## Online Supplementary Appendix

### Online Supplemental Appendix, Figure 1. Trial schematic

**Online Supplemental Appendix, Figure 2. Relationship of the proportional reduction in cardiovascular event rate and mean LDL cholesterol difference between treatment groups in published statin trials.** Gray square represents summary data from randomized trials of statin therapy versus placebo as summarized by the Cholesterol Treatment Trialists' (CTT) Collaboration, and solid squares represent results of individual trials comparing different intensities of statin therapy. Open circle represents projected benefit of rosuvastatin and closed circle represents observed benefit in the JUPITER trial. Vertical lines are 95 % confidence intervals. PROVE IT = Pravastatin or Atorvastatin Evaluation and Infection Therapy; IDEAL = Incremental Decrease in End Points Through Aggressive Lipid-Lowering; TNT = Treating to New Targets; A-to-Z = Aggrastat-to-Zocor. Figure adapted from Bowman L, Armitage J, Bulbulia R, Parish S, Collins R. Study of the effectiveness of additional reductions in cholesterol and homocysteine (SEARCH): characteristics of a randomized trial among 12064 myocardial infarction survivors. *Am Heart J* 2007; 154:815-23.
