**A SYSTEMATIC STUDY OF SUPERCONDUCTIVITY
IN Bi-Pb(Sn)-Sb-Sr-Ca-Cu-O SYSTEMS**

Abstract

Superconducting transition above 160K has been reported¹ in the Bi-Pb-Sb-Sr-Ca-Cu-O system. The results of a systematic study emphasizing the correlations between the type and amount of dopant, and superconducting transition will be presented. The effect of Sn (instead of Pb) substitution will also be highlighted.
