Study of Recreational Land and Open Space
Using SKYLAB Imagery
Monthly Progress Report, October 1973

Analysis of SL-2 photography was reported in the September Progress Report. High altitude aerial photography of Oakland County and other areas in Southeast Michigan was acquired on 11 August 1973 by the NASA/ARC Earth Resources Aircraft Project in support of this EREP project. This photographic coverage has been received by the Principal Investigator. The photography is of excellent quality and will be used in conjunction with the further analysis of EREP data. Project activity is now at a low level until SL-3 photography and scanner imagery acquired on 5 August 1973 are received.
