were interchangeable. We were both single and willing to trade house for the year, and we both agreed to pay our own transportation costs.

Whether personnel operations in other federal agencies would allow for any similar kind of exchange, I would hesitate to predict, since to my knowledge, no formal mechanism for doing so actually exists in the federal service. In our case, the benefits of a job trade had to be justified informally at the supervisory level rather than in written documentation, and this supervisory committee in turn became the prime mover in forcing action on our proposal.

As for measuring the success of our exchange, I think we both emerged refreshed by the change

of pace and ready to tackle our old jobs with renewed enthusiasm. In an era of limited job mobility for federal librarians, this was a good way to get some much needed variety to break the monotony of our everyday routines without sacrificing our jobs entirely, something neither of us was willing to do.
