FOREWORD

This report is a compilation of published and unpublished research generated from January 1987 to September 1992 by the Acoustics Division. The output described in this document is the result of research performed both in-house and by personnel supported entirely or in part by grants and contracts. In addition to being grouped chronologically, the report is divided according to the following general headings:

- I. Formal Reports
- II. Quick-Release Technical Memorandums
- III. Contractor Reports
- IV. Journal Articles and Other Publications
- V. Meeting Presentations
- VI. Technical Talks
- VII. Computer Programs
- VIII. Tech Briefs
- IX. Patents

Included are the generally available NASA Technical Papers and Technical Memoranda (TP- and TM-) and Contractor Reports (CR-), copies of which may be obtained from the National Technical Information Service (NTIS), Springfield, Virginia 22161, for a nominal charge. Meeting/conference papers and associated journal articles are obtainable from NTIS or the sponsors of the meetings and conferences. Tech Briefs are usually available from the NASA Langley Technology Utilization and Applications Office.
