

# American Mineralogist

Vol. 95, No. 11–12

An International Journal of Earth and Planetary Materials

November–December 2010

## ARTICLES

- 1601 Characterization of cation environments in polycrystalline forsterite by  $^{25}\text{Mg}$  MAS, MQMAS, and QCPMG NMR**  
Michael C. Davis, William J. Brouwer, Andrew S. Lipton, Zhehong Gan, and Karl T. Mueller
- 1608 Structure of nanocrystalline phyllo-manganates produced by freshwater fungi**  
Sylvain Grangeon, Bruno Lanson, Naoyuki Miyata, Yukinori Tani, and Alain Manceau
- 1617 First-principles study on variation of lattice parameters of mullite  $\text{Al}_{1-2x}\text{Si}_{2-2x}\text{O}_{10-x}$  ( $x = 0.125, 0.250, 0.375$ )**  
Chuin-Shan Chen, Chia-Ching Chou, Shu-Wei Chang, Reinhard X. Fischer, and Hartmut Schneider
- 1624 Geochemistry in the lung: Reaction-path modeling and experimental examination of rock-forming minerals under physiologic conditions**  
Anne E. Taunton, Mickey E. Gunter, Gregory K. Druschel, and Scott A. Wood
- 1636 Natrolite may not be a “soda-stone” anymore: Structural study of fully K-, Rb-, and Cs-exchanged natrolite**  
Yongjae Lee, Yongmoon Lee, and Donghoon Seoung
- 1642 Metal retention, mineralogy, and design considerations of a mature permeable reactive barrier (PRB) for acidic mine water drainage in Northumberland, U.K.**  
Manuel A. Caraballo, Esther Santofimia, and Adam P. Jarvis
- 1650 A relationship between  $d_{104}$  value and composition in the calcite-disordered dolomite solid-solution series**  
Fangfu Zhang, Huifang Xu, Hiromi Konishi, and Eric E. Roden
- 1657 XRD, micro-XANES, EMPA, and SIMS investigation on phlogopite single crystals from Mt. Vulture (Italy)**  
F. Scordari, M.D. Dyar, E. Schingaro, M. Lacalamera, and L. Ottolini
- 1671 Volume behavior of the 10 Å phase at high pressures and temperatures, with implications for  $\text{H}_2\text{O}$  content**  
Alison R. Pawley, Mark D. Welch, Alistair R. Lennie, and Raymond L. Jones
- 1679 Interfacial tension between immiscible liquids in the system  $\text{K}_2\text{O}-\text{FeO}-\text{Fe}_2\text{O}_3-\text{Al}_2\text{O}_3-\text{SiO}_2$  and implications for the kinetics of silicate melt unmixing**  
Ilya V. Veksler, Johannes Kähn, Gerhard Franz, and Donald B. Dingwell
- 1686  $\text{H}_2\text{O}$  and the dehydroxylation of phyllosilicates: An infrared spectroscopic study**  
Ming Zhang, Simon A.T. Redfern, Ekhard K.H. Salje, Michael A. Carpenter, and Ling Wang
- 1694 Effects of intermediate range structure on the  $^{29}\text{Si}$  NMR chemical shifts of framework silicates: Results for analcime**  
Yeongkyoo Kim, Sung Keun Lee, and R. James Kirkpatrick
- 1701 High-temperature Mössbauer spectroscopy: A probe for the relaxation time of Fe species in silicate melts and glasses**  
Coralie Weigel, Catherine McCammon, and Hans Keppeler

- 1708 The thermal equation of state of FeTiO<sub>3</sub> ilmenite based on in situ X-ray diffraction at high pressures and temperatures**  
E.J. Tronche, M. van Kan Parker, J. de Vries, Y. Wang, T. Sanehira, J. Li, B. Chen, L. Gao, S. Klemme, C.A. McCammon, and W. van Westrenen
- 1717 OH species, U ions, and CO/CO<sub>2</sub> in thermally annealed metamict zircon (ZrSiO<sub>4</sub>)**  
Ming Zhang, Ekhard K.H. Salje, and Rodney C. Ewing
- 1725 Crystallographic and chemical constraints on the nature of the proustite–pyrrargyrite solid-solution series**  
Luca Bindi, Giovanni Pratesi, and Paul G. Spry
- 1730 Accurate  $\mu$ Raman characterization of reaction products at the surface of (bio)oxidized pyrite**  
Céline Pisapia, Bernard Humbert, Marc Chaussidon, Frédéric Demoisson, and Christian Mustin
- 1741 Determination of manganese valence states in (Mn<sup>3+</sup>, Mn<sup>4+</sup>) minerals by electron energy-loss spectroscopy**  
Shouliang Zhang, Kenneth J.T. Livi, Anne-Claire Gaillet, Alan T. Stone, and David R. Veblen
- 1747 AFM study of the epitaxial growth of brushite (CaHPO<sub>4</sub>·2H<sub>2</sub>O) on gypsum cleavage surfaces**  
André Jorge Pinto, Encarnación Ruiz-Agudo, Christine V. Putnis, Andrew Putnis, Amalia Jiménez, and Manuel Prieto
- 1758 Compressibility of protoamphibole: A high-pressure single-crystal diffraction study of protomangano-ferro-anthophyllite**  
P.F. Zanazzi, F. Nestola, and D. Pasqual
- 1765 Crystal structure of hydrous wadsleyite with 2.8% H<sub>2</sub>O and compressibility to 60 GPa**  
Yu Ye, Joseph R. Smyth, Anwar Hushur, Murli H. Manghnani, Dayana Lonappan, Przemyslaw Dera, and Daniel J. Frost
- 1773 Dehydration and rehydration processes in gmelinite: An in situ X-ray single-crystal study**  
Alberto Alberti, Ilaria Parodi, Giuseppe Cruciani, Maria Chiara Dalconi, and Annalisa Martucci
- 1783 Characteristics of emission centers in alkali feldspar: A new approach by using cathodoluminescence spectral deconvolution**  
Masahiro Kayama, Satoshi Nakano, and Hirotsugu Nishido
- 1796 Mechanism of metamorphic zircon growth in a granulite-facies quartzite, Adirondack Highlands, Grenville Province, New York**  
William H. Peck, M.E. Bickford, James M. McLelland, Ashley N. Nagle, and Gretchen J. Swarr
- 1807 Speciation and mixing behavior of silica-saturated aqueous fluid at high temperature and pressure**  
Bjorn O. Mysen
- 1817 A critical comment on Thy et al. (2009b): Liquidus temperatures of the Skaergaard magma**  
S.A. Morse
- 1828 SUBMISSION INFORMATION**
