Received 2012 February 14; published 2012 March 16

Key words: acceleration of particles – Sun: flares – Sun: particle emission – Sun: X-rays, gamma rays

Online-only material: color figure

Due to an error at the publisher, the times given for the major tick marks in the X-axis in Figure 1 of the published article are incorrect. The correctly labeled times should be “00:52:00,” “00:54:00,” . . . , and “01:04:00.” The correct version of Figure 1 and its caption is shown below. IOP Publishing sincerely regrets this error.

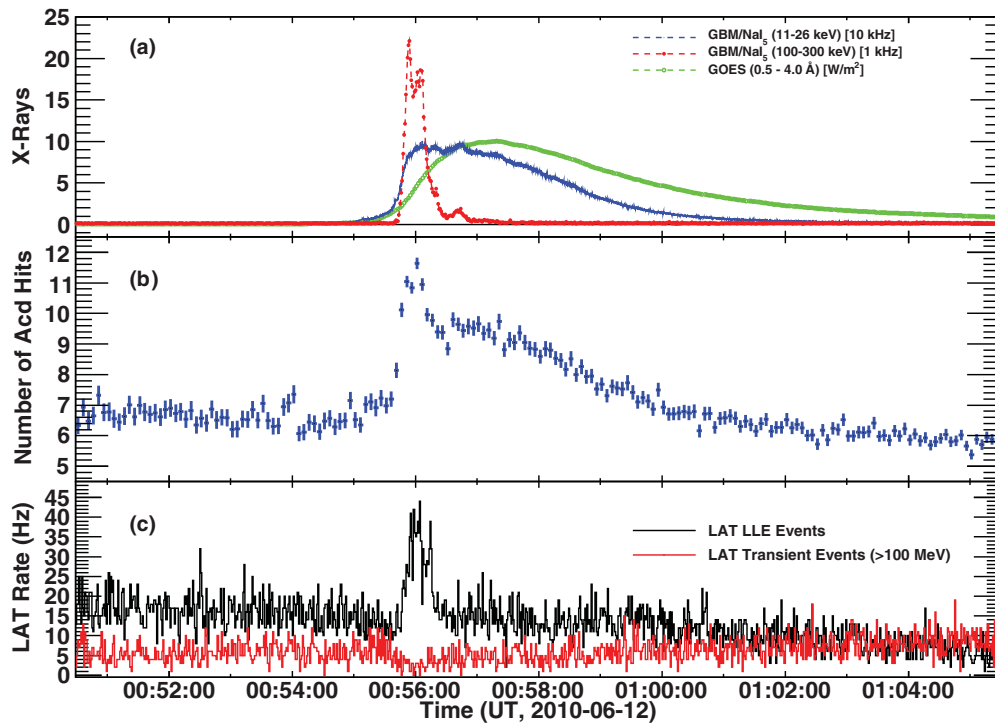

Figure 1. Time histories related to the 2010 June 12 solar flare. (a) *GOES* 0.5–4 Å rates, and *GBM* *NaI* 11–26 keV and 100–300 keV relative rates; (b) *LAT* *ACD* hit rate >100 keV containing contributions from background, >100 keV solar flare X-rays (impulsive peak) and pulse pile-up from tens of keV solar X-rays following the *NaI* 11–26 keV profile in (a); and (c) *LLE* and *LAT* Transient Class event rates.

(A color version of this figure is available in the online journal.)
