Titre	Unsymmetrical Triphenylamine-Oligothiophene Hybrid Conjugated Systems as Donor Materials for High-Voltage Solution-Processed Organic Solar Cells
Type de publication	Article de revue
Auteur	Ripaud, Emilie [1], Rousseau, Theodulf [2], Leriche, Philippe [3], Roncali, Jean [4]
Editeur	Wiley
Type	Article scientifique dans une revue à comité de lecture
Année	2011
Langue	Anglais
Date	07/2011
Numéro	4
Pagination	540-545
Volume	1
Titre de la revue	Advanced Energy Materials
ISSN	1614-6832
Résumé en anglais	The synthesis of unsymmetrical triphenylamine-oligothiophene hybrid conjugated systems bearing dicyanovinyl electron acceptor end-groups is presented. When used as molecular donor materials in solution-processed bulk heterojunction solar cells, these compounds lead to efficient devices with very high open-circuit voltages.
