</table>
| Project 5 | Production of Airborne Nano-Particles by Proton Irradiation in an FFAG Accelerator  
Y. Oki et al. (26P5-2) |
| Project 6 | Irradiation Effects on Nuclear Advanced Materials Irradiated by Particles with High Energy  
Q. Xu (26P6) |
| PR5-2 | Production of Airborne Nano-Particles by Proton Irradiation in an FFAG Accelerator  
Y. Oki et al. (26P5-2) |
| PR5-3 | Corrosion of Various Metals in Water and Formation of Metal-related Colloidal Particles under Intense Photon-Radiation Field  
K. Bessho et al. (26P5-3) |
| Project 6-1 | Compensation Mechanism of DX-like Center in Neutron Transmutation Doped GaN  
K. Kuriyama et al. (26P6-1) |
| Project 6-2 | Neutron Irradiation Effects of Superconducting Magnet Materials at Low Temperature  
T. Nakamoto et al. (26P6-2) |
| Project 6-3 | Study on Fine Structures Formed by High Energy Particle Irradiation  
A. Kinomura et al. (26P6-3) |
| Project 6-4 | Thermoluminescence of Synthesized Calcite  
T. Awata et al. (26P6-4) |
| Project 6-5 | Electron irradiation on W around 500°C using KURRI-LINAC  
M. Akiyoshi et al. (26P6-5) |
| Project 6-6 | The Development of New Positron Beam System Using KUR  
Y. Nagai et al. (26P6-6) |
| Project 6-7 | Radiation Damage in Bulk Amorphous Alloys by Electron Irradiation  
F. Hori et al. (26P6-7) |
| Project 6-8 | Positron Annihilation Study of Fe-Cr Alloys After Neutron Irradiation in KUR  
R. Kasada et al. (26P6-10) |
| Project 6-9 | Positron Annihilation Lifetime Measurements of Austenitic Stainless Steels Irradiated in the SINQ Target Irradiation Program  
K. Sato et al. (26P6-12) |
| Project 8 | Development on Neutron Imaging Application  
Y. Saito (26P8) |
| PR8-1 | Dynamic Observation of Two-Phase Flow Using Neutron Radiography  
Y. Saito et al. (26P8-1) |
| PR8-2 | Quantitative Measurement of Adsorbed Ethanol Amount in Activated Carbon Adsorber for Adsorption Heat Pump  
H. Asano et al. (26P8-2) |
| PR8-3 | Neutron Radiography on Tubular Flow Reactor for Supercritical Hydrothermal Synthesis of Nanoparticles  
T. Tsukada et al. (26P8-3) |
| PR8-4 | Neutron Imaging and Optics Development Using Simulation of VCAD Systems  
Y. Yamagata et al. (26P8-5) |
| PR8-5 | Evaluation of the Moisture Movement in High-Performance Concrete Subjected to Heating  
M. Kanematsu et al. (26P8-10) |
| PR8-6 | Effect of Gravity on Coolant Distribution in FGHP Heat Spreader  
K. Mizuta et al. (26P8-11) |
| PR8-7 | Study on Visualization of Organic Materials between Metals for Advance of Industrial Products  
K. Hirota et al. (26P8-12) |
| PR8-8 | Visualization of Flow Inside Fine Scale Wick of Heat Pipe  
Y. Tsuji et al. (26P8-13) |
| Project 10 | Project Research on the Elucidation of Generating Mechanism of Damaged Protein Induced by Aging and Irradiation  
N. Fujii (26P10) |
| PR10-1 | Project Research on the Elucidation of Generating Mechanism of Damaged Protein Induced by Aging and Irradiation  
N. Fujii (26P10) |
PR10-1  Detection of d-Aspartyl Endopeptidases Activity in Floral Tissues of Broccoli (Brassica oleracea var. Italica)  T. Kinouchi et al. (26P10-1) ................................................................. 45

PR10-2  Damage to Biological Molecules Induced by Ionizing Irradiation and Biological Defense Mechanisms against Ionizing Radiation I  T. Saito et al. (26P10-2) ................................................................. 46

PR10-3  Analysis of Aspartate Isomerization Using Protein L-Isospartyl Methyltransferase (PIMT)  Y. Sadakane et al. (26P10-3) ................................................................. 47

PR10-4  Analysis of Imbalance in Mice Exposed to Environmental Stress  N. Ohgami et al. (26P10-4) ................................................................. 48

PR10-5  Identification of Biologically Uncommon β-aspartyl Residues in Proteins Using MS  N. Fujii et al. (26P10-5) ................................................................. 49

PR10-6  Side Chain Conformers of Aspartyl Isomers in Crystallin Mimic Peptide  K. Aki et al. (26P10-6) ................................................................. 50

PR10-7  Rapid survey of Asp isomers in disease-related proteins by LC-MS/MS combined with Commercial Enzymes  H. Maeda et al. (26P10-7) ................................................................. 51

Project 11 Studies on Actinides and Fission Products Performed at the KURRI Hot Laboratory  T. Fujii (26P11) ............................................................................. 52

PR11-1  Apparent Formation Constant of Metal Ions with Humic Substances; Modelling  T. Sasaki et al. (26P11-1) ................................................................. 53

PR11-2  Temperature Effect on the Solubility and Solid Phase of Tetravalent Metal Hydroxide  T. Kobayashi et al. (26P11-2) ................................................................. 54

PR11-3  Research on The Behavior of Actinides and FPs in Fuel Debris  N. Sato et al. (26P11-3) ................................................................. 55

PR11-4  Effect on Borosilicate Glass Structure by Neutron Irradiation  T. Nagai et al. (26P11-4) ................................................................. 56

PR11-5  Ligand Exchange of Uranium (IV) Chloro- and Fluoro- Complexes in High Temperature Molten NaCl-CsCl Eutectic  A. Uehara et al. (26P11-5) ................................................................. 57

PR11-6  Evaluation of Parameters Governing Anodic Dissolution of U-Zr Alloy in Molten LiCl-KCl  M. Iizuka et al. (26P11-6) ................................................................. 58

PR11-7  Electrochemistry and Structural Analysis of Cations in Molten Sub-halide Systems: Fluoride Addition Effect on Voltammograms and UV-vis Spectra of Neodymium Cation in Molten Chlorides  H. Matsuura et al. (26P11-7) ................................................................. 59

PR11-8  Polarization Effect of Chloride Ions on Uranyl Ion in Molten LiCl  N. Ohtori et al. (26P11-8) ................................................................. 60

PR11-9  Study of Isotope Separation of Strontium and Calcium via Chemical Exchange Reaction  R. Hazama et al. (26P11-10) ................................................................. 61

PR11-10  Experimental and Calculated Optical Properties of Molten Aluminium Chloride Melts  T. Goto et al. (26P11-11) ................................................................. 62

PR11-11  Precipitation Behavior of Trivalent Dysprosium Ion by Reaction with Oxide Ion in CaCl₂–LiCl Molten Salt  H. Sekimoto et al. (26P11-12) ................................................................. 63

PR11-12  Elucidation of the Uptake Route of Radionuclides in Deciduous and Coniferous Trees Using Radio Cesium and Radio Potassium in Annual Tree Rings  T. Ohta et al. (26P11-13) ................................................................. 64

PR11-13  Photon transfer analysis of alkali earth elements and arsenic with bremsstrahlung at the KURRI-LINAC  T. Kubota et al. (26P11-14) ................................................................. 65

PR11-14  Study of Applicability of Isotopic Ratio Measurement for Analysis of Radionuclide in Environmental Samples  Y. Shibahara et al. (26P11-15) ................................................................. 66

PR11-15  Tracing Halogen and Noble Gas Recycling in the Northern Izu Subduction Zone by Neutron Irradiation and Noble Gas Mass Spectrometry  H. Sumino et al. (26P11-16) ................................................................. 67
PR11-16  Volcanic and Tectonic History of Philippine Sea Plate (South of Japan) Revealed by $^{40}$Ar/$^{39}$Ar Dating Technique
O. Ishizuka et al. (26P11-17) .................................................................................................................. 68
PR11-17  Ar–Ar Age Determination of Minamitorishima
N. Hirano et al. (26P11-18) .................................................................................................................. 69

Project 12  Project Research on Nuclear Spectroscopy and Condensed Matter Physics Using Short-Lived Nuclei
Y. Ohkubo (26P12) .................................................................................................................................... 70
PR12-1  $\beta$ Decay of $^{150}$Ce to $^{150}$Pr
Y. Kojima et al. (26P12-3) ....................................................................................................................... 71
PR12-2  Interaction between He and Elements with $A = 140$ in Fe
Y. Ohkubo et al. (26P12-4) ....................................................................................................................... 72
PR12-3  Atmosphere Dependence of Stability of Local Fields in Al-Doped ZnO
S. Komatsuda et al. (26P12-5) ................................................................................................................... 73
PR12-4  Extranuclear Dynamic Motion of $^{111}$Cd($\gamma$,111Ag) Doped in AgI Nanoparticles
W. Sato et al. (26P12-6) .......................................................................................................................... 74

Project 13  Project Research on the Advanced Utilization of Multi-Element Mössbauer Spectroscopy for the Study of Condensed Matter
M. Seto (26P13) ........................................................................................................................................ 75
PR13-1  Magnetism of an iron oxypnictide Cr-doped CeFePO
T. Okano et al. (26P13-2) .......................................................................................................................... 76
PR13-2  A study of Formation of Au(III) Surface Complex on Manganese Dioxide by $^{197}$Au Mössbauer Spectroscopy
T. Yokoyama et al. (26P13-3) .................................................................................................................... 77
PR13-3  Mössbauer Spectroscopy of Novel Ferroelectric Materials
S. Nakamura et al. (26P13-5) .................................................................................................................... 78
PR13-4  Mössbauer Spectra of Oriented Thin Sections and Small Grain of Magnetite Single Crystal
T. Kamiryo et al. (26P13-6) ....................................................................................................................... 79
PR13-5  Electronic States of Negative/Zero Thermal Expansion Materials
I. Yamada et al. (26P13-7) .......................................................................................................................... 80
PR13-6  Mössbauer Study of Fe-Based Superconductors, Ba$_1$$_x$K$_x$Fe$_2$As$_2$
S. Kitao et al. (26P13-7) ........................................................................................................................... 81

Project 14  Translational Research on BNCT for Clinical Application
M. Suzuki (26P14) ...................................................................................................................................... 82
PR14-1  Boron Neutron Capture Therapy for Radiation-induced Osteosarcoma from the Skull
S. Miyatake et al. (26P14-4) ...................................................................................................................... 83
PR14-2  Clinical Studies on BNCT for 6 Cases of Head and Neck Cancer
I. Kato et al. (26P14-5) .............................................................................................................................. 84
PR14-3  Boron Uptake in Tumour of Local Recurrenced Breast Cancer by 18F-BPA Positron Emission Tomography for Application to Boron Neutron Capture Therapy
H. Yanagie et al. (26P14-8) ...................................................................................................................... 85
PR14-4  High Boron-Accumulated Liposomes as Efficient Boron Carriers for Neutron Capture Therapy
H. Nakamura et al. (26P14-16) ................................................................................................................... 86
PR14-5  Boron Carbide Particle as a Boron Compound for BNCT in vivo
S Tada et al. (26P14-18) ........................................................................................................................... 87
PR14-6  Boron Neutron Capture Therapy Selectively Destroys Human Clear Cell Sarcoma (CCS) Metastasis to Lung in CCS-bearing Animal Model
T. Fujimoto et al. (26P14-19) ..................................................................................................................... 88
PR14-7  Nanoparticle-assisted Boron Neutron Capture Therapeutics: Design of Novel Boron-containing Nanoparticle for ROS Scavenging Ability Improving Therapeutic Efficiency with Low Adverse Effect
Z. Gaoa et al. (26P14-20) ............................................................................................................................ 89
PR14-8  Evaluation of Component in WOW Emulsion as Intra-arterial Boron Delivery Carrier for Neutron Capture Therapy to Hepatocellular Carcinoma
H. Yanagie et al. (26P14-22) ..................................................................................................................... 90
Establishment of QA/QC Using Ionization Chamber and Bonner Sphere in BNCT Field
H. Ueda et al. (26P14-26) ................................................................. 91

Study on the Real-time dose Monitor System Using Prompt Gamma Rays or Boron Neutron Capture Therapy
H. Tanaka et al. (26P14-27) ................................................................. 92

Quality Assurance of Irradiation Field for BNCT Using Twin Imaging Plate System
K. Tanaka et al. (26P14-28) ................................................................. 93

Development and Evaluation of 3D Polymer Gel Dosimeter for the Measurement of dose Distribution in BNCT
S. Hayashi et al. (26P14-29) ................................................................. 94

I-2. COLLABORATION RESEARCHES ................................................................. 95

1. Slow Neutron Physics and Neutron Scattering

CO1-1 Analysis of Heavy Metal Elements in Chinese Medicine and Herbs
E. Furuta et al. (26001) ................................................................. 96

CO1-2 Status Report 2014 for B-3 Beam Port of KUR
K. Mori et al. (26007) ................................................................. 97

CO1-3 Synthesis of Metal Nanoparticles under the Gamma-ray Irradiation Field
F. Hori et al. (26010) ................................................................. 98

CO1-4 The Role of Human Oxidation Resistance 1 (OXR1) in Cellular Response to Radiation
A. Matsui et al. (26018) ................................................................. 99

CO1-5 Development of an Advanced Optical Fiber Type Neutron Detector
K. Watanabe et al. (26021) ................................................................. 100

CO1-6 Focusing Test of an Ellipsoidal Neutron Mirror with a Metal Substrate
M. Hino et al. (26065) ................................................................. 101

CO1-7 Examination of the Usefulness as the New Boron Compound of KA-BSH for Born Neutron Capture Therapy
G. Fitamura et al. (26078) ................................................................. 102

2. Nuclear Physics and Nuclear Data

CO2-1 Development of Measurement Method for Epi-Thermal Neutrons Using the $^{10}$B(n,αγ) Reaction
T. Matsumoto et al. (26055) ................................................................. 103

CO2-2 Measurement of Gamma Ray and Neutron Spectrum of Curium Isotope (3)
Y. Nauchi et al. (26057) ................................................................. 104

CO2-3 Development of Hybrid Ce:LiCAF Scintillator for Nuclear Data Measurement
T. Fujiwara et al. (26058) ................................................................. 105

CO2-4 Investigation of Variable Neutron Field for Accurate Determination of Thermal Neutron Capture Cross Section at KURRI-LINAC
J. Hori et al. (26069) ................................................................. 106

CO2-5 Experimental Study on Non-destructive Assay with a Pulsed Neutron Source
J. Hori et al. (26070) ................................................................. 107

3. Reactor Physics and Reactor Engineering

CO3-1 Development of In-reactor Observation System Using Cherenkov Light (VI)
T. Takeuchi et al. (26040) ................................................................. 108

CO3-2 Neutron Irradiation Effect of High-density MoO3 Pellets for Mo-99 Production (2)
K. Nishikata et al. (26041) ................................................................. 109

4. Material Science and Radiation Effects

CO4-1 Development of Radiation Tolerant Image Sensor with Field Emitter Array
Y. Gotoh et al. (26002) ................................................................. 110

CO4-2 Sub-terahertz Absorption of Ionic Liquid
T. Awano et al. (26015) ................................................................. 111

CO4-3 Generation of Circular Polarization using Linearly Polarized Coherent Transition Radiation
T. Takahashi et al. (26016) ................................................................. 112
5. Geochemistry and Environmental Science

CO5-1 Central Diameters and Concentrations of Element in the Atmospheric Aerosols at Sakai, Osaka
N. Ito et al. (26011) ................................................................. 116

CO5-2 Study of Earth and Planetary Matters by Thermoluminescence
K. Ninagawa et al. (26024) ............................................................. 117

CO5-3 Evaluation of Redox Conditions at Dredged Trenches in Tokyo Bay by the Concentrations of Elements in the Sediments
T. Yamagata et al. (26028) ............................................................. 118

CO5-4 Characteristics of Synthetic Calcite Thermoluminescence Studied Reconstruction of East Asia
N. Hasebe et al. (26029) ................................................................. 119

CO5-5 Fission Track Ages of Sedimentary Rocks from Accretionary Belt in the Kii Peninsula
H. Ohira et al. (26036) ................................................................. 120

CO5-6 Trace Amounts of Halogens (Cl, Br and I) in Manganese Nodule Reference Materials
M. Ebihara et al. (26043) ............................................................... 121

CO5-7 Application of Neutron Activation Analysis to Micro Gram Scale of Solid Samples
S. Sekimoto et al. (26048) ............................................................... 122

CO5-8 Probability Distribution of SEL Occurred on on-board Computer (OBC) Mounted on Small-scale Satellite
S. Sekimoto et al. (26053) ............................................................... 123

CO5-9 Instrumental Photon Activation Analysis of Geological and Cosmochemical Samples
N. Shirai et al. (26067) ................................................................. 124

CO5-10 Decomposition of Perfluorooctane Sulfonate by Gamma Ray Irradiation
A. Hashiguchi et al. (26074) ........................................................... 125

6. Life Science and Medical Science

CO6-1 D-serine Acting as Competitive Inhibitor on Tryptophanase
A. Shimada et al. (26012) ............................................................. 126

CO6-2 Study of Localization Estimation of Abasic Sites in DNA Irradiated with Ionizing Radiation
K. Akamatsu et al. (26017) ............................................................. 127

CO6-3 The Effect of Boron Neutron Capture Therapy (BNCT) on Anti-tumor Immune Response
T. Suzuki et al. (26049) ................................................................. 128

CO6-4 In situ Visualization of Boron in Plants Using Neutron Capture Radiography
M. Kobayashi et al. (26056) ............................................................. 129

CO6-5 Measurement of Transmittance Spectra of a Cryo-Sectioned Tissue of Brain Tumor C6 Model in the Sub-Terahertz Region-II
N. Miyoshi et al. (26072) ............................................................... 130

CO6-6 Design and Synthesis of New Drugs for Boron Neutron Capture Therapy and Boron Magnetic Resonance Imaging
S. Aoki et al. (26077) ................................................................. 131

7. Neutron Capture Therapy

CO7-1 Evaluation of Boron-containig Rare Earth Oxides Nanoparticles as an Agent for Boron Neutron Capture Therapy
T. Nagasaki et al. (26005) ............................................................. 132

CO7-2 In vivo Evaluation of Gd-DTPA-incorporated Calcium Phosphate Nanoparticles as Neutron Capture Therapy Agent
N. Dewi et al. (26014) ................................................................. 133
CO7-3  Development of a Phantom for Estimation of Beam Quality in BNCT  
Y. Sakurai et al. (26034) ................................................................. 134
CO7-4  A Fundamental Experiment for the Measure Against the Activation of the Irradiation-room Concrete at BNCT Facility  
Y. Sakurai et al. (26035) ................................................................. 135
CO7-5  Radiosensitizing Effect of Purinergic Antagonists on the Damage of Melanoma by BNCT  
M. Tsukimoto et al. (26061) ............................................................ 136
CO7-6  Feasibility Study for Establishing QA Method for Hospital- and Reactor-based BNCT  
S. Nakamura et al. (26068) .............................................................. 137

9. TRU and Nuclear Chemistry
CO9-1  Stability of Caprolactam Resin against γ-Ray Irradiation in HNO₃  
T. Nishida et al. (26013) ................................................................. 138
CO9-2  Search for Ultraviolet Photons from Precipitated ²²⁹mTh Samples  
Y. Yasuda et al. (26079) ................................................................. 139

10. Health Physics and Waste Management
CO10-1  Study on the Behavior of Cs and Sr in Soil as Waste  
M. Yoneda et al. (26075) ................................................................. 140

11. Accelerator Physics
CO11-1  Study of Intense Terahertz Light Source Based on Superimposing Backward Coherent Diffraction Radiation  
N. Sei et al. (26004) ................................................................. 141
CO11-2  The XEP-e (xXtremely High Energy Plasma/ Particle Sensor for Electron) of the ERG Satellite  
N. Higashio et al. (26071) ............................................................. 142

12. Others
CO12-1  Precise Determination of Br in ABS Resin by Instrumental Neutron Activation Analysis  
T. Miura et al. (26008) ................................................................. 143
CO12-2  Thickness and Density of Adsorbed Additive Layer onto Metal Surface  
T. Hirayama et al. (26020) ............................................................. 144
CO12-3  Characteristic Measurement of Neutron Detector for Fukushima Debris  
M. Kureta et al. (26022) ................................................................. 145
CO12-4  Evaluation of Multiwire-type Two-Dimensional Neutron Detector with Individual Line Readout  
K. Toh et al. (26042) ................................................................. 146
CO12-5  Development of Neutron Resonance Densitometry for Nuclear Material Quantification in Melted Fuel  
F. Kitatani et al. (26044) ................................................................. 147
CO12-6  Test of a Microcell Multi-Wire Proportional Chamber for a Muon-Electron Conversion Search Experiment, DeeMe  
H. Natori et al. (26046) ................................................................. 148
CO12-7  Ethnographic Study of Nuclear Reactor  
M. Takagaki et al. (26051) ............................................................. 149
CO12-8  Effective Measures on Safety, Security, Hygiene and Disaster Prevention in Laboratories  
T. Iimoto et al. (26054) ................................................................. 150
CO12-9  Development of New NiMo Neutron Mirror for Fundamental Physics  
Y. Arimoto et al. (26059) ............................................................. 151

II. PUBLICATION LIST (April 2014 – March 2015) ................................................. 152
KURRI Progress Report 2014

Issued in July 2015

by the Research Reactor Institute, Kyoto University
Kumatori-cho, Sennan-gun, Osaka 590-0494 Japan
