

# **Distribution and Validation of CERES Irradiance Global Data Products Via Web Based Tools**

David Rutan<sup>1</sup>, Cristian Mitrescu<sup>1</sup> and David Doelling<sup>2</sup>, Seiji Kato<sup>2</sup>

## 1. Science Systems and Applications Inc., Hampton, VA      2. NASA Langley Research Ctr., Science Directorate, Hampton, VA

NASA's Clouds and the Earth's Radiant Energy System (CERES) project produces global, 1-degree gridded, 3 hourly estimates of TOA, atmospheric and surface radiative fluxes in the SYN1Deg and EBAF-surface data products.

New web tools allow plotting, analyzing, and downloading single grid box values associated with surface validation sites:

SYN1Deg:

<https://ceres-tool.larc.nasa.gov/cave/jsp/CAVESelection.jsp>

### EBAF-surface (Monthly Means)

<https://ceres-tool.larc.nasa.gov/cave/jsp/CAVESelection.jsp>

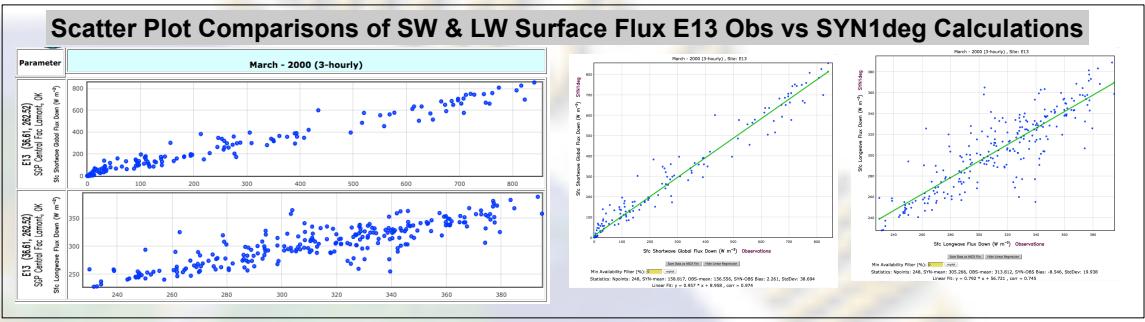

86 land and buoy sites available from the above web links.

## Plot Style & Time Variables

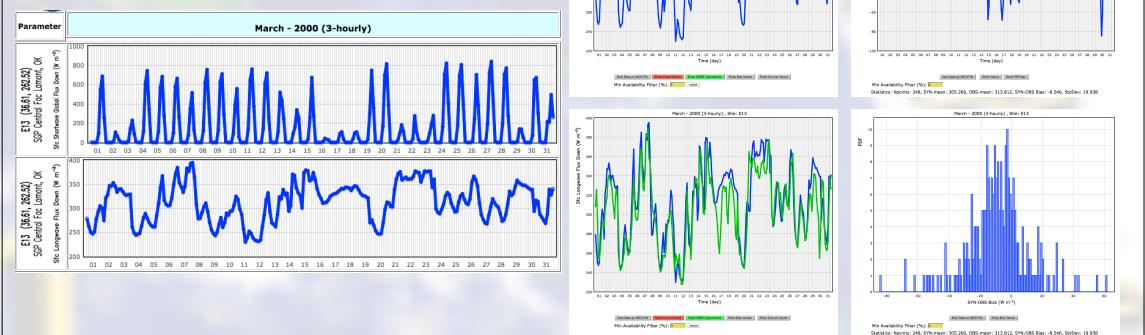

## Possible Parameters

<b>Plot Type</b>
<input checked="" type="radio"/> Time Series <input type="radio"/> Scatter Plots
<b>Temporal Resolution</b>
<input type="radio"/> Monthly <input type="radio"/> Daily <input checked="" type="radio"/> 3-Hourly <input type="radio"/> Hourly (Time Series only)
<b>Time Range</b>
Available Time Range: 3/2000 to 6/2015.
From: <input type="text" value="03 - 2000 (MM-YYYY)"/> To: <input type="text" value="09 - 2015 (MM-YYYY)"/>

  - Surface Relative Humidity 1
  - Cloud Fraction Myr Day 1
  - Annual Orbital Depth (mm) 1
  - Precipitation Rate 1
- Auxiliary Data 1

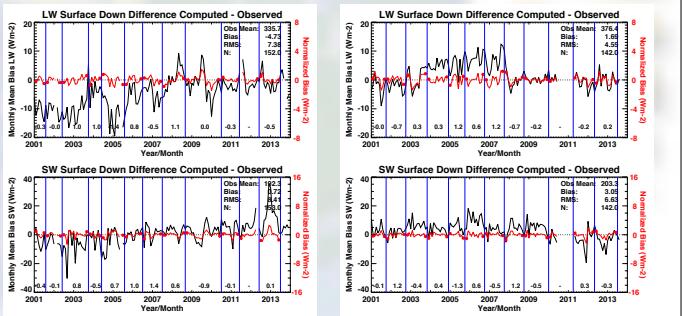

**Time Series Plots include observation, observation compared to calculation, bias, and bias distribution.**

## **Monthly Mean Error E13 & WHOI Stratus Buoy – Plotted With Instrument Swap Dates**

Can one identify an error in model/observation comparisons due to instrument swaps on land versus at sea? First, calculate monthly mean bias. Then normalize by series RMS and remove bias for each length of instrument set use. Finally difference first/last month. Results indicates no significant difference between land and buoy at monthly mean time scale.
