3 di Cycle 2, menurut Bu Isti apa sudah ada cukup peningkatan Bu?
ET1 : Kalau menurut saya sekarang sudah jauh lebih baik dari Cycle 1 mbak. Kekurangan yang ada di Cycle 1 juga sudah dibenahi di Cycle 2. Teknik Mbak Yuni yang memotong teks jadi per paragraf ternyata juga sangat efektif. Sekarang siswa juga jadi bisa menggunakan strategi membaca yang efisien.
R : Kalau begitu, apa saya sudah bisa menghentikan Cycle 2 Bu?
ET1 : Sudah Mbak karena sudah ada peningkatan. Jadi tinggal Post-test ya Mbak?
R : Iya Bu.
ET1 : Ya sudah silahkan dipersiapkan test nya nanti hubungi saya lagi Mbak masalah waktu pelaksanaannya.
ET1 : Wa’alaikum salam Mbak.

APPENDIX E

READING COMPREHENSION TEST
Maura who was thought as the most beautiful and powerful queen of Arabia had many suitors. One by one she discarded them, until her list was reduced to just three sheiks. The three sheiks were all equally young and handsome. They were also rich and strong. It was very hard to decide who would be her husband.

One evening, Maura disguised herself and went to the camp of the three sheiks. As they were about to have dinner, Maura asked them for something to eat. The first Sheik gave her some leftover food. The second Sheik gave her some unappetizing camel’s tail. The third sheik, who was called Hakim, offered her some of the most tender and tasty meat. After dinner, the disguised queen left the sheik’s camp.

The following day, the queen invited the three sheiks for dinner at her palace. She ordered her servant to give each Sheik exactly what they had given to her before. Hakim, who received a plate of delicious meat, refused to eat it if the other two sheiks could not share it with him.

This Sheik Hakim’s act finally convinced Queen Maura that he was the man for her. “Without question, Hakim is the most generous of you” she announced her choice to the sheiks. “So it is Hakim that I will marry”.

Adapted from www.understandingtext.blogspot.com

The following text is for questions 1-11.

1. What the best title for the story?
   a. Queen Maura and Three Sheiks
   b. Queen Maura’s wedding
   c. Three Sheiks and The Food
   d. Queen Maura and The King

10. The word delicious has the same meaning with....
     a. Tasty
     b. Bitter
     c. Good
     d. Terrible
     e. Leftover

The following text is for questions 12-22.

Once upon a time, there was a poor widow who had only a son named Jack. They were so poor and they just had a cow. When the mother had grown too old, his mother sent Jack to the market to sell the cow. On the way to the market, Jack met a butcher who had some beautiful beans on his hand. The butcher told the boy that the beans were of great value and persuaded the silly lad to sell the cow for the beans.
Jack brought them happily. When he told his mother about this, his mother became so angry that she threw the beans out of the window. When Jack woke up in the morning, he felt the sun shining into a part of his room, but all the rest was quite dark and shady.

Jack decided to jumped to the window. What did he she? The beanstalk grew up quite close past Jack’s windows. He opened the window and jumped to the beanstalk which ran up just like a big ladder. Jack climbed and climbed till at the last he reached the sky. While looking around, he saw a very huge castle. He was very amazed.

Then Jack walk along the path leading to the castle. There was a big tall woman on the doorstep. Jack greeted her and asked her for the giantess’ mercy to give him breakfast, because he felt very hungry. Although the giantess grumbled at first, finally, he gave Jack a hunk of bread and cheese and a jug of milk.

Jack had not finished when the whole house, began to tremble with the noise of someone’s coming. “Oh, it’s my husband!” cried the giantess. “What on earth shall I do?” Hastily, the giantess opened a very big cupboard and hid Jack there.

11. What is the story about?
   a. Jack and a butcher
   b. Jack and the giantess
   c. Jack and the bean stalk
   d. A poor window and her son
   e. The giantess and her husband

12. What is the main idea of the fourth paragraph?
   a. Jack met the giantess
   b. Jack found the huge castle
   c. Jack was found by the giantess
   d. Jack made the giantess cried
   e. Jack woke up and had a nice breakfast

13. Where did Jack sell his cow?
   a. At a castle
   b. At the market
   c. At the giant’s castle
   d. At the butcher’s house
   e. On the way to the market

14. Why did Jack sell the cow to the butcher?
   a. Because Jack had been so tired
   b. Because the butcher liked his cow
   c. Because the cow was so poor
   d. Because the butcher pay with precious bean.

| I (1<sup>st</sup>-3<sup>rd</sup> meeting) | Animals | 5. Understanding meaning of short functional text and simple essay in daily life context. | 5.2 Respond to meaning and rhetoric steps of essay which uses written language variety in accurate, fluent, and acceptable manners in daily life context in the form of report text. | 1. Students are able to identify the language features of the text. 2. Students are able to identify vocabulary related to the text. 3. Students are able to share ideas related to the topic of the text. 4. Students are able to identify details information of the text. | 1. Use action verb when describing behaviour e.g. Kangaroos eat grass and plants. 2. Use adjectives e.g. They have short front legs, but very long, and very strong back legs and a long tail. 3. Use simple present tense (V1) e.g. A kangaroo is an animal.... They can also run at speeds.... | -Animal, pouch, hump -strong, long, large, -Sit up, jump, run, | 1. *K (What I Know) stage*  
- The students work in group of 4, discuss and retrieve their previous knowledge including the vocabulary they know about the picture then write them down in *What I Know column.*  
2. *W (What I want to Know) stage*  
- The students propose some questions (things they want to know) related to the text they are going to read.  
3. *L (What I Learn) stage*  
- The students write the information the get from the text and try to find whether the questions in *What I want to Know column* are answered or not.  
- The students make a summary based on what they write in the *What I Learn column.* | Whiteboard KWL chart Picture-cued | 2X45’ |
### Countries of origin

5. Understanding meaning of short functional text and simple essay in daily life context

| 1. Students are able to identify the language features of the text. |
| 2. Students are able to identify vocabulary related to the text. |
| 3. Students are able to share ideas related to the topic of the text. |
| 4. Students are able to identify details information of the text. |

### Cultural events

| 1. Students are able to identify the language features of the text. |
| 2. Students are able to identify vocabulary related to the text. |
| 3. Students are able to share ideas related to the topic of the text. |
| 4. Students are able to identify details information of the text. |

#### 1. Use adjectives
- Eg. Populous, famous, large, big

#### 2. Use simple present tense (V1)
- Eg. Sydney is the most populous city in Australia, Sydney has several museums.

#### 1. K (What I Know) stage
- The students work in pairs to identify and choose some vocabulary and statements related to the topic in What I Know column.

#### 2. W (What I want to Know) stage
- The students propose some questions (things they want to know) related to the text they are going to read.

#### 3. L (What I Learn) stage
- The students write what they find and try to find the answers of the questions in What I Learn column then whether the statement is true or false.
- The students make a summary based on what they write in the What I Learn column.
| II (1st meeting) | Folktales | 5. Understanding meaning of short functional text and simple essay in daily life context. | 5.2 Respond to meaning and rhetoric steps of essay which uses written language variety in accurate, fluent, and acceptable manners in daily life context in the form of **narrative** text. | information of the text. | prepared by the host family. Use simple present tense (V1) e.g. Tingkeban is traditional ceremony help for woman whose pregnancy has reached seven months. | **What I want to Know** column. |

| K (What I Know) stage | The students work in pairs some information they know related vocabulary written in the whiteboard by the teacher then guess what story they will read is about. |
| W (What I want to Know) stage | The students propose some things they want to know. |
| L (What I Learn) stage | The students write the information they find from the text. The students make a summarize based on what they write in the **What I Learn** |

- **Using simple past tense:** S+to be/V2+Object
  - was, were, had, walked, grew up

- **Using Adverb of time:** Once upon a time,

- **Widow, stalk, grew up, giantess, wealth**
| (2nd meeting) II | 2. Fable | 5. Understanding meaning of short functional text and simple essay in daily life context. | 5.2 Respond to meaning and rhetoric steps of essay which uses written language variety in accurate, fluent, and acceptable manners in daily life context in the form of narrative text. | 1. LESSON PLAN

School : SMA N 1 Sanden
Subject : English
Grade/ Semester : XI/ 1
Text Type : Report texts
Skill : Reading
Time Allocation : 2 x 45 menit

A. Standard of Competence:
5. Understanding the meaning of written functional texts and essays in the forms of report, narrative, and analytical exposition texts related to surroundings to get knowledge.

B. Basic Competency:
5.2. Responding to meaning and rhetoric steps accurately, fluently, and acceptably in essays related to surroundings to get knowledge in the forms of: report text.

C. Indicators:
1. Identifying the topic and main idea of a report text.
2. Identifying the meaning of difficult words in the report text.
3. Identifying word reference in the report text.
4. Identifying the detail information of a report text.

D. Learning Objective:
At the end of the lesson, students are able to:
1. Identify the topic and main idea of a report text.
2. Identify the meaning of difficult words in the report text.
3. Identify word reference in the report text.
4. Identify the detail information of a report text.

E. Learning Materials
Short functional text in the form of report.

Report
1. Social function : To describe the way things are, with reference to a range of natural, man made and social phenomena in our environment.
2. Language feature of the text :
   - Use action verb when describing behaviour
e.g. Kangaroos eat grass and plants.
   - Use adjectives
e.g. They have short front legs, but very long, and very strong back legs and a long tail.
   - Use simple present tense (V1)
e.g. A kangaroo is an animal.... They can also run at speeds....
3. **Key vocabulary**
- pouch, crawl, relative, leap

4. **Text**

A kangaroo is an animal found only in Australia. It has a smaller relative, called a wallaby, which lives on the Australian island of Tasmania and also in New Guinea.

Kangaroos eat grass and plants. They have short front legs, but very long, and very strong back legs and a tail. These are used for sitting up and for jumping. Kangaroos have been known to make forward jumps of over eight metres, and leap across fences more than three metres high. They can also run at speeds of over 45 kilometres per hour.

The largest kangaroos are the Great Grey Kangaroo and the Red Kangaroo. Adult grow to a length of 1.60 metres and weigh over 90 kilos. They are very big.

Kangaroos are marsupials. This means that the female kangaroo has an external pouch on the front of her body. A baby kangaroo is very tiny when it is born, and it crawls at once into this pouch where it spends its first five months of life.

Taken from Peter Haddock Ltd., Ref.083

---

**F. Teaching and Learning Method**
Three Phase Reading

**G. Teaching and Learning Activities**

**Opening (5’)**

- Greeting
  *Good afternoon everyone? How are you getting on?/ How’s life?*
- Checking students’ attendance list
  *Who is absent today?*
- Checking students’ readiness
  *Is everybody ready to start*
  *Let’s get cracking*
- Checking the students’ understanding about the previous materials.
  *Do you still remember what we have learned last week?*
Main Teaching Learning Activities

a. Pre Reading

K (What I Know) stage (Elicit Prior Knowledge)
- Presenting the students a big picture of kangaroo and asking them some questions:

“Do you know what it is?”
“What do you know about it?”
- Giving some key vocabulary related to the topic. (Elicit vocabulary)
- Distributing KWL chart
- Asking the students to write everything they have already known related to the picture and the title in What I Know Column.

W (What I want to Know) stage (Set a Purpose of Reading)
- Asking the students to write what they want to know about the topic.

b. Whilst Reading

L (What I Learn) stage (Monitor Reading Comprehension) (45’)
- Presenting the students a narrative text.
- Asking the students to find the answer of their own questions in What I Want to Know column by doing skimming. If they find the answer, they have to write it down in What I learn column.
- Asking the students to reread the text in dept.
- Asking the students to write new information they find in the text in What I learn column.
- Asking the students to rewrite the information they find in What I learn column.
- Asking the students to present their KWL chart.
- Discussing the students’ work in KWL chart.

c. After reading

- Asking the students to do comprehension questions.

Closing
- Giving conclusion about the materials that have been learned.
- Discussing the students’ difficulties in understanding the materials.
H. Assessments

E-Book Developing Tactics New, E-Book Inter language-Language

Sanden, September 2012

English Teacher,                                           Researcher,

Isti Rahayu, S.Pd                                      Eko Yuniarti
NIP. 198002172008012009                                NIM. 08202241019
STUDENTS’ WORKSHEET

TASK 1

Answer the questions based on the text entitle “Kangaroo”

1. Are kangaroos and wallabies indigenous animals of Australia?
2. What is the main idea of the second paragraph?
3. Where do you find the pouch of the female kangaroo?
4. How many kind of largest kangaroo? What are they?
5. Which sentences tell you about the description of the kangaroo's appearance?

TASK 2

Answer the question based on the text.

What do the words refer to?

1. these (Paragraph 2 line 2)
2. they (Paragraph 2 line 3)
3. they (Paragraph 3 line 2)
4. it (Paragraph 4 line 2)
5. It (Paragraph 4 line 3)

TASK 3

Find the meaning of the following words.

1. Leap
2. Crawl
3. Female
4. Tiny
5. Spend
6. Speed
7. Fence
8. Adult
9. Large
10. Weigh

   - around
Sydney the Metropolitan City

Sydney is the most populous city in Australia, with a metropolitan area population around 4.12 million. It is the state capital of New South Wales and is the site of the first European colony in Australia. The city is Australia’s largest financial centre.

Sydney is located on Australia’s south-east coast. The city is built around Port Jackson, which includes Sydney Harbour, leading to the city’s nickname, “the Harbour City”. This city is a major international tourist destination famous for its beaches and twin landmarks: the Sydney Opera House and the Harbour Bridge. The metropolitan area is surrounded by national parks, and contains many bays, rivers and inlets.

Sydney also has many shopping centres and retail outlets throughout the city. The Queen Victoria Building on George Street also contains many shops. Many of the large regional centres around the metropolitan area also contain large shopping complexes.

Sydney has several museums. The biggest are the Australian Museum (natural history and anthropology), the Powerhouse Museum (science, technology and design), the Art Gallery of New South Wales, the Museum of Contemporary Art and the Australian National Maritime Museum.

Sydney’s Central Business District (CBD) extends southwards for about 3 kilometres (1.25 mi) from Sydney Cove. It is the point of the first European settlement in the area at the southern end of the bridge known as “The Rocks”. It is densely concentrated with skyscrapers and other buildings including historic sandstone buildings such as the Sydney Town Hall and Queen Victoria. Building are combined by several parks such as Wynyard and Hyde Park.

### Sydney, the Metropolitan City

**What I Know**

1. Sydney is an Australian city.
2. There is a bridge.
3. There is a big building in the sea.

**What I Want to Know**

1. Where is Sydney located?
2. What is the name of the bridge?
3. What is the name of the big building?
4. How far is the big building?
5. How many people live in Sydney?
6. What can we find in Sydney?

**What I Learn**

1. Sydney is located on Australia's South-East coast.
2. The name of the bridge is Harbour Bridge.
3. The name of the big building is Sydney Opera House.
4. We can find many shopping centers and schools in Sydney.
5. Sydney and Harbour are the island town landmarks.
6. The population is around 4.52 million.
7. Sydney is the state capital of New South Wales.

### Summary

Sydney is located on Australia's South-East coast. It is the state capital of New South Wales. The population in Sydney is around 4.52 million. Sydney has twin landmarks. They are Sydney Opera House and Harbour Bridge. In Sydney, one can find many shopping centers and several museums.

4. Identifying the detail information of a report text.

D. **Learning Objective:**

At the end of the lesson, students are able to:
1. Identify the topic and main idea of a report text.
2. Identify the meaning of difficult words in the report text.
3. Identify word reference in the report text.
4. Identify the detail information of a report text.

E. **Learning Materials**
Short functional text in the form of report.

**Report**
1. **Social function** : To describe the way things are, with reference to a range of natural, man made and social phenomena in our environment.
2. **Language feature of the text** :
   - Use passive voice
     \[ S + \text{to be} + V3 + \text{Object} \]
     e.g. *Tingkeban is traditionally observed* by most families for the sake of baby’s welfare.
     The guest are then *invited* to enjoy the special food prepared by the host family.
   - Use simple present tense (V1)
Tingkeban

Tingkeban is traditional ceremony help for woman whose pregnancy has reached seven months. In West Java, and especially in the town of Garut and its surrounding area, it is traditionally observed by most families for the sake of baby’s welfare. Relatives, friends, and neighbors are invited to witness this festivity, which demand a lot of preparation.

The number seven plays an important role in the Tingkeban ceremony. An important part of the preparation for Tingkeban is the collection of a variety of items-seven kinds of each item serving a specific purpose.

Seven different kinds of root, such as sweet potatoes, and cassava, seven kinds of fruits to enable the solution to problem in the child’s future, seven diverse fragrant flowers, seven kinds of light snacks, seven kinds of fruit to make rujak, seven piece of batik cloth, seven varieties of earthen mortars, and seven oil lamps of different shapes to brighten the child’s life so that it is free from complication.

The guest are then invited to enjoy the special food prepared by the host family. Meanwhile, the mother to-be goes through the bathing ceremony. Clad in the batik cloth, she is ladled with sweet scented water from a tub which the eel is put. Relatives take turn bathing the mother to-be, changing her batik clothes as many as seven times.

After the bathing ceremony, the mother to-be sells rujak outside the house, and the consumers, who are the relatives and neighbors, pay with chips of rounded clay tiles. The purpose is for the child to earn a lot of money, with the blessing of God the Rujak fiesta marks the end of the Tingkeban ceremony. Everybody has a good time! May all good wishes be fulfilled.

  Is everybody ready to start
  Let’s get cracking
- Checking the students’ understanding about the previous materials.
  Do you still remember what we have learned last week?

Main Teaching Learning Activities

a. Pre Reading

K (What I Know) stage (Elicit Prior Knowledge)
- Presenting the students a big picture of traditional ceremony and asking them some questions:
  “Do you know what it is?”
  “What do you know about it?”
- Giving some key vocabulary related to the topic. (Elicit vocabulary)
- Distributing KWL chart
- Asking the students to write everything they have already known related to the picture and the title in What I Know Column.

W (What I want to Know) stage (Set a Purpose of Reading)
- Asking the students to write what they want to know about the topic.

b. Whilst Reading

L (What I Learn) stage (Monitor Reading Comprehension) (45’)
- Presenting the students a report text.
- Asking the students to find the answer of their own questions in What I Want to Know column by doing skimming. If they find the answer, they have to write it down in What I learn column.
- Asking the students to reread the text in dept.
- Asking the students to write new information they find in the text in What I learn column.
- Asking the students to rewrite the information they find in What I learn column.
- Asking the students to present their KWL chart.
- Discussing the students’ work in KWL chart.

c. After reading
- Asking the students to do comprehension questions.

Closing
- Giving conclusion about the materials that have been learned.
- Discussing the students’ difficulties in understanding the materials.

### Comprehension Questions

1. What is the main idea of the first paragraph? Tinglehen is a traditional ceremony for women whose pregnancy has reached seven months.

2. Find the meaning of the words: fragrant and relatable (without consulting dictionary) Fragrant: wangi → fragrant Flower: fragrant flower → fix-up strategies

3. What does the word "it" in paragraph 1 refer to? Tinglehen.

5. What is the purpose of setting up fuits? The purpose is for the child to earn a lot of respect with the members of the family.
LESSON PLAN

School : SMA Negeri 1 Sanden
Grade/ Semester : XI/ 1
Subject : English
Text Type : Narrative
Skills : Reading
Time Allocation : 2 x 45 minutes

A. Standard of Competence : 5. Understanding meaning of short functional text and simple essays in the form of narrative, narrative, and analytical exposition in daily life context and to get knowledge.

B. Basic Competence : 5.2 Responding to meaning and rhetoric steps of essay which uses written language variety in accurate, fluent, and acceptable manners in daily life context in the form of : narrative text.

C. Indicators

1. Identifying the language features of the text.
2. Identifying the topic and main idea of a narrative text.
3. Identifying the detail information of a narrative text.
4. Identifying synonyms and antonyms.
5. Identifying moral values of the text.

D. Lesson Objectives

In the end of the lesson, the students are able to:

1. Identify the language features of the text.
2. Identify the topic and main idea of a narrative text.
3. Identify the detail information of a narrative text.
4. Identify synonyms and antonyms.
5. Identify moral values of the text.

E. Materi Pembelajaran

Short functional text in the form of narrative
Narrative
Social function : to amuse, entertain and to deal with problematic events which lead to a crisis or turning point of some kind, which in turn finds a resolution.
Key vocabulary :

Text

Once upon a time there was a poor widow who lived with her son Jack in a little house. Their wealth consisted solely of a milking cow. When the cow had grown too old, the mother sent Jack to sell it.
On his way to the market, the boy met a stranger. "I will give you five magic beans for your cow," the stranger offered. Jack was unsure and hesitated for a while but then, enticed by the idea of such an extraordinary deal, he decided to accept.

Jack brought them happily. When he told his mother about this, his mother became so angry that she threw the beans out of the window. When Jack woke up in the morning, he felt the sun shining into a part of his room, but all the rest was quite dark and shady.

Jack decided to jump to the window. What did he see? The beanstalk grew up quite close past Jack’s windows. He opened the window and jumped to the beanstalk which ran up just like a big ladder. Jack climbed and climbed till at the last he reached the sky. While looking around, he saw a very huge castle. He was very amazed.

Then Jack walk along the path leading to the castle. There was a big tall woman on the doorstep. Jack greeted her and asked her for the giantess’ mercy to give him breakfast, because he felt very hungry. Although the giantess grumbled at first, finally, he gave Jack a hunk of bread and cheese and a jug of milk.

Jack had not finished when the whole house, began to tremble with the noise of someone’s coming. “Oh, it’s my husband!” cried the giantess. “What on earth shall I do?” Hastily, the giantess opened a very big cupboard and hid Jack there.

"Hide, quick!" the woman whispered, pushing Jack into the oven. "Do I smell a child in this room?" the giant asked suspiciously, sniffing and looking all around.

"A child?" the woman repeated. "You see and hear children everywhere. That's all you ever think about. Sit down and I'll make your dinner." The giant, still grumbling, filled a jug of wine and drank it all with his dinner.

After the giant sleep, Jack ran down the path over the clouds. When he finally reached the ground, he found his mother waiting for him. The poor woman had been worried sick since his disappearance.

Jack decided to go back to the castle above the clouds. This time the boy went inside through the kitchen and hid once again in the oven.

After dinner, the giant placed a hen on the table. The hen laid golden eggs. Jack saw the miraculous hen from a crack in the oven door. He waited for the giant to fall asleep, jumped out of the oven, snatched the hen and ran out of the castle. The hen's squawking, however, woke up the giant. "Thief! Thief!" he shouted. But Jack was already far away.

The hen kept on laying golden eggs. Jack's life had gone through a lot of changes since he had accepted the magic beans. But without his courage and his wit, he and his mother could never have found happiness.

F. Teaching and Learning Method
Three Phase Reading
G. Teaching and Learning Activities

Opening (5’)

- Greeting
  Good afternoon everyone? How are you getting on? / How’s life?
- Checking students’ attendance list
  Who is absent today?
- Checking students’ readiness
  Is everybody ready to start
  Let’s get cracking
- Checking the students’ understanding about the previous materials.
  Do you still remember what we have learned last week?

Main Teaching Learning Activities

a. Pre Reading

K (What I Know) stage (Elicit Prior Knowledge)

Asking the students some questions:

1. Do you believe magic?
2. Have ever got magic thing?
3. Do you want to be a rich people?
- Showing pictures related to materials.
1. Asking the students to guess the title of the text
2. Distributing KWL chart
3. Asking the students to write everything they have already known related to the picture and the title in What I Know Column.

_W (What I want to Know) stage (Set a Purpose of Reading)_
4. Asking the students to write what they want to know about the topic.

b. _Whilst Reading_

_L (What I Learn) stage (Monitor Reading Comprehension) (45’)_
5. Presenting the students a narrative text.
6. Asking the students to find the answer of their own questions in What I Want to Know column by doing skimming. If they find the answer, they have to write it down in What I learn column.
7. Asking the students to reread the text in dept.
8. Asking the students to write new information they find in the text in What I learn column.
9. Asking the students to rewrite the information they find in What I learn column.
10. Asking the students to present their KWL chart.
11. Discussing the students’ work in KWL chart.

c. _After reading_
12. Asking the students to do comprehension questions.

_Closing_
13. Giving conclusion about the materials that have been learned.
14. Discussing the students’ difficulties in understanding the materials.

E. **Materi Pembelajaran**

Short functional text in the form of narrative

**Narrative**

Social function: to amuse, entertain and to deal with problematic events which lead to a crisis or turning point of some kind, which in turn finds a resolution.

**Key vocabulary**:

- Cock  Heaven
- Milipede  Ascend Horn
Why Does the Cock Eat the Millipede?

Long ago the cock had a pair of beautiful horns on his head. But at that time there was a dragon who was prevented from ascending into heaven because he lacked a pair of horns. And so he asked the millipede to borrow the horns from the cock!

When the millipede borrowed the horns to the cock, he said to the cock: "When you want your horns back, you must call out at dawn: 'Give me back my horns!' and they will be returned to you at once. You don’t need to be worried."

The kind cock knew how difficult it was to ascend to heaven, so, reassured by the good security the millipede offered, he loaned his horns without hesitation, just twisting them right off his head. He also thought to himself that when the dragon returned from his visit to heaven, they could sit down and have a good conversation; he would ask the dragon to tell him how things were in heaven, and if it really was beautiful there, as he had always heard. If it was true, he might consider going there himself someday, he thought.

So, next morning at daybreak (for the dragon's visit was scheduled to be brief), the cock called out loudly: "Give me back my horns!" But, even though he repeated this demand ten times over, there was no sign at all of either the dragon or the horns. Worried, the cock promptly went off to complain to the millipede, who soothed him, saying: "If the dragon has not returned the horns this morning, then he will certainly do so tomorrow. At the very latest, the day after that. Just learn to be a little patient and your horns will soon be back on your head, just as before."

The cock did wait several days, but although he called out every morning at sunrise: "Give me back my horns!" They never did reappear. The cock was extremely annoyed at this deception and loss, as you can well imagine, therefore he ordered all the members of his family to eat millipedes on sight.

Even so, the cock has not yet given up hope of getting his horns returned. He ordered his descendants always to call out at the break of day: "Give me back my horns!" He still hopes that the dragon may hear him!

Task 3

Find the meanings of the following words based on the context. You may use your

dictionary.

1. bay (kb) : kuan
2. coast (kb) : pantai
3. colony (kb) : kumpulan
4. harbour (kb) :
5. metropolitan (kb) : kota besar
6. settlement (kb) :

Task 4

Find the synonym of each word. Underline the correct one.

1. Big : Large, Narrow, Wide, Small
2. Famous : Popular, Good, Familiar, Great
3. Numerous : Various, Precious, Dangerous, Populous
4. Major : Main, Captain, Minor, Important
5. Near : Far, Distance, Close, Separated
LESSON PLAN

School : SMA N 1 Sewon
Subject : English
Grade/ Semester : XI/ 1
Text Type : Narrative text
Skill : Reading
Time Allocation : 2 x 45 menit

A. Standard of Competence:
5. Understanding the meaning of written functional texts and essays in the forms of narrative, narrative, and analytical exposition texts related to surroundings to get knowledge.

B. Basic Competency:
5.2. Responding to meaning and rhetoric steps accurately, fluently, and acceptably in essays related to surroundings to get knowledge in the forms of: narrative text.

C. Indicators:
1. Identifying the topic and main idea of a narrative text.
2. Identifying the meaning of difficult words in the narrative text.
3. Finding synonyms and antonyms
4. Identifying the detail information of a narrative text

D. Learning Objective:
At the end of the lesson, students are able to:
1. Identifying the topic and main idea of a narrative text.
2. Identifying the meaning of difficult words in the narrative text.
3. Finding synonyms and antonyms
4. Identifying the detail information of a narrative text

E. Learning Materials
Short functional text in the form of narrative.

Narrative
Social function : to amuse, entertain and to deal with problematic events which lead to a crisis or turning point of some kind, which in turn finds a resolution.

1. Language feature of the text :
   • Use
e.g.
   • Use simple past tense (V2)
e.g.

2. Key vocabulary :
   - wolves, thief/thieves, sesame, sack.
3. Text

Ali Baba and the Forty Thieves

Ali Baba was such a poor man that he had only one shoe for his two feet. Even the mice in his house were hungry.

One day, his wife said, "We have no food in the house. No rice. No potatoes. Go and collect leaves in the forest so that I can make a soup."

Ali was a lazy man. He looked for leaves for about ten minutes and then he climbed a tree to sleep. He was afraid of wolves. When he woke up, he was surprised to see forty thieves on forty horses. They stopped in front of a big rock.

"Open Sesame!" shouted the leader. A door on the rock opened. The thieves carried sacks full of gold into the cave. When they had finished, the leader shouted.

"Close Sesame!" and the door closed. As soon as the thieves had disappeared Ali Baba jumped down from the tree, said, "Open Sesame" and went into the cave.

There were shelves all around the walls. The shelves were full of sacks. And the sacks were full of gold. Ali took a sack home with him.

Unfortunately, one of the thieves saw Ali's footprints on the sand. He followed them to Ali's home. He took out his knife and made a cross on the door.

"Now I shall know which house it is," he said. He rode off to get the other thieves. But Ali had seen the thief.

He and his wife took brooms and swept away the footprints. Then he made crosses on every door at the street. When the forty thieves arrived they had their knives between their teeth. But they couldn't find either Ali – or the gold. And Ali and his wife lived happily ever after.

Taken from Addison–Wesley Kids 4, 1990

F. Teaching and Learning Method

Three Phase Reading

G. Teaching and Learning Activities

Opening (5')

- Greeting
  
  *Good afternoon everyone? How are you getting on?/ How's life?*

- Checking students’ attendance list

  *Who is absent today?*

- Checking students’ readiness

  *Is everybody ready to start*

  *Let’s get cracking*

- Checking the students’ understanding about the previous materials.

  *Do you still remember what we have learned last week?*
Main Teaching Learning Activities

a. Pre Reading

K (What I Know) stage (Elicit Prior Knowledge)
- Typing the title of the text on the board
- Drawing painting of the KWL chart
- Asking the students to discuss with each other and retrieve their previous knowledge about the subject.
- Asking the students what do they know about the subject in the first column. The teacher can urge the students to answer the questions and brainstorm them by asking some questions such as: “Tell me something you know about……. What made you think such and such… This idea is associated with another one.”
- Make the students ask questions about what they want to know about the subject and record these questions in the second column (W). Asks alternative questions to produce ideas.
  For example, what do you want to learn about the subject? If the student's answers are nothing, or if they have a problem, so the following question can be asked: What do you think you learn about the subject that we are going to take?

W (What I want to Know) stage (Set a Purpose of Reading)
- Asking the students to write what they want to know about the topic.

b. Whilst Reading

L (What I Learn) stage (Monitor Reading Comprehension) (45’)
- Presenting the students a text entitle “Ali Baba and the Forty Thieves”.
- Let students read every paragraph silently. In this case, students should read carefully to find the answers for the questions in the second column (W).

c. After reading
- Discussion of the text which has been read - what is in the first and second columns. Asking the students to write what they have learned for the text in the third column (L).
- Asking the students to write any interesting thing they found while reading the text in the third column.
- Discussing the answers which are written in the third column by students
- Asking the students to do comprehension questions.

Closing
- Giving conclusion about the materials that have been learned.
- Discussing the students’ difficulties in understanding the materials.
