| **Digital Skills Audit** | The ‘DigiKnow Skills Audit’ comprises six short quizzes with five questions each. Students complete the quizzes to reveal a personalized profile spanning six different genres: Digital Guru, Media Mogul, Career Builder, Information Junkie, Digital Dodger, and Online Networker. The feedback given provides suggestions on how to build on existing practices and skills, and if delivered as part of face-to-face session can form the basis for a discussion with students about the digital technologies.  

This ‘mini’ course is accessible from the ‘My home’ page in Moodle and can either be completed by students in their own time or it can form part of a face-to-face session.  

For more information, please contact Learning Technology Support ([lts@glos.ac.uk](mailto:lts@glos.ac.uk)). |
| DigiKnow: Using Prezi | The ‘DigiKnow: Using Prezi’ course provides a brief introduction to this ‘cloud-based’ presentation software and storytelling program. As part of the course students create a Prezi account, watch a short video tutorial on how Prezi works, and create their own Prezi which they are then invited to share in the ‘Prezi Forum’ on the Moodle course.

This ‘mini’ course is accessible from the ‘My home’ page in Moodle and can either be completed by students in their own time or it can form part of a face-to-face session.

| --- | --- |

| DigiKnow: Using Windows Movie Maker | The ‘DigiKnow: Using Windows Movie Maker’ course provides a brief introduction to this freeware video editing software created by Microsoft. As part of the course students watch a short video tutorial and are then set the task of creating their own WMM video. They can either use their own videos and/or images, or they can choose to use the practice resources provided. In addition to WMM information the ‘mini’ course also provides a number of additional guides and resources, including a basic introduction to Creative Commons and Flickr.

This ‘mini’ course is accessible from the ‘My home’ page in Moodle and can either be completed by students in their own time or it can form part of a face-to-face session.

For more information, please contact Learning Technology Support (lts@glos.ac.uk). |
| **DigiKnow: Using Google Sites** | The ‘DigiKnow: Using Google Sites’ course provides a brief introduction to one of the many free webpage creation tools available on the internet. As part of the course students watch a short introduction video about Google Sites, create a Google account, and create their own Google Sites website. In addition, the ‘mini’ course provides a brief introduction on how to use Creative Commons and Flickr to search for images online, and how to reference their sources.

This ‘mini’ course is accessible from the ‘My home’ page in Moodle and can either be completed by students in their own time or it can form part of a face-to-face session.

For more information, please contact Learning Technology Support (lts@glos.ac.uk). |
| **DigiKnow: Digital Tattoo** | The ‘DigiKnow: Your Digital Tattoo’ course aims to increase students’ awareness of their ‘digital tattoo’, or ‘digital footprint’ (i.e. the data left behind when they use digital services online). The course reveals how some employers use social media profiles as part of their vetting process when employing new members of staff. It also presents the benefits and risks involved in making personal information public online, and finally the course shows students how to track the data that is available about them online.

This ‘mini’ course is accessible from the ‘My home’ page in Moodle and can either be completed by students in their own time or it can form part of a face-to-face session.
