

## Online Resource 2

*Interaction of DISC1 with the PTB domain of Tensin2*

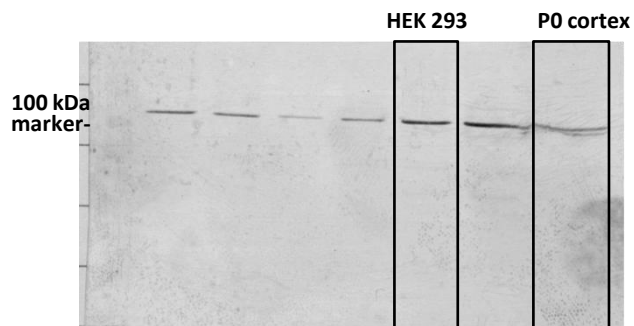

*Cellular and Molecular Life Sciences*

*Salman Goudarzi, Luke J.M. Smith, Steffen Schütz, Sassan Hafizi*

*University of Portsmouth; e-mail: [sassan.hafizi@port.ac.uk](mailto:sassan.hafizi@port.ac.uk)*

Original uncropped images of two western blots represented in **Fig. 1b**, showing DISC1 detection as a single 105-kDa band using both commercial goat (Gt) polyclonal and in-house rabbit (Rb) polyclonal anti-DISC1 antibodies. The lanes outlined in squares are those lanes from which the bands are taken for representation in **Fig. 1b**.

### Gt $\alpha$ -DISC1 blot

### Rb $\alpha$ -DISC1 blot
