MBRS RISE PROGRAM

**Minimum Requirements: 2.7 GPA & US Citizen/Legal Permanent Resident
Chemistry or Biology major**

Creating Leaders of Tomorrow

Interest Meeting

Tuesday, March 13, 2012 at 11:00AM

Carver Hall Conference Room

The goal of the MBRS RISE Program is to increase the number of students from underrepresented groups in biomedical research who enter into and successfully complete the Ph.D. degree programs in these fields. Specifically, it is expected that the undergraduates participating in the Program will, upon graduation, directly enter into a Ph.D. program, and that the Ph.D. students participating in the RISE program will complete their terminal degrees in biomedical research fields.
