

Robotics at NASA and Beyond

Dr. Kimberly Hambuchen
NASA Johnson Space Center
Software, Robotics and Automation Division

Introduction

- Graduate of Conway High School
- Vanderbilt University
 - Bachelor of Engineering
 - Masters of Engineering
 - Doctorate of Philosophy
- Biomedical, Electrical and Computer Engineering
- Intelligent Robotics Laboratory
- NASA GSRP Fellowship

What is a robot?

- A robot is a mechanical and/or electrical device that performs tasks on its own, whether in a repetitive or intelligent fashion.

Robotic Fields

- Mechanical
- Electrical
- Software
- Psychology
- Cognitive Science
- Human Factors

Robots in Manufacturing

Robots in the Military

Packbots

Unmanned Ground Vehicles
(UGVs)

Big Dog

Robots in the Medical Field

Da Vinci
Surgery Robot

Helpmate

Robots for Search and Rescue

Robots in Space

Voyagers

CanadaArms

Mars Rovers

Robots at NASA's Johnson Space Center

Robonaut 2

Robonaut 2 on ISS

Robonaut 2 on ISS

Robonaut 2 Climbing on ISS

SEV and Centaur 2

X1

DARPA Robotics Challenge

How can you get involved with NASA?

- <http://www.nasa.gov/education>
- College internship programs
 - University of Texas A&M
 - Purdue University
 - Georgia Technical University
 - The Ohio State University
- NASA Career fields
 - Astronaut!
 - Food science
 - Biological sciences
 - Astronomy

Thank you!

Kimberly Hambuchen
