# A CUMULATIVE INDEX TO A CONTINUING BIBLIOGRAPHY ON

# **AEROSPACE MEDICINE AND BIOLOGY**

This Cumulative Index supersedes the indexes contained in supplements [SP-7011(281) through SP-7011(292)] published by NASA during 1986.

# INTRODUCTION

### WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to the abstracts contained in NASA SP-7011(281) through NASA SP-7011(292) of Aerospace Medicine and Biology: A Continuing Bibliography, NASA SP-7011, and by means of supplements, serves as a current abstracting and announcement journal for references on bioscience and biotechnology. It has been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronuatics (AIAA), and the National Aeronautics and Space Administration (NASA). Entries prepared by the two contributing organizations are identified as follows:

- 1. NASA entries by their STAR accession numbers (N86-10000).
- 2. AIAA entries by their IAA accession numbers (A86-10000 series).

### **HOW THIS CUMULATIVE INDEX IS ORGANIZED**

This Cumulative Index includes a subject, personal author, corporate source, foreign technology, contract number, report number, and accession number index.

### **HOW TO USE THE SUBJECT INDEX**

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and that the following term or terms are used instead. For example:

**DOSE** 

U DOSAGE

**AIRLINERS** 

- U COMMERCIAL AIRCRAFT
- U PASSENGER AIRCRAFT
- 2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found. For example:

**FATIGUE (BIOLOGY)** 

NT AUDITORY FATIGUE

NT FLIGHT FATIGUE

NT MUSCULAR FATIGUE

In addition, a searcher may use the title or title and title extension in the index to narrow further his quest for particular items; this is because subject terms may include documents on different aspects of the same subject term. For example:

**BIOLOGICAL EFFECT** 

Vibratory force effect upon biological systems, particularly human organism.

Biological effect of cosmic and solar radiations on human body at high altitudes.

### **HOW TO USE THE PERSONAL AUTHOR INDEX**

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in translation schemes may require multiple searching on the index for variants of an author's name. For example:

EMELIANOV, M. D.

and

YEMELYANOV, M. D.

### HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

BOEING CO., SEATTLE, WASH. MILITARY AIRCRAFT SYSTEMS DIV. (Source citation entry) BOEING CO., SEATTLE, WASH. (Source index entry)

### HOW TO USE THE CONTRACT NUMBER INDEX

All contract numbers that are identified in the abstract-section citations in the individual Supplements appear in this index. Changes by agencies in the style in which contract numbers are presented may require multiple searching for variants. For example:

AF 33(615)-71-C-1758 F33615-71-C-1758

### HOW TO USE THE REPORT/ACCESSION NUMBER INDEX

All report numbers that have been assigned by the corporate source, monitoring agency or cataloging activity appear in this index. Variations in initial cataloging may result in different report number series. For example:

TP-924

ONERA-TP-924

### **IDENTIFICATION OF DESIRED SUPPLEMENT**

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The page-number range of each Supplement appears on the inside front cover of this index. Once the range of page numbers containing the selected accession number is located in the second column, the desired supplement number will be found in the first column. For example:

Page 239 will be found in Supplement 287

### **AVAILABILITY OF DOCUMENTS**

Information concerning the availability of documents announced in *Aerospace Medicine and Biology* supplements is found in the Introduction to the most currently issued supplement.

### **PUBLIC COLLECTIONS OF NASA DOCUMENTS**

**DOMESTIC:** NASA and NASA-sponsored documents and a large number of aerospace publications are available to the public for reference purposes at the library maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, New York 10019.

**EUROPEAN:** An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and \* from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

### FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 50 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. Over 1,300 other depositories also exist. A list of the regional GPO libraries appears on the inside back cover.

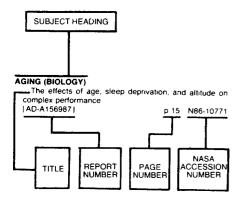

# **TABLE OF CONTENTS**

	Page
Subject Index	A-1
Personal Author Index	B-1
Corporate Source Index	C-1
Foreign Technology Index	D-1
Contract Number Index	E-1
Report Number Index	F-1
Accession Number Index	G-1

### AEROSPACE MEDICINE AND BIOLOGY / A Continuing Bibliography 1986 Cumulative Index

January 1987

### Typical Subject Index Listing

The subject heading is a key to the subject content of the document. The title is used to provide a description of the subject matter. When the title is insufficiently descriptive of the document content, the title extension is added, separated from the title by three hyphens. The (NASA or AIAA) accession number and the page number are included in each entry to assist the user in locating the abstract in the abstract section. If applicable, a report number is also included as an aid in identifying the document. Under any one subject heading, the accession numbers are arranged in sequence with the AIAA accession numbers appearing first.

#### A-10 AIRCRAFT

A review of pilot workload measurement techniques used on the A-10 single seat night attack test program [SAE PAPER 841492] p 146 A86-26016

## A-6 AIRCRAFT

Cockpit information requirements analy orientation p 236 A86-29856 ABDOMEN

Enhancement of somniferous effects of thermal pulsation by simultaneous application to two refle p 120 N86-19849

### **ABILITIES**

The effect of skill on performance under environmental stressor p 94 A86-20408 Retention of helicopter flight skills - is there a 'critical period' for proficiency loss? p 129 A86-23718 The flight surgeon and psychiatry - Interest and skills

p 131 A86-25654 Subjective workload and individual differences in information processing abilities

[SAE PAPER 841491] p 132. A86-26011 Review and evaluation of empirical research in

troubleshooting [AD-A168660] p 186 A86-28865

Formula for a better understanding of pilot p 230 A86-29900

The event related brain potential as an index of information processing, cognitive activity, and skill acquisition: A program of basic research [AD-A159118]

p 43 N86-13897 Acquiring procedural skills from lesson sequences
[AD-A164580] p. 291 N86-24

p 291 N86-26829 Initial skill learning: An analysis of how elaborations facilitate the three components

[AD-A165137] p 292 N86-27922 Evaluation of 2 cognitive abilities tests in a dual-task environment p 438 N86-32988

#### ABIOGENESIS

The oldest traces of life (according to papers presented at the 27th session of the International Geological p 47 A86-13974 Congress) theory of Outline of a evolution: physico-chemical theory of the origin of life -- Book

p 76 A86-17623 Simulation of thermal polycondensation processes of amino acids during the migration of their aqueous solution in the earth's lithosphere p 274 A86-34489 Astronomical sources of circularly polarized light and their role in determining molecular chirality on earth

p 297 A86-38144 Synthesis and analysis in chemical evolution p 297 A86-38145

RNA catalysis and the origin of life p 372 A86-41043

The synthesis of primitive 'living' forms - Definitions, goals, strategies and evolution synthesizers

A86-41045 p 372 Chirally selective, intramolecular interaction observed in an aminoacyl adenylate anhydride p 372 A86-41046 Molecular and Elemental Dust Analyzer (MEDA) for the comet rendezvous asteroid flyby mission

p 299 N86-26857 multiplex gas chromatography: A novel analytical technique for future planetary studies

n 299 N86-26860 Ion Mobility Drift Spectrometer (IMDS) as a flight analytical instrument technique Adsorption and condensation of amino acids and nucleotides with soluble mineral salts

p 301 N86-26869 The principle of cooperation and life's origin and volution p 303 N86-26880 p 303 ABLATION

Laser ablation of human atherosclerotic plaque without adjacent tissue injury p 91 A86-22711

ABNORMALITIES Detection of chromosomal abnormalities in human

[DE85-014178] p.7 N86-11834

Teratogenic effects of microwave radiation [PB85-207462] p 7 N86-11837 The clinical prediction of dangerousne

[AD-A160820] p 135 N86-19899

### ABRASION RESISTANCE

Abrasion-resistant aluminized-coated aramid fabrics for manufacture of firefighters' protective clothing [AD-A157056] p 75 N86-14901

### ABSORBERS (MATERIALS)

The application of diffraction optics techniques to laser eve protection p 284 N86-26821 ABSORPTION

Production of gamma- and alpha-interferon by human blood leukocytes under successive induction conditions p 217 N86-23229

#### **ABSORPTION SPECTRA**

Particulate models of photosynthesis [DE86-001625]

p 160 N86-22090 **ABSORPTION SPECTROSCOPY** 

Photometric and photo acoustic measurement of the absorbance of micro-organisms and its relation to the micro-organism-grain hypothesis p 188 A86-26671 **ABSTRACTS** 

USSR Space Life Sciences Digest, issue 4

[NASA-CR-3922(04)] p 209 N86-23218

### **ACCELERATION (PHYSICS)**

The influence of preview period and global optical flow rate on sensitivity to loss in speed of self motion

p 230 A86-29901

Optical and event-duration variables affecting self-motion perception [AD-A161836] p 223 N86-24194

#### **ACCELERATION PROTECTION**

Positive pressure respiration, a means of protecting against + Gz accelerations - A theoretical approach

p 31 A86-13568 The effect of +Gz acceleration on cardiac volumes

determined by two-dimensional echocardiography p 58 A86-18547

An engineering test and evaluation of several new anti-G valves --- for high performance fighter aircraft

p 430 A86-47734 Current research on advanced concept anti-G suits

p 431 A86-47747 Development of a mechanical analog of a human spine

D 418 Single stage rapid response anti-G valve

p 432 A86-47762

Anti-G suit protection and body position p 432 A86-47764

The choice of seat back angle to improve acceleration [CEV-70-209] D 386 N86-29512

ACCELERATION STRESSES (PHYSIOLOGY)

Medical evaluation of cosmonauts - Assessment of vestibular system p 11 A86-12429 Medical evaluation of cosmonauts - 'Acceleration'

p 11 A86-12430

The effect of +Gz acceleration on cardiac volumes determined by two-dimensional echocardiography

p 58 A86-18547 p 58 A86-18548 Inflight loss of consciousness. II The effects of +Gz on the coronary circulation - A

p 86 A86-20401 increased gluconeogenesis in rats exposed to hyper-G

p 103 A86-23311 Clinical problems posed by the medical surveillance of pilots exposed to high levels of acceleration

p 112 A86-24503 Effect of seat cushions of human respone to +Gz p 145 A86-25652

Proteinuria in fighter pilots after high +Gz exposure p 113 A86-25653

Critical impact and acceleration loading to the head p 214 A86-30381

Protein concentration elevations in lungs of mice following sudden, transient cephalad (+Gz) acceleration p 199 A86-30437

Human factors problems in the tactical air command p 396 A86-44778

Inflight loss of consciousness - A first look at the U.S. Navy experience p 396 A86-44780 gravitational overloads (mathematical modeling) p 12 N86-10739 Study of hypokinesia and acceleration effects on human

p 12 N86-10740 Dynamics of changes of statistical indicators of heart rhythm of persons with different degree of motion p 12 N86-10743

Endocrine and fluid metabolism in males and females of different ages after bedrest, acceleration and lower body negative pressure

[NASA-TM-58270] p 39 N86-13886 Characteristics of accelerations in aerobatic flight as a p 172 N86-21117 Dynamic behaviour of spherical and aspherical contact s exposed to +Gz-acceleration forces

p 294 N86-26816 Distinctions in humoral control of metabolism with simulation of spaceflight factors p 286 N86-27884 Continuous ECG monitoring of Mirage 2000 pilots (comparison with Mirage 3 and F1 pilots)

p 399 N86-30315 The use of ECG changes caused by acceleration as tolerance predicition factors p 399 N86-30316

The vertebral column: Selection and aptitude of combat aircraft pilots of the future p 400 N86-30322 Assisted positive pressure breathing and modified anti-acceleration suit filling tested up to 9 G in a human

centrifuge, Karolinska Institute [FOA-C-50038-H1] p 408 N86-30341 The effects of acceleration stress on human workload

p 437 N86-32984 **ACCELERATION TOLERANCE**

Effects of 60 Hz electric fields on operant and social
stress behaviors of nonhuman primates
[DE86-005807] p 411 N86-30347
BELGIUM
Treadmill spiroergometry in the selection and screening
of high-performance combat aircraft pilots in the Beligan
Air Force p 401 N86-30325 BENDING
Evidences for changes in sensitivity to auxin and in cell-wall properties during gravitropic bending of dicot
stems properties during gravitropic bending of dicot
BENZENE
Identification and quantification of the water-soluble
components of JP-4 and a determination of their biological
effects upon selected freshwater organisms
[AD-A160271] p 108 N86-18957
Production and characterization of antibodies to
benzo(a)pyrene
[DE86-002204] p 222 N86-23271
BENZENE POISONING
The absorption of benzene through human skin [AD-A161157] p 127 N86-19894
[AD-A161157] p 127 N86-19894 BESS (SATELLITE)

Advantages of the gas exchange approach to microbiological studies (AD-A1668871 p 393 N86-31207

CHLOROPHYLLS

Experimental, structural and theoretical models of bacteriochlorophylls a, d and g [DE86-001727] p 158 N86-21101

Particulate models of photosynthesis [DE86-001625] p 160 N86-22090

CHLORPROMAZINE

An atropinized heat-stressed rat model: Anticholinergic

and anticholinesterase drug potency [AD-A157620] p 6 N86-11832

CHOLERA

Immunomodulation by proteins of bordetella pertussis

[AD-A160078] p 107 N86-18953 CHOLESTEROI Activation of cholesterogenesis under the effect of

ionizing radiation on a living body p 207 A86-32697 Aerobic capacity and coronary risk factors in a middle-aged army population AD-A163998 HC A02/MF A01 [AD-A163998] p 257 N86-25979

### CHOLINE

Short term heat effect on adreno- and cholino-sensitivity of rat's small intestine P 4 N86-10754 Cortical plasticity: Theoretical analysis, experimental

[AD-A157965] p 38 N86-12961 Effect of 24,25-dihydroxycholecalciferol on amino acid metabolism of hypokinetic rats p 55 N86-14869 Biosensors from membrane proteins reconstituted in polymerized lipid bilayers

(AD-D0121601 p 248 N86-25974

### CHOLINESTERASE

The activity of cholinesterase and norepinephrine after laser irradiation of acupuncture points

p 414 A86-49921 An atropinized heat-stressed rat model: Anticholinergic and anticholinesterase drug potency [AD-A157620] p 6 N86-11832 Biosensors from membrane proteins reconstituted in olymerized lipid bilayers

[AD-D012160] p 248 N86-25974 Effects of atropine sulfate on aircrew performance [AD-A165063] p 290 N86-27919

CHOROID MEMBRANES

Implementation of models for the transient division stem of spatio-temporal visual perception TN-86-97533] p 425 N86-32965 A model of the transient part of the spatio-temporal [ETN-86-97533]

perception, containing a two-dimensional long fiber [ETN-86-97540] p 426 N86-32966

### CHROMOSOMES

The frequency of sister chromatid exchanges in blood cells under prolonged hypokinesia p 421 A86-49272
Study of hypokinesia and acceleration effects on human

p 12 N86-10740 Relationship between alkylation sites and induction of dominant lethals and heritable translocations in mice [DE85-014309] p 7 N86-11835

HLA-D: The T cell perspective (AD-A1600191

p 84 N86-17976 Cloning and expression of leptospira pomona hemolysin gene in escherichia coli P 211 N86-23249 Cloning and analysis of genes for anthrax toxin components [AD-A161901]

p 212 N86-24186 Changes in the morphological and molecular biological processes during early embryo development in amphibians under micro g conditions p 388 N86-29522

### **CHRONIC CONDITIONS**

The desensitisation of chronically motion sick aircrew in the Royal Air Force p 59 A86-18832 Recurrent serious otitis in a reconnaissance pilot - The consequences for his career D 112 A86-24506 Skeletal mass change as a function of gravitational p 192 A86-30380 Chronic acceleration and egg production in domestic p 193 A86-30392

Growth and development of mice and rats conceived and reared at different G-intensities during chronic centrifugation p 195 A86-30403

Carotid bodies are required for ventilatory acclimatization to chronic hypoxia p 206 A86-30682 Impaired pulmonary conversion of angiotensin I to angiotensin II in rats exposed to chronic hypoxia p 246 A86-36218

#### CINEMATOGRAPHY

Sensitivity to visual motion in statistically defined displays [AD-A167291] P 405 N86-31217

### CIRCADIAN RHYTHMS

Types of work capacity and the frequency of the development of ischemic heart disease and hypertonic p 34 A86-15516 Disturbance of the multiperiodic synchronization of the

heart-beat and respiratory rhythms after transmeridian flights through three time zones p 88 A86-22533 The elusive mechanism of the circadian clock

p 82 A86-22650 Cardiorenal-endocrine responses to head-out immersion at night

Modification of the resting oxygen consumption level of biological body and its tissues, during prolonged hypodynamics exposure p 194 A86-30398 hypodynamics exposure p 194 A86-30398 Circadian variation of volume and concentration of

orthostatically shifted fluid p 215 A86-30445 Day course of blood and plasma density in relation to other hematological parameters p 215 A86-30446 Reduction of circadian disruption following surgery by ingestion of caffeine in the laboratory rat

P 201 A86-30447 The rhythms of paramagnetic-center concentration in mouse liver and a mathematical model of synchronized autooscillations D 247 A86-36497 The mechanisms of muscle activity regulation in humans

depending on biorhythm type p 254 A86-36528 Seasonal dynamics of circadian rhythms of oxygen consumption and heat production in youths in Siberian p 254 A86-36529

Phase shifting two coupled circadian pacemakers Implications for jet lag p 377 A86-40684 A benzodiazepine used in the treatment of insomnia

phase-shifts - The mammalian circadian clock p 372 A86-40875

Digestive system rhythms and the body's biological p 391 A86-43676 Circadian variations of systolic time intervals

p 394 A86-44087 Seasonal and circadian rhythms in androgen excretion in the extremely continental climate of Trans-Baikal and the BAM region among groups of local nonnative population p 420 A86-49269 Intradiurnial organization of wakefulness-sleep sequence and energy metabolism in rats exposed to low

p 5 N86-10764

ambient temperature

Monitoring of circadian waveforms in rodents exposed to high-intensity static magnetic fields [DE85-015225] p 28 N86-12952

Effects of 9-hour time zone changes on fatigue and ircadian rhythms of sleep/wake and core temperature [NASA-TM-88197] p 92 N86-16890

An experimental trial to test the efficacy of temazepam to induce sleep and improve subsequent performance during partial sleep deprivation and circadian rhythm [AD-A160795]

D 116 N86-18972 Problem of biological clocks: New data on circadian

changes in status of human organism

p 120 N86-19848 Circadian variation in host defense

[AD-A161702] p 158 N86-21098 Crew factors in flight operations. Part 4: Sleep and

akefulness in international aircrews [NASA-TM-88231] p 379 N86-28613 Multiparameter data acquisition systems for studies of

Circadian rhythms [DE86-004041] p 398 N86-30308

A 24-hour structure of vigilance under prolonged sleep deprivation: Relationship with performance [AD-A167399] p 422 N86-32089

### CIRCULAR CYLINDERS

Suit penetration study: Preliminary analysis of flow about a circular cylinder [DE86-0057601 p 385 N86-28623

#### CIRCULAR POLARIZATION

Astronomical sources of circularly polarized light and their role in determining molecular chirality on earth

p 297 A86-38144 Inverse Faraday effect in hemoglobin detected by Raman spectroscopy: An example of magnetic resonance Raman activity [AD-A159806]

p 84 N86-17975 CIRCULATION

Respiratory response and muscle function during isometric handgrip exercise at high altitude

[AD-A162003] p 223 N86-24198 Influence of erythrocythemia on blood volume and thermoregulation during exercise-heat stress [AD-A165014]

p 289 N86-27916 CITIES

Airway infections related to city climate and local immission load p 168 N86-21042 The biological efficiency of dust emmission: Determination based on the withering degree of exposed p 169 N86-21047

**CIVIL AVIATION** 

Airline pilot disability - The continued experience of a major U.S. airline p 8 A86-10251 Airsickness among Indian Airlines passengers

p 12 A86-12435 Professional flightcrew human resource development Developing a Needs Assessment Programme

p 232 A86-29915 Voice analyzer for evaluating pilot's condition

D 64 N86-14886 The history of aeronautical medicine in Venezuela [NASA-TM-77709]

p 176 N86-22094 CLADDING Effect of heat and chemical protective clothing on

cognitive performance [AD-A162001] p 242 N86-24218 CLAYS In the beginning . . . there was clay?

p 297 A86-38624 Origin of life and iron-rich clays p 300 N86-26866 Clay energetics in chemical evolution p 301 N86-26867

# **CLEANERS**

A study to define a set of requirements for cleansing agents for use in the Space Station whole body shower [NASA-CR-171910] p 99 N86-16903

CLIMATE

The lunar nodal tide and the distance to the Moon during the Precambrian era e Precambrian era p 305 N86-26886 Climatic consequences of very high CO2 levels in Earth's arly atmosphere p 308 N86-26904 CLIMBING FLIGHT

Physiological problems of ascent to altitude

p 376 A86-40566

## CLINICAL MEDICINE

Calcified hematoma of the greater omentum in an F-15 fighter pilot Unsteady blood flow in humans under artificial conditions Russian book p 33 A86-15443
Typological analysis of central and peripheral hemodynamics during orthostasis in normal subjects and in patients with arterial hypertonia p 33 A86-15515 Additional pressurisation for treating nonresponding cases of serious air decompression sickness

   Estimating the small airways
                                     resistance from
  measurements of the upstream resistance of several gas
  mixtures
                                    p 162 A86-28448
   Evaluation of the use of hydrogen-oxygen as a breathing
  gas in deep-sea diving
  AD-A1657971
                                     p 380 N86-29499
GAS PRESSURE
    A small oxygen concentrator
  [AD-A163145]
                                     p 273 N86-25993
GAS RECOVERY
   CELSS experiment model and design concept of gas
  recycle system
  [SAE PAPER 851393]
                                     p 141 A86-23570
GAS SPECTROSCOPY
   New physical methods for biological aerosol detection
 [AD-A158218]
                                      p 29 N86-13881
GAS TRANSPORT
   Role of hemoglobin P50 in O2 transport during normoxic
  and hypoxic exercise in the dog
                                       p 1 A86-10103
   Effects of hemodilution on O2 transport in high-altitude
  polycythemia
                                      p 37 A86-16053
   Mechanical resistance of erythrocytes and oxygen mass
  transport in hypoxic states due to different conditions
                                      p 88 A86-21452
   The effect of prolonged physical work at the levels of
  submaximal and extreme intensity upon the mass transfer
  and utilization of oxygen
                                      p 89 A86-22536
   Calculation method for determining energy expenditures
  for operators
                                     p 90 A86-22567
   Resistance, exchange and capacitance functions of
  skeletal muscle vessels in the presence of acute hypoxic
                                      p.81 A86-22593
    Effect of hyperoxic gas mixtures on oxygen mass transfer
  through the hematoparenchymatous barrier
                                    p 103 A86-23492
   Blood transport of oxygen (The role of erythrocytes)
                                     p 208 A86-33073
    A model of inhaled gas and vapor transport in the human
 lung
[AD-A160829]
                                     p 117 N86-18976
   Resistance, exchange, and capacitance functions of
  skeletal muscle vessels in acute hypoxic hypoxia
                                     p 379 N86-28611
GAS TURBINE ENGINES
   User interface description of a gas turbine control
  [ASME PAPER 86-GT-2961
                                     p 433 A86-48309
   Drugs and surfactants used to prevent caisson disease
    Transport of arterial blood gates through human skin
                                      p 91 N86-16887
   CELSS experiment model and design concept of gas except system p 148 N86-19909
  recycle system
   Gas and water recycling system for IOC vivarium
                                     p 150 N86-19920
  experiments
    A preliminary study of flat-panel displays
                                     p 236 N86-24546
   Direct spectrophotometric method of assaying ammonia
  concentration in gas environment of seeding chambers
                                     p 280 N86-27900
GASTROINTESTINAL SYSTEM
    Tachygastria and motion sickness
                                      p 32 A86-14315
    Hypokinezia and space flight reflected on
  stomach
                                     p 200 A86-30442
   Review of duodenal and gastric ulcer
                                     p 117 N86-18977
  [AD-A1609191
    Vection-induced gastric dysrhythmias and motion
  sickness
  [NASA-CR-176620]
                                     p 176 N86-22095
    Acute oral toxicity (LD50) of guanidine hydrochloride in
  rats
 [AD-A165747]
                                     p 376 N86-28608
GENERAL AVIATION AIRCRAFT
   The training and certification of the general aviation
  [SAE PAPER 841468]
                                     p 132 A86-26013
GENETIC CODE
   A multivariate study of the relationship between the
  genetic code and the physical-chemical properties of
                                     p 104 A86-23997
  amino acids
      change in the genetic code in Mycoplasma
  capricolum
                                    p 105 A86-24000
   Rationalization of some
                                  genetic anticodonic
p 189 A86-28723
   Conservation of the secondary structure of protein during
  evolution and the role of the genetic code
                                     p 372 A86-41047
```

GENETIC ENGINEERING SUBJECT INDEX

Intramolecular interactions in aminoacyl nucleotides: Geochemical anomalies, bolide impacts and biological Altitude acclimatization attentuates plasma ammonia Implications regarding the origin of genetic coding and extinctions on the Earth p 308 N86-26903 during submaximal exercise p 302 N86-26873 AD-A168630] protein synthesis GEOGRAPHY p 425 N86-32962 A comparative study of prebiotic and present day The effects of color-coding in geosit displays. 1: Color **GLUTAMATES** p 303 N86-26877 translational models a redundant code Response of rat hindlimb muscles to 12 hours recovery **GENETIC ENGINEERING** from tail-cast suspension [AD-A161107] p 181 N86-22108 p 198 A86-30426 Biotechnology regulation Chemically induced damage to the hippocampal The effects of color-coding in GEOSIT (geographical o.3 N86-10733 [GPO-43-778] situational) displays. 2: Redundant versus non-redundant Somatic cell and molecular genetics approach to DNA [NDRE/PUBL-86/1002] p 255 N86-25112 repair and mutagenesis p 405 N86-30334 Multidisciplinary studies on excitatory amino acids as [AD-A166263] [DE85-0141811 p 4 N86-10737 transmitters in the brain **GEOLOGY** HLA-D: The T cell perspective AD-A1642581 p 256 N86-25115 The fossil record of evolution: Analysis of extinction [AD-A160019] AD-A160019] p 84 N86-17976 Clonal analysis of HLA-DR and -dQ associated GLUTAMINE p 308 N86-26901 Response of rat hindlimb muscles to 12 hours recovery GEOMAGNETISM determinants: Their contribution to dw specificities from tail-cast suspension p 198 A86-30426 The dependence of thromboelastographic indices in AD-A160059] p 84 N86-17977 Sequence polymorphism of HLA-DR beta 1 alleles [AD-A160059] Vaccine Proteins R and D on Salyut-7 healthy subjects on geomagnetic-field conditions p 220 N86-23256 p 90 A86-22545 relating to T cell-recognized determinants GLUTATHIONE p 107 N86-18956 The rhythms of paramagnetic-center concentration in [AD-A160237] Effect of intensive visible light on activity of glutathione mouse liver and a mathematical model of synchronized autooscillations p 247 A86-36497 Production of gene bank from cotton plant chloroplast DNA foi HC/MF p 210 N86-23228 peroxidase in pigmented epithelium of eye p 210 N86-23226 Effect of plasmids on virulence of pseudomonas **GEOMETRIC ACCURACY** Comparative biochemistry and metabolism. Part 2: The metric of visual space p 234 A86-32072 aeruginosa strains in mouse experiments Naphthalene lung toxicity p 210 N86-23237 Virtual space and 2-dimensional effects in perspective [AD-A163144] p 257 N86-25983 Cloning and expression of leptospira pomona hemolysin ene in escherichia coli p 211 N86-23249
Cloning and analysis of genes for anthrax toxin p 441 N86-33005 displays Evolution of thiol protective systems in prokaryotes gene in escherichia coli GEOMETRY p 307 N86-26896 A comparative study of prebiotic and present day GLYCINE components translational models p 303 N86-26877 Radiation chemistry of an aqueous solution of glycine [AD-A161901] p 212 N86-24186 Compounds of interest to chemical evolution studie USSR report: Life sciences. Biomedical and behavioral Carbon exchange between the mantle and the crust and its effect upon the atmosphere: Today compared to p 23 A86-12003 A search for interstellar glycine p 274 A86-33668 [JPRS-UBB-86-009] p 376 N86-28610 p 304 N86-26882 GLYCOGENS Biotechnology: The US Department of Agriculture's Increased gluconeogenesis in rats exposed to hyper-G GEOTROPISM biotechnology research efforts Investigations of the effects of gravity on Paramecium [GAO/RCED-86-39BR] p 376 N86-29494 Determining a carbohydrate profile for Hansenula caudatum structure and behavior GENETICS polymorpha [DFVLR-FB-85-40] p 82 A86-22710 p 56 N86-15863 Biological parameters in Japanese quail genetically Increased gluconeogenesis in rats exposed to hyper-G Influence of gravity on structure and behavior of selected for resistance or sensitivity to an acute hypoxic p 103 A86-23311 stress Paramecium caudatum survival p 2 A86-10256 Possible mechanism for changes in glycogen [ESA-TT-963] An intron in the 23S ribosomal RNA gene of the p 416 N86-32087 metabolism in unloaded soleus muscle GERMINATION archaebacterium Desulfurococcus mobilis p 198 A86-30427 Modification of cytogenetic and physiological effects of p 80 A86-21588 Muscle protein and glycogen responses to recovery from Molecular archaeology of the mitochondrial genome space flight factors by biologically active compounds hypogravity and unloading by tail-cast suspension p 104 A86-23996
Sequence of the 16S rRNA gene from the termoacidonbilio activities [NASA-TM-87987] p 386 N86-28624 p 202 A86-30457 **GERONTOLOGY** Application of photosynthetic N2-fixing cyanobacteria to thermoacidophilic archaebacterium Sulfolobus solfataricus geroprotective activity of 2,6-dimethyl the CELSS program e CELSS program p 151 N86-19929 Collagen, lipid and glycogen content of rat skeletal p 104 A86-23998 3,5-diethoxycarbonyl 1,4-dihydropyridine and its evolutionary implications p 49 A86-16783 Sequence divergence of an archaebacterial gene cloned muscles in recovery period after 15-15- and 30-day p 279 N86-27886 from a mesophilic and a thermophilic methanogen The effect of high energy (HZE) particle radiation (Ar-40) hypokinesia p 104 A86-23999 on aging parameters of mouse hippocampus and retina Somatic cell and molecular genetics approach to DNA p 50 A86-17679 Metabolic distinctions of human red blood during repair and mutagenesis p 60 N86-14850 Structural correlates of aging in Drosophila - Relevance long-term spaceflights [DE85-014181] p 4 N86-10737 to the cell differentiation, rate-of-living and free radical **GLYCOLYSIS** Positive genetic hazard predictions from short-term tests The distinctive features of the energetic metabolism, theories of aging p 415 A86-49999 have proved false for results in mammalian spermatogonia **GLASS** glycolysis, and tissue respiration of the myocardium in rats with all environmental chemicals so far tested having high and low resistance to hypoxia In vitro comparison of zinc phosphate and glass [DE85-013640] p 6 N86-11833 p 80 A86-21455 ionomers ability to inhibit decalcification under and Skeletal muscle lactate release and glycolytic stermediates during hypercapnia p 155 A86-28124 HLA-D: The T cell perspective adjacent to orthodontic bands [AD-A160019] p 84 N86-17976 [AD-A160881] p 127 N86-19889 intermediates during hypercapnia Clonal analysis of HLA-DR and -dQ associated Changes in glycolytic intermediates in rat erythrocytes GLIDING determinants: Their contribution to dw specificities Molecular and biological properties of an during exposure to simulated high altitude [AD-A1600591 p 84 N86-17977 p 156 A86-29097 immunopotentiating complex polysaccharide adjuvant Molecular approaches to selective immunization Models of glycolysis: Glyceraldehyde as a source of produced by a gliding bacterium [AD-A1601411 p 107 N86-18954 AD-A162664] energy and monomers for prebiotic condensation p 160 N86-22086 DNA and protein studies of HLA class 2 molecules: Their GLOBULINS reactions p 302 N86-26876 relationship to T cell recognition Small X-ray diffraction of immunoglobulin-membrane GOGGLES [AD-A160704] p 116 N86-18968 complexes Mild hypoxia and visual performance with night vision Review of duodenal and gastric ulcer [AD-A158252] goggles p 29 N86-13882 p 249 A86-33755 p 117 N86-18977 [AD-A160919] Compendium of protective eyewear Fab-fragment of heterologic immunoglobulin for flu CELSS science needs p 151 N86-19925 p 273 N86-25126 prophylaxis and treatment p 219 N86-23241 [PB86-135779] Annual report and summaries of FY 1985 activities GLOVES Operational experiences with night vision goggles in supported by the Division of Biological Energy Research Enhancement of space suit glove performance helicopter low-level flight at night p 293 N86-26805 [DE85-009132] p 209 N86-23220 [SAE PAPER 851335] p 138 A86-23524 Visual and spectroradiometric performance criteria for USSR report: Life sciences. Biomedical and behavioral Advanced spacesuit glove design Night Vision Goggles (NVG) compatible aircraft interior [AAS 84-175] p 186 A86-28801 p 294 N86-26807 [JPRS-UBB-86-002] p 209 N86-23222 EVA suit glove design p 383 A86-40521 GOLD COATINGS Investigations with methanobacteria and with evolution the genetic code p 306 N86-26890 The WPI space glove design project Abrasion-resistant aluminized-coated aramid fabrics for of the genetic code p 383 A86-40522 manufacture of firefighters' protective clothing Effect of increased body clothing insulation on hand USSR report: Life sciences. Biomedical and behavioral [AD-A157056] p 75 N86-14901 temperature in a cold environment **GRAPH THEORY** [JPRS-UBB-86-008] p 278 N86-27869 p 22 N86-10786 The prediction of biological activity using molecular The effect of cold training and the wearing of gloves A theoretical concept for state changes and shape connectivity indices on manual performance in the cold: A comparison of pure changes in weightlessness p 387 N86-29516 [AD-A166986] p 394 N86-31208 ability and operational tasks **GEOCENTRIC COORDINATES** GRAPHIC ARTS [AD-A163893] p 273 N86-25124 Investigation of factors determining pilot's geocentric A graphic anthropometric aid for seating and workplace GLUCOSE orientation p 72 N86-15868 Increased gluconeogenesis in rats exposed to hyper-G GEOCHEMISTRY [AD-A156988] p 23 N86-10788 ress p 103 A86-23311
Remarkable metabolic availability of oral glucose during Carbon exchange between the mantle and the crust GRATINGS and its effect upon the atmosphere: Today compared to The effects of the contrast, spatial frequency and long-duration exercise in humans p 216 A86-30684 Archean time p 304 N86-26882 Determination of the lumped constant and the kinetic temporal frequency of a surrounding field upon the
