## Legend

Country	
Code	three letter codes provided in ISO 3166
Sample	total sample or sample subdivided in quintiles, where the first is the lowest and the fifth the highest
WAZ	prevalence of underweight (weight-for-age) < -2 s.d (standard deviation)
HAZ	prevalence of stunting (height-for-age) < -2 s.d
WHZ	prevalence of wasting (weight-for-height) < -2 s..
Sample size NS	sample analysed for nutritional status
BR	prevalence of registered children
Sample size BR	sample analysed for birth registration
Survey	

The “sample size BR” of The Democratic Republic of the Congo has been retrieved from the MICS dataset.

The sample size used for assessing wasting was selected when the samples sizes for the other indicators were different.

All data have been retrieved from DHS and MICS reports.
