EYDROGEN-BASED BREEGY

17 p0097 A78-18826 Technical and economic aspects of hydrogen storage

Hydrogen transmission - The significance of efficiency --- in comparison with conventional electric power system

in metal hydrides 17 p0099 A78-18842

Technical concepts and economic prospects for thermal hydrogen power plants for peak load generation

17 p0100 A78-18847 Outline for a hydrogen economy in 1985-2000 17 p0100 A78-18848

Profitability of a hydrogen network in a chemical complex

17 D0101 A78-18853 Toxicological aspects of the use of hydrogen in xicological aspects of the duction of the future as main energy source 17 p0101 A78-18855

Safety aspects of a widespread hydrogen energy economy

17 p0101 A78-18857

Entropy production, efficiency, and economics in the thermochemical generation of synthetic fuels. I - The hybrid sulfuric acid process 18 p0174 A78-22867

Where aerospace can serve afresh - Paths tc energy independence

18 p0175 A78-23420

Materials problems in large scale production of hydrogen from water and in hydrogen storage 18 p0183 A78-25056

The hydrogen energy economy: A realistic appraisal of prospects and impacts --- Book

19 p0336 A78-38055. Application of laser fusion to the radiolytic production of hydrogen

19 p0383 A78-42858

HYDROGENATION The manufacture of synthetic natural gas by hydrogenation of fossil fuel residuals

17 p0099 A78-18840 Coal conversion to liquid and gaseous fuels -

Aerospace technology in a new role [AIA PAPER 78-293] 18 p0177 A78-24004 Analysis and scale-up consideration of bituminous

coal liquefaction rate processes 18 p0184 A78-25322 The role of solvent in the solvent refined coal

process 18 p0190 A78-26577

Products from two-step coal liquefaction using three different first-step reactor packings 18 p0190 A78-26578

Effect of coal minerals on reaction "rates during coal liquefaction

18 p0190 A78-26579 Hydrogenation of phenanthrene over a commercial cobalt molybdenum sulfide catalyst under severe reaction conditions --- hydrocarbon fuel from coal liquefaction

18 p0190 178-26580 Catalytic liquefaction of coal

18 p0191 A78-26583 Rinetics of coal hydrodesulfurization in a batch reactor

18 p0191 A78-26584 Kinetics and solubility of hydrogen in coal liguefaction reactions

18 p0191 A78-26585 Short contact time coal liquefaction - Techniques and product distributions

18 p0191 A78-26586 A petrographic classification of solid residues derived from the hydrogenation of bituminous coals

18 p0192 A78-26592 Deactivation of hydrodesulfurization catalysts under coal liquids. I - Loss of hydrogenation

activity due to carbonaceous deposits 18 p0203 A78-27919

Deactivation of hydrodesulfurization catalysts under coal liquids. II - Loss of hydrogenation activity due to adsorption of metallics

18 p0203 A78-27920

HYDROGEBOLYSIS

A-134

Bffects of coal minerals on the hydrogenation, desulfurization, and solvent extraction of coal 18 p0229 A78-31870 Early coal hydrogenation catalysis 19 p0337 A78-38403 New concepts and results concerning the mechanism of carbon monoxide hydrogenation. I - Organic Oxygen compounds produced during medium-pressure Synthesis with iron catalysts. II - Evolution of reaction steps on the basis of detailed product composition and other data 19 p0337 A78-38404 Residence time measurements in a coal hydrogenation process 19 p0337 178-38405 Hydroconversion of a bituminous coal with CO-H2O 19 p0342 A78-39125 Engineering development of a short residence time, coal hydropyrolysis process 19 p0362 A78-40592 Economic evaluation of synthetic natural gas production by short residence time bydropyrolysis of coal 19 p0363 .178-40593 Combined gas chromatographic-mass spectrometric analyses of nitrogen bases in light oil from a coal liguefaction product 19 p0363 A78-40594 Non-catalytic hydrogenation of Australian coals 19 p0363 A78-40596 Water in synthetic fuel production: The technology and alternatives --- Book 19 CO365 A78-41000 Catalytic hydrosolvation process converts coal to low-sulfur liquid fuel 19 p0368 A78-41817 The conversion of model coal liquids compounds to Naphtha species [PB-275891/0] 18 p0272 N78-20291 Research and development of rapid hydrogenation for coal conversion to synthetic motor fuels (riser cracking of coal) [PE-2307-17] 19 D0403 N78-24382 [PE-250/-17] Hydrogasifier development for the Hydrane process [PE-2518-4] Catalytic hydroprocessing of shale oil to produce distilate fuels [CONF-770814-9] 19 p0423 N78-25579 Assessment of technology for the liquefaction of Coal: Summary [PE-1216-2] 19 p0445 N78-26572 In situ conversion of ccal [COO-0066-2] 19 p0448 N78-26610 HYDROGEBOLYSIS Use of solar energy for direct and two-step water decomposition cycles 17 00080 A78-16048 Proceedings of the DOB Chemical Energy Storage and Hydrogen Fnergy Systems Contracts Review [NASA-CE-157164] 19 p0419 B78-255 19 p0419 #78-25532 HYDROGROLOGY Making use of moderate temperature geothermal resources 18 p0232 A78-32117 Hydrogeochemical and stream-sediment survey of the National Resource Evaluation (HUBE) program: Western United States [UCID-16911-77-2] 19 p0434 N78-25722 HYDROLOGY -Pilot demonstration of enhanced oil recovery by micellar rolymer waterflooding, rhuse P [SAW/1395-15] 19 p0455 #78-27498 HYDROLYSIS Upgrading of coal liguids for use as power generation fuels [BPRI-AP-444] 19 p0427 19 p0427 #78-25608 IBN CONPUTERS Sims Prototype System 2 test results: Engineering analysis [NASA-CB-150544] 18 £0263 N78-19604

ICRLAND Thermal surveillance of 'active volcances using the hermal surveillance of active Volcances using the LANDSAT-1 data collection system. Preface and part 1: The Surtsey, Iceland, temperature data relay experiment via LANDSAT-1 --- Lassen volcanic region, California, Surtsey, Iceland and Mt. St. Helens and Mt Baker, Washington [878-10121] 19 00394 N78-23498 Thermal surveillance of active volcances using the LANDSAT-1 data collection system. Part 5: Blectronic thermal, sensur and data collection platform technolog y [B78-10124] ţ, 19 p0394 N78-23500 IGNBOUS BOCKS Research on the physical properties of geothermal reservoir rocks. Summary report on collection of samples of volcanic rocks for petrophysical studies [COO-2908-1] 17 p0141 N78-13584 IGNITION Surface ignition of toal and other fuel particles in radiative and diffusive environment --- in HED combustor 18 p0222 178-30511 1 IGNITION SYSTEMS An approach to decisi on modeling for an ignition test reactor --- The Next Step Tokamak design Engineering features of an upgrafable ignition test reactor 19 p0349 A78-39878 A lower hybrid heating system for an ignition 19 p0354 178-39972 The GPD-3 Stirling engline ground power unit ignition system [GHR-2690-SECT-1.2034] "9 p0438 178-26253 IGUITION TEMPERATURE A shock tube study of the ignition delay of methane at elevated temperatures 13 p0199 178-27831 ILLIBOIS The Illinois program for comprehensive solar energy legislation [PB-275565/0] 18 p0277 N ILLUNINTING 18 p0277 N78-20648 Research design construct ion and evaluation of a low energy utilization school, phase 2 [PB-269407/3] 17 p01 17 p0112 878-10569 IBAGE BESOLUTION Photosensing arrays with improved spatial resolution 18 10204 178-28134 IBAGE TRABSDOCERS Photosensing arrays with improved spatial resolution 18 pt 204 178-28134 INPEDANCE MEASUBERENTS Experimental determination of series resistance of p-n junction diodes and i olar cells 18 p0; 28 A78-31731 INPEBIAL VALLEY (CA) REFIAL VALLEY (CA) Engineering aspects of geothermal development with emphasis on the Imperial Valley of California 18 p027:8 A78-31742 A scenario for geothermal elistric power development in Imperial Valley 18 p0228 178-31743 Planning and design of additional Bast Resa geothermal test facilities, phase 1B. Dynamic oil shale fracture experiments	SIDELOBE BEDUCTION
[PB-269258/0] 17 p0122 B78-11559	Solar power satellite system definition study,
Borehole gravity survey to determine density	Fart 3
variations in the Devonian shale sequence of	[NASA-CR-151673] 18 p0272 N78-20164
Lincoln County [NERC/CR-77/7] 17 p0157 N78-14729	SILANBS Process feasibility study in support of silicon
Interactive data management and analysis system	material task 1 [NASA-CR-157030] 19 p0396 N78-23561
[HLH-2469(OP)] 19 p0401 N78-23988	SILICIDES
Bechanical properties of oil shale of importance to in-situ rubblization	Thin Pt and Pd silicide Schottky barriers for silicon solar cells
[SAND-77-0499C] 19 p0411 N78-24731	18 p0171 A78-22267
Carbonaceous shales of Indiana as sources of energy, petrochemicals, and ceramic materials	Sputtered metal silicide solar selective absorbing surfaces
[TID-28179] 19 p0418 N78-25518	18 p0221 178-30303
Geochemical characterization of Devonian gas shale	SnO2/Si solar cells - Neterostructure of
'[HLH-2467(OP)] 19 p0434 N78-25719	Schottky-barrier or MIS-type device
Physiochemical characterization of Devonian gas	19 p0338 A78-38550
shale [HIM-2466(OP)] 19 p0434 N78-25720	SILICON Silicon for solar photocells
SHEAR FLOW	17 p0003 A78-10551
Simplest physical model of a magnetohydrodynamic generator	Single crystal silicon photocells for terrestrial use - State of the art and perspectives on the
19 p0339 A78-38634	fature
SBBAB STRESS	17 p0003 A78-10553
Investigations of the effects of shear degradation on the rheological behavior of ultra-high molecular weight water scluble polymers as	Pabrication and characterization of solar cells using dendritic silicon thin films grown on alumina ceramic
applied to enhance oil recovery	17 p0013 A78-10916
18 p0237 N78-16171 Two-phase Hartmann flows in the MBD generator	Low cost solar cells based on large area unconventional silicon
configuration [AD-A051450] 19 p0401 x78-23927	17 p0013 A78-10918 Production of solar-grade silicon from purified
SHELTERS Evaluation of computerized energy programs for the	metallurgical silicon
calculation of energy use in new and existing	17 p0013 A78-10925 Dip-coated sheet silicon solar cells
buildings	17 p0014 A78-10926
[PB-272337/7] 18 p0243 N78-16466 SHIPS	The application of color response data of silicon cells for improving photovoltaic efficiency
Forecast markets, economics and shipbuilding	17 p0055 Å78-11341
program for OTEC/industrial plant-ships in	Silicon films, as selective absorbers for solar
tropical oceans Ocean Thermal Energy	energy conversion
Conversion 17 p0056 A78-11349	17 p0070 A78-13905 Solar cells for terrestrial applications
Energy - Implications for transport	17 p0083 A78-16826
18 p0218 A78-29904 Energy and economic impacts of projected freight	Thermomigration of silicon wafers in a solar furnace 17 p0084 A78-16837
transportation improvements	Development of low-cost silicon crystal growth
18 p0257 N78-18537	techniques for terrestrial photovoltaic solar
SHOCK TUBBS A shock tube study of the ignition delay of	energy conversion 18 p0220 A78-30268
methane at elevated temperatures	State of the art homojunction cells
18 F0199 A78-27831	19 p0343 A78-39454
Shock-tube combustion of high density hydrocarbon fuels	High-purity silicon for solar cell applications 19 p0344 A78-39567
18 p0222 A78-30512	High efficiency solar panel (HESP)
SHORT CIRCUITS	[AD-A043382] 17 p0112 878-10572
Variation of short-circuit current spectral response with Cu/2-I/S composition in thin film	A Review of Air Force space photovoltaic development efforts
Cu/2-x/S/CdS photovoltaic cells	17 p0136 N78-13530
17 p0017 A78-10973 Buhancement of MIS solar-cell 'efficiency' by	Impurity concentrations and surface charge densities on the heavily doped face of a silicon
peripheral collection	solar cell
17 F0070 A78-13797	17 p0136 N78-13534
Annealing of Gals solar cells damaged by electron	Investigation of the topographical features of
irradiation 18 p0219 A78-30192	surface carrier concentrations in silicon solar cell material using electrolyte electroreflectance
SHORT HAUL AIBCBAPT	17 p0136 N78-13535
Improved energy efficiency for small CTOL transport aircraft	Advanced bigh efficiency wraparound contact solar cell
18 p0226 A78-31305	[AIRA-PAPER-77-521] 17 p0137 B78-13536
SHORT TAKBOFF AIRCRAFT	Transmutation doping of silicon solar cells
Some aspects of powerplant airframe integration affecting fuel conservation	17 p0137 N78-13539 Nonreflecting vertical junction silicon solar cell
. 18 p0226 A78-31304	optimization
SHEOUDED TURBINES The shrouded aerogenerator wind turbines	[AD-A046150] 17 p0151 H78-14636 Silicon photovoltaic cells in thermophotovoltaic
The shrouded aerogenerator wind turbines 17 p0067 A78-13344	COnversion
The Lebost Wind Turbine - Laboratory tests and	[BPRI-BB-478] 18 p0242 N78-16460
data analysis	Silicon on ceramic process. Silicon sheet growth
19 p0364 A78-40824	development for the large-area silicon sheet task of the low-cost silicon solar array project
The energy problem of the North cower	[NASA-CE-155613] 18 p0248 N78-17464
requirements, resources, and technological	Phase 1 of the automated array assembly task of
evolution	the low cost silicon solar array project
17 p0071 A78-13989	[NASA-CE-155935] 18 p0255 H78-18516

Bot forming of silicon sheet, silicon sheet growth development for the large area silicon sheet task of the low cost silicon sclar array project [MASA-CR-155934] 18 p0255 078-18517 Energy requirement for the production of silicon

SUBJECT INDEX

Silicon solar cells on metallurgical silicon substrates 17 F0013 A78-10915 Fabrication and characterization of solar cells using dendritic silicon thin films grown on. alumina ceramic 17 p0013 A78-10916 Low cost solar cells based on large area unconventional silicon 17 p0013 A78-10918 Efficiency calculations for thin film polycrystalline semiconductor Schettky barrier solar cells 17 p0013 A78-10920 Vacuum deposited polycrystalline silicon solar cells 17 p0013 A78-10921 Silicon solar cells from transition metal doped Czochralski and web crystals 17 p0013 A78-10922 Production of solar-grade silicon from purified metallurgical silicon ÷ . 17 p0013 A78-10925 Dip-coated sheet silicon solar cells 17 p0014 A78-10926 The tubular silicon solar cell - A new concept for photovoltaic power generation 17 p0014 A78-10927 Experiments to evaluate high-temperature rolling as a low-cost process for silicon solar cells 17 p0014 A78-10928 Ribbon-to-ribbon crystal growth --- for solar cell fabrication : 17 p0014 A78-10929 An analysis of factors influencing the efficiency of EFG silicon ribbon solar cells 17 p0014 A78-10930 ATS-6 solar cell flight experiment through 2 years in orbit 17 p0014 178-10932 Qualification of European high efficiency solar cells for future ESA satellites 17 p0014 A78-10936 Comparative testing of high efficiency silicon solar cells 17 p0014 A78-10937 Electron and proton degradation of commercially available solar cell/coverslide components 17 p0015 Å78-10938 Photon degradation cf electron and proton irradiated silicon solar cells 17 p0015 A78-10940 Solar cell processing with spin-on diffusion sources 17 p0015 A78-10943 Bigh performance, inexpensive solar cell process capable of a high degree of automaticn Herits of ion-implantation processes in conjunction with appropriate annealing procedure for fabrication of silicon solar cells 17 p0015 A78-10945 Silicon solar cells by ion implantation and pulsed energy processing 17 F0015 A78-10946 Application of thick-film technology to solar cell fabrication 17 p0015 A78-10947 Integral glass sheet encapsulation for terrestrial panel applications --- solar cell modules Processing ramifications of textured surfaces ---of silicon wafers for solar cells High efficiency sclar cells 17 p0016 A78-10953 Total energy use in the production of silicon solar cells from raw materials to finished product 17 p0016 A78-10959 Fired through printed contacts on antireflection coated silicon terrestrial solar cells 17 p0016 A78-10956 Advanced interconnect for use with ultrasonic seam welding on solar cells 17 p0016 A78-10958 A novel solar cell interconnection design 17 p0017 A78-10959 Concentrator solar arrays for space power 17 p0017 A78-10970

The relationships between preparation parameters, operating characteristics and physical processes in Cu2S-CdS thin film solar cells 17 p0017 178-10971 An automatable integrated thin film solar cell array 17 p0017 A78-10972 Variation of short-circuit current spectral response with Cu/2-I/S composition in thin film Cu/2-I/S/CdS photovoltaic cells 17 p0017 178-10973 Model of the CdS/Cu2S heterojunction 17 F0017 A78-10974 The influence of the horizontal and vertical structure of the p-n junction in Cu2S-CdS solar cells 17 p0018 178-10975 Characteristics of chalcocite /Cu/X/S/ films produced by different methods and some properties of solar cells made from such films 17 p0018 A78-10977 Post-fabrication treatments, surface properties, and front contact of Cu/x/S-CdS solar cells The formation of Cu2S thin films for CdS solar cells by sulfurization of copper with thiourea 17 p0018 A78-10978 CdS sprayed thin films - Electrical and optical properties 17 p0018 178-10981 Studies related to 2n/x/Cd/1-x/S-Cu2S solar cells 17 p0018 A78-10982 Recent results on II-VI heterojunctions for photovoltaic solar energy conversion 17 p0018 A78-10983 Thin film heterojunction and homojunction solar cells utilizing I-III-VI2 ternary compound semiconductors 17 p0018 A78-10984 InP/CdS solar cells 17 p0018 178-10985 CdS - sputtered Cu25 solar cells 17 p0019 178-10986 Indium phosphide films deposited by cylindrical magnetron reactive sputtering 17 p0019 A78-10987 What is simulated AMO - A comparison of CNB and violet cell measurements across USA and Furope 17 p0019 A78-10988 Potential of Gals solar cells for Air Force space power systems 17 p0019 A78-10994 Improved Helios cell output --- solar generator power efficiency 17 p0019 178-10995 Textured surface cell performance characteristics 17 p0019 A78-10996 Black and thin silicon solar cells 17 p0019 A78-10997 The current status of the U.S. photovoltaic conversion program 17 p0020 178-10998 Status of the ERDA photovoltaic material and device studies 17 p0020 A78-10999 Prench activities in the field of photovoltaic power conversion for terrestrial use 17 p0020 A78-11001 Status of the West German terrestrial photovoltaic program 17 p0020 A78-11002 Terrestrial solar cell R & D in the UK 17 p0020 A78-11003 Photovoltaic system in 'Sunshine Project' - E & D underway in Japan 17 p0020 A78-11004 German activities in the field of terrestrial application of solar cell arrays 17 p0020 A78-11005 17 p0020 A78-11005 Bajor terrestrial applications for photovoltaic solar energy conversion in the 1980-2000 period 17 p0020 A78-11006 Wominal cost and performance objectives for photovoltaic panels in nonconcentrating central station applications 17 p0021 A78-11007 Solar photovoltaic conversion electric utility point of view and development role

17 p0021 A78-11008

SOLAB CELLS CONTD

Status of the FRDA photovoltaic systems definition FEOTECT

17 p0021 A78-11009 Computer simulation of photovoltaic systems

Rilitary applications of solar cell power 17 p0022 A78-11018 Silicon solar cell development for concentrated-sunlight, high-temperature

applications 17 p0022 178-11020 The testing of specially designed silicon solar cells under high sunlight illumination

Design criteria for high efficiency silicon solar cells with concentration

A pn junction silicon sensor for high-intensity solar flux mapping

17 p0023 A78-11023 Progress report on a 1-kW terrestrial array of AlGaAs/GaAs concentrator solar cells

17 p0023 A78-11025 Characteristics of high intensity /HI/ edge-illuminated multijunction silicon solar

cells - Experimental results and theory 17 p0023 A78-11026 Recent experimental results on high intensity /BI/ edge-illuminated multijunction silicon solar cells 17 p0023 A78-11027

Figh intensity solar cell

17 p0023 178-11028 A data acquisition system for in situ measurements

of terrestrial photovoltaic array performance 17 p0023 A78-11029 Interface design considerations for terrestrial solar cell modules

17 p0023 A78-11030 Thermophotovoltaic systems for electrical energy conversion

17 p0023 a78-11031 Improved performance of solar cells for high intensity applications

Economic analysis of low ccst silicon sheet produced from Czochralski grown material 17 F0024 A78-11036 Solar cells based on tunnel

metal-insulator-semiconductor structures 17 p0024 A78-11038

HIS solar cell calculations

17 p0024 A78-11039 H-I-S solar cell - Theory and experimental results 17 p0025 A78-11040

A contribution to Schottky barrier schot cell theory 17 p0025 A78-11041

Currous oxide Schottky barrier photovoltaic cells

Corrolling open circuit voltage in silicon Schottky /HIS/ solar cells

17 p0025 A78-11043 Single crystal and polycrystalline Gans solar cells using AMOS technology

17 p0025 A78-11044 Solar cells using Schettky barriers on aporphous silicon

17 p0025 A78-11045 Large open-circuit photovoltages in silicon minority carrier MIS solar cells

17 p0025_A78-11046 Interface study of MIS silicon solar cells

17 p0025 A78-11047 Photocurrent analysis in MIS silicon solar cells

Inversion layer silicon solar cells with HIS contact grids

17 p0026 A78-11049 Diffusion length measurement by a simple photoresponse technique --- for HIS and Schottky barrier solar cells

17 p0026 A78-11050 I/ pu026 178-1 Improvement of efficiency in Si Schottky barrier solar cells

17 p0026 A78-11051

The effects of illumination on the depletion-region recombination currents in schottky-barrier solar cells

17 p0026 A78-11052

Experimental study of the interface properties of HOS tunnel devices 17 p0026 A78-11053 Bigh efficiency and large area /GaAl/As-GaAs solar

cells. 17 p0026 A78-11054

Vapor-phase-epitaxial growth, processing and performance of AlAs-Gals heterojunction solar colle.

17 p0026 A78-11055 Computer analysis of heterojunction and graded

bandgap solar cells 17 p0026 178-11056

Improved Gals solar cells with very thin junctions 17 p0026 A78-11057

The potential for increasing the efficiency of photovoltaic systems by using multiple cell concepts

17 p0026 &78-11058 Tandem photovoltaic solar cells and increased ndem photovoltaic solar cells and solar energy conversion efficiency 17 p0027 A78-11059

The structure and Schottky barrier diode properties of polycrystalline Gals films grown by the close spaced wapour transport technique on Ho substrates

17 p0027 A78-11060 Pabrication of OSOS cells by neutral ion beam sputtering --- Oride Semiconductor On Silicon solar cells

17 p0027 A78-11062

Degradation of SnO2/Si heterojunction solar cells 17 p0027 A78-11063 Design factors for transparent conducting layers

in solar cells H Solar Cells 17 p0027 A78-11064 High efficiency thin window Ga/1-x/Al/x/As/GaAs

solar cells

17 p0027 A78-11065 Inversion layer silicon solar cells with 10-12% Am1 efficiencies

17 p0027 A78-11066 Rheotaxy for large grain thin film solar cell fabrication

17 p0027 A78-11067 LaP3 solar cell

17 p0027 A78-11068

Some problems concerning solar cell arrays in the

design of solar-electrical systems 17 p0030 A78-11086 An analysis of optimum loading conditions for P-W junction solar cells

17 p0030 A78-11092 Low cost, high efficiency solar cells using indium-tin oxide on semiconductor /0505/ solar

cells. Cells 17 p0054 A78-11334 Characteristics of solar cells designed for

concentrator systems 17 p0054 A78-11337

Experimental investigation of a solar cell/inverter system 17 p0054 178-11339

Dye sensitization of Schottky barrier solar cells 17 p0055 178-11340

The application of color response data of silicon cells for improving photovoltaic efficiency 17 p0055 A78-11341 Evaluation of the CdS/CdTe heterojunction solar cell 17 p0062 A78-11815 High-efficiency Gals shallow-homojunction solar

cells

17 p0062 A78-11933 Bnhancement of HIS solar-cell 'efficiency' by peripheral collection

17 p0070 A78-13797 Influence of junction roughness on solar-cell characteristics

17 p0075 A78-14745 A simple measurement of absolute solar-cell efficiency

17 p0079 A78-15850 Semiconductor materials for photovoltaic conversion 17 p0080 A78-16128

The prospects for photovoltaic conversion 17 p0081 A78-16276 Solar cells for terrestrial applications 17 p0083 A78-16826 SOLAR CELLS CONTD

Optimum efficiency of photogalvanic cells for solar energy conversion 17 p0091 A78-17520 An optical scanning technique for evaluating silicon solar cells 17 p0091 A78-17553 A monolithic series-array solar-cell system 17 p0103 A78-19374 Thin Pt and Pd silicide Schottky barriers for silicon solar celle 18 p0171 A78-22267 Photocells with intermediate conversion of radiation and which operate, at an increased concentration /2500-fold/ of sclar radiation 18 p0172 A78-22795 A Fokker-Flanck analysis of photovoltaic systems 18 p0173 A78-22841 Photovoltaic power systems - A tour through the alternatives 18 p0175 178-23563 Procedure for minimizing the cost per watt of photovoltaic systems 18 p0176 A78-23636 Optimization of solar cell contacts by system cost-per-watt minimization 18 p0176 A78-23637 Optimum shape of the bus bar on sclar cells of arbitrary shape 18 p0176 A78-23638 Terrestrial solar cells - Present and future 18 p0177 A78-23952 The efficiency of grating solar cells 18 p0178 A78-24131 Properties of a solar cell array with mirrors and radiators [DGLE PAPEF 77-011] 18 p0179 A78-24405 An optimum thickness indicator for evaporating metals on Schottky barrier solar cells 18 p0182 A78-24967 Air pollution potential of solar technologies --emissions from various fabrication processes [APCA PAPER 77-37,1] 18 p0185 A78-25427 Bstimating the deformation process in the formation of the reflecting surface of solar concentrators 18 p0187 A78-25735 Solar energy - Its nature and possibilities as a source of power for terrestrial use 18 p0188 A78-26144 Response of a solar cell partially illuminated by a nonuniform light source 18 p0192 A78-26614 On the theory of homojunction and hetercjunction solar cells 18 p0192 A78-26616 The operation of the semiconductor-insulator-semiconductor /SIS/ solar cell Theory 18 p0192 A78-26717 Photovoltaic conversion 18 p0201 A78-27862 Application of solar energy in space 18 F0201 A78-27863 Thermophotoelectrochemical cells for solar energy conversion ; 18 p0205 A78-28169 Diffusion lengths in amphoteric GaAs heteroface solar cells 18 p0216 A78-29195 Simplified fabrication of Gals homojunction solar cells with increased conversion efficiencies 18 p0216 178-29199 Solar cells from zone-refined metallurgical silicon 18 p0219 178-30190 Purification and characterization of metallurgical silicon 18 p0219 A78-30191 Annealing of Gaas solar cells damaged by electron irradiation 18 p0219 178-30192 Development cf low-cost silicon crystal growth techniques for terrestrial photovoltaic solar energy conversion 18 p0220 A78-30268 Silicon monoxide antireflection coatings for InP/CdS solar cells 18 p0221 A78-30305

Bigh-efficiency organic solar cells 18 p0223 178-30646

SUBJECT INDEX Observations of anisotropic diffused layer sheet resistance in EFG silicon ribbon solar cells Edge-defined Film-fed Growth 18 p0223 A78-30648 The sun on a semiconductor The sum of a semiconductor 18 p0223 A78-30743 Polycrystalline thin film CdS/CdTe solar cells 18 p0225 A78-31210 Theoretical analysis of a novel BPB gallium arsenide Schottky barrier solar cell 18 p0223 A78-30743 18 p0225 A78-31210 18 p0225 A78-3120 18 p025 A78-3120 18 p0227 A78-31385 Two-dimensional analysis for Cu/x/S-CdS solar cells with nonuniform skin region 18 p0228 A78-31726 Increases in energy conversion efficiency for this-film polycrystalline CdS/Cu2S photovoltaic cells 18 p0228 A78-31730 Experimental determination of series resistance of p-n junction diodes and solar cells 18 p0228 178-31731 Epitaxial silicon solar cells with uniformly doped layer 18 p0228 178-31732 Influence of light reflection on the collection efficiency of a solar cell 18 p0229 178-31767 Semiconductor electrodes. XV Photoelectrochemical cells with mixed polycrystalline n-type CdS-CdSe electrodes 18 p0233 A78-32233 On the fill factor of solar cells --- volt-ampere characteristics 19 p0292 178-32691 Junction potentials of strongly illuminated n/+/-p-p/+/ solar cells 19 p0292 178-32693 An integral equation method to calculate the transient behaviour of a photovoltaic solar cell 19 F0292 A78-32695 The influence of interface states and energy barriers on the efficiency of heterojunction solar cells 19 p0309 A78-34008 Cu/x/S/CdS thin-film solar cells using chemically sprayed CdS films 19 p0309 178-34009 Photovoltaic conversion of solar energy for terrestrial use - The present situation and the . developmental trends 19 p0309 178-34021 The influence of tunneling effects on the efficiency of heterojunction solar cells 19 p0309 178-34048 High conductivity 2nSe films --- for solar cells 19 p0310, A78-34256 CuInS2 liquid junction solar cells 19 p0310 A78-34274 New TiOx-HIS and SiO2-HIS silicon solar cells 19, p0313 A78-34847 A computer analysis of Ga/1-x/Al/x/As-Gals solar cells with sultilayered window structure 19 p0313 178-34850 Sunstations --- calibrated silicon solar cell for insolation measurement insolation measurement 19 p0314 178-34933 Blectrical and photovoltaic characteristics of indium-tin oride/silicon heterojunctions 19 p0315 A78-35282 Influence of an insulating layer on the efficiency of a semiconductor-insulator-semiconductor /SIS/ heterojunction solar cell Baximisation of operating efficiency of solar cells 19 p0316 A78-35287 Baximisation of operating efficiency of solar cells 19 p0322 A78-35782 Thickness dependence of structural and electrical properties of CdS films for solar cells 178-3625 19 p0325 178-36035 Structure and morphology of chemical-sprayed CdS filss 19 p0325 178-36036 Photovoltaic electricity - On the way. I - An optimistic view. II - Solar cell arrays too expensive . . . but interesting 19 p0327 178-36444 Photo-galvano-voltaic cell - A new approach to the use of solar energy 19 p0333 A78-37174

materials field. Volume 1: Principal findings	17 p0082 A78-16635
energy technology requirements and impact	Solar energy for village development
[PB-278639/0] 19 p0453 N78-27009	18 p0176 A78-23564
An agenda for technology assessment in the	MBD electric power generation using fossil fuels
materials field. Volume 2: Appendices	18 p0179 A78-24329
energy technology requirements and impact	Application of solar energy in space
[PB-278640/8] 19 £0453 N78-27010	18 p0201 A78-27863
' Overview of NASA CTOL program	Technological innovation and social exploration in
19 p0453 N78-27047	economic growth and energy development
Ceramic technology readiness program	18 p0204 A78-27935
[FE-2664-3] 19 p0454 N78-27279	Application of solar energy bioconversion in
Advancing coal mining technology research,	developing countries
development, and demonstration in fiscal year 1977	18 p0208 A78-28367
[PB+278001/3] 19 p0456 N78-27511	Criteria for the manufacture and operation of wind
High-power, ultralow-mass solar arrays: FY-77	power installations with power up to 10 kW
solar arrays technology readiness assessment	18 p0212 A78-28573
report, volume 1	Legal problems of solar energy utilization
[NASA-CB-157264] 19 p0457 N78-27530	18 p0214 A78-28595
High-power, ultralow-mass solar arrays: FY-77	Advancing technologies Book
solar arrays technology readiness assessment	. 18 p0225 A78-31151
report, volume 2	Preliminary assessment of nontechnical issues
[NASA-CR-157265] 19 p0457 N78-27531	related to industrial application of
State-of-the-art lead-acid vehicle	solar-thermal-energy systems
[ANL-K-77-3639-1] 19 p0459 N78-27547	18 p0232 A78-32112
Models and methodologies for assessing the impact	Advanced lightweight solar array technology
of energy development	for communication satellites
[BRDA-77-91] 19 p0463 N78-27587	[AIAA 78-533] 19 p0294 A78-32883
Impact of selected energy conservation	Aerospace technology can be applied to exploration
technologies on baseline demands	'back on earth' offshore petroleum resources
[BNL-50745] 19 p0463 N78-27591	19 p0297 A78-33123
TECHNOLOGY TEANSFER	Making aerospace technology work for the
What does it concern technological information	automotive industry - Introduction
dissemination and social response	19 p0306 A78-33359
18 p0218 A78-29873	Emerging heat pipe applications
Information and data flows in societal problem	[AIAA 78-390] 19 p0317 A78-35585
areas: Focus-energy	Heat pipes in space and on earth
[PB-269497/4] 17 p0118 N78-10965	[AIAA 78-439] 19 p0318 A78-35619
Buropean developments in the Na/S high temperature	Solar thermal heating systems: Technical aspects
battery for automobile propulsion and energy	and economic limits /2nd revised edition/
storage	German book
[AD-A042541] 17 p0120 N78-11501	19 p0328 A78-36650
An overview of aerospace gas turbine technology of	Solar energy prospects in Saudi Arabia
relevance to the develorment of the automotive gas turbine engine	19 p0345 A78-39671
[NASA-TH-73849] 17 p0129 N78-13062	New designs and applications of medium sized wind systems
Intertechnology Corporation report of solar energy	
	19 p0361 A78-40369 A survey of applications of fusion power
systems installation costs for selected	A survey of applications of fusion power
systems installation costs for selected commercial buildings	A survey of applications of fusion power technology for the chemical and material
systems installation costs for selected commercial buildings [COO-2688-76-13] 17 p0143 N78-13606	A survey of applications of fusion power technology for the chemical and material processing industries
systems installation costs for selected commercial buildings [COO-2688-76-13] 17 p0143 N78-13606 Industrial applications of solar energy	A survey of applications of fusion power technology for the chemical and material processing industries 19 p0368 &78-41812
systems installation costs for selected commercial buildings [COO-2688-76-13] 17 p0143 N78-13606 Industrial applications of solar energy [SAN/1132-1] 18 p0242 N78-16457	A survey of applications of fusion power technology for the chemical and material processing industries 19 p0368 &78-41812 High-power lasers industrial applications
systems installation costs for selected commercial buildings [COO-2688-76-13] 17 p0143 W78-13606 Industrial applications of solar energy [SAN/1132-1] 18 p0242 W78-16457 The diffusion of the use of new energy technology	A survey of applications of fusion power technology for the chemical and material processing industries 19 p0368 &78-41812 High-power lasers industrial applications 19 p0382 &78-42446
systems installation costs for selected commercial buildings [COO-2688-76-13] 17 p0103 N78-13606 Industrial applications of solar energy [SAN/132-1] 18 p0242 N78-16457 The diffusion of the use of new energy technology as a context for an overview of solar energy	A survey of applications of fusion power technology for the chemical and material processing industries High-power lasers industrial applications 19 p0382 A78-42446 Photovoltaic highway applications: Assessment of

ENERGY/A Continuing Bibliography (Issue 19)

Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The issue, page and accession numbers are located beneath and to the right of the title, e.g., 17 p0138 N78-13552. Under any one author's name the accession numbers are arranged in sequence with the *IAA* accession numbers appearing first.

CORPORATE SOURCE INDEX

ENERGY / A Continuing Bibliography (Issue 19)

Typical Corporate Source Index Listing

The title of the document is used to provide a brief description of the subject matter. The issue, page number and NASA or AIAA accession number are included in each entry to assist the user in locating the abstract in the abstract section of an individual supplement of Energy. If applicable, a report number is also included as an aid in identifying the document.

- ACADEMY OF SCIENCES (USSE), HOSCOW. A Tokamak reactor and an MHD energy conversion system (the TVE-2500 project)
- 18 p0278 N78-20942 ACTON CORP., CLEVELAND, ORIO. Acton mass flow system applied to PFBC feed
- 17 p0133 N78-13267 ACUREN CORP., MOUNTAIN VIRW, CALIF. Application of solar energy to the supply of industrial process hot water: Preliminary design and performance report. ENERGY / A Continuing Bibliography (Issue 19)

Listings in this index are arranged alphanumerically by contract number. Under each contract number, the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order with the IAA accession, numbers appearing first. The accession number denotes the number by which the citation is identified in either the IAA or STAR section. Preceding the accession number are the issue and page number in the particular supplement in which the citation may be found.

REPORT/ACCESSION INDEX

ENERGY / A Continuing Bibliography (Issue 19)

Typical Report/Accession Number Index Listing

Listings in this index are arranged alphanumerically by report number. The issue and page number indicate the actual Supplement and page where the citation may be located. The accession number denotes the number by which the citation is identified. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche. A plus sign (+) indicates a document that cannot be microfiched but for which one-to-one facsimile is available.

PUBLIC COLLECTIONS OF NASA DOCUMENTS

DOMESTIC

NASA distributes its technical documents and bibliographic tools to eleven special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

CALIFORNIA

University of California, Berkeley COLORADO University of Colorado, Boulder

DISTRICT OF COLUMBIA Library of Congress

GEORGIA Georgia Institute of Technology, Atlanta ILLINOIS

The John Crerar Library, Chicago

MASSACHUSETTS

Massachusetts Institute of Technology, Cambridge MISSOURI Linda Hall Library, Kansas City-NEW YORK Columbia University, New York OKLAHOMA University of Oklahoma, Bizzell Library PENNSYLVANIA Carnegie Library of Pittsburgh WASHINGTON University of Washington, Seattle

NASA publications (those indicated by an "*" following the accession number) are also received by the following public and free libraries:

CALIFORNIA

Los Angeles Public Library San Diego Public Library COLORADO **Denver Public Library** CONNECTICUT Hartford Public Library MARYLAND Enoch Pratt Free Library, Baltimore MASSACHUSETTS **Boston Public Library** MICHIGAN **Detroit Public Library** MINNESOTA

Minneapolis Public Library MISSOURI Kansas City Public Library

NEW JERSEY

St. Louis Public Library

Trenton Public Library

NEW YORK

Brooklyn Public Library Buffalo and Erie County Public Library **Rochester Public Library** New York Public Library OHIO

Akron Public Library **Cincinnati Public Library Cleveland Public Library** Dayton Public Library **Toledo Public Library**

TENNESSEE Memphis Public Library

TEXAS

Dallas Public Library Fort Worth Public Library WASHINGTON Seattle Public Library WISCONSIN

Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 750 Third Avenue, New York, New York 10017.

EUROPEAN

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. By virtue of arrangements other than with NASA, the British Library Lending Division also has available many of the non-NASA publications cited in STAR. European requesters may purchase facsimile copy of microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "#" and "*", from: ESA -Space Documentation Service, European Space Agency, 8-10 rue Mario-Nikis, 75738 Paris CEDEX 15, France.
