FOREWORD

This report contains a listing of Langley Research Center's scientific and technical research output for calendar year 1982.

The intent of this report is to provide a greater awareness of the broad scope of results and the importance of the research and development work conducted by scientists and engineers at Langley. This current awareness is mandated by the National Aeronautics and Space Act of 1958, which provides for the widest practical dissemination of NASA research.

During the calendar year 1982, Langley's contributions to NASA and non-NASA literature included 130 NASA Formal Reports, 116 Quick-Release Technical Memorandums, 285 Contractor Reports, 188 Journal Articles and Periodical Literature, 590 Technical Talks and Meeting Presentations, 20 Computer Programs, 29 Tech Briefs, and 22 Patents.

Comments or suggestions concerning this publication should be addressed to the Research Information and Applications Division, Mail Stop 180A, NASA Langley Research Center, Hampton, Virginia 23665.

Jess G. Ross
Chief, Research Information
and Applications Division

INTRODUCTION

The NASA Langley Research Center is one of the Nation's leading laboratories for research and development in the sciences of aeronautics and space technology. Langley conducts basic and applied research in fluid and flight mechanics, structures and materials, acoustics and noise reduction, measurement and instrumentation systems, numerical methods and techniques, data systems, electronics, physics, chemistry, and Earth and space sciences.

This publication is a compilation of Langley's scientific and technical research output for 1982 which is processed through the Center's Research Information and Applications Division, an integral part of NASA's Agency-wide Scientific and Technical Information (STI) system. This document is intended as a reference summary for researchers and as a current awareness publication for the scientific, research, and academic community.

The results of Langley's research are disseminated in a variety of NASA and non-NASA scientific and technical media and information systems. Details of the availability of the research references in this document are found in the section, "Availability," on page vii.

The citations are grouped first by Langley Directorates, then by the Langley Office or Division to which the senior author or innovator belongs. Citations are listed alphabetically by author or innovator under the following headings: Formal Reports (Technical Papers, Technical Memorandums, Conference Publications, Reference Publications, and Special Publications), Quick-Release Technical Memorandums, Contractor Reports, Journal Articles and Periodical Literature, Technical Talks and Meeting Presentations, Computer Programs, Tech Briefs, and Patents. There is a separate section listing NASA Contractor Reports funded by the Army Structures Laboratory, USARTE (AVRADCOM). If a citation has more than one author, it is listed only once under the first author's name. The subject category number used to index the citation and the Research Technology Objectives and Plans (RTOP) number are noted below citations when appropriate.

Computer Programs listed are those which were submitted by Langley to COSMIC in 1982. Those programs listed with an M accession number are available from COSMIC.

The NASA Tech Briefs cited have been released in 1982 for publication in "NASA Tech Briefs," a quarterly journal for United States industry and technology transfer agents. Subscriptions to this journal are available through the NASA Technology Utilization Program by writing to the Director, Technology Transfer Division, NASA Scientific and Technical Information, P. O. Box 8757, Baltimore/Washington International Airport, Maryland 21240.

Patents listed, which are owned in whole or in part by Langley Research Center personnel, have been published in issues of "Scientific and Technical Aerospace Reports" (STAR), a NASA announcement journal for report literature. A subscription to STAR is available from the U.S. Government Printing Office (GPO) or to qualified recipients from the NASA Scientific and Technical Information Facility (STIF).

Category 06: Aircraft Instrumentation

312, 313, 331, 359, 820, 843, 844

Category 07: Aircraft Propulsion and Power

902, 1008, 1029, 1030, 1035, 1052, 1265, 1318

Category 08: Aircraft Stability and Control

68, 69, 80, 82, 158, 159, 160, 161, 205, 208, 210, 211, 213, 215, 227, 228, 233, 234, 237, 238, 241, 321, 322, 341, 350, 355, 709, 794, 803, 804, 828, 829, 907, 928, 933, 1231, 1247

Category 09: Research and Support Facilities (Air)

99, 151, 152, 153, 167, 168, 178, 185, 635, 846, 870, 871, 872, 885, 887, 889, 890, 906, 908, 909, 910, 911, 912, 914, 920, 924, 927, 938, 948, 949, 950, 951, 960, 1066, 1077, 1078, 1325, 1356

ASTRONAUTICS

Category 13: Astrodynamics

220, 1230, 1283, 1288, 1311

Category 15: Launch Vehicles and Space Vehicles

7, 8, 43, 49, 50, 51, 53, 54, 55, 57, 229, 230, 260, 261, 290, 797, 798, 1080, 1081, 1228, 1229, 1275, 1284

Category 16: Space Transportation

10, 852, 1314, 1317

Category 17: Spacecraft Communications, Command and Tracking

640

Category 18: Spacecraft Design, Testing and Performance

9, 214, 235, 236, 239, 300, 424, 427, 428, 604, 706, 714, 741, 773, 777, 784, 931, 1079, 1226, 1236, 1239, 1243, 1248, 1250, 1255, 1261, 1277, 1292, 1293, 1301, 1341

Category 19: Spacecraft Instrumentation

154, 247, 258, 274, 284, 1238

Category 20: Spacecraft Propulsion and Power

1127, 1294, 1295

CHEMISTRY AND MATERIALS

Category 23: Chemistry and Materials (General)

177, 371, 1209

Category 24: Composite Materials

59, 64, 65, 66, 67, 72, 87, 115, 117, 133, 134, 180, 181, 187, 188, 372, 373,
