

American Mineralogist

Vol. 94, No. 11–12

An International Journal of Earth and Planetary Materials

November–December 2009

LETTERS

1727 Crystal structure of argentopyrite, AgFe_2S_3 , and its relationship with cubanite
Hexiong Yang, William W. Pinch, and Robert T. Downs

1731 Magnetite-free, yellow lizardite serpentinization of olivine websterite, Canyon Mountain complex, N.E. Oregon
Bernard W. Evans, Scott M. Kuehner, and Anastasia Chopelas

1735 The influence of atomic size and charge of dissolved species on the diffusivity and viscosity of silicate melts
Liqun Zhang, James A. Van Orman, and Daniel J. Lacks

1739 Si–Al distribution in high-pressure $\text{CaAl}_2\text{Si}_2\text{O}_8$ phase: A ^{29}Si and ^{27}Al NMR study
Xianyu Xue, Shuangmeng Zhai, and Masami Kanzaki

REVIEW PAPER

1505 Microbe-clay mineral interactions
Hailiang Dong, Deb P. Jaisi, Jinwook Kim, and Gengxin Zhang

ARTICLES

1520 Chemical substitutions, paragenetic relations, and physical conditions of formation of högbomite in the Sittampundi layered anorthosite complex, South India
Pulak Sengupta, Uttam K. Bhui, Ingo Braun, Upama Dutta, and D. Mukhopadhyay

1535 Migueleroite, the Mn analogue of sainfeldite, and redefinition of villyaellenite as an ordered intermediate in the sainfeldite–migueleroite series
Anthony R. Kampf

1541 Mechanism and kinetics of a mineral transformation under hydrothermal conditions: Calaverite to metallic gold
Jing Zhao, Joël Brugger, Pascal V. Grundler, Fang Xia, Guorong Chen, and Allan Pring

1556 A statistical reassessment of the evidence for the racemic distribution of quartz enantiomorphs
María Támara and Martin R. Preston

1560 On the crystal structure and crystal chemistry of pollucite, $(\text{Cs}, \text{Na})_{16}\text{Al}_{16}\text{Si}_{32}\text{O}_{96}\cdot n\text{H}_2\text{O}$: A natural microporous material of interest in nuclear technology
G. Diego Gatta, R. Rinaldi, G.J. McIntyre, G. Nénert, F. Bellatreccia, A. Guastoni, and G. Della Ventura

1569 The effect of fluid inclusion size on determination of homogenization temperature and density of liquid-rich aqueous inclusions
Andrés Fall, J. Donald Rimstidt, and Robert J. Bodnar

1580 Effect of SiO_2 , total FeO, $\text{Fe}^{3+}/\text{Fe}^{2+}$, and alkali elements in basaltic glasses on mid-infrared spectra
Céleste D.M. Dufresne, Penelope L. King, M. Darby Dyar, and Kim N. Dalby

1591 Influence of cation size on the low-temperature heat capacity of alkaline earth metasilicate glasses
Pascal Richet, Atsusi Nidaira, Daniel R. Neuville, and Tooru Aitake

1596 The high-pressure–high-temperature behavior of bassanite
Paola Comodi, Sabrina Nazzareni, Leonid Dubrovinsky, and Marco Merlini

1603 Geochemistry of reversible hydratable tephra from the Trans Mexican Volcanic Belt
Liberto De Pablo, Mercedes Doval, and Angel La Iglesia

N-D

American Mineralogist

Vol.
94Pages
1505–
1744

- 1616 Physical contradictions and remedies using simple polythermal equations of state**
George Helffrich and J.A.D. Connolly
- 1620 Thermodynamic and crystallographic properties of kornelite $[\text{Fe}_2(\text{SO}_4)_3 \cdot 7.75\text{H}_2\text{O}]$ and paracoquimbite $[\text{Fe}_2(\text{SO}_4)_3 \cdot 9\text{H}_2\text{O}]$**
Sonia Ackermann, Biljana Lazic, Thomas Armbruster, Stephen Doyle, Klaus-Dieter Grevel, and Juraj Majzlan
- 1629 Humidity-induced phase transitions of ferric sulfate minerals studied by in situ and ex situ X-ray diffraction**
Wenqian Xu, Nicholas J. Tosca, Scott M. McLennan, and John B. Parise
- 1638 In situ Raman spectroscopy of MgSiO_3 enstatite up to 1550 K**
Rachel Zucker and Sang-Heon Shim
- 1647 Optical spectroscopic study of tetrahedrally coordinated Co^{2+} in natural spinel and staurolite at different temperatures and pressures**
Michail N. Taran, Monika Koch-Müller, and Anne Feenstra
- 1653 New insights into smectite illitization: A zoned K-bentonite revisited**
Douglas K. McCarty, Boris A. Sakharov, and Victor A. Drits
- 1672 The hydrothermal conversion of kaolinite to kalsilite: Influence of time, temperature, and pH**
Ana Isabel Becerro, Alberto Escudero, and Marco Mantovani
- 1679 Sideronatrite, $\text{Na}_2\text{Fe}(\text{SO}_4)_2(\text{OH}) \cdot 3\text{H}_2\text{O}$: Crystal structure of the orthorhombic polytype and OD character analysis**
Fernando Scordari and Gennaro Ventruti
- 1687 Anharmonic OH vibrations in brucite: Small pressure-induced redshift in the range 0–22 GPa**
Pavlin D. Mitev, Grzegorz Gajewski, and Kersti Hermansson
- 1698 Structural properties of biologically controlled hydrozincite: An HRTEM and NMR spectroscopic study**
Giovanni De Giudici, Francesca Podda, Roberta Sanna, Elodia Musu, Riccardo Tombolini, Carla Cannas, Anna Musinu, and Mariano Casu
- 1707 Mechanism of wollastonite carbonation deduced from micro- to nanometer length scale observations**
Damien Daval, Isabelle Martinez, Jean-Michel Guigner, Roland Hellmann, Jérôme Corvisier, Nathaniel Findling, Christian Dominici, Bruno Goffé, and François Guyot
- 1743 BOOK REVIEW**
